Franks honored as 1982 Sailor of Year

Operations Specialist First Class Randy W. Franks, 29, head of the General Services Branch in Operating Management Service, is Naval Regional Medical Center Oakland's 1982 Sailor of the Year.

In a Jan. 13 Clinical Assembly ceremony in his honor, Petty Officer Franks told his many friends and coworkers present:

"I would like to thank all of you for being here and sharing this occasion with me. Being selected as Sailor of the Year is not a result of individual effort only. During the past year I have received guidance and direction from many people here at NRMC Oakland. It would take me quite awhile to name all of them, but even without mentioning names, I am sure they know who they are.

"This is my first experience working with a medical facility, and I've learned quite a bit about an aspect of the Navy I was previously unaware of. I would like to believe that I now have a more complete understanding of the Navy—medical, as well as operational.

"For you sailors here today, I'd just like to tell you to keep doing your job to the best of your ability, and there is really no reason that you can't be standing up here next year."

A selection board under the chairmanship of LCDR P. B. Hoggatt and comprised of HMCM C. R. Dackerman, HMCS J. Price, HMCS N. Jenkins, QMCS (SS) H. Dandridge, HMCS D. Jackson, MAC E. P. Sharp and HMC K. Thornton reviewed the achievements of all the medical center's Sailors of the Month over the past fiscal year before judging Franks, who was the June 1981 top sailor, as the best. He will also become his command's nominee for the Navywide Shore Sailor of the Year.

During last week's ceremonies Rear Admiral Walter M. Lonergan, NRMC Oakland's commanding officer, congratulated Franks and called him "the king of kings."

Following an introduction of the center's Sailors of the Month by the Command Master Chief, Mrs. Lesley Kopp, representing the NRMC Officers' Auxiliary, presented the honoree with a \$50 check, and Mr. Bud Howe, in behalf of Concord's Branch 121, Fleet Reserve Association, presented a plaque to the year's best enlisted man.

Senior Chief Dandridge passed an engraved commendation plaque from the command, citing Franks for insight, organizational skills, leadership abilities and overall sustained professional excellence.

The recipient also received a name tag identifying him as Sailor of the Year, a \$100 U. S. Savings Bond from the Chief Petty Officers' Association, a one-year reserved parking space, and use of a condominium for a weekend at Lake Tahoe, a 96-hour pass, and a candlelight dinner for two at the Porthole.

Petty Officer Franks has been assigned to Oak Knoll for a little more than a year. He is responsible for management of telephone, teletype, VHF radio, pagers and mail distribution services for the medical center, and has been the project officer for rapidly changing communication needs. He is also the Petty Officer in Charge of the OOD and Information Desk.

The trim non-commissioned officer has also been active in the First Class Petty Officers Association as its President, and as President of the Enlisted Mess (Open) Advisory Board.

With more than 11 years' military service, he has had duty aboard six aircraft carriers—USS ENTERPRISE, USS MIDWAY, USS KITTY HAWK, USS CONSTELLATION, USS RANGER AND USS NIMITZ—plus six years' service in Army Armor units. He is a graduate of two military technical schools.

Petty Officer Franks holds the Meritorious Unit Commendation, Sea Service Deployment Ribbon, Humanitarian Service, Army Commendation, Vietnamese Cross of Gallantry,

OS1 Randy Franks

Army Good Conduct, Vietnam Campaign, Vietnam Service, and National Defense.

Originally from Manchester, Iowa where his parents still live, he became a policeman and later an industrial employee in his home state after his Army enlistment before returning to the military, this time with the Navy.

He expects to once again receive orders to an aircraft carrier about November 1982 and hopes one day to become, sometime in his career, the master chief petty officer of a command.

Franks lives in quarters on base and enjoys the sports of softball, bowling, basketball and racquetball.

SHARING THE CELEBRATION—Rear Admiral Walter M. Lonergan, Commanding Officer, chats with OS1 Franks during a reception honoring the 1982 Sailor of the Year.

(More photos, Page 9)

BEFORE THE CEREMONY—OS1 Franks is briefed on the program by three members of the selection committee (l to r): LCDR Patricia Hoggatt, MAC Edward Sharp and QMC(SS) Harold Dandridge.

EDITORIAL

MARTIN LUTHER KING, JR.

April 4, 1968

“There can be no
justice . . . unless
there is peace.”

Our patients write. . .

I am a retired Navy person who was recently discharged from your facility after two months of treatment. . . and I would like to take this time to thank you and all your staff for making a very painful time as comfortable as possible.

I would especially like to commend Dr. Gabriel and all the nurses, corpspersons and civilian personnel in Ward 7 West. They were all wonderful. I would also like to thank all the technicians, who are too numerous to mention, for their high technical skill.

I am coming along fine, and I have your fine facility to thank for it.

N.W. Cooper

I was a patient in your hospital recently and wish to express my

Hospital Corpsman—a skate rate?

“All you corpsmen ever do is skate! You guys never do any work; I wish I had an easy job like yours!” We hear those comments every day and put up with endless kidding about our “easy” job. I hope to clear up some of the myths about my job and just how easy it is at times. A machinist’s mate once told me that if you didn’t have greasy hands you were in a “skate rate.” And we all know that corpsmen never get their hands dirty.

But just how easy is it being a corpsman? Working around pain, suffering, and, many times, death, has never been easy for me. I had been a corpsman for two months when a three-year-old boy died in my arms one Christmas eve. He died of Tay-Sachs disease; it’s incurable and it only affects very young children. I was about to become a father myself.

A 38-year-old woman who had undergone several operations to arrest cancer lost the battle against that disease on her birthday. She left behind a husband and five children, the youngest of whom was 18 months. Her husband was a Marine master sergeant. I had pictured all Marines as “towers of strength” incapable of showing any emotion. When I saw him in tears that day, I realized that the men of our toughest fighting outfit were also very human, and that I was ignorant in assuming otherwise. I had a lot to learn.

When I was assigned to the Marines, one of my first duties was on an ambulance crew. My first run was to the grenade range where a drill instructor and a recruit were killed by a hand grenade. The scene was the most sickening thing I’ve seen to this day. There were some very lucky recruits though, because a heroic drill instructor gave his life so that they wouldn’t be killed. And then there was the recruit who ended his life with a rifle bullet through his head, the pilot who ejected out of his aircraft when it sent sideways and was skipped like a pebble 300 yards down the runway, and the baby who was beaten by his parents because he wouldn’t stop crying. He died. I could go on, but I hope I’ve made my point.

Many people see us when we are not working. To tell the truth, I’d rather not have to work, because when I have to work, one of my shipmates is either sick or injured. Even though I have been able to accept it, I have never gotten used to seeing people hurt. If a person thinks my job is “skating,” why don’t they try it? Grease and blood both wash off, but do you remember the times and circumstances that your hands were dirty? I can recall every time I’ve had blood on my hands and even though it washes off, it’s hard to forget.

I love my job and I am proud of what I do. I put up with ignorant comments every day about my job, but to be called “Doc” means the world to me, especially when a shipmate would rather see his doc than go to the dispensary.

So if I skate or am out of work, it’s your fault. (Keep it that way, please.) But, should you decide to bring your business my way, I am ready and waiting to serve you.—HM2 Mark J. McClellan, USN, USS MOBILE (LKA-115). (Reprinted with permission from *Navy Medicine*.)

USO grateful for support

Bay Area United Services Organization, Inc. expresses grateful appreciation to all military and federal employees who designated all or part of their 1981 Combined Federal Campaign contributions to USO.

Your contributions are especially meaningful during these days of high inflation and reductions in other funding sources. With the passing of each year, it is more and more evident that if USO is to continue, it will be due to contributions by members of the military and federal employees.

A new service center is opening this month at Oakland International Airport. With its openings, it will be the 14th airport USO in the United States. The center will be available for the more than 16,000 military personnel and their dependents traveling through the Oakland airport each month.

As USO closes out its 40th year of operation, staff and volunteers look forward to serving the members of the military and their dependents for another 40 years.

NRMCO staffers accompany

Air Force medevacs tiny Navy dependent

A Navy and Air Force team joined forces on Jan. 10 to fly a critically ill infant, his mother, sister and brother to Connecticut, thereby reuniting the family of Lieutenant Commander Michael Brennan without endangering the baby's life.

When Sean Michael Brennan was born 10 weeks ago at the naval hospital in Balboa, he was found to have multiple congenital anomalies. Specialists at the University of San Diego Medical Center performed two surgeries on the infant and believed him recovered enough to accompany his mother and siblings to New London, Conn., to join his father.

Three weeks later, however, when Mrs. Kathleen Brennan and her children were in transit and stopped by her hometown of Atascadero for the holidays, the infant once again became seriously ill. From a civilian hospital in that city, he was flown to Mt. Zion Hospital in San Francisco, and subsequently transferred to Naval Regional Medical Center Oakland, where he was placed in a newborn intensive care unit.

Two days later, through coordination with the 44th Aeromedical Evacuation Wing at Travis Air Force Base, Sean was placed in a portable unit, taken by ambulance to Travis and flown to New Haven, Conn., aboard a C-

9 Nightingale from the 57th Aeromedical Evacuation Squadron out of Scott Air Force Base, Ill. Upon arrival in the east, he was admitted to Yale University Medical Center where further evaluations will be made.

Accompanying the infant on the flight were pediatrician and Navy Lieutenant Commander Louis A. Papp and Navy Nurse Corps Lieutenant Maureen Clary, both of the Navy medical center staff, Mrs. Brennan, her daughter Darcy, 13, and son Derrick, 7, Air Force Flight Nurse Captains Mary Gillespie and Mary Ann Creamer, Airman First Class Gary Ask, flight attendant, and Air Force medical technicians Staff Sergeant Richard Bockelcamp, Technical Sergeant Dennis Decorte and Sergeant Raul Valdez. Piloting the plane was Air Force Captain Kenneth Moore, with Captain John Verad serving as copilot.

The infant's father, recently transferred from the San Diego area, is presently enrolled in a navigation school in the east.

In discussing the child's illness and the medical evacuation, Mrs. Brennan said, "We're so thankful that we are a military family and that Sean is eligible for such good medical care. I don't know **how** we could have managed as civilians..."

Navy selects commodores— first since WWII

The President has approved the recommendations of the Staff Corps selection boards which recommended Medical Corps officer Joseph S. Cassells, Dental Corps officer Richard G. Shaffer, and Lewis E. Angelo, Medical Service Corps, for promotion to the permanent grade of commodore.

Other Staff Corps officers named were Carl R. Webb, Jr., John H. Ruehlin and Stuart F. Platt, Supply Corps, and John C. Fraser, Jr., Civil Engineer Corps.

Earlier 38 line captains were recommended for promotion to commodore—33 unrestricted line officers, two aeronautical engineering duty officers, two engineering officers and one special duty (Public Affairs) officer.

The promotions will be the first to the one-star rank since World War II. The rank of commodore was restored by the Defense Officer Personnel Manpower Act (DOPMA) to bring the Navy in line with the other services, all of which have a one-star rank. Prior to the restoration, the Navy had divided its two-star flag officers into "upper" and "lower half" rear admirals. "Lower half" rear admirals will be "grandfathered." They will retain the uniform and title of rear admiral but will be paid as a commodore (O-7).

The rank of commodore came from Holland. In the Dutch Wars of 1652, there were not sufficient admirals and the Dutch desired to create others without calling them Admirals. The title was brought to England by William III. The broad command pennant or burgee was used by the Dutch at the same time. The rank was officially recognized by the British in 1806. The American Navy used the rank as an honorary title in the Revolution—"Commodore" John Paul Jones, "Commodore" Esek Hopkins, appointed as "Commander in Chief."

Until 1861 all captains in the United States Navy, commanding or having commanded squadrons, were recognized as commodores, though never commissioned as such. They wore a broad pennant distinctive of that rank.

In 1862, it was established as a fixed rank, when in July of that year 18 were commissioned on the active list and 17 on the retired list. The grade was abolished in 1899. During World War II, the temporary grade of commodore was given to some officers both of the line and the Staff Corps. President Franklin D. Roosevelt made the original suggestion that the old title be revived.

A captain in the United States Navy who commands a flotilla or squadron of destroyers is called a "Commodore" by courtesy. The British Admiralty continues to make appointments of a small number of commodores. The broad strip of rank is worn by those appointed and the "burgee" of a commodore is flown.

New, tough anti-drug policy effective Feb. 1

"The illegal use of drugs constitutes a serious breach of discipline which undermines the very fiber of the combat readiness of our Navy," said Admiral Thomas B. Hayward, Chief of Naval Operations, in recently announcing a tough, new anti-drug program, adding that drug trafficking **"directly promotes personal tragedy, undisciplined conduct and substandard performance."**

The Navywide policy, which takes effect Feb. 1, stresses intolerance of illegal drug use. **Officers and Chief Petty Officers involved in drug abuse will be processed for separation, which can result in a discharge under other than honorable circumstances.** Other enlisted personnel are to be disciplined and placed in a counseling program. A second violation will bring disciplinary action and separation under other than honorable conditions. A vital aspect of the leadership effort is to change the attitude of Navy men and women about drugs, to reinforce the view that everyone has a responsibility for the lives of his or her shipmates.

Oak Knoll OR staff robbed at knifepoint

About midnight last Saturday, two males disguised in operating green scrub suits, face masks, surgical gloves and foot gear burst into one of the main operating rooms on the fourth floor of the main hospital at Oak Knoll.

Brandishing knives, they took a Navy doctor, nurse, and three hospital corpsmen captive and tied them up for nearly two hours while they ransacked drug cabinets and offices in the operating suite.

Approximately 15 minutes after the thieves left, the bound personnel were found by another corpsman who happened on the scene and freed them.

unharmed. No surgery was underway during the robbery.

Small amounts of drugs, personal property and cash were taken and the Naval Investigative Service is pursuing leads at this writing. Any NRMCO Oakland personnel who believe they may have information that may assist the investigation and/or apprehension of the robbers are urged to call Special Agent Andy Higgins at Autovon 686-4276 or Commercial 869-4276.

The identity of the personnel taken captive during the incident is being withheld for their personal protection.

HM3 Tony Carroll

HM1 Perry L. Lane

Lane, Carroll selected top sailors

Hospital Corpsman First Class Perry L. Lane and Hospital Corpsman Third Class Tony Carroll were selected as NRMCO Oakland's Sailors of the Month for November and December, respectively.

Lane, who is Leading Petty Officer and student coordinator in Radiology, said, "It instills a feeling of pride that goes beyond comparison, not only being elected, but even being nominated. To take note that the center of attention has been focused on you will

give an individual the strength and intentional fortitude to carry on... and on."

"I feel that it is an honor to be selected as Sailor of the Month," commented Carroll, microsurgery hand technician in Orthopedics. "It's nice to know you are appreciated and that your work is noticed. I feel this honor is a great work incentive. I would like to thank Dr. Lichtman, Chief of Service, Dr. Schneider, and the Orthopedic staff for the opportunity and training."

Lane's career goal is to achieve as
(Continued to Page 9)

Drug detection capability up

In order to improve its ability to detect the illegal use of drugs, the Navy has purchased a new testing kit, which is described by Dr. William Pollin, Director of the National Institute on Drug Abuse as, "The most important recent advance in urinalysis of cannabinoids for the determination of past use of marijuana."

According to Dr. Pollin, the kits will provide "the first rapid and accurate chemical measure of drug use in military populations."

THC, marijuana's "active ingredient," is fat soluble and remains in the body in fatty tissues for long periods of time, unlike water-soluble alcohol, which washes out of the system over a matter of hours. The new kits use a chemical reagent to confirm THC presence and are capable of detecting evidence of marijuana for as long as 7 to 10 days in some individuals after a single use, and up to 3 or 4 weeks after a chronic abuser's last use.

MEMENTO—Captain E. L. Jones (left), Officer in Charge of the Fleet Hospital Support Office in Alameda, presents a photo of the fleet hospital prototype to Admiral John G. Williams, Jr., Chief of Naval Material, during the latter's recent visit to the Bay Area. The visiting admiral was briefed and toured warehouses which will be used to receive, assemble and store fleet hospitals prior to deployment to worldwide sites.

Separation travel entitlement change

Navy personnel being separated from the service must actually travel to receive any reimbursement under a provision of the Uniformed Service Pay

CHAMPUS MEDICAL DIRECTOR—Dr. Alex R. Rodriguez, who served a psychiatry internship and residency at Oak Knoll 1973-76, has been appointed to the medical directorship of the Civilian Health and Medical Program of the Uniform Services, reporting directly to the Assistant Secretary of Defense for Health Affairs. According to a recent article in Emory College (his alma mater) magazine, Dr. Rodriguez is particularly concerned about how the nation's health care system affects the elderly, the indigent, and the veteran. After his Oakland duty, he served at Guantanamo Naval Base in Cuba as Chief of Psychiatry, and when that tour ended, spent three more years in specialized study as a fellow at the University of California Medical Center and at Naval Medical Center, Camp Pendleton. He was selected to become a White House Fellow and during that fellowship which ended last September, served as special assistant to the secretary of the Department of Health and Human Services.

Act of 1981, which became effective Nov. 1.

In the past, servicemembers being separated or retired could claim reimbursement for transportation between their last duty station and their home of record or place of entry into active duty service, whichever was further, without actually making the trip.

The new law divides separatees into Groups "A" and "B" Group "A" members are those who have completed 90 percent of their initial active duty commitment and are separated honorably, personnel receiving hardship or medical discharges, and members retiring or being placed on the temporary disability retired list. They and their dependents remain entitled to the current monetary allowance in lieu of transportation and per diem rates for the distance they actually travel. This may not exceed mileage and authorized travel time to the servicemember's home of record or place of entry on active duty.

Group "B" members, those who have been honorably separated but completed less than 90 percent of their initial commitment and those discharged under other than honorable conditions, are only entitled to transportation in kind by the least expensive common carrier or a monetary allowance not to exceed the cost of that ticket.

Members retiring, being placed on the temporary disability retired list, or transferred to the fleet reserve are eligible for advance travel payments for themselves and their dependents, but must actually perform the travel for which they are paid.

Questions about travel entitlements should be addressed to your local PASS or Disbursing Office.

Career protection for Feds joining spouses overseas

The Director of the U S Office of Personnel Management, Donald J. Devine, has approved changes which will protect the careers of Federal employees who leave their jobs to accompany military or Federal civilian employee spouses on overseas assignments.

In making the changes, Director Devine said, "We believe it is in the interest of the Federal Government to encourage both employee mobility and family cohesion wherever possible. We therefore, plan a number of improvements in our employment policies affecting spouses of U S civilian and military employees. The change we are announcing will allow Federal employees who accompany military or civilian sponsors overseas to resume their Federal careers without penalty on their return to the United States."

Announced in a Federal Personnel Manual Bulletin, the change will permit career-conditional employees to extend their reinstatement eligibility for Federal employment by the amount of time spent overseas with a family

member on official assignment.

Formerly, such employees had only three years following separation to be reinstated. With many overseas tours of duty lasting more than three years, they had the difficult choice of either remaining home alone to continue their Federal careers, or losing their reinstatement eligibility.

Civilian jobs open

Civilian medical clerks are needed at both the NAS Alameda and Naval Supply Center Oakland clinics of Naval Regional Medical Center Oakland, and clerk-typists are needed throughout the command.

Applications will be accepted through Monday (Jan. 25) for the two GS-4 medical clerk positions at Alameda and the supply center, while the announcement for Clerk-Typist and Medical Clerk (Typing) GS-3 positions will not close until July 12.

Detailed information on any of these positions may be obtained from Civilian Personnel Service, Ext. 2116.

Staff officer's son dies in auto crash

Memorial services were held Dec. 17 in St. Luke's Chapel at Oak Knoll for Navy Airman Apprentice Anthony S. Bielawski, 19, son of Lieutenant Commander Jerome J. Bielawski of the medical center staff and his wife Mildred.

Anthony Bielawski

The young airman was killed in a motor vehicle accident near Memphis, Tenn., Dec. 11. He entered the Navy April 17, 1981, and at the time of his death was a student at an aviation electronic school near Memphis.

In addition to his parents, he is survived by his two sisters, Teresa Ann and Christine Cecilia and a brother Mark Steven, all of Fremont, grandmother, Annie Herbein of Boyertown, Pa., grandfather, Morris Dierolf, also of Boyertown, and uncle and godfather, William A. Bielawski of Reading, Pa.

Funeral services were held Dec. 18 at the Chapel of Chimes in Hayward.

Dr. King remembered

Naval Regional Medical Center Oakland sponsored a memorial service for Dr. Martin Luther King, Jr. in the Clinical Assembly on Jan. 15, the date that would have been his 53rd birthday.

The distinguished American leader was assassinated April 4, 1968.

Several military and civilian staff members attended the program, which was arranged by the Equal Employment Opportunity staff.

IRS ups interest rate

April 15 has long been a date to remember—and a deadline to react to. But beginning in 1982 it may have an even greater affect on some taxpayers.

The Internal Revenue Service has announced that, effective Feb. 1, the annual interest rate for federal income tax underpayments and overpayments will increase from 12 percent to 20 percent.

The change can work both ways, of course. Persons owing taxes will be charged 20 percent interest for any period payment is overdue. On the other hand, the person whose withholding was too generous will be paid 20 percent interest on money Uncle Sam must return.

Provisions for the rate change are contained in the Economic Recovery Tax Act of 1981. The law stipulates that the rate will be set each Oct. 15 and will be based on 100 percent of the average prime interest rate for the preceding month.

Under prior law, the rate was set every two years and was based on 90 percent of the prime rate.

Uniform update

Effective March 1, 1982, the wearing of the blue utility caps and/or blue ball caps issued for wear with dungarees or utility uniforms is discontinued.

For men, the standard white hat, and for women, the blue garrison cap, will be worn with dungarees or utility uniforms at all times ashore, outside unit or working areas, on board naval bases or naval stations.

Commands (unit identity) ball caps are authorized for wear within unit premises or working areas.

Resolutions for a secure New Year

By MAC Edward Sharp

1. I will protect my valuables because my own hard and diligent work has provided me with my rent money, car payment, credit cards, telephone bill, radios, tape-players, etc.

2. I will not become a statistic as did some 134 victims of theft who lost an average of about \$75 each (\$10,050 total) last year.

3. I will help my shipmates, both military and civilian, and my patients in protecting their property by bringing to their attention any mistake they may make in the proper safeguarding of their valuables.

4. I will be observant and report to proper authority any suspicious activity or persons within my view and in an area under my authority.

(Note: The accompanying photos point out situations found on just one day within the hospital. All these people did not lose their valuables. They were lucky. Names have been deleted to protect the embarrassed.)

I thought my locker was locked. My whole paycheck was in there. What am I gonna do?

Holiday payday for a thief.

I ALWAYS leave my purse there. Nobody has taken anything before.

The coffee mess funds were stolen. Now everybody has to chip in \$5 to get started again!

I thought someone would stay in the office while I went to get a coke and shoot the breeze...

I just turned my back for a minute... why ME?

I was in a hurry. I was coming back to lock it up later.

I thought it would be a safe place. I was only gone 10 minutes or so...

They took my vacation money. It isn't fair!

Hmm... I wonder how they got into my locker...

I just went to the bathroom. Nobody knew I had \$300 in my bedstand... I thought.

Hello, Security? Someone stole the radio out of my office!

Kudos.....

NAVY ACHIEVEMENT MEDAL

LTJG Robert Hoffner, Disaster Preparedness Office, now transferred.

CIVILIAN SUSTAINED PERFORMANCE AWARD

Ms Erlinda Guzman, Nursing Service.

MASTER'S DEGREE

HM2 Richard Rudowski, Laboratory, Master of Arts in Human Resources Management from Pepperdine University.

LETTERS OF COMMENDATION

HMCS Jerry Price, now retired.
CAPT Mario Schwabe, transferred.
DTC Arthur Lannan, transferred.
Mr. Frederick Sinopoli, Radiology Service.

LCDR Karl Mendenhall, transferred.

LETTERS OF APPRECIATION

HM2 Francis Girotti, ENT Clinic.
LCDR Earl Martin, transferred.
HM3 Jon Junker, Clinical Investigations Center.

HM2 Donald Pierron, Laboratory.

PHYSICAL THERAPY GRADUATES

HM3 Terry Kapturowski and HM2 Glen Lounsbury.

FELLOWSHIP CERTIFICATES

CDR James Schneider, MC, Hand Surgery.
LCDR Robert Murphy, MC, Hand Surgery.

RESIDENCY CERTIFICATES

LT William McKown, MC, Pediatrics.
LCDR Charlotte Alexander, MC, Orthopedics.

CIVILIAN LENGTH OF SERVICE AWARDS (15 YEARS)

Annie Carmans, Supply.
Brenda Green, Laundry.
Ida Jackson, Food Management.
Margaret Eddie, Pharmacy (CSR).
Lenora Brady, Nursing Service.
Robert Glenn, Laundry.

REENLISTMENTS

SMC Edward Tilton.
HMCS Andrew Latigue.

RETIRES—Shortly before the holidays Senior Chief Hospital Corpsman Jerry Price, whose last duty was with Military Manpower Service, tried to quietly retire without fanfare. The word got out, however, and the Admiral's office was packed with Jerry's many military and civilian friends who dropped by to see him presented a letter of commendation. The affable senior chief is reportedly taking life easy in San Jose these days after 24 years in the Navy.

Clinic clerk retires

Lucille Showaker, OB/GYN Clinic clerk, retired from civil service on Dec. 11 after 15 years' service.

Over 45 fellow workers attended a surprise farewell luncheon in her behalf at the Officers' Club a couple of weeks earlier.

Captain Charles M. Scott, Chairman, Obstetrics and Gynecology, presented her with a gold chain necklace, a farewell gift from her many Oak Knoll friends.

THE WAY HE WAS—The year was 1957 and this Hospital Corpsman Second Class was on shore leave in Kamakura, Japan, off his ship, USS TICONDEROGA (CVA-14). Today he is a senior medical officer on the Oak Knoll staff. Look for the answer next issue.

VA benefits require more active duty

Due to recent changes in the law, 24 months of continuous active duty service is now required before an individual is entitled to VA benefits for which a period of active service is a prerequisite.

Benefits affected by these changes include VA home loans and loans for mobile homes and condominiums.

The 24 month requirement does not apply to those who receive a disability or hardship discharge. All enlisted personnel who enlisted after Sept. 7, 1980, and officers who began their active duty after Oct. 16, 1981 are affected by these changes.

Newlyweds

Recent newlyweds are Hospital Corpsman Second Class Greg Leavitt, Discipline Petty Officer in Operating Management, and Hospital Corpsman Third Class Bonita Ela, until recently an area coordinator on the 9th Deck.

Both corpsmen were stationed at Oak Knoll for approximately two years. The new Mrs. Leavitt has been transferred to Naval Station Norfolk, Va.

The couple married Christmas Eve in New Hampshire at the home of the bride's parents.

Reserve dependents get shopping days

Eligible dependents of reserve component members who participate in regularly scheduled inactive duty training have been authorized use of their sponsors' exchange privileges by the House Armed Services Committee. The change permits dependents one day of exchange shopping for each day of the sponsor's inactive duty training in pay status.

The dependent must present the sponsor's leave and earning statement (LES) or a letter of authorization issued by the reserve component organization and must possess a driver's license or other credentials that verify the dependent relationship.

According to exchange officials, dependents who special order merchandise, purchase on a layaway basis or leave merchandise for repair will be permitted to complete the transaction on another day without having that day charged against the days they are entitled to shop.

The new provisions apply to all military exchange systems.

Comings and Goings

"Fair winds and following seas" to the following personnel who have recently departed this command:

LCDR Mary Maxson, NC, to Beaufort.

LCDR Walter Marolf, MSC, to Yokosuka.

LCDR Early Martin, MSC, to Long Beach.

LCDR Karl Mendenhall, MSC to Bethesda.

LTJG Robert Hoffner, to USS RANGER (CV 61).

LTJG Lesa Marks NC, resigned.

LT Katherine Geyer, NC, released from active duty.

LT Stephen Gulinier, to Groton, Conn.

LT Cynthia McGrane, released from active duty.

LT William McKown, MC, to Okinawa.

CAPT Mario Schwabe, MC, to NMMC Bethesda.

LT Steven Hart, released from active duty.

HMCS Jerry Price, retired.

HMC Britton Gladden to 1ST FSSG, Camp Pendleton.

HM Perry Lutke to 3RD FSSG, FMFPAC, Okinawa.

HM3 Jennifer Behrens to NSHS San Diego.

HM3 Debra Ebright to San Diego.

HM3 Mark Faville, to 3RD FSSG, FMFPAC Okinawa.

DTC Arthur Lannan to USS PROBEUS, (AS-19).

HM3 Phil Tevlin to Fort Sam Houston, Texas.

HM2 Cesar Ortega, released from active duty.

HN Thomas McConnell to 1ST FSSG, Camp Pendleton.

HN James Dunn to 1ST FSSG, Camp Pendleton.

HM2 Stephen Boone to NRMC Okinawa.

HM3 Rebecca Lind, released from active duty.

HM3 Michael Tuirk, released from active duty.

HM3 Kim Broomall to Rota, Spain.

HM3 Veronica Castro to NRMC Jacksonville, Fla.

HM2 James Pfiefer to USS RANGER (CV-16).

HN Tofutu Faaleava, 1ST FSSG, Camp Pendleton.

HN Laredo Bois to Pensacola, Fla.

HN Shelley Curtis to Pensacola, Fla.

HM2 Frank Diaz to Pensacola, Fla.

HM2 Robert Lyons, released from active duty.

HR Gregg Zanella to Pensacola, Fla.

HM3 Earl Thompson to Denver (Lowry Air Force Base).

HM3 Teofilo Geron to Concord Naval Weapons Station.

HN Darrell Draughon to NMMC Bethesda.

DT3 Augusto Sosa to USS ENTERPRISE (CVN-65).

HM3 Matthew Mooney, released from active duty.

HN Daniel Vonlogh, released from active duty.

HM3 Raymond Donaghy to Fort Sam Houston.

HM3 Diane Vroman to NRMC Seattle.

HM2 Linda Greene to Pensacola, Fla.

HN Cheryl Valeriano to Portsmouth, Va.

...

"Welcome aboard" to newly arrived:

HM3 Caroline Lynch, Nursing Service.

HM3 Lonenda Lanagan, Nursing Service.

HR Lee Ann McLeman, Nursing Service.

CDR Judith Dault, Nursing Service.

HM3 Deborah Bishop, Nursing Service.

LCDR Linda McMahon, Nursing Service.

HN Kathleen Grimm, Nursing Service.

HR Renato Fones, Nursing Service.

HM3 Leo Barrameda, Nursing Service.

HN Thomas Bliss, Main Operating Room.

HN Charpong Phuranatnaranubala, Nursing Service.

HM2 Paul Buckholz, OR School (instructor).

HA Joseph Hatyenikolis, Nursing Service.

HA Hyron McCullough, Nursing Service.

LTJG Michael Watkins, Nursing Service.

ENS Karin Lundgren, Nursing Service.

HR Rick Elliott, Nursing Service.

HM3 Joseph Abbott, Nursing Service.

HM3 Regina Abiva, Laboratory Service.

HN Ellen Vaughn, Nursing Service.

MM3 Robert Rathbone, Operating Management.

HMC Michael Larkin, Military Manpower Service.

HMC Steven Putter, PMT School staff.

HM3 David Weiler, Laboratory Service.

HMCS Connie Graves, Patient Affairs.

LT Janet Cooper, Main Operating Room.

HN Louis Savoie, Nursing Service.

HR Allen Marshall, Nursing Service.

LT Michelle Tanner, Nursing Service.

HM2 Stephen Foster, Nuclear Medicine.

HM3 Carl Kjonas, Nursing Service.

LT Mary Schetter, Nursing Service.

HM1 Charles Pearce, Patient Affairs.

LT Marlys Tuftin, Nursing Service.

HA Charles Stephanski, Nursing Service.

LTJG Aurelia Coultherst, Nursing Service.

ENS Roger Cagle, Nursing Service.

HN Thornton Jones, Nursing Service.

HN James Coleman, Main Operating Room.

LCDR Laurence Parr, MSC, Nuclear Medicine.

DN John Halliburton, Dental.

LT Stephen Lindsey, Nursing Service.

LTJG Kevin Marty, Nursing Service.

HR Sharon Hine, Nursing Service.

HA Catherine Reinhart, Military Manpower.

HN Robin McDaniel, Nursing Service.

LT Dennis Jordan, Nursing Service.

LT Luisa Ferreira, Nursing Service.

LCDR Harald J. Aaning, MC, Surgery.

LT Mary Schetter, Nursing Service.

LT Janet Cooper, Nursing Service.

ENS Karen Chapman, Clinical Clerk.

ENS Peter Weimerskirch, Clinical Clerk.

ENS Elaine Copeland, Clinical Clerk.

2nd LT James Laurenzano, Clinical Clerk.

NEW EMPLOYEE—Richard Kempton, new library technician at Oak Knoll, assists HN Cheryl Valeriano in selecting a best seller from the General Library's new collection. Kempton formerly worked in the UC Santa Barbara Library. Books, phonograph records and periodicals may be checked out of the General Library in Bldg. 101 by military and civilian personnel and retired military persons. Hours are from 8 a.m. to 4:30 p.m. and 6 to 8 p.m., Monday through Thursday, 8 a.m. to 4:30 p.m. Friday. A ward cart service is also provided to hospital patients.

Safety tips for happy travel

By Ruby Sparks

During this coming year, many of you will be traveling both at home and abroad. The following helpful safety tips will enable you to have pleasant and uneventful journeys:

Before leaving...

- Give a trusted person a copy of your itinerary so you can be reached in case of an emergency.

- Obtain traveler's checks, and be sure to record the check numbers and amounts as you cash them.

- Don't overpack your bags.

- Traveling in your own car...

- Be aware that your out-of-town license plates may attract thieves.

- Remove all luggage when you leave the vehicle.

- If you must leave your ignition key in the car, don't leave your home key in it.

At the airport...

- Keep your tickets in a safe place and your valuables with you.

- Use only authorized skycaps.

- Watch your belongings as they enter and leave the metal detectors.

While in transit...

- Use only recognized taxi services, and try to determine your fare beforehand.

- On buses or subways, sit or stand close to other passengers, the driver or the conductor.

- In general, stay in well-lighted, populated places when awaiting transportation.

At your destination...

- Use all locking devices in the room, and know your escape routes in case of fire or other emergencies.

- Be sure of a visitor's identity before opening the door. Open the door with the chain lock secured to verify the caller's identity, or use the door viewer.

- Use streets that are well-traveled, and select the most direct routes.

- Place your wallet in a front pocket rather than in a back pocket or coat, carry a handbag with an arm through the strap.

When traveling abroad...

- Don't publicize your travel plans, but do let someone know your schedule.

- Don't use baggage tags that show your employer's name or logo.

- Don't exhibit large amounts of currency.

- Above all, be discreet, keep a low profile.

- Patronize only reputable hotels and restaurants, and avoid hotel paging.

- Don't establish a pattern of routes in daily activities.

- Know how to contact police, and report suspicious incidents.

- Avoid civil disturbances and areas known as "tourist traps."

- Use vehicles most common to the country. Travel in numbers when possible and not in remote areas.

- If you don't know the language, learn phrases such as "I need a doctor." Know how to use the pay telephones, and carry change.

- Refuse to meet with strangers in unknown or remote locations.

NEW ON STAFF—Dr. Anton Zikmund joined the Naval Regional Medical Center Oakland staff on Dec. 28. A retired Navy Medical Corps officer, the physician is serving part time in the Primary Care Clinic. He maintains a private practice and has also been serving as an Industrial Medical Officer at NAS Alameda. Dr. Zikmund received his M. D. from Loyola University School of Medicine and is board certified in internal medicine. He was Chief of Medicine at Bethesda from 1953 to 1955.

Hazel Harlow ends career

Hazel Harlow, a popular employee of Civilian Personnel Service for more than 15 years, retired from federal service last Friday with a total of 23 years with Uncle Sam.

"(I) plan to stay at home and love it," she told a fellow employee, but we also learned that Hazel will be installed as the head state officer of a national charitable organization known as the "Royal Order of Cantas" on Jan. 30 in ceremonies at the Emeryville Holiday Inn.

The organization provides funding for guide dogs for the blind, Medic Alert bracelets, dentures and hearing aids for the needy, scholarships for nurses, tapes for the blind—and, this year under Hazel's supervision—a free, volunteer instructional program in reading, typing, etc. for handicapped youth.

Mrs. Harlow reported to Oak Knoll on Oct. 16, 1966 after several years of employment at the San Francisco Bay Naval Shipyard.

Hazel Harlow

VETS ASK:

Q—I was honorably discharged from the Army after serving four years, part of which was in Vietnam. Can I use my entitlement for a home loan and go to school under the GI Bill at the same time?

A—There is no restriction on receiving both of the benefits at the same time.

...

Q—I have been receiving VA outpatient care for a service-connected disability. Will the outpatient treatment reports be sent to the rating board for re-evaluation of my disability?

A—Generally, the veteran or his representative must request that the outpatient treatment reports be reviewed by the rating board for possible re-evaluation of the disability.

...

Q—When are dividends paid on participating National Service Life Insurance policies?

A—Dividends are normally paid on the anniversary date of the insurance policy.

Q—What is the maximum amount I can borrow on a Veterans Administration guaranteed home loan?

A—There is no legal maximum. The VA will guarantee 60% of the loan or \$27,500, whichever is less. The total amount of the loan is determined by the policy of your lending institution and by your ability to repay the loan.

...

Q—When I apply for Veterans Administration benefits, what must I bring with me?

A—Recently discharged veterans must present carbon copy number four of their discharge certificate. This assures prompt processing of benefit applications.

...

Q—My husband is a 100% disabled veteran, but his disability is not service connected. Are we entitled to armed forces commissary and exchange privileges?

A—No. Only 100% service connected disabled veterans and their survivors are eligible for these privileges.

...

Q—I've just been released from the service. Will the government help me get a job?

A—Assistance is available in finding employment in private industry, in federal service and in local government. Contact your local or state employment service, the U.S. Office of Personnel Management or the nearest Veterans Administration office.

...

Q—I was in Vietnam and believe I came in contact with Agent Orange.

Will the Veterans Administration examine me for possible exposure?

A—Yes. All Vietnam veterans can receive a physical examination at the nearest VA medical center.

...

Q—Are Veterans Administration benefits subject to taxation?

A—Almost all veterans benefits are non-taxable. However, there are two exceptions. One is interest paid on accrued GI insurance dividends left on deposit. The other is death settlement proceeds.

...

SAFETY SAMPLER

Each year, about **89,000** persons are seriously injured in skiing accidents.

Beginners should get expert instruction.

Make sure that all equipment is properly fitted, adjusted, and maintained.

Wear warm, close-fitting clothing.

PRESENTATION—Mrs. Lesley Kopp (right) presents a \$120 check in behalf of the NRMCA Officers' Auxiliary to Captain Harold M. Koenig, Chairman of Pediatrics, to use for supplies in the children's ward in support of the Child Life Program. Witnessing the presentation was Ms. Sheri Szeles, Child Life intern from Mills College. The \$120 was realized from the sale of handmade puppets at the auxiliary's November bazaar.

Request by mail

PHS medical records for former patients

Former patients (including active duty and retired service members and their dependents) of Public Health Service (PHS) hospitals and clinics that have been closed may obtain their medical records from: Director, PHS Data Center, 10000 Aerospace Road, Warehouse No. 1, Lanham, MD 20706.

Medical records 250 pages or less in length are free. There is a charge of 10 cents per page over 250 pages.

All Public Health Service medical facilities were closed or converted to community operation in the period Sept. 30 to Dec. 1, 1981 by mandate of the Omnibus Budget Reconciliation Act of 1981.

Patients of PHS hospitals and clinics that were not closed but converted to community operation may still obtain their records from those facilities. Since these facilities don't have new names yet, requests for medical records may be addressed to the *Former* PHS Hospital or Clinic. Following is a list.

Hospitals

US Public Health Service Hospital
3100 Wyman Park Drive
Baltimore, MD 21211

US Public Health Service Hospital
77 Warren Street
Boston, MA 02135

US Public Health Service Hospital
2050 Space Park Drive

Nassau Bay, TX 77058

US Public Health Service Hospital
1131 14th Avenue, South
Seattle, WA 98144

US Public Health Service Hospital
Bay Street and Vanderbilt Avenue
Staten Island, NY 10304

Clinics

US Public Health Service Outpatient Clinic
331 Veranda Street
Portland, ME 04103

US Public Health Service Outpatient Clinic
New Post Office Building
West 3rd St. and Prospect Avenue
Cleveland, OH 44114

PHS reports a significant number of patients handled at these facilities were military and their dependents, since PHS hospitals and clinics were Uniformed Services medical facilities.

Congress is considering a proposed amendment to the Military Procurement Bill which would designate the converted hospitals and clinics as Uniformed Services facilities for a minimum of three years. If the amended bill passes, former PHS medical facilities converted to community operation would be authorized to again provide medical services to active duty and retired service members and their dependents.

X-ray case of the week

Diagnosis: Eisenmenger's Syndrome associated with a VSD.

RAD PA and LAT films showed cardiomegaly, enlarged calcified pulmonary trunk and left pulmonary artery, and prominent central arteries.

A calcified pulmonary artery is highly suggestive of pulmonary hypertension.

A number of the answers suggested pulmonary valvular stenosis. However, Eisenmenger's was not included.

MED • SCAN

A quick look
at recent health care
developments

Penicillin-resistant gonorrhea is on the increase in the U.S., according to the Centers for Disease Control. The sharp rise in incidence has prompted the CDC to recommend strongly that a test for resistance be routinely run on all gonorrhea patients throughout the country. Even worse, the first gonorrhea infection resistant to both penicillin and spectinomycin, the drug commonly used to treat the penicillin-resistant variety, has been found in California. The infection, imported from the Philippines, was successfully treated with tetracycline. But the airman who contracted the disease was lucky. Tetracycline has a failure rate of 20 to 25 percent against penicillin-resistant VD.

Those video display terminals (VDT) of word processors and other electronic marvels have caused a lot of people to fret about their effect on life and limb. The Food and Drug Administration's Bureau of Radiological Health reported that their testing "generally agreed with those of earlier studies done by the National Institute for Occupational Safety and Health and other organizations here and abroad. The consensus of the studies is that VDTs emit little or no harmful radiation under normal operating conditions; the emissions that are detectable are well below any existing national and international standards. Fluorescent lamps, for example, emit more visible and ultraviolet light. Space heaters give off more infrared radiation with no known ill effects. And VDTs emit less x-irradiation than TV sets." The comments and investigation were triggered in part by allegations of cataracts and other defects among VDT users at newspapers.

A Metropolitan Life Insurance study has found that one sure way to live long is to be an orchestra conductor. Researchers followed 437 male conductors from 1956 to 1975. As a group their death rate was only 62 percent that of the general population and 38 percent below their specific age group. Surprisingly, the age group which is assumed to be most affected by mounting professional responsibilities, 50 to 59, had the lowest mortality rate among the conductors—56 percent lower than the nonconducting contemporaries. But the rank and file of the orchestra and entertainers in general have a much higher death rate than the overall population.

Persons who feel trapped in their jobs, who have little opportunity to make decisions, little latitude in making their personal schedules on the job, and find the pace hectic, run a high risk of contracting coronary heart disease and suffer an increased risk of cardiovascular disease. This report, published in the *American Journal of Public Health*, of a study conducted in Sweden also found a high incidence of heart attack on blue Monday. People in higher levels of management frequently had a lower rate of coronary heart disease because they have a greater degree of decision-making which allows them to moderate the factors which might cause stress. Coronary heart disease is, of course, present on the executive level, but it is rare in lower-status jobs.

Those bright yellows and golden halos around bright objects in the paintings of Vincent Van Gogh were his private vision, but did the vision come from the bottle? Writing in the *Journal of the American Medical Association (JAMA)*, a student at Case Western Reserve University School of Medicine speculates that as confirmed Absinthe drinker, Van Gogh would have been subject to hallucinations both auditory and visual. Absinthe, by the way, was outlawed in France in 1915 and in the United States in 1912.

Baby Louise, the first known "test tube baby" who was born in England, seemed to symbolize new hope to those women who because of fallopian tube malfunction cannot conceive. But in a report issued by the National Institute of Health, Bethesda, Md., the technique is judged to be largely a failure. The problem is that the egg fertilized in the test tube grows properly for only 24 hours. Thereafter the rate of growth slows considerably behind that of a normally fertilized embryo. This slow growth rate prevents the normal development of all but a rare few of the implanted embryos. The failures have numbered in the hundreds. There is hope, however, in a new technique tested successfully on monkeys, in which the egg is moved down past the point where the tube may be blocked and then left alone. Fertilization then takes place naturally, with the success rate paralleling that of individuals with no blockage problem. Perhaps as many as 500,000 American women are infertile because of blockage problems.

X-rays not advisable during pregnancy

If you're pregnant or think you might be, you know how important it is to take good care of yourself. You watch what you eat, cut out cigarettes and alcohol, and you're careful about prescription and over-the-counter drugs.

But x-rays of the abdominal area also deserve extra attention during pregnancy. According to the Department of Health and Human Services, the kinds of x-rays that involve risk to the unborn child are those of the mother's lower torso—the abdomen, stomach, pelvis, lower back, or kidneys. These may expose the unborn child to the direct x-ray beam.

During most x-ray examinations—like those of the arms, legs, head, teeth or chest—your reproductive organs are not exposed directly to the x-ray beams. So these kinds of procedures, when performed properly, don't involve any risk to the unborn child.

Most women will not need an abdominal x-ray during pregnancy. But, sometimes, because of a particular medical condition, your physician may feel that a diagnostic x-ray of your

abdomen or lower torso is needed. This should happen—don't be upset. The risk to you and your unborn child is very small, and the benefit of finding out about your medical condition is much greater. But, even small risks should be taken if they're not necessary.

You can reduce those risks by talking to your doctor if you are, or think you might be, pregnant. The doctor will decide that it would be best to cancel the x-ray examination or modify it to reduce the amount of radiation. Or, depending on your medical needs and realizing that the risk is very small, the doctor may feel that it is best to proceed with the x-ray as planned. In any case be sure to discuss it with your doctor.

Another way to reduce risk is to tell your doctor about any similar x-rays you had recently. It is a good idea to keep a written record of any x-rays you and your family have had.

For more information, send for a free copy of *X-Rays and Pregnancy*. Just write to Consumer Focus, Pueblo, Colo. 81009.

Sailor of Year

(Continued from Page 1)

HONOR—Mr. Bud Howe of Branch 121 presents a plaque in behalf of the Fleet Reserve Association to NRMCO Oakland's Sailor of the Year.

HUMOR HELPS—Oak Knoll's Sailor of the Year has multiple responsibilities in his position with Operating Management Service, but finds that there is an occasional amusing sidelight in dealing with people.

HOW SWEET IT IS—Petty Officer Franks is caught by the camera as he sneaks a taste of frosting from the beautifully decorated cake served at a post-ceremony reception in his honor.

Lane, Carroll

(Continued from Page 3)

much rank as possible before retirement and to complete all degree requirements to attain a master's, while Carroll said that he wants to continue in the field of orthopedics and microsurgery.

Petty Officer Lane, 32, attended Idaho State University and the University of Maryland and is presently enrolled in the Southern Illinois University health care administration program. He has 12 years of Navy service and has served aboard the USS PIEDMONT (AD-17), and at NNMCMC Bethesda, Md.; 3rd FSSG, Okinawa, Japan; NAEC Lakehurst, N.J.; Naval Dispensary, Idaho Falls, Idaho, and NRMCO Portsmouth, Va. He has also completed Hospital Corps School, Advanced X-Ray Technician School, Fleet Marine Force School, and Instructional School. He has been assigned to NRMCO Oakland for about a year and a half.

Petty Officer Carroll, the son of Mr.

and Mrs. Hollis L. Jones, of Thomasville, N.C., is 21 years old and has been in the Navy three and a half years, most of the duty served at NRMCO Oakland. He has received on-the-job training here as an orthopedic technician and has completed courses in microvascular and Operating Technician specialties. Other duty stations have been RTC Orlando, Fla. and NHCS Great Lakes, Ill.

Lane was a member of the team that took honors in the NRMCO and Regional Racquetball Tournament. He reports racquetball his "first love and golf a very close second." The petty officer and his wife are presently working to become foster parents.

Carroll played football and was assistant basketball varsity coach and center at Oak Knoll. He also enjoys music, backpacking, and other sports and is interested in human relations, formerly serving as a member of the command Human Relations council.

Pass in Review

By HM2 Charles M. Frye

Naval Regional Medical Center Oakland is the port of entry for all human remains shipped to the United States for burial in deaths occurring to Department of Defense employees, active duty Navy and Marine Corps personnel and their dependents in the Pacific Basin, an area west of California which includes the Hawaiian Islands, Guam, Antarctica and the Indian Ocean.

Because of the vast size of this region, a substantial burden is placed on the enlisted person assigned to Decedent Affairs, Overseas Branch, according to LCDR John Kraft, Chief of Patient Affairs. This responsibility currently rests upon the shoulders of Hospital Corpsman First Class Daniel W. Lewis, whose duties range from arranging shipment of the remains, seeing that they are handled in a dignified manner, and coordinating funeral services in the states.

"My area of responsibility is unique, for the Navy is the only remaining service that still has military morticians. The other branches employ civilians to work in that capacity," he explained.

Petty Officer Lewis is a licensed mortician and holds the Navy Enlisted Classification of 8496 (Embalming Technician). He said, "As an embalmer for the Navy my duties consist of inspecting the work done by contract morticians, preparing uniforms, seeing that proper awards and ribbons are in order, providing shipping arrangements, arranging for escorts, and maintaining liaison among funeral homes, family members, the Navy and other governmental agencies."

The Navy maintains mortuaries at three other locations—Quantanamo Bay, Cuba, Guam, and Naples, Italy. At those locations Lewis's counterparts actually perform the duties for which they are licensed.

HM1 Lewis is a graduate of the Commonwealth College of Mortuary Science, Houston, Tex. He entered this college after his original tour in the Navy where he served on the USS ORISKANY (CVA-34) as a Gunner's Mate and made two WESTPAC deployments to Vietnam aboard the carrier. He returned to the Reserves and mortician's school in 1965. He holds a license in Texas and California.

In 1974 Lewis came back on active

HM1 Daniel W. Lewis
Mortician

duty and was first assigned to the Treasure Island Dispensary where Decedent Affairs was then located. After four years he requested and received orders to Guam where he received field experience in a humid climate "which presented a real challenge to the way you perform your work." Four years later he received orders back to the Bay Area and was assigned to NRMCO Oakland. Upon occasion he has returned to Guam on temporary active duty to cover a shortage of personnel at that command.

The mortician holds numerous letters of appreciation and commendations for his efforts and has been awarded the Good Conduct Medal, Navy Unit and Meritorious Unit Citations, National Defense, Expert Pistol, Expert Rifle, Reserve Service, Vietnam Campaign ribbon and the Vietnam Service medal. He has also completed two courses in his specialty at Fort Lee, Va., in graves registration and memorial activities.

HM1 Lewis becomes eligible for transfer in November, but would like to extend his tour to 1984 at this command.

(Know an enlisted person who is working in an unusual or interesting assignment? If so, leave a message for HM2 Charles Frye at the Public Affairs/Oak Leaf Office, or call Ext. 2113.)

Collection benefits bereaved parents

Some \$170 has been voluntarily collected among military and civilian personnel of Oak Knoll and been sent to aid the parents of three children who were killed in a recent mudslide in Pacifica.

Michele, Billy and Melissa Velez died when the storm-caused slide crushed their home and sent it tumbling down the hill in the middle of the night. The parents barely managed to escape but were unable to reach the children.

sleeping in back bedrooms. It took firemen and volunteers several days to clear the debris in order to find the bodies.

The Chief Petty Officers' Association made a \$25 contribution to the cause.

According to Donna Ostrowski of Patient Affairs who volunteered to forward the donations, more contributions are expected from others who want to help the distressed parents.

EARLY TALENT—Webelo Cub Scout Jim Keck, 10, of Oak Knoll's Pack 428, took first prize in a recent art contest (which drew entries from nearly 400 scouts of the Bay Area) and won a \$100 U. S. Savings Bond. His pastel still life, held by Hospital Corpsman First Class Joseph Adams, Webelo leader, depicts three balls and a bat on a wooden chair. Congratulating the young son of Lieutenant Commander and Mrs. Keith A. Keck is Lieutenant Commander Earl Martin, recent Scoutmaster for Pack 428.

Child abuse in many forms

Child abuse comes in many forms, and these can occur simultaneously. The concept of the "battered child" has forced professionals to confront and explore an area that has long been avoided. Such exploration has given rise to the idea of "child advocacy," in which it is realized that young children because of limitations in intellectual development, language experience and legal standing need guardians to defend their physical and emotional well being. As a result, every state now has statutes advocating the mandatory protection of vulnerable or victimized children.

Physical abuse is the form of child abuse that is usually addressed; however, there are other methods of abuse:

- **Physical neglect** of a child results from parent failure to provide the basic physical necessities of life such as proper nutrition, warmth and cleanliness. Such inattention is frequently the result of profound immaturity in the parents' ability to cope with their own emotions—a form of neglect that is passive and unintentional. Consequently, the children may show poor weight gain or loss; enlarged abdomen; severe diaper rash; skin and eye infections; and, at a later age, learning disabilities.

- **Emotional neglect** occurs when parents ignore their children's need to be held, cuddled and the like. Without this affectionate behavior, an infant's

physical, emotional and intellectual development may be stunted. Usually, most parents don't exercise emotional neglect on purpose. Rather, their behavior is a reflection of problems such as self-absorption due to depression or poor contact with reality.

"Failure to thrive" is an extreme form of emotional neglect seen in infants soon after birth. They demonstrate poor growth, particularly in weight. Initially, when infants failed to thrive, doctors suspected major disease of the heart, kidney or nervous system as the cause. But negative medical results, coupled with dramatic weight increases when a child was hospitalized and cared for, demonstrated otherwise. Thus, this failure to thrive reflects the lack of a primary child-mother bond that is critical to a child's growth and development.

- **Emotional abuse** is characterized by the willful and consistent heaping of anger, hostility, shame or rejection on a child, which can damage a child's emotional development—a child's fragile self-esteem. At times, all parents get angry with their children and sometimes lose control over these emotions. But children who feel that they are loved can handle these occasional outbursts without losing their confidence.

- **Sexual abuse** is far more rampant than imagined. More cases are being reported, and more knowledge is emerging. This abuse ranges from casual stimulation to incest. The father abusing his oldest daughter is the most common form, usually beginning when she is of school age and continuing through adolescence until the daughter decides to speak out. Also, in many cases, the mother who had functioned as the sexual partner early in the marriage, but bowed out of this role for various reasons, chooses to look aside while her husband shifts his attention to the daughter. Although such incestuous activity takes place in the home when other family members are out or asleep, they also suspect but choose to deny it. The young girls are not only abused by their fathers but are left unprotected by other family members. (NES)

More than embassy registration needed if child born overseas

Children born to American parents in foreign countries are American citizens by birth under federal law. The catch comes when and if you have to prove it.

In almost every instance, these births are registered with the U. S. embassy in the country of birth. Many parents, however, assume erroneously that no further action need be taken to establish the child's citizenship.

Registration of a child's birth with the State Department or with the American consulate or embassy overseas does not serve as absolute proof of citizenship. It does serve to record that the birth occurred.

Upon the parents' return to the states, they should apply to the nearest office of the Immigration and Naturalization Service for a certificate of citizenship for their foreign-born child or children.

This certificate, when obtained, can be used with assurance in instances where proof of citizenship is required. If your child does not have a birth certificate issued by one of the 50 states as proof of citizenship, the Certificate of Citizenship serves as that proof.

In order to obtain a certificate, parents must file a Department of Justice Form N-600, Application for Certificate of Citizenship, with the nearest immigration office.

In addition, the birth certificates and marriage certificate of both parents, child's birth certificate issued by the foreign government or the overseas U. S. government hospital, three photographs of the child and a \$10 fee must accompany the N-600 application.

If no birth certificate is available, the Department of State Form FS-240—Report of Birth Abroad—can be submitted as a substitute. The immigration

office will accept copies of this for filed with the N-600.

Persons needing additional information should contact their base leg offices. (From Air Force News Service written by Alonzo S. Westbo, Keesler Law Center, Keesler AF Miss.)

The following new additions to the Navy medical "family" have arrived at Oak Knoll:

A baby girl to LCDR David Thompson, Anesthesiology, and his wife Carol Yvonne, Dec. 10.

A baby boy to HN Rex R. Lippold, North, and his wife, Sherie, Dec. 11.

A baby girl to HM3 Reginald Robinson, USS CORAL SEA (CV-43), and his wife Mychell, Dec. 19.

A baby girl to LT Clyde Faucet, Internal Medicine, and his wife Gretchen, Dec. 27.

A baby boy to HM2 Robert A. Brandt, Fleet Hospital Support Office, and his wife Lynne, Jan. 1.

A baby girl to LT Daniel C. Brooke, Orthopedics, and his wife Theresa, Jan. 5.

A baby boy to LCDR Charles Blankenship, Surgery staff, and his wife Susan, Jan. 8.

A baby girl to HM1 Gary Silk, Photo Lab, and his wife Kaydie, Jan. 11.

DOD dependents above other students

For the sixth consecutive year, students of the Department of Defense Dependent's Schools averaged higher Scholastic Aptitude Test (SAT) score than did U. S. students nationwide.

Almost 25 percent more DoDD students chose to take the SAT in 1980-81 than took it last year, officials said.

DoDDs students scored 11 points higher than the national average on the SAT verbal test and 12 points higher on the SAT math test. DoDDs student scores also averaged higher than the national average on the majority of separate achievement tests administered as part of the College Board Admissions Testing Program and on the Test of Standard Written English, also a part of that program.

Big rummage sale to benefit museum

The Oakland Museum's White Elephant Sale, reputed to be the Bay Area's best rummage sale, will be held Feb. 27 from 9 a.m. to 4 p.m. and Feb. 28 from 11 a.m. to 4 p.m. at 1960 Embarcadero, Oakland.

Best access to the sale site is from the 5th Ave./16th Ave. exits off Highway 17. Shuttle buses will also run from 7th and Fallon Streets.

The museum association's Women's Board is already hard at work collecting used and new items of all kinds for the sale.

Donations to the rummage sale are tax-deductible and all proceeds benefit the Museum.

Dental Service offers kids' exam

The Naval Regional Medical Center's Dental Service, in conjunction with the American Dental Association, will locally sponsor Children's Dental Month in February.

The dental health program is specifically designed for dependents of active duty staff. The screening exam teaches proper dental hygiene.

The program consists of an examination, cleaning and fluoride application. Parents will also be advised of the child's future dental needs.

A movie, "Toothbrushing with Charlie Brown," will be shown for all young staff dependents on Feb. 27.

For further information, or to schedule appointments, call Ext. 2291 between 8 and 10 a.m.

Nearly 10,000 burned by hot coal, wood stoves

Coal and wood burning stoves are a major cause of burns and burn injuries are increasing.

The U. S. Consumer Product Safety Commission, which keeps tabs on injuries to adults and children caused by consumer products, says that some 8,800 people were rushed to hospital emergency rooms last year to treat burns suffered from contact with coal and wood stoves and free standing fireplaces. There were also reports of house fires triggered by improperly maintained or installed stoves.

CPSC notes that a number of accident patterns have developed since the return to popularity of the stoves:

- **Improper placement in the home.** Extremely hot flues and stoves can set fire to nearby walls, floors and furnishings. A minimum 3 ft. clearance is recommended by the National Fire Protection Association on all sides of stoves that do not carry certification by a recognized testing organization. No stove should be installed with less clearance than that recommended by the manufacturer.

- **Body contact with the stove or flue.** Aside from the obvious hazard of clothing igniting on contact with the stove, there have been reports of accidental falls against the stove itself, this resulting in painful burns. Common sense dictates all family members should stay away from the stove when it is in use.

- **Burns from using flammable liquids.** Gasoline and other volatile liquids should never be used or stored where their vapors may reach an igni-

tion source, such as the stove. Serious fires occur each year when these vapors explode in the home.

- **Improper venting.** Coal and wood require oxygen to support combustion, therefore there must be adequate venting to allow for the escape of carbon monoxide and the intake of oxygen. Proper installation and routine maintenance are important to assure proper operation of the stove; creosote buildup in the flue or chimney also increases the risk of an accidental fire. Therefore, flues should be cleaned routinely. Keep a fire extinguisher in the room in the event of a flue or chimney fire.

If you are considering installation of a stove to save energy dollars, you should contact the fire marshal in your community or city for building and fire code provisions relating to wood stoves. Products that carry certification labels from a nationally recognized testing agency would be a wise choice for the home.

Navy Relief offers help in self/family budgeting

Meeting one's basic living expenses for the essentials of food, shelter, gas and electricity is the top priority in the budget of any responsible person. However, year in, year out, Navy Relief receives more requests for help with such expenses than all other categories of assistance. Nearly \$6 million in Navy Relief interest-free loans and grants were provided to sea service personnel and their dependents for these basic living expenses in 1981. At NAS Alameda alone, the Auxiliary's assistance for such needs totaled over \$196,000.

Navy Relief understands that often the requirement for this assistance stems from circumstances beyond an individual's control, such as non-acceptance of an allotment or an unexpected PCS move. Although Disbursing is now able to pay dislocation allowance and dependent's travel allowance in advance of PCS moves to

eligible personnel, many families may require a loan for the security and/or utility deposits. Navy Relief can and does provide such assistance to individuals entitled to full BAQ, married or single, as long as the housing chosen is affordable on a continuing basis. The key question in assistance with establishing a household is affordability within a realistic budget. It would be wrong for Navy Relief to help people get in over their heads financially, and it does not.

The majority of Sailors and Marines manage their money adequately. In some cases, however, requests for assistance with basic living expenses are made because the servicemember or his spouse has spent so much of their income on their "wants" and "desires" that they cannot meet their rent or pay their utility bills. One-time assistance may be in order to prevent immediate hardship. However, the real need here is for the individual and family to control their spending to live within their income. All Navy Relief interviewers are trained to assist in personal financial management. They can and will help such persons develop a realistic budget and counsel them on how they can cope with the financial problems they have incurred through mismanagement and poor planning. It is the responsibility of the individual, however, to live within his or her means in the future.

Many prudent servicemembers take advantage of Navy Relief's knowledge of budgetary planning BEFORE their financial difficulties become so acute that they need a loan. An ounce of prevention can avoid real problems. Call the East San Francisco Bay Auxiliary office at 869-4188 for an appointment if you want to use this free service.

BEDSIDE CEREMONY—When Frances Barker (left) and Mary Paternoster (right) of Unit 10, Fleet Reserve Association Auxiliary, came out to present a \$100 donation to Kay Barnett for the hospital patients' ceramics program, they elected to make the award at the bedside of another auxiliary member, Lois Shepherd, an inpatient. Mrs. Shepherd examines one of the ceramic elephants painted by a patient while Mrs. Barnett displays the monetary gift.

How to cool your hot water

Heating the water for the average house takes about one-third of all the energy used in the dwelling.

Getting out of hot water bills is another simple energy-savings step.

If the thermostat on your water heater is set between 140°-160°, you can reduce the setting down to 110°-120° and save at least \$20 a year for electric water heaters and \$10 a year for gas water heaters.

If this change in thermostat setting produces spotty dishes in the automatic dishwasher, or if there isn't enough hot water for all the household needs, you can always turn the dial back up a little. Remember, though, the lower the setting the more money you will save.

Anybody with a screwdriver and five minutes to spare can reset the water heater thermostat.

Caution: If you are resetting an electric hot water heater, turn off the circuit breaker for the appliance before removing any plate.

At the front of most water heaters there are one or two plates held on by screws.

After you have turned off the circuit breaker, remove both plates. This is

important, since on electric water heaters, both the top and bottom control must be reset.

Push back the insulation and you will see the thermostats. They will have either numerical settings or simply the designations "high," "medium," or "low."

Reset both thermostats to 120° or "low."

Gas hot water heaters have one setting device at the bottom where the pilot light is located. This should be set in the same manner as above.

A quick energy saving fix for less than a dollar is the installation of a flow controller in the shower head. You still enjoy a comfortable shower, but you cut the flow of hot water through the shower head from five gallons a minute to about three gallons a minute. Simple to do, also. Your nearest hardware store will have a flow controller for your shower head. Back home, simply reach up, screw off the shower head, place the flow controller inside, and you have instant savings. If you have any doubts about the size needed, take the entire shower head up to the hardware store and let an expert there advise you.

What was Iran called?

WASHINGTON (NES)... Just how adept are you in current foreign affairs? Test yourself by matching the places' former names with their new names:

Old	New
1. Belgian Congo	A. Bangladesh
2. Ceylon	B. Ghana

RECORDING STARS—Lieutenant Nelson Clark (banjo) of Occupational Therapy and Lieutenant Jay Hoppus (guitar) of Pastoral Care Service teamed up to record in Nashville, Tenn., last fall. Title of the vocal/instrumental, now on the market, is "Humble Beginning," composed of Gospel music written by Chaplain Hoppus, who believes in getting across his messages through music as well as sermon.

'Fun Run' in the rain

The NRMCO "Fun Run" was held as scheduled on Dec. 19, but because of inclement weather, the race was run with no age groups, only male/female categories.

Top finishers were:

Five Miles (Males): Paul Farrier, first, 22:15; Randy Guzman, second, 23:50; J.P. Brown, third, 24:09, followed by Richard Kline and Frank Cruice, in that order.

Five Miles (Females): Susan Coligan first, Rose Blake, second.

Two Miles (Males): Paul Farrier, first; A.K. Brown and Ben Franklin, tied for second; Richard Kline, third.

Two Miles (Females): Susan Coligan first, Rose Blake, second.

All participants received T-shirts and trophies will be awarded to the top runners soon.

The planning committee expresses

particular thanks to HMCM Albert Y. Marumoto of Special Services, and timers HM1 Gerald Koltes, RP2 Brian Carroll, HM3 S.L. Stevenson, HM3 Kim Broomall and HN K. L. Rivers.

Beam returns to the Porthole

Returning by popular demand to the Porthole, the enlisted club on base, is Ray Beam, a hypnotist of international acclaim. He is to appear only for tonight.

Beam combines the unusual and the humorous in his act, using only volunteers from the audience as his subjects in a tasteful and safe manner. He is reputed to be a leading authority on the scientific use of hypnosis.

National Prayer Breakfast to be observed at hospital

The National Prayer Breakfast will be observed locally on Feb. 12 at 7 a.m. in the hospital's third floor main dining room. Plans for a special guest speaker are underway but a commitment has

not yet been made, a Pastoral Care Service spokesman said, adding that more information will be forthcoming.

All hands are invited to attend the breakfast. Tickets may be purchased at normal prices from the cashier. Attendees are encouraged to go through the food line and then to the designated eating area.

The National Prayer Breakfast is sponsored by the U.S. Senate and House prayer groups. The purpose of the occasion is to bring together the leadership of the United States in recognition of the moral and spiritual values upon which our nation is founded. In 1953, members of the Senate and House prayer groups established, with President Eisenhower, the first Presidential Prayer Breakfast. The 1982 breakfast marks the 29th anniversary of the event that has taken place each year since 1953. The President, Vice President, the Cabinet, members of the Senate and House of Representatives, the Supreme Court, government officials, military leaders and others from across the nation usually attend.

Navy sledders national champs

On Jan. 3, the U.S. Navy team won the national championship for four-man bobsleds on the mile-long Mount Van Hoevenberg run at Lake Placid, N.Y. The team of driver BM1 Bill Ren-ton (from Commander Naval Special Warfare Group Two), BM2 Steve Clayton, USS HOIST (ARS 40), DP3 Wayne DeAtley, USS PIEDMONT (AD 17), and BM2 Carl Flanagan, Seal Team Two, sustained speeds of nearly 60 miles per hour through the four heats

of competition to finish with a total time of 4:05.90.

In a related story, JO3 Donna Burke, attached to Navy Internal Relations Activity, Washington, D.C., was named Amateur Athlete of the Year for the sport of luge (similar to one-man bobsledding) by the U.S. Olympic Committee. JO3 Burke was nominated for the award by the U.S. Luge Federation after capturing the National Women's Luge Championship in 1981.

Marine World's 30% discount

Marine World's company discount program, formerly known as the Seafari Club, is taking on a new name, the "Wild Card Club." The cards are now available in Special Services on base.

As a special introduction, Marine World is offering a full 30 percent discount on admission to the park for the first three months of the campaign (weekends through March 28). That's a savings of \$2.70 for adults and \$1.95 for children and twice the nor-

mal Wild Card discount of 15 percent.

In addition to the "Double Your Discount" offer, the new Wild Card also entitles personnel to a 20 percent discount on photo finishing at all Northridge California Fotomat stores, and special rates on meals at all participating California restaurants.

According to Sally Young of Special Services, this is a very good price at a time when the park is not crowded.

Cats like rain

The East Bay Regional Park District reports that the recent severe storms have hampered trout fishing success in Lake Chabot (Castro Valley), but have improved catfishing action.

The rain brings up worms from the soil and those are washed into the lake. This seems to have started a feeding frenzy among the cats. A 10 lb. and 11 lb. catfish recently took honors, with many limits of smaller fish (1-2 lb.) being taken from shore in the base cove area of the lake.

Best bait is chicken livers for the larger fish, with the nightcrawlers being more effective for the pan-sized fish.

Jewish retreat set by CREDO

Jewish personnel and adult dependents are eligible to attend the Jan. 29-31 Jewish Spirituality Retreat sponsored by the Chaplain's Religious Enrichment and Development Operation (CREDO).

The retreat, led by Chaplain Bernard Frankel, will emphasize the meaning of Jewish identity through the media of Jewish worship, sabbath observance, study, recreation and fellowship. There is no cost for military members or dependents.

A bus will convey attendees from CREDO House San Diego on Harbor Drive, across from the B Street Pier, to the retreat site in Julian, Calif., at 1 p.m. Friday (Jan. 29) and return at 3 p.m. the following Sunday.

It is important that interested personnel phone CREDO for reservations as soon as possible at (714) 235-3621 or Autovon 958-3621.

TESTING—Senior Gunner's Mate Chief Ronald W. Kitterman (earphones) is checked by Dr. Charles E. Fankhauser 12 days after the senior chief had surgery here to remove a large tumor on the hearing nerve of one ear.

Brain waves monitored during neuroma removal

In what local physicians believe to be the first attempt at a federal hospital, an Oak Knoll surgical team recently removed a large tumor on the hearing nerve of a patient while monitoring brain wave response on a comparatively new measuring device.

Senior Gunner's Mate Chief Ronald W. Kitterman, 41, of the Strategic Weapons Facility, Bangor, Wash., and a 22-year Navy veteran, lost the hearing in one ear nine years ago and was losing function of the other from a rapidly growing, but benign, acoustic neuroma.

Although the Jan. 13 removal of the tumor was successful, his hearing was not spared, largely due to the size of the growth, specialists said. According to a staff otolaryngologist, the senior chief would have become deaf within four months if the operation had not been performed, adding there was also a strong possibility that the tumor

would eventually cause death.

The procedure was done in a combined approach by the Neurosurgery and Otolaryngology (Head and Neck Surgery) departments, with Dr. Charles E. Fankhauser, Chief of Audiology, doing intraoperative monitoring of brain wave response to an auditory stimulus in the operated ear. Capability of performing this type of procedure with monitoring of the patient is found in only three Northern California hospitals, and less than 20 hospitals nationwide, the otolaryngologist said. "It is hoped that this will be the beginning of an increasingly more successful series of procedures of this type," he declared.

Senior Chief Kitterman expects a medical discharge from the service. He is already learning sign language and has entered a rehabilitation program.

LOOK FOR THE SUN—Medical Corps Lieutenant Commander William Runyon displays a poster carrying the logo of the *StayWell* program. Watch for these sunshine posters around the hospital for announcing monthly programs.

R. C. Owens, speaker

Breakfast date changed

As they say in football, we've had to call an "audible" at the line!

In other words, change the original call. The National Prayer Breakfast will now be observed here **Thursday, the 11th of February**, vice the 12th, as previously announced. The event will be held in the Main Dining Room of the hospital and all other information remains the same.

It is our good fortune this year to have **R.C. Owens** from the **World Champion San Francisco Forty-Niners** as guest speaker. R.C. was a wide receiver for the "Niners" who

gained fame for his reception of many clutch, "alley-oop" passes. Currently his job is Special Assistant for Forty-Niner Public Relations. He will show a film entitled "Making the Extra Effort" (which evidently made the difference this year for the Niners).

Check the Plan of the Day and bulletin boards for additional biographical information.

All hands are invited to attend. Tickets may be purchased at normal prices from the cashier. Attendees then go through the food line and proceed to the eating area.

DOD VISITOR—Army Major General William S. Augerson (right), Deputy Assistant Secretary of Defense for Health Policy and Planning Systems, is met upon his arrival at Oak Knoll last week by Lieutenant Alan Kay of Management Information Service. The major general, accompanied by several other staff members from his Washington office, paid an informal visit to review the recent installation of the TRILAB system at Naval Regional Medical Center Oakland.

GIFT—Captain Richard W. Poley (left), Chief of Laboratory Service, receives the gift of a coffemaker for the new blood donor center from HMCM Charles Dackerman and HMC Rose Percival, representing the Chief Petty Officers Association of the command.

Something new under the sun

An enthusiastic crowd almost filled the Clinical Assembly to help launch the medical center's new *StayWell* program on Jan. 21.

Dr. William Runyon, Chief of Primary Care and Emergency Services, and director for the program, geared his presentation, "The Road to Health—Which Way Do I Turn?" toward our major health problems and the role of individual responsibility.

He addressed such problems as alcohol and tobacco abuse, obesity, stress and safety hazards, among many other health threats that we may face as individuals. He cited how only 10 percent of our health care is obtained through formal medical provisions such as hospitals, doctors, nurses

EDITORIAL

SECURITY is an ALL-HANDS job!

By MAC Edward Sharp

"3-1, this is 3-2... 10-19, Fourth Deck, Code 145."

Does that phrase sound familiar? Expressed in plain language it tells of another sailor falling victim to a theft. There were more than 130 such calls voiced by Security last year. Once every three days a theft occurs within the hospital... and these are just the ones reported.

The responsibility for safeguarding government property is an **ALL-HANDS JOB**. Do not lose sight of the fact that the Security Division is comprised of fellow sailors—Hospital Corpsmen, Signalmen, Machinist's Mates, Masters-At-Arms—and hold no special answers to your problems. So before you say, "I don't want to get involved," "It's not my job," etc., you should remember that YOU took the same oath of enlistment as the Security patrolman (sailor).

Security Patrolmen are frequently challenged by personnel as to their status and purpose in the hospital. However it seems that often a complete stranger can wander

aimlessly, unchallenged or questioned. Everyone "assumes" the stranger belongs there. You can be assured a thief knows precisely where he's going and what he is looking for. The stranger that goes unchallenged may also go with your paycheck, watch, rings and credit cards in his possession.

Let's assume some technical equipment is taken from the hospital. How can you provide quality patient care (our mission) without the proper medical tools? You can't! Don't let an attitude of "not my job" cripple your effectiveness. There will always be a need for Security Patrolmen as long as other personnel show no concern or responsibility in helping to prevent crime, large or small. If you are not a part of the preventive solution toward crime prevention, then YOU are definitely a part of the problem.

The bottom line is "Security is an all-hands job!" Be aware, or beware! Take charge of your surroundings and help your shipmates who wear badges.

A grateful family says 'thanks'

The wee one seeming to wave "hi" at right is Erin Jean Silk. She was born Jan. 11 at 4 lbs. 2 oz., seven weeks early.

She wouldn't be here today if it weren't for a lot of people in this hospital to help us through the whole ordeal.

We really don't know how to thank all of these people for everything they did, and a single box of candy just doesn't seem appropriate. We are hoping that this will let each of them know that we thank God each day that they were here when we needed them.

It would be impossible to list each by name, but we would like to thank all of the obstetricians, all the nurses and staff members on 8 West, the staffs of the labor deck, the operating room, recovery, ICU—and above all—the pediatricians and nursery staff who pulled Erin through the roughest first weeks of her life.

Each and every one of these people have been kind and gentle to all

of us. We will never forget how they touched our lives in their individual ways. We thank them so very much.

Garry, Kaydie, Erika and Erin Silk

A real 'pro' shows leadership

By JO2 Jeff Wooddell

Professionalism is not an outdated word these days. With the current interest in the wearing of the uniform and personal appearance, it's being used more and more to describe today's sailors.

Professionalism is defined as "engaging in worthy standards, pursuing an activity in an intensive, calculating manner," and it's up to petty officers to make every effort to live up to that definition. The young sailor whose goal is to become a part of this profession can certainly expect increases in pay and allowances as well as additional privileges. But before this first milestone can be reached, he or she must be willing to accept an equal share of the responsibility for upholding the high standards of tradition, pride and professionalism of which Navy members can be proud.

Rapid technological and social changes have complicated the leadership role of the petty officer through the complexity of the tasks and skills that must be mastered in order to perform duties effectively, and the various attributes, attitudes and values that have been created by those changes over a period of 20 years.

You, as a petty officer, must demonstrate to your fellow service members that you are a qualified leader—competent in all phases of your responsibilities. Service members expect answers—rank alone no longer ensures automatic respect and admiration. When accepting this important position, it is essential that the new petty officer be watchful of his or her conduct, exemplary in the performance of duty and ever mindful of the important roles that he or she performs as leader, trainer and supervisor.

Leadership is the ability to teach, to inspire and to get the job done.

But no one can become an effective leader unless one is cognizant of his or her capabilities and limitations. So become more aware of your strong and weak points, then take steps to increase the strong ones and diminish the weak. If you need more education, go back to school. If you're handicapped in the proper way of handling people, talk to some of your senior petty officers to find out how they developed their leadership skills. Becoming a petty officer demands many personal sacrifices and much hard work. The desired result is total devotion to duty, and once these achievements are locked into a petty officer's performance, he or she can then add that fourth credential to being a leader, a trainer and a supervisor—a professional (NES)

Our patients write...

I wish to commend Dr. Peter Fern for the care and consideration he extends to his patients.

I first saw Dr. Fern in the summer of 1979. He quickly calmed me, banishing all my fears, and impressing me so very much with his medical proficiency the fears did not recur. I saw him that fall and he again impressed me with his medical competence and his caring about the patient. I then requested Dr. Fern for my annual examinations in 1980 and 1981 and he performed his routine procedures with a thoroughness unknown to me in prior years.

During these three years I have witnessed the professional growth of Dr. Fern, his increased self-confidence, and his maturity in the medical field. It must reflect the inspiration of his superiors to achieve goals within the Navy system as well as considerable effort by Dr. Fern.

I hope the Navy continues to recruit, train and retain doctors of the caliber of Dr. Fern.

Thelma S. Prescott
Sanger

...

I wish to express my gratitude to the doctors and corpsmen in ICU for all they did for my brother, Harold Von Gross. Especially I wish to commend Corpsman Phillip Tevlin who was on duty the day my brother passed away.

Phillip was more than professional—he was compassionate and truly caring. Having him present during those long hours was a great comfort to me. I know Harold could not have received better care than Phillip provided.

Susanne Lynch

...

I have just been released from this facility as fit for duty after surgery. I would like to take this time to sincerely thank the General Surgery Blue team headed by Dr. Traquina.

I wish to especially commend Dr. Upton who performed the surgery and made this fearful time for me a calm experience and assured my daughter of a normal recovery for me.

I can't forget Dr. Day, the wonderful anesthesiologist, and the feeling of caring as expressed by Mrs. Oller and an unknown person as I was prepared for surgery.

I am an employee of this hospital and I am so grateful to the civilian workers here who were "family" during my stay.

Gladys T. Mitchell

Former Navy chaplain dies

Services were held Jan. 20 in St. Luke's Chapel on base for retired Navy chaplain Ralph Caldwell, once chief

Chaplain Ralph Caldwell

chaplain at Oak Knoll. Interment followed two days later with full military honors at Arlington National Cemetery.

The chaplain died suddenly during a scuffle when he went to aid a neighbor grappling with youths apparently stealing gasoline.

Chaplain Caldwell, 58, was on the Oakland staff from September 1964 to September 1965, and again from April 1971 to January 1973. Following his Navy retirement he served as chaplain of Alameda County's Santa Rita jail.

He is survived by his wife June, five children, Courtney, Jeffrey, Jennifer, Christina and Meg, and three granddaughters. The family home has been in Pleasanton.

Graduation soon for PMT students

Twenty-three members of Class No. 96 Preventive Medicine Technician School will graduate in ceremonies scheduled to be held in the Clinical Assembly at 9 a.m., Feb. 19.

As of this writing, neither the class spokesman nor valedictorian had yet been selected.

Graduates, and their new duty stations are:

HM3 James L. Burrell, National Naval Medical Center, Bethesda; HMC Michael E. Cantatore, U.S. Coast Guard Training Center, Government Island, Alameda; HM3 Allen B. Chackman, NRMCC Quantico, Va.; HM3 Frank J. Cruise, Naval Submarine Center, Groton, Conn.; HM3 Cynthia J. Dixon, NRMCC San Diego; HM3 Michael Evans, NRMCC Long Beach; HM3 David A. Forde, Naval Support Facility, Diego Garcia; and HM3 Robert S. Harrington, Naval Hospital, Bremerton, Wash.

Also, HM2 Treneater C. Horton, NRMCC Pearl Harbor, Haw.; HM3 Norma M. Kropelnicki, NRMCC Great Lakes, Ill.; HM2 Carl J. Lindemann, Branch Clinic, El Centro, Calif.; HM3 Jerry W. Lombardi, USS GUADALCANAL, homeported in Norfolk, Va.; HMC Richard E. Miller, NRMCC Okinawa, Japan; HM3 Arthur E. Mitchell, Disease Vector Ecology and Control Center, Alameda; HM1 Ronald C. Rhodes, USS SARATOGA, homeported in Mayport, Fla.; and HM1 Terry R. Roscoe, NRMCC Quantico, Va.

Also, HM3 Clarence Sims, USS LAND, homeported in Norfolk, Va.; HM1 Berwin J. Slusarczyk, Naval Air Station, Dallas, Tex.; HM3 Christopher M. Stainbrook, NRMCC Camp Pendleton, Calif.; HM3 Gregory E. Stephens, NRMCC Orlando, Fla.; HM3 William D. Threet, NRMCC Oakland; HM3 Zigfrid R. Tomsons, Branch Clinic, Lakehurst, N.J.; and HM2 Jerry L. Vernon, Combined Arms Center, Twenty-Nine Palms, Calif.

Suspects held in drug caper

Three days after the Jan. 16 incident when two thieves burst into an Oak Knoll operating room, stole drugs and other items and held five staff members captive, one suspect was captured. Two days later, the other one was taken into custody and most of the drugs recovered.

Both suspects are active duty Navy personnel and are being held in the brig on Treasure Island awaiting trial. Most regretfully, one is a junior corpsman and a member of the hospital staff.

The U.S. Naval Investigative Service, aided by the Federal Bureau of Investigation and state and local law enforcement agencies, promptly and easily apprehended the two men. Principal NIS investigator was Special Agent Andy Higgins of the Alameda office.

The doctor, nurse and three corpsmen tied up during a two-hour ransacking of drug cabinets and offices in the operating suite on the fourth deck were reportedly shaken, but unharmed.

CNO commends salvage workers

Navy personnel from a number of commands assisted with salvage operations of a commercial jetliner which crashed into the Potomac River during takeoff from a Washington, D.C. airport Jan. 13.

After visiting the salvage site, Admiral Thomas B. Hayward, Chief of Naval Operations said, "I am very proud of the tremendous job our Navy divers are doing. With below-freezing temperatures hampering the recovery effort, they are working under almost impossible circumstances, but they are pros. They are doing a remarkable job. I have the greatest admiration for their courage, skill and stamina, and I couldn't be prouder of them."

CARRIER WIVES DONATE—Mrs. Sandra Stevens, on behalf of the USS CORAL SEA Officers' Wives' Club, made a recent presentation of a videotape recorder to the Pediatrics Service at Naval Regional Medical Center Oakland for the children's ward on 7 East. The equipment will be used to show special children's TV programs to young patients. Receiving the gift are Captain Harold Koenig (left), Chairman of Pediatrics Service, and Nurse Corps Lieutenant Commander David Becker of the same department.

(Continued from Page 1)

and prescription medications; and that 90 percent of our health care is the result of personal health habits or behavior. "So why not learn the best behavior?" Runyon asked his audience.

The lecture introduced the *StayWell* program as a means of health promotion by providing more complete and sound health education for each individual. Emphasis was placed on the importance of each person understanding the motivation for his good and bad health behavior.

Future plans for the *StayWell* program include lectures on the third Thursday of each month, movies, instructional packets, newsletters, problem-oriented courses or workshops (for weight control, stopping smoking, dealing with stress, etc.), and other offerings as the program develops.

On Feb. 18, Lieutenant Michael McDonald, Chief of Outpatient Administration, will address the problem of gaining access to services offered by the hospital, a look at how to use health care services to best advantage. "Silent Countdown," a 35-minute award-winning film feature with Ben Gazzara, will be offered on Feb. 25 in several showings, addressing the ubiquitous problem of high blood pressure.

Dr. Runyon closed the first presentation by encouraging everyone to look for the *StayWell* program logo of the rising sun, which will mark all program offerings and announcements in the future. The audience left with the

challenge of controlling 90 percent of their own health, a personal responsibility the *StayWell* program hopes to promote.

Gaining commands to get fast notice

A new "orders notification" letter developed by the Chief of Navy Technical Training will enhance Navy sponsorship efforts beginning this month by ensuring that ultimate duty stations receive adequate notice of a service member's transfer from service school and training commands.

The orders notification letter will be mailed to the receiving command the day after orders are transmitted electronically, with enough information to enable a sponsor to be assigned to assist the member prior to arrival.

Training commands formerly received orders electronically by a "standard transfer directive module." Individuals were transferred so rapidly in this system that their ultimate commands had not always received notification prior to their arrival onboard.

Civilian job applications sought

Civilian Personnel Service is receiving applications for the following positions, located either at Naval Regional Medical Center Oakland and/or its branch clinic(s)

Job	Grade	Location	Closing Date
Licensed Vocational Nurse	GS-3/4/5	NRMCC Oakland and branch clinics	July 12
Laundry Worker (temporary)	WG-1	NRMCC Oakland	July 12
File and Medical Clerks	GS-3	NRMCC Oakland and branch clinics	July 12
Clinical Nurse	GS-5/7/9	NRMCC Oakland and branch clinics	July 12
Medical Clerk	GS-4	NRMCC Oakland	July 12
Housekeeping Aid	WG-1	NRMCC Oakland	July 12
Secretary (Stenography)	GS-5	Moffett Br. Clinic	Feb. 8
Supply Clerk (Typing)	GS-5	NRMCC Oakland	Feb. 16
Word Processing	GS-6/7	NRMCC Oakland	Feb. 16
System Project Planner			
Pharmacy Technician	GS-5	NRMCC Oakland	Feb. 8

For more information on any of the above openings, call Ext. 2116.

THE WAY HE IS—The young sailor pictured in the last issue was Captain Philip J. Vogt 25 years ago. Today Dr. Vogt is Assistant Chairman of Laboratory Service at Oak Knoll and has been on the staff nearly 10 years. Dr. Vogt obtained his M.D. from the University of Wisconsin and is board certified in anatomic and clinical pathology. Before his assignment here he served aboard USS SANCTUARY (AH-17).

X-Ray students complete course

A ceremony was held in the office of the Commanding Officer on Jan. 22 for the only two graduates of Class 82-001, Basix X-Ray School.

Honorpersion was Hospital Corpsman Second Class James W. Hunsinger who has been transferred for new duty at Naval Hospital, Lemoore, Calif.

The second graduate was Tawana J. Givens, who has been transferred to Naval Hospital, Patuxent River, Md.

ADA head visits

Dr. Oscar Crofford, President of the American Diabetes Association, visited Naval Regional Medical Center Oakland Jan. 15-16 as the guest of Captain Steve Lewis and the Clinical Investigation Center staff.

Dr. Crofford was also the principal speaker at Medical Grand Rounds on Jan. 16.

Naval reservists under consideration for commodore rank

The FY83 promotion selection boards, to recommend Naval Reserve inactive duty and TAR officers serving in the permanent grade of captain for permanent promotion to the grade of commodore, will convene Feb. 22.

The following officers, among those to be considered, are the senior and junior officers in the promotion zone and junior officer eligible for consideration for promotion as of Jan. 22. Officers serving in the permanent grade of captain who are in the same competitive category and are senior to the junior indicated for their respective competitive category, are eligible for consideration for promotion to commodore.

Inactive Dental Corps (220X)

Senior in zone: Captain A. Lewandowski, junior in zone: Captain J.M. Studdard, junior eligible: Captain E. J. O'Shea.

Inactive Medical Corps (210X)

Senior in zone: Captain W.G. Podolsky; junior in zone: Captain P.L. Black, junior eligible: Captain N.G. Pare.

AFEES renamed MEPS

The AFEES (Armed Forces Examining and Entrance Stations) are no more; they are now called Military Enlistment Processing Stations (MEPS).

The New Year name change came as a result of confusion of the old name with that of the Army and Air Force Exchange Service (AAFES) and as a gesture to more closely identify the centers with their parent command, the Military Enlistment Processing Command (MEPCOM).

The 67 processing stations, scattered throughout the U. S. and its territories, conduct aptitude testing, medical exams and administrative processing for persons enlisting in all the armed services. The AFEES were originally part of the U. S. Army Recruiting Command, but split from it in 1976, becoming a separate command in 1979, with headquarters at Fort Sheridan, Ill. The command is rotated among officers of the Army, Navy, Air Force and Marine Corps.

The command is staffed by civilians and military of all the services, for a total of 2,900 personnel. This work force conducted some 2.2 million aptitude tests last fiscal year and processed some 770,000 enlistees.

The command is divided into three regions: East, Central and West MEPCOM, the last having its headquarters at Oakland Army Base.

Under Navy Commander Jerry F. Morrison, and with the assistance of 60 military and civilians, West MEPCOM headquarters controls 20 MEPS in 15 western states, spread from Houston, Tex., to Honolulu, as well as two substations, one in Guam and another in Alaska.

Four of the MEPS are in California: in San Diego, Los Angeles, Fresno and on Clay Street here in Oakland.

The Oakland MEPS, under the command of Marine Corps Lieutenant Colonel Jack F. Hansston, has 49 military and 25 civilian employees. Last fiscal year, they administratively processed the enlistments of 12,307 individuals entering all four services.

Small but important, this "purple suit outfit" insures that men and women entering the armed forces are processed into the ranks in a cost-effective fashion with a minimum of duplication of effort. (Reprinted with permission from *Western Arrow*.)

BRIEFING—Medical Corps Rear Admiral A.C. Wilson, Project Manager for Fleet Hospital program, briefs military and civilian staff at the medical center during a Clinical Assembly on Jan. 18. The speaker conducted a two-hour program discussing contingency planning, fleet orientation and medical support.

Pass in Review

By HM2 Charles M. Frye

HM2 Gregory Leavitt
Discipline Petty Officer

*Now these are the laws of the Navy
Unwritten and varied they be
And he that is wise will observe them,
Going down in his ship to the sea.
As the wave rises clear to the hawse
pipe,*

*Washes aft, and is lost in the wake,
So shall ye drop astern, all unheeded,
Such times as the law ye forsake.
Now these are the laws of the Navy,
And many and mighty are they.*

*But the hull and the deck and the keel
And the truck of the law is—OBEY.
—Admiral Ronald Hopwood, Royal Navy*

According to the Master-at-Arms training manual "Discipline is considered to be that attribute of a military organization which enables it to function in a coordinated manner under different circumstances. Many factors contribute to the building of a well disciplined organization. One of the instruments for achieving a high state of discipline is military law."

Master-at-Arms Chief Edward Sharp and his staff of the Security Branch of Operating Management Service are tasked with enforcing these laws and the many functions related to base security. One division of the Security department is the Discipline

Section, which is responsible for processing report chits. This includes receiving the chit, notifying the individual that a report has been received on him, making an investigation, interviewing the complainant, and processing the chit through appropriate channels.

At Naval Regional Medical Center Oakland, Hospital Corpsman Second Class Gregory S. Leavitt is the Discipline Petty Officer. Although the duties of his office bring him into contact with others under adverse circumstances he uses that contact in a positive manner. He may counsel the individual, suggest alternative methods to handle stress (rather than going UA), or just advise an individual of the procedures that will take place.

"Not everyone we come in contact with is looking for an easy way out," he said. "Some realize that they have made a mistake and are willing to suffer the consequences. Our department avoids typecasting individuals and treats each case on its own merits." Petty Officer Leavitt encourages departments to handle minor infractions on that level, however, commenting that there are those individuals who leave a department no alternative but to submit a report chit. Although his job is a difficult one, he is still able to receive "satisfaction by helping others."

Petty Officer Leavitt recently married the former Bonita Ela, who was stationed at this command until her departure to Aerospace Medicine Technician School and her subsequent assignment to Norfolk, Va. He is currently trying to get orders to the east coast to be near his wife.

Leavitt has been in the Navy for 10 years and originally was a Boatswain's Mate. He has served on two aircraft carriers, the USS CORAL SEA and the USS ENTERPRISE. He changed to the corpsman rating after developing an interest in the medical field. He has been awarded the Vietnam Service, Vietnam Campaign, Humanitarian Service, National Defense, Navy Marksman, and Good Conduct medals. He has also received Sea Service Battle Efficiency ribbons and the Navy Unit Citation. He enjoys weightlifting and gymnastics and hopes to complete 20 years in the military.

LCDR Criscitiello accepted by ACHA

Lieutenant Commander Joseph J. Criscitiello, Chief, Operating Management Service, has been admitted to nomineehip in the American College of Hospital Administrators, according to a recent announcement made by Stuart A. Wesbury, Jr., Ph.D., President of the Chicago-based professional society.

In his new affiliation, the Navy Medical Service Corps officer will join a personal membership organization comprised of the leading chief executive officers and their administrative colleagues serving hospitals and health service facilities in the United States, Canada, and other countries.

The American College of Hospital Administrators, founded in 1933, is dedicated to the provision of quality patient care through competent administration of hospitals and health service facilities. Toward this objective, ACHA conducts a comprehensive professional education program focusing on all facets of the managerial process.

Membership in ACHA consists of three categories: Nomineehip, Membership, and Fellowship. To advance in status, an affiliate must pass a

stringent written and oral examination and also contribute to the health field's literature by writing a thesis or case report.

In addition, the society publishes the major professional journal serving the broad health service field and periodically issues task force reports and monographs on topics pertinent to health service delivery.

LCDR Criscitiello holds a bachelor's degree in health care administration and is currently working toward a master's in management.

Red Cross office closes for lunch

New operating hours of the Red Cross office at Oak Knoll are 8 a.m. to noon, and 1 to 4 p.m., Monday through Friday. The office will be closed and locked during the lunch hour from noon to 1 p.m.

Those desiring emergency service from the Red Cross during weekends or after duty hours are encouraged to call the Officer of the Day Desk at Ext. 2411, or the answering service at 834-6656.

Comings and Goings -----

"Fair winds and following seas" to the following personnel who have recently departed this command:

Medical Corps Lieutenant Commander James Pitts, to Okinawa

Medical Corps Lieutenant Jeffrey Kneisl, to USS VANCOUVER

Hospital Apprentice Malcolm Mundy, released from active duty

Hospital Corpsman Third Class Donald Burwell, released from active duty

Hospital Corpsman Second Class Donald Pierron, released from active duty

Hospital Corpsman Third Class Terry A. Bogard, to NRMOC Okinawa

Hospital Corpsman Second Class Glen Leunbury, to NRMOC Subic Bay

Hospitalman Douglas L. Williams, to Camp Pendleton, Calif.

Dental Technician Third Class Luma Warnecke, released from active duty

Lieutenant (junior grade) Robert Haffner, to USS RANGER

Hospital Corpsman Third Class Rene Garcia, released from active duty

Hospital Corpsman Third Class Catherine Roberge, released from active duty

Hospitalman Armidee Mack, to Camp Lejeune, N.C.

Dental Technician Second Class Ronnie McGhee, released from active duty

Boiler Technician Michael Hamilton, to USS DIXON

Hospitalman Tawan Givens, to NRMOC Patuxent River, Md.

Hospital Corpsman Second Class James Hunsinger, to Lemoore, Calif.

Hospitalman Jeff Scott, to Ft. Sam Houston, Tex.

Hospitalman Alice Arredondo, to Ft. Sam Houston, Tex.

Interior Communications Electrician Second Class Keith Hammer, to USS MARS

Lieutenant Commander Robert Murphy, to NRMOC Long Beach, Calif.

Hospitalman John L. Bredon, to Camp Pendleton, Calif.

Hospitalman Karen Cox, to Japan.

"Welcome aboard" to newly arrived:

Ensign Michael Watkins, Nurse Corps

Ensign Karen Lundgren, Nurse Corps

Lieutenant (junior grade) Kevin Marty, Nurse Corps

Lieutenant (junior grade) Aurella Caulthirst, Nurse Corps

Lieutenant Stephen Lindsey, Nurse Corps

Ensign Stanley Higgins, Clinical Clerk

Lieutenant Debra Parker, Nurse Corps

Lieutenant Tima Roemer, Nurse Corps

Lieutenant Dennis Jordan, Nurse Corps

Lieutenant Deborah Farrard, Nurse Corps

Lieutenant Sharon Figg, Nurse Corps

Lieutenant Commander Carol Riddell, Nurse Corps

Hospital Corpsman Second Class Terry Cummings

Hospitalman Ralph Albie, OR School

Hospitalman Susan Albie, Nursing Service

Hospital Recruit Zenada Poage, Nursing Service

Hospital Corpsman Third Class Karen J. Mauro, Psychiatry

Lieutenant Deborah Bane, Nursing Service

Hospitalman Charlene Dawson, Nursing Service

Dentalman Clay Davis, Dental Service

Hospitalman Juan Escudero, Nursing Service

Hospital Recruit Raymond Fernandez, Nursing Service

Dental Recruit Valerie J. Barbrauld, Dental Service

Hospital Corpsman Second Class Lee Ray, Medical Repair

Hospitalman Jack Means, Nursing Service

Lieutenant Don R. Pearson, Anesthesiology

Kudos.....

NAVY ACHIEVEMENT AWARD

INTERN CERTIFICATE
Lieutenant Jeffrey Kneisl, Medical Corps

Navy daughter now in uniform

Although she's relatively new to Navy service, Hospital Apprentice Jennifer A. Tate, as the daughter of two Navy parents, is not exactly unfamiliar with it.

Jennifer, 19, is the daughter of Tactical Nuclear Warfare Commander, William Tate, now on duty in Washington, D.C. Her mother Judith, who now teaches school in Virginia, was once a Navy journalist stationed at Treasure Island.

The young corpsman who has been wearing Navy blue for six months, is currently awaiting a March seat in the Operating Room Technician School here. In the meantime, she is working in the Command Career Counselor's Office.

After her first hitch, Jennifer hopes to get a degree in nursing, become a nurse anesthetist, and come back into the Navy in the Nurse Corps.

Back in her hometown of Springfield, Va., she taught gymnastics in the community and was also a camp counselor. She swims and/or runs every day for exercise, and enjoys soccer, football and softball "for fun."

Jennifer's other off-duty interest is playing the guitar.

HA Jennifer Tate

Gene Helmuth to retire

Oak Knoll will lose one of its most skilled craftsmen on Feb. 15 when Gene R. Helmuth retires after 33 years service.

Modelmaker Helmuth, who works in the Prosthetics Laboratory and custom builds artificial knee and other mechanical joints for amputees, has also built and/or modified medical equipment during the 31 years he has been employed at Naval Regional Medical Center Oakland. Other civil service was with the Naval Supply Center in Oakland.

Gene served in the U.S. Army's 69th Infantry Division for 18 months of World War II. He earned a Purple Heart and lost a leg in the Battle of the Bulge in Germany (1944-45).

Released from the Army, he took apprenticeship training for six years

with a logging truck manufacturer before being employed at the supply center as an automotive machinist.

Born in Oakland and a graduate of Fremont High School, Gene and his wife Greta will make their retirement home in a condominium they own in Lakeport. She, too, is retiring from her job as a medical transcriptionist with Eden Hospital in Castro Valley. The couple has three grown children and one granddaughter.

Gene and Greta, who also own a motor home, plan to travel. Gene says he will join a health club, "swim every day; take an English course at nearby Mendocino College, and study automotive electronics."

The Helmuths will be honored in a Sayonara Party at the Porthole on the evening of Feb. 12.

Taylor new head of school

Lieutenant Commander Michael A. Taylor assumed the duties of Director, Basic X-Ray School in mid-January,

Krevans vs. Sooy

Julius R. Krevans, MD, dean of the UC-San Francisco School of Medicine for the past 10 years, has been appointed as the fifth chancellor of the UC-San Francisco campus.

He will succeed Francis A. Sooy, MD, who announced last summer that he would resign effective July 1, after serving 10 years as chancellor, in order to devote more time to his medical practice.

Krevans served as the 1980-81 chairman of the Association of American Medical Colleges, helping develop public policy for the organization which represents 126 medical schools, some 400 teaching hospitals and 80 professional societies. Additionally, he has served on boards and committees of numerous national foundations, government agencies and organizations, including the American Board of Internal Medicine.

relieving Lieutenant Commander Karl Mendenhall who was transferred to the National Navy Medical Center at Bethesda.

Lieutenant Commander Taylor is a radiation physicist and the administrative assistant to Chief of Radiology Service. He acts as director of the school in one of his several collateral duties.

The school celebrated its second year of operation in January, and Mr. Taylor becomes its third director.

RADM Gorsuch receives medal

The Secretary of the Navy recently awarded the Legion of Merit to Rear Admiral George E. Gorsuch, MC, USN, for his outstanding service while commanding Naval Regional Medical Center, Portsmouth, Va., August 1978 to July 1981.

Rear Admiral Gorsuch is currently the Deputy Surgeon General of the Navy.

Dietary fat in heart disease subject for SF symposium

Recent advances in the understanding of cholesterol metabolism, the role of diet in heart disease, and diagnosis and treatment of hyperlipidemia (elevated blood cholesterol and fatty acids) will be discussed at a Feb. 18 symposium co-sponsored by the UC-San Francisco Gladstone Foundation Laboratories for Cardiovascular Disease and the S. F. Chapter of the American Heart Association. Entitled "Coronary Artery Heart Disease: Hyperlipidemia and Its Management," it will be held at the Mark Hopkins Hotel from 12:30-5 p.m.

Designed for practicing physicians, the symposium features experts who bring the latest knowledge from clinical studies, epidemiology and basic medical research.

The symposium fee is \$35. Physicians may claim up to three hours of Category I credit toward the California Medical Association Certificate in Continuing Medical Education. To register contact Ms. Kari Olila, American Heart Association, San Francisco Chapter, 421 Powell Ave., San Francisco 94102, 415/433-2273.

ACLS courses to be offered here

A new schedule of Advanced Cardiac Life Support (ACLS) courses has been announced by Lieutenant Commander Bonnie B. Potter, Training Officer in the Department of Internal Medicine.

The first series of classes will be held Feb. 25-26. Others scheduled are April 7-8, and June 10-11. Classes will be all day, from 8 a.m. to 4:30 p.m.

Registration for each course is limited, Dr. Potter said, and applicants will be taken on a "first-come" basis. Registration deadlines are: Course 82-1: Feb. 10; 82-2: March 23; 82-3: May 26.

A mandatory prerequisite is certification in Basic Cardiac Life Support within 12 months prior to the ACLS course. All residents in their final year of residency and Emergency Room watch standers especially are encouraged to enroll in these classes.

Upon completion, American Heart Association ACLS provider certification will be awarded those who suc-

cessfully complete 85 percent on the written examination and near-perfect proficiency in performance skills.

Registrants will receive advance materials and further information. Those interested in attending should contact Dr. Potter in writing at Box 169, NRMCOakland.

Herpes — one to five

"Apparently, the (World War II venereal disease) films were successful. By the time peace broke out, most of the GI's hadn't." —Dick Cavett, "Remember When"

Times haven't really changed. Between 10 and 14 million Americans will contract a venereal disease in 1982, and the majority of them will be between 15 and 29 years old.

The herpes virus affects about one in five sexually active adults. And remember, as of today science hasn't yet found a cure for herpes.

AMA: 'Marijuana dangerous'

The American Medical Association (AMA) recently stated, "There is now no doubt at all that marijuana is a dangerous drug, with great potential for serious harm." Studies reviewed by the association point to a growing body of evidence from both animal and human experiments and from clinical observations that marijuana is "by no means" a harmless amusement.

That conclusion supports the statement by Admiral Thomas B. Hayward, Chief of Naval Operations, that "habitual use of illegal drugs ultimately results in tragedy both to the user and, all too frequently, to fellow shipmates." Admiral Hayward's statement was contained in NAVOP 172/81, which announced a "get-tough" policy on drugs and drug offenders.

Recent research shows that cannabinoids contain psycho-active substances of high potency and rapid onset. These substances target the brain and cause changes in brainwave patterns. Acute marijuana intoxication impairs learning memory, comprehension, thinking and general intellectual performance. Adverse psychological consequences may be long-lasting.

Other organs are also affected. Marijuana smoke contains larger amounts of cancer-causing hydrocarbons than tobacco smoke. Bronchitis and emphysema are common in regular users and lung damage can appear in three months with daily use.

Studies have raised the concern that chronic use may have the potential to cause at least temporary infertility. Sperm abnormalities have been noted among lab animals.

Health hazards in cocaine use

In testimony before the House select committee on narcotics abuse and control, Dr. Robert C. Peterson, Assistant Director, Division of Research of the National Institute on Drug Abuse reported that illicit use of the drug cocaine may be hazardous to individual's health. The hazards range from adverse psychological responses to death.

One common hazard is damage to nasal tissue. According to Dr. Peterson, "When used repeatedly, cocaine causes local tissue death from the decreased blood supply. This results in ulceration of the mucous membrane of the nose. In mild cases the symptoms resemble those of the common cold with stuffy or running nose. Continued use of over-the-counter nasal sprays often becomes necessary to permit breathing through the nose."

Clinical reports have described a range of adverse psychological responses to heavier, more prolonged use of cocaine on a daily basis. Hallucinations reported resemble those of the alcoholic experiencing "DT's." The user believes that bugs, snakes, or other animals are burrowing beneath the skin. This belief can be so vivid that the person tears at the skin in an effort to rid it of the imagined pest.

Death from cocaine use, while uncommon, does occasionally occur. There is no question that cocaine can cause death as a direct effect of its pharmacological action.

A quick look _____
at recent health care _____
developments _____

Just as a teacup loses its ring when it's cracked, so too bones lose their characteristic "ring" when they have been fractured. Researchers, reports *Science* magazine, applied force to the ends of animal bones which were suspended by a fulcrum, and cataloged the resultant sounds of healthy and damaged bones. They then devised a system by which human bones are subjected to ultrasound pulses, the emitted sounds are then compared with the patient's healthy limb. The technique, when it is perfected, could have important applications: For example, joggers frequently suffer microfractures of their leg bones which are difficult to detect by x-rays, but which if not treated develop sometimes into major problems. The "ring" of the jogger's leg would reveal the fracture. Also monitoring the healing of the complex fractures, which must now be done with frequent x-rays, could be accomplished by innocuous acoustic means.

...

As the long-term survival rates of leukemia and Hodgkin's Disease patients continue to improve, successfully treated young women have naturally enough wondered about the possibility of bearing children. Two separate articles report that the prospects are optimistic. In the *New England Journal of Medicine* researchers from Stanford University said that in 103 women Hodgkin's Disease patients who were treated by irradiation, chemotherapy or a combination of the two, infertility was directly related to the amount and duration of radiation to the pelvic region. In the study group 20 women became pregnant after treatment, with no fetal deaths and no birth defects among the 24 infants who were born. As to leukemia patients, the prospects of child-bearing are even better. In the *Journal of the American Medical Association (JAMA)* a resident of Johns Hopkins School of Medicine reported on a study of 163 leukemia patients who had received chemotherapy. Females seemed especially resilient although he did find that in 29 of the 73 males studied viable sperm were produced after chemotherapy.

...

The *Journal of Public Health* reports the number of permanently disabled people in the United States is rising faster than the total population. They increased by 30.2 percent between 1966 and 1976, while the total population increased in the same period by ten percent. One in seven Americans are now disabled, with all age groups affected. The rise in numbers is perhaps due to better identification of the disabled and improved health care which means lower mortality figures. Analysis of the data shows that there has been a 56 percent increase in rheumatism and arthritis—replacing heart disease as the number one cause of disablement—and a 174 percent increase in diabetes. Under the age of 45 years, asthma, visual and hearing loss, and muscle, bone and movement problems are the leading causes of disability. From 45 to 64 years, diabetes, muscle and bone problems and circulatory diseases lead the pack. For those 65 and older circulatory problems and diabetes increased the most.

...

Norfolk takes aim at drug abusers

Following the advice of the Chief of Naval Operations, Admiral Thomas B. Hayward, that a "business as usual" approach would be unsuccessful in combating drug abuse, Rear Admiral Joseph F. Frick, Commander Naval Base Norfolk, has established a "Tidewater Area Alcohol and Drug Abuse Advisory Council" comprised of representatives from every major crackdown on drug abusers at Norfolk naval facilities.

Though the council's recommendations are still in the planning stage, area commanders have already taken positive action which includes an increase in car searches, spot inspections at sta-

tion bachelor living quarters and searches aboard ship. Drug detection dogs are being used in many of the searches and their use is expected to increase when the naval station receives an additional 10 dogs. Commanding officers of area ships also are requesting dog searches, as they have routinely in the past.

Drug abusers identified by the searches, or by any other authorized method, potentially may be discharged under "other than honorable" conditions. This type of discharge may result in forfeiture of a number of veteran benefits and service allowances.

Second-hand smoke hazard to kiddies

Could it be that you are, in part, responsible for your child's frequent clinical visits for repeated upper respiratory, middle ear or lung infections? Would you believe that your child's exposure to your tobacco smoke may lead to his or her hospitalization and surgery? Simply stated, medical experts believe that such distress and disease have been caused by one or more of the 3,000 gases found in tobacco smoke.

Each cubic centimeter of cigarette smoke (about the size of a one-inch cube) contains about 1,000 million particles that are small enough to penetrate the smallest lung sacs. It has been reported that a smoker who inhales retains 68 to 70 percent of those particles. But whether you inhale or not, the fact is your child is inhaling your tobacco smoke and is retaining particles that are harmful to such small, developing, fragile lungs. In essence your child is an involuntary smoker and has statistically entered the realm of

those having illnesses related to tobacco smoke.

What about the unborn child? Swedish study of more than 6,000 pregnant women revealed that the "total death risk"—still-births and deaths of infants up to the age of one year—was 60 percent higher for offspring of smokers than nonsmokers. In view of these facts, it appears that the smoker, parent or not, has something far more important to consider than his or her wishes, desires or rights (NES-Courtesy of *Crosswind*)

Valentines in Verse

BORN TO LOVE

was born to love and be loved. This is the way I have to be, for I've never had a desire or wish to keep my fancy free. Although love has brought me naught but despair and misery, I bear it again and once again, because most unbearable is the emptiness I feel when I have my fancy free.

used to love you my darling, my dear. But now I sit alone in my room and shed many a lost and bitter tear. For once again my love's betrayed, and my love for you has grown ragged and frayed. My love once new, and oh, so true, has faded away like morning dew.

You'd think 'twas enough to make me stop, to cease to love so needlessly, stumbling blindly into love recklessly. But once more trembling with an arrow piercing my heart, heart throbbing, eyes dreamy, I seek the part when I gaze into the eyes of the one I adore. And so I doom myself to love's fate once more—to sure, so sure so very sure.

—Betty Martin, Mailroom

SPENDING A LIFETIME —IN THE MEANTIME

Never could a dream compare
to the mysterious woman sitting there.
Her eyes met and at once I knew,
she was the one lady I must pursue.
Our time together grew day by day
till my life to be no other way.
But our destiny's charted—it just couldn't last
for we were two people—victims of our past.
Only one month to share
who said all in love is fair.
So we must spend a lifetime—
in the meantime—
making what we can get,
hoping we'll never forget.

Violets filled with warmth and laughter,
as if it supposed to be "happy ever after?"
ending a short story with the last word goodbye
we can't change the ending, even if we try.

Now I wake to empty, lonely days,
since both of us have gone our separate ways.
A love was won and lost in such a short time—
and with the lady could have been mine.

Only one month to share,
who said all in love is fair?
So we've spent a lifetime—
in the meantime—
making what we could get,
hoping we'll never forget.

—HM1 Phillip Leach
NRMC Memphis
(formerly of NRMC Oakland)

ODE TO BILLY

Roses may be red, and violets they are blue
But on this Valentine's Day
I share a love with the likes of you,
(and many other residents of the bay.)

The 'niners in gold, 'n red,
(and Raiders, silver 'n black)
They raise the pulse of the very dead—
And strip our teeth of plaque!

Now soon 'twill be spring,
With the Oakland A's and Billy.
Excitement they'll surely bring
And once again we'll go silly.

We'll clap, boo, stomp and cheer—
(Sometimes argue with the other fellow)
We'll carry our pennants and other gear,
While wearing caps green n' yellow.

Love comes and goes in life—
There often is no reason.
But child, husband, or wife,
We all like baseball season!

—Betty Beck

So you stayed at home, did you?

By Sally Young

In case you haven't heard, the HELLO HOLLYWOOD, HELLO show at the MGM Grand Hotel in Reno is sensational, as members of the recent Special Services trip found out.

Along with all the other benefits offered to the military in this special package, were a few big pots. Chief Claude Gorie and Dorothy Gorie were the luckiest with a \$500 jackpot in the dollar machine. (However, that old bandit got \$400 of it back.)

Lily Thompson of Patient Affairs was kind enough to loan her husband lunch money after she won \$350 on a keno ticket.

The third big winner was Mrs. Rayma L. Price, Capt., U. S. Army Ret (calls herself an "Old Army Nurse"—she joined up in 1941, but people today should have so much energy). Mrs. Price won \$110 on the five and ten-cent machines.

Fourth in the winner's circle were Mary and Roy Takai whose winnings paid for their trips. The Takai's brought a lot of fun to all when they presented Sara Lou Knight's husband, Bill, with two unusual birthday presents: a red Japanese birthday cap and gown and a bottle of birthday control pills. What are Birthday Control Pills? JELLY BEANS, OF COURSE! (Pharmacy, please note)

SH2 Ron Abad of Special Services and friend, along with AK1 Anicete and DK2 Enriquez were still smiling when they left the bus, as were Alice King (Red Cross), Joan Gilmore (Peds) and Dorothy Shogren.

In the "Win some/lose some" category were LT Brian Clayton, LT Konrad Hayaski, Dr. and Mrs. Carl Sainten, HM3 Chris Barclay of ENT,

...

Bev, Patrick in TV movie

The editor has learned that Bev O'Shea and her son Patrick, former Oak Knoll residents, have small parts in a Paramount movie filmed at Pt. Hueneme for television release next fall. The film is entitled "Winds of War."

Mrs. O'Shea, the wife of HMC Mike O'Shea, was very active in Navy-oriented community affairs when the family was stationed here. She was the founder of the Oak Knoll Youth Center.

At Pt. Hueneme, Bev continues to be active, serving as Ombudsman, working part time at a church, speaking to women's groups, etc. Mike returns from Operation Deep Freeze on Feb. 20 and Bev will meet him in Hawaii.

Chaplain's Corner

One little lift can tip the scales

By Father Mel Hary
CDR, CHC, USNR

Edward Steichen, who eventually became one of the world's most renowned photographers, almost gave up the day he shot his first pictures.

At 16, young Steichen bought a camera and took 50 photos. Only one turned out—a portrait of his sister at the piano.

Edward's father thought it a poor showing. But his mother insisted that the photograph of his sister was so beautiful that it more than compensated for 49 failures.

Her encouragement convinced the youngster to stick with his new hobby. He stayed with it for the rest of his life. But it had been a close call.

What tipped the scales?

A person who had enough vision to spot a little excellence in the midst of a lot of failures, who cared enough to point out a small achievement instead of dwelling on obvious shortcomings; who gave a gentle word of encouragement instead of a thoughtless putdown.

Each of us faces choices every day. Our decisions may not drastically affect anyone's life. But they might. We won't know in advance.

One thing is certain—if we don't choose to "build up," we'll never know.

HM3 Donna Glass of Patient Affairs, RN Mildred Johnson of PCU and Col. Aquilla Walker, U. S. Army, Ret. HM3 Manual Naguit and friend said they had a lot of fun in spite of lighter pockets.

CDR Pat White and CDR Bernice Spanier loved that cold water in the morning after having paid the old robbers. Nancy Campulli of Duplicating and her daughter want to move into MGM, and, it is rumored that Mrs. Helen Verran, in spite of having had the best seat in the house for the show, intends to try the trapeze next time.

On the way home, the question was raised, "When are we going again?" Watch the Oak Leaf.

Fishing poor now; improvement coming

The East Bay Regional Park District reports poor fishing success in most of its lakes due to various factors, including high muddy water, strong winds, cold rains, flooding and turbid water conditions.

The catfish at Lake Chabot have even fizzled out, probably due to a large influx of worms and other tasty morsels, allowing them to feast on other than bait.

A few trout and cats are being taken at Don Castro in Hayward between storms by anglers using eggs and nightcrawlers. Also, clear water persists at Shadow Cliffs in Pleasanton and this results in good catches of trout to 14 inches long.

Hang in there—trout plants are being made this month and good fishing is just around the corner.

The following new additions to the medical "family" have arrived at Naval Regional Medical Center Oakland:

A baby girl to Commander David B. Moyer, Treasure Island Branch Clinic, and his wife Caroline, Jan. 14.

A baby girl to Lieutenant John Bendele, Jr., Anesthesiology, and his wife Judith, Jan. 17.

A baby girl to Hospital Corpsman First Class Shelley A. Gofstein, Laboratory Service, and his wife Violetta, Jan. 19.

A baby girl to Hospital Corpsman Third Class John Bangs, Security, and his wife Jeannette, Jan. 21.

A baby girl to Hospital Corpsman Third Class Keith Lambert, PMT School student, and his wife Pamela, Jan. 23.

Scenes by the sidelines

By Ron Brown

ENT maintains slim lead over Medicine in basketball

ENT maintained their unbeaten record of 8-0 by virtue of their win over Anesthesiology on Jan. 6, and their 42-41 squeaker over OPD on Jan. 13, culminating with a 57-18 win over ARS. Medicine stayed right on ENT's tail with a 54-42 win over MSC (now in third place) on Jan. 6, and a blistering 68-32 win over NP on Jan. 13, followed by their impressive 78-36 win over Special Services on Jan. 20. **Games played Jan. 6**

In other games played, OPD scored an easy 67-21 victory over Med Repair. D. Daniels led all scorers with 26 points on 13 field goals. M. Ford followed with 18 markers on 8 field goals and 2 free throws. K. Hammer and G. McDonald each had 6 points in a losing cause for Med. Repair.

NP handed the All Stars their worst defeat of the season as the score ended up 53-16. B. Carey split the net for 18 points on 9 field goals. L. Gomez led the losers with 9 points.

Special Services, under the able leadership of HMCM Marumoto, stayed in the thick of the race with a commanding 54-30 win over ARS. A. Peralta and T. Lewis scored 19 and 16 points respectively for Special Services. C. Staats and F. Rockefeller each had 10 points in a losing cause for ARS.

In the feature game of the night, two of the league's power houses met with Medicine maintaining a slim lead for second place with a 54-42 win over MSC. M. Terry led all scorers with 23 points. A Brakeford split the net for 19 points on 6 field goals and 7 free throws. D. Love contributed 13 points also in a losing cause for MSC.

Games played Jan. 13

With M. Terry garnering 22 points, Medicine dumped NP into a tie for fifth place in the league as they easily handed them a 68-32 loss. NP just could not keep up with the balanced scoring attack of Medicine as three players scored in double figures. Along with Terry's 22 points, B. Malone chipped in 18 markers and S. Baez followed with 16. R. Issett led the losers with 14 points.

Special Services, with the ailing "coach" Marumoto at the helm, moved into undisputed possession of fourth place with a resounding 65-40 win over the All Stars. T. D. Louis led Special Services with 20 points (12 in the second half). A. Pareja led the losers with 15 points on 7 field goals and 1 free throw.

With John Jennette paving the way with 12 points, Anesthesiology had to extend themselves to defeat a much improved quintet from ARS. S. Staats led the losers with 10 points. Final score was 35-32 with Anesthesiology getting the edge.

After leading only by 2 points at half, ENT barely nosed out OPD by a final score of 42-41. OPD outscored ENT 21-20 in the second half. G. Stevens led ENT with 18 points on 9 field goals (6 in the first half). D. Daniels scored 11 points for the losers. ENT maintains their lead in first place and looms as the team to beat in 1982.

Med Repair outscored MSC in the second half 40-33, but could not overcome the first half lead of 32-21 by MSC as the latter went on to win 65-61 and hold a slim one-game lead over Special Services in third place. MSC has held their season record to 5-2, with Special Services right on their tail with a 4-3 record.

Games played Jan. 20

Med Repair came close to forcing an overtime game against NP, but fell short as P. Wood scored one of the most important baskets in his career at NRMCO by scoring the all-important 33rd point for NP at the buzzer. Wood ended up the night with 6 points. B. Carey led all scorers with 14 points as K. Hammer led the losers with 9 points.

With three players scoring in double figures, Medicine had an easy time of it as they defeated Special Services by a score of 78-36. S. Baez led his Med team with 30 points (his high for the season) followed by S. Williams with 25 points. The other Medicine player in double numbers was B. Malone, who garnered 16 markers.

ENT also had three men in double figures as they still "rule the roost," winning easily over ARS. Lewis, Trapp and Fields scored 12, 11, and 10 points respectively for ENT. F. Rockefeller led the losers with 6 points.

Despite Doug Love's 23 points, MSC fell short by 20 points as OPD put one of their best games together with four players hitting double digits. Daniels connected for 18 points to lead OPD, followed by Tosie, Ford and Mays with 12, 11, and 10 respectively. Fox, although in a losing cause, scored 12 points for MSC.

Standings thru 1/20/82

Team	Wins	Losses	Pct.
ENT	8	0	1.000
Medicine	7	1	.875
MSC	5	3	.625
Special Services	4	4	.500
NP	4	4	.500
OPD	4	4	.500
Anesthesiology	4	4	.500
All-Stars	3	5	.375
Med Repair	1	7	.125
ARS	0	8	.000

Be a VISIBLE jogger

People who jog along roads used by motor vehicles should:

- Jog only on shoulders of the road.
- Jog in the direction of oncoming traffic.
- Stay on the outside edge of the shoulder at curves, the crest of a hill, or when the sun is at your back and in oncoming drivers' eyes.
- Come to a full stop at all intersections, even if you have the right-of-way
- Jog during daylight hours, if possible.
- Wear bright colored clothing, preferably with reflective material attached.

Obey these simple rules and you should enjoy many miles of accident-free jogging.—MAC News Service

Military admitted free of charge

All military personnel in uniform or with active IDs are invited to attend the upcoming races at Golden Gate Fields with free admission to the grandstand, courtesy of the Pacific Racing Association.

The 1982 season will run for 100 racing days, Feb. 9-June 26. The thoroughbreds will run five days a week, Tuesdays through Saturday, with first post at 1 p.m. throughout the

entire meeting.

The racetrack is located on the bay at Albany, just off Highway 80.

Valentine Day Run benefits heart group

The American Heart Association is sponsoring a Valentine Day Run on Saturday, Feb. 13 around Lake Merritt in Oakland, with all proceeds from the race benefiting the heart association's Alameda County Chapter.

The run will begin in Lakeside Park near the Natural Science Center (Bellevue Ave. at Perkins St.) at 10 a.m., rain or shine, and will feature both 5 kilometer (3.1 miles) and 10 kilometers (6.2 miles) laps.

Trophies will be awarded in each class, men and women, in both 5K and 10K to include 17 and under, 18-29, 30-39, 40-49, 50-59, 60 and over, and wheelchair. T-shirts will go to all participants and refreshments will be served.

Runners may register on race day from 8 to 10 a.m.; \$7 registration fee for adults, \$5 for those under 16.

Winter parties at Salmon Lake

Once again Salmon Lake Lodge, high in the Sierras near the top of Yuba Pass, is offering cross-country ski parties.

The lodge will stock up on groceries and have a warm fire waiting. They will meet your group at Bassett's Station, using snow-tractors and cargo sleds to haul in personal gear. Members of your party will ski to Salmon Lake or ride on the snow-tractors (towing from behind can also be arranged).

The cost for this real winter experience is \$85 per adult for the weekend and \$50 for a child of 12 or younger. It is best to pick a time when you can be away from work for three days so you can stay at the lodge for two nights.

Weekends presently available on Feb. 20-21, 27-28; March 12-13, 20-21, 27-28; and Apr. 3-4.

If you would like to make up a party or join one, please call Sally at 2475 Special Services, and she will help you make the arrangements.

How do you want to receive your pay— by direct deposit or (maybe) by mail?

By HM2 Scott Marsh

Have you ever lost a paycheck or had it stolen before you deposited it in the bank? Have you ever been transferred to a new department and then did not receive your check? Do you feel that you have to plan your leave around pay-days? Have you ever requested special pay before you could go on leave?

Why not enjoy your vacation while your check is being safely deposited in your checking account? Once a check has been issued, if it is lost or stolen, a new one cannot be reissued for 90 days.

How about you "a.m." shift people that have to rush to get to the bank before it closes? Or you "p.m." and night shift people who have to make a special trip to work just to pick up your check? FORGET that nonsense and hassle. Save time and gas, have your check deposited directly to the financial institution of your choice.

CIVILIAN PAY

By April 3 civilian employees will no longer receive their paychecks at work, according to directives. To be more reliable and efficient, the Department of the Treasury of the United States has instituted a Direct Deposit program for payment, for both civilian and military employees.

A recent instruction from the Secretary of the Navy (SECNAVINST 7200.17) states that the use of the program "eliminates the hardship and costs associated with stolen, lost/mutilated check reissue, reduces lost time for individual check distribution and for deposit, improves timeliness of deposit, and substantially reduces check preparation costs."

After the pay period ending March 26, civilian employees will have two options! They can select a non-work address to which their check may be mailed, or they may enroll in the Direct Deposit program.

Unless changed by the employee, the address previously furnished for the W-2 tax forms will be used as the non-work address. If an address is to be changed, the employee must complete NAVCOMPT Form 2103, Mailing Authorization (Salary Check/U.S. Bonds), and forward to Civilian Pay Division, (Code 803), Regional Financial Services Department, Naval Supply Center (NSC), Oakland, Calif. 94625, or return it to the Civilian Payroll Office. Leave and Earnings Statements (LES) and savings bonds will be mailed to the provided address. The LES will be the pay record for the amount deposited, which may be received in the mail between Friday and Monday following the payday.

Employees may enroll in the Direct Deposit program by completing Standard Form 1189, Request by Employee for Payment of Salaries or Wages by Credit to Account at a Financial Organization, having an agent of that organization sign the form, and either returning it to Civilian Payroll or forwarding it to Civilian Pay Division at NSC Oakland. The forms are available through the Civilian Payroll office in the hospital on the third floor next to Military Manpower Branch clinics can request to have them sent via guard mail. The checks will then be deposited.

Now you really don't want to have your check go through the mail do you or have to wait for it?

Currently one third of the Navy Department's civilians participate in the program and 2,000 of the 7,000 regional employees are enrolled. The Department of the Treasury has established a goal of 40 percent voluntary participation in the Direct Deposit program by October 1982 and 75 percent by 1990. New hires will automatically be enrolled in the program.

MILITARY PAY

For the military, Personnel Support Detachment (PSD) is currently using the locally controlled Pay Deposited Quicker (PDQ) system for bank deposits. PSD will have new computers installed and will go "on line" between June 20 and July 19 and will be linked directly to the Naval Finance Center in Cleveland where the master payroll accounts are maintained.

With the current printed-check system, utilizing Optical Character Recognition, OCR, if a check is lost or destroyed, recovery time would be approximately 90 days. OCR forms take 10-16 days ideally if they are folded, spindled, mutilated, or marked in any way and then arrive through the mail. But, with the direct line, corrections can be done usually within 24 hours. Within a half hour every day, all documents produced in the proceeding 24 hours will be transmitted and corrections made to the pay records in Cleveland. The PDQ is the forerunner of the Direct Deposit (DD) system and is an interim measure for producing the initial data base required to implement the Direct Deposit program.

Enrollment in the PDQ/DD program is done by completing the automatic payroll deposit form obtained from the designated financial institution, and after having it signed and the account number authenticated, returning it to PSD. LES and pay record slips will still be delivered to the member.

The military will become part of a Pay Enhancement Program (PEP) and ultimately the Source Data System (SDS). This system will facilitate the computerization of pay and personnel records of all involved servicemembers, with "on line" capabilities to interface with MILPERSCOM; EPMAC, New Orleans; and NAVFINCEN, Cleveland. In cases of bonafide emergencies, accounts would still maintain capability for manual override. If it becomes necessary to stop the PDQ check, it can be done, within a cut-off period, in 24 hours.

This will leave the clerks more time to solve the problems locally with payroll discrepancies, according to Lieutenant Commander Douglas R. Sperry, PSD officer in charge.

Current military participation in the program at this command and in the Navy is one in six. The goal by October 1982 is 20 percent, 50 percent Navywide by 1990. But, remember that most of those personnel can sometimes be deployed; therefore, shore activities will most probably be

'THAT'S ALL I HAVE TO DO?' Ida Fahey, Civilian Pay Supervisor, assists John McCole of Transportation in completing Standard Form 1189 to enroll in the Direct Deposit program.

Standard Form 1189 (Rev. 1-78) Department of the Treasury TFRM 3-8000		All information on the form, including the Social Security Account Number where necessary, is required under 31 U.S.C. 492-31 CFR 209 and/or 210; and EO 9397. enrolled 100 percent. (PSD personnel are already 100 percent enrolled.)

So, military and civilian please sign up early to avoid the rush! Have your check deposited directly and avoid "hardship and costs," and the lost

time. Forget the hassle and the nonsense. Do it the convenient way!! Don't stand in line for hours or waste gas having to drive to the bank when you can be doing something more productive. **GO DIRECT DEPOSIT/PDQ!!!**

Black History to be observed

Plans are underway for a Naval Regional Medical Center Oakland observance of Black History Month in the last week of February.

The observance will be in two parts, according to a committee spokesperson. A program, yet to be finalized, will be held in the Clinical Assembly on Tuesday, Feb. 23 from

1:30 to 2:30 p.m.

On Thursday, Feb. 25, ethnic foods prepared by staff members will be featured in the Main Dining Room from 2 to 3 p.m.

All personnel are invited to both events. Watch for more detailed information in the Plan of the Day.

EDITORIAL

Afro-Americans: after all is said and done

By Major Eddie T. Miles, Jr., USAF

It has been said that history is a witness of the times, the torch of truth, the teacher of life and the messenger of antiquity. Without history, people are rootless and, like a plant without roots, cannot grow and stretch forth to their rightful place in the sun. Nor can a rootless people take their place among other people of the world.

Who are Afro-Americans? Leone Bennet, in his book *Before the Mayflower*, tells of 20 Afro-American men and women who arrived in 1619 as indentured servants, not as slaves. He describes the heritage of Afro-Americans as the children of the gentle Mandingo, the spirited Hausus, the creative Yourbas and others too numerous to name. Their civilizations included the wealth and power of Ghana and the scholarly cities of Timbuktu, Mali, Songhay, Egypt and the kingdom of Kush.

The achievements of Afro-Americans have slowly appeared in history books. The following people received no recognition until the black awareness movement updated history: Dr. Nathan Hale Williams, heart surgeon and founder of Chicago's Providence Hospital; Elijah McCoy, inventor of the self-lubricator which is used in trains, boats and other continually-run machinery; Dr. Charles Drew, developer of

blood plasma and first director of the Red Cross Blood Bank; Dr. Ralph Bunche, Nobel Peace Prize recipient and former secretary general of the United Nations; and Matthew Henson, explorer, interpreter and the first man to reach the North Pole in Admiral Perry's expedition.

But what about today's Afro-Americans? Beginning with the leadership of Dr. Martin Luther King, they sat in, rode in and walked throughout this nation to win rights already guaranteed in the Constitution. The results have begun to show somewhat as Afro-Americans begin to hold high positions in federal and local government and in the military. Twenty-two percent of the deaths in Vietnam were of Afro-American servicemen. A number of unit citations and individual medals were awarded. In essence, Afro-Americans have worked, fought and died to help make this nation great. Yet, somehow, these achievements have been "lost, stolen or strayed."

Young Afro-Americans, the Americans of the future, now have role models who not only live in America but are part of its strength and its future growth. The military, in particular, has provided youth with many significant role models to emulate.

But what of the future? It is the opinion of many that the theme of the Constitution of equality and justice for all has not changed and that we have begun to realize some of the benefits. Nevertheless, we cannot rest on our laurels; there is still work to be done. We must continue to cooperate and improve inter-personal relationships, awareness and understanding among this nation's diverse ethnic groups. Equal opportunity and treatment are not only fundamental to the democratic way of life, they are essential to force readiness. (NES)

Help for overseas move

By HMC G.L. Soileau

"You're going overseas."

When one gets this news the immediate reaction is usually a range of feelings, from enthusiastic anticipation, to "Why there? Why now?" If you're typical of most servicemen and their families, you will want to know about the country and its culture, what kind of base the Navy has there, how you'll "fit" into this new environment, and how much of your personal routine can continue after arrival.

Information is available from a wide assortment of naval sources, but gathering enough knowledge to approach an overseas assignment confidently has not always been easy. Finding a reliable source of information often seems an endless ordeal of letter-writing, reading, counseling, investigating... and waiting. An all-purpose "bank" of information offering routinely updated advice on all overseas naval facilities was a concept definitely needed, but never brought to action—until now!

The **Overseas Transfer Information Service (OTIS)**, established in 1980, provides general and specific information on the varied overseas commands where a sailor may be assigned. Answers to questions about "problem" topics such as concurrent travel, housing availability, privately-owned vehicle shipments, availability of English-speaking schools for dependents, and other pieces of necessary advice are offered by the trained OTIS staff. These people, all veterans of overseas travel, rely on personal experience, as well as a massive data file on every foreign country where U. S. Navy personnel are assigned. When required information is not on file, the staff will research all sources related to the request until the answer is found.

Family members are most welcome to call with specific questions. The OTIS staff may be conveniently contacted via **Autovon 224-8392, 224-8393**, or (from the Continental United States only), collect to **(202) 694-8392/3**.

USO-41 and growing strong

Feb. 4 marked the 41st anniversary of the founding of USO. And on that day USO operated as usual—providing information, assistance, and "a shoulder to lean on" from nearly 150 points of contact worldwide, as it has for 41 years.

Three service centers in the Bay Area expect to serve nearly 300,000 individuals during 1982, helping solve all types of problems. These may include help with an orientation trip of the Bay Area, translations for foreign-born wives, meeting ship docking at Bay Area piers, a reception and tours for service members, or just a place to sit and relax. Whatever is needed, USO is still a touch of home.

What began as a recreational oriented organization now helps combat the whole range of family and individual problems that servicemen and women and their families face. Two airport USO centers in the Bay Area deal with all manner of travel problems.

Some things never change, and USO is one that remains consistent and strong. Happy 41st Birthday.

Grateful HA thanks civilians

Patricia A. Cox and Nina P. Marable, both civilian employees of Drug Screening, have earned a great deal of appreciation from Hospital Apprentice Sean T. Murphy.

On Jan. 22 he lost a wallet containing \$150, a military identification card, and related personal valuables. The wallet was found on the ground by

Nina, and with Pat's help, she was able to get it back intact to its rightful owner.

Murphy was so pleased with the two employees' honesty and sincerity he brought the act to the attention of Rear Admiral Walter M. Lonergan, Commanding Officer, who added his appreciation for their integrity.

Examples teach life to our little ones

By Rev. Al Dagnoli

Experience is the best teacher, but examples are even better. Show your children, through your actions, the type of life you want them to lead. For example, if you say grace before meals each time you eat and say your prayers at night, your children will too. So, before you tell your children to pray, see to it that they see you pray!

Children must respect you first before they will emulate you, and respect is not automatically due to a mother or father. It must be earned. Treat your children fairly. Love them, help them, advise them, nurture them.

Talk to them in one-to-one situations, you'll be amazed at how little you actually know them—their problems, anxieties, frustrations, and fears. Invest some of your time in each of your children so that they will have a chance to get to know you, too.

Remember, just because your children are clothed, fed and sent safely off to school, don't heave a sigh of relief—your job is not done. Your "example-giving" is a steady, everyday process which must accent values and attitudes rather than mere rules. (NES)

THE OAK LEAF is published biweekly on Friday, produced commercially with appropriated funds in compliance with NNPR P-35, Rev. Jan. 1974. Deadline for copy is Thursday noon of the week prior to publication.

Opinions contained herein are not official expressions of the Department of the Navy. THE OAK LEAF receives American Forces Press Service and Navy News material.

Contributions from both staff and patients are welcomed and should be addressed to the Editor of the OAK LEAF, Naval Regional Medical Center, Oakland, CA 94627.

LOOKING GOOD—LTJG Kathleen Williams, NC, checks circulation in the fingers of Petty Officer Second Class Martin Jumper while he recovers after the 13-hour surgery on 7 West. (Another photo, Page 6)

Third toe transplant story has uncommon 'kick'

There's an old adage in the newspaper business that when man bites dog, that's news! How about a slight variation, such as a fellow named Jumper (honest) who loses his thumb after an encounter with a leaping kangaroo?

They tell us it really happened, and we know that it all turned out OK, because we have Sonar Technician Second Class Martin L. Jumper, 25, resting comfortably on 7 West after a successful transplant of his left big toe to the stump where his thumb used to be before the incident with the kangaroo.

It all started on July 19, 1981 when Jumper and a few of his shipmates from USS HEPBURN (FF-1055) decided to see a bit of Australia during the ship's port call to the land down under. They rented a car and were a few kilometers north of Geraldton when a kangaroo jumped across the road. The car left the road and rolled four times leaving Martin without his left thumb and index finger.

Following treatment at the hospital in Geraldton, Martin was transported to the USS KITTY KAWK (CV-63), and subsequently here. Last September in San Diego, skin grafts were taken from his left elbow to graft to his left hand in preparation for the transplant. In November he was transferred to Oak Knoll and worked here in the Hematology/Oncology clinic while awaiting surgery.

In an interview before the operation, Martin said that he was looking forward to the transplant.

The 13-hour surgery began at 9 a.m. on Feb. 4 and ended at 10 that evening. The team of five orthopedic microsurgeons who detached the toe and transplanted it to the hand, consisted of Captain David M. Lichtman, Commander James R. Schneider, Lieutenant Commanders Charlotte E. Alexander and David C. Barton, and

Lieutenant Timothy L. Keenan. Dr. Lichtman, the team leader, said that the surgery went well.

The transplant of the left big toe to the left thumb was accomplished under microscopes using nearly invisible needles and sutures.

A few days later, Martin said that he was glad that it was over and was feeling "pretty good." He seemed to be especially cheerful after winning a game of backgammon with one of the staff members.

In the first dressing change on Feb. 10, Doctor Lichtman said: "Everything looks great. The skin color is pink and healthy; he has movement in the transplanted toe, and there appear to be no problems whatsoever."

Petty Officer Jumper became the third successful toe to hand transplant at Naval Regional Medical Center, Oakland.

The first made medical history on Jan. 20, 1981, with the successful transplantation of a patient's two toes to the stumps of a thumb and little finger. That patient, Chief Electrician's Mate Deane E. Rapp, a decorated Navy veteran trained for duty aboard nuclear-powered submarines, had accidentally severed all fingers of his right hand eight months earlier. The operation was completely successful and he has now returned to active duty aboard a submarine and is able to write, climb ladders, etc., by using the two former toes as fingers in a pinching movement.

The second transplant was performed on Sept. 10, 1981. Marine Corps Private First Class Mark E. Heermann lost his thumb in the engine fan belt of an amphibious vehicle he operated. He is now on limited duty and doctors are hopeful that he will be able to return to full duty.

In addition to the transplants, the finger of a young Marine was reattached last summer here by the microsurgery team.

Nursing Service LCPO

Leadership award goes to HMC Jackson

Chief Hospital Corpsman David R. Jackson, Nursing Service Leading Chief Petty Officer, recently received the Semi-Annual Leadership Award, the second given at this command.

Jackson was selected because of his performance in the areas of devotion to the Navy, motivation on the job, character-building attitude, leadership characteristics, support of command policies and counseling attributes in his billet where he supervises 175 Hospital Corps personnel. During the past several months he has also served as the Assistant Operations Officer for the Mobile Medical Augmentation Teams Program at this command. His organizational and analytical skills have been directly responsible for the super success of the program, said one officer.

The chief received a letter of commendation from the command, a leadership certificate, a plaque, and a 96-hour pass.

"This esteemed, sought-after award," Jackson said, "is accepted only in behalf of Nursing Service, where the leadership and training of personnel—past, present and future—are the 'keystone' of a successful Naval Medical Department—in the air, sea (or with the) landing forces."

Chief Jackson, who joined the Navy 19 years ago, has been assigned to NRMCMC Oakland for 18 months. His prior billets include duty aboard the USS FORT FISHER (LSD 40) as Senior Medical Department Representative, and on the general staff of the Third

HMC David Jackson

Marine Division, Fleet Marine Force.

He has completed Independent Duty School and courses at George Washington University, and holds the Navy Commendation Medal, the Navy Achievement Medal, and the Battle "E" ribbon.

The son of Mr. and Mrs. David R. Jackson of Greensboro, N.C. makes his home in Fremont with his wife Shung-Chou and daughter Mei-Ling. His principal hobby is Mandarin Chinese.

Local credit union to open annex for check service

Due to continued growth of both members and assets, the Alameda Coast Guard Federal Credit Union is expanding its Oak Knoll facilities into the building formerly occupied by the Bank of America, with a tentative opening date of March 1, it has been announced.

The new location will be used by members exclusively for share draft checking account services; all other services will remain at the present credit union office on base.

"In the past five years our membership has grown 51 percent and our assets have increased 43 percent to over \$60,000,000," noted Walter Terry, General Manager of the credit union. "The expanded floor space will enable us to serve our share draft

checking account members more quickly and efficiently, while providing much needed increased space in our present office for all other activities—share savings accounts, special savings certificates, IRAs, loans, new member accounts, and safe deposit boxes."

The handicapped will be able to cash paychecks at the new location, located next door to the present credit union office, using an express teller line for handicapped persons.

The March 1 opening date of the checking account facility is based on final installation of a phone line for computer hookup, officials said. Watch for the "open" sign at the office, or call the new phone number for checking account services ONLY: (415) 569-2633.

Civilian technicians needed

Two **Medical Technologists**, GS-7, and seven **Medical Technicians** (Chemistry), GS-5, will be hired for the Naval Drug Screening Laboratory at Naval Regional Medical Center, Oakland, it has been announced.

The temporary (not to exceed one-year) employees will work in the special laboratory established under the Department of Defense Drug Abuse Program, in a variety of chemical analytical procedures including the receiving, sorting, logging and labeling of urine specimens.

Qualified Career and Career-Conditional employees of federal activities in the San Francisco Bay Area, reinstatement eligibles and eligibles within reach on the appropriate OPM register may apply for both the technologist and technician jobs. Eligible applicants

without federal status may also be considered for the lower-graded jobs, a Civilian Personnel spokesperson said. The GS-7 applications will be accepted until close of business Feb. 22; the GS-5s through Feb. 23.

Other local job openings are:

Health Technician (Optometry), GS-4 or 5, Ophthalmology Service, Oak Knoll, closing Feb. 22;

Secretary (Typing), GS-5, Operating Management Service, Oak Knoll, closing Feb. 25;

Medical Clerk (Typing), GS-4, Naval Support Activity, Mare Island Branch Clinic, closing Feb. 26; and

Clerk Typist, GS-3/4 (trainee for Word Processing Systems Operator, GS-5), Management Information Service, Oak Knoll, closing Aug. 12, 1982.

Parents get tax break

People who qualify for a tax break due to payments they must make for child or dependent care will get a larger break in figuring their 1982 taxes. The increased dependent-care credit is part of a new tax package recently signed into law by the President.

The old rule permitted credit of 20 percent of employment-related expenses, with a maximum of \$2,000 of expenses for the first two dependents.

The new package changes the credit to 30 percent for incomes of \$10,000 or less, with the percentage decreasing by one percent for each additional \$2,000 of income. The percentage will not go lower than 20 percent. The expense maximum is now \$2,400 for one dependent and \$4,800 for more than one.

The credit relates to the percentage of employment-related expenses, not a percentage of income.

As an example of how the credit has changed, a servicemember has an adjusted gross income of \$10,000 and child care expenses of \$2,000. Previously he was entitled to a credit of \$400, or 20 percent of the \$2,000. Under this change, the credit increases to \$600, or 30 percent of the \$2,000.

In addition, a deduction of up to \$1,500 will be allowed for adoption fees, court costs and attorney's fees for the adoption of a child with special needs which may make the child difficult to place, such as mental retardation or handicaps.

Beginning in 1982, expenditures will be included for out-of-home, non-institutional care of a disabled dependent or spouse who spends at least eight hours a day in the taxpayer's home.

Hobbies are taxable income

Many of you have at least one hobby, be it sewing; bowling; stamp, newspaper or comic book collecting; gardening; or ceramics. Hobbies provide personal satisfaction and in many cases, extra income, too. And that income is taxable, says the Internal Revenue Service.

Whether you breed and sell animals as a hobby, or farm a few acres of land while maintaining a full-time employment, it's important for you to know how the IRS distinguishes a hobby and a business. Generally, a hobby is done more for pleasure than for business, and losses from a hobby are not deductible. However, a business hobbyist is allowed to deduct operating expenses as long as the amount does not exceed the amount of taxable income that the business generates.

To claim your activity as a business rather than a hobby, you must be able to show that that activity was intended to make a profit. Also, you must have conducted that activity in a business-like manner via advertising, promoting

and other efforts that allowed for the maximization of sales and the minimization of costs. Additionally, if you ran your business from your basement, for example, you must be able to prove that the basement was not used for any other purpose in order to take advantage of the home office deduction. With regard to hobbies, if you make items to be sold at events such as flea markets, you must report the income derived from those sales.

As in any tax situation, you should exercise good record keeping for your benefit as well as the government's. Many activities that begin as simple hobbies often blossom into lucrative business adventures. For additional information about hobbies as taxable income, the IRS has a publication, No. 525, "Taxable and Nontaxable Income (Including Minimum Tax, Alternative Minimum Tax and Maximum Tax)," available free by using the order form in your tax package or by calling the IRS. Forms/Tax Information number listed in the telephone directory. (NES)

Need help with income tax?

A commercial income tax preparation service is now available on base as a convenience for authorized Navy Exchange patrons.

Representatives of Beneficial Income Tax Service will be available at the exchange Saturday mornings through April 10, by appointment only. Cost of preparation of Standard Form 1040A is \$7; complete price list-

ing for all other forms preparation is available in the exchange office in Bldg. 38.

Please phone 639-2151 for appointments.

The same service is available at the NAS Alameda (865-4777) and Treasure Island (765-6966) exchanges.

Federal, state tax information available

Navy personnel and their dependents may find information about federal and state income taxes in two recent notices from the Office of the Judge Advocate General. JAGNOTE 5840 of Dec. 16, 1981 summarizes state income tax filing requirements and deadlines, while a JAGNOTE dated Dec. 29, 1981 lists federal income tax items of interest to naval personnel and explains changes in the tax laws made by the Economic Recovery Tax Act of 1981.

One feature of the federal income tax notice is a breakdown of taxable and nontaxable items of military compensation. Information on deductions and regulations unique to the military member is also included.

The responsibility of servicemembers to pay state taxes and their rights under the Soldiers' and Sailors' Civil Relief Act are highlighted in the state tax notice. Addresses for obtaining forms and instructions in each state are also listed.

The Armed Forces Federal Income Tax Pamphlet (NAVSO P-1983), which formerly provided a yearly summary of tax information, has been discontinued due to budget constraints. Internal Revenue Service Publication 17, "Your Federal Income Tax," and instructions for Forms 1040 and 1040A are available from the IRS upon request and offer a detailed discussion of this year's federal tax requirements.

The NRMOC Oakland Legal Office also has a copy of the All States Income Tax Guide for Service Personnel, which has extensive information concerning state income tax liability of service personnel.

Navy Campus

Counseling service aids higher educational goals

Mrs. Marj Stallings, Education Specialist from the Navy Campus Office, is now here every Tuesday and Thursday in the Staff Education and Training Service on the sixth floor of Bldg. 500 to assist those interested in fulfilling educational goals through off-duty study.

There are college catalogs and schedules available for students to research in pursuit of "just the right program" in the most suitable college for them. Two of the nearly endless college opportunities are offered right here at Naval Regional Medical Center, Oakland. Southern Illinois University offers the third and fourth year of college for those seeking a bachelor of science degree in health care services, while California State Hayward provides extension courses.

Several free college-level testing programs, such as CLEP (College Level Examination Program) and DSST (Dantes Subject Standardized Tests), are available. Successful completion of these tests qualifies for credit at many colleges. In addition, a career assess-

IRS TAX TIP

For Single Taxpayers

■ If you pay a preparer to complete your tax return, you should receive a copy of your tax return in addition to the copy which is filed with the IRS.

■ If you receive alimony, it is considered taxable income to you. On the other hand, if you are required to pay alimony you may deduct these payments from your gross income. You need not itemize deductions to claim alimony payments.

Taxpayers to test form

The Internal Revenue Service (IRS) will test a new "simpler" tax form in Georgia in 1982.

The forms, along with rewritten instructions that are supposed to be easier to understand, will be sent to 30,000 users of the short form. These taxpayers will also get the present 1040A short form, which they may use if they do not want to participate in the test.

A questionnaire will be included asking the users what they think of the revised form.

In 1983, a test of a revised 1040 long form is proposed. If both tests prove successful, new forms may be available to all taxpayers in 1984.

CSR responsibility shifts to Supply

Effective Feb. 1, responsibility of the Central Supply Room (CSR) in the main hospital passed from Pharmacy Service to Supply Service at Naval Regional Medical Center, Oakland.

Until further notice, CSR issue procedures will remain unchanged, officials said. After-hours issues will be handled through the Information Desk. The duty Chief-of-the-Day will escort individuals to CSR and make issues after-hours and on weekends.

All items presently stocked by CSR will be available for issue to satisfy emergency requirements, but routine requests for items to be deleted will be referred to Supply for issue after March 1.

FRA GIFT—Mr. John J. Reilly (center), President, Branch 87, Fleet Reserve Association, Alameda, presents a \$50 check for the medical center's health and welfare fund to Captain Joseph Smyth, Director of Clinical Services. Looking on at left is Mr. John H. Durgess, past president of the same FRA branch. The association has made a practice of making a similar gift annually over the past several years.

ment inventory questionnaire is available for those unsure of their particular career goals.

If financial aid is needed, tuition assistance may be used by active duty military through Navy Campus. VA educational benefits are also available to eligible students.

Military personnel can obtain an external degree through the Navy Campus Contract for Degree Program from 15 colleges throughout the United States. There is no residency requirement and 75 percent of the credits can be non-traditional. Besides classroom work, these credits can be for military experience, college-level tests and/or independent study. Most military personnel have accumulated college credits which are accepted by many colleges toward a degree.

Commander Patricia Linehan, Chief Staff Education and Training Service, recommends that motivated servicemembers who have a desire to further their off-duty education, call 639-2003 for an appointment with the Navy Campus counselor.

Top performer'

Sailor of Month is Fallon corpsman

Hospital Corpsman Second Class Barry D. Knapp, 22, a petty officer whose superior officer, Lieutenant Commander G.V. Meskill, describes as "a top performer in all categories of military and professional performance" has been selected as January's Sailor of the Month for the Oakland naval medical region.

Knapp has been assigned to our NAS Fallon, Nev. branch clinic since Nov. 15, 1980 as a Duty Section Leader and Search and Rescue Corpsman. During this assignment he (1) performed CPR on a civilian who collapsed while eating and managed to revive her; (2) administered CPR to a neighbor child who nearly drowned while bathing at home, probably saving the boy from brain damage or death, a doctor said; (3) on one SAR mission shimmied 100 ft. down a rope from a helicopter that hovered within two feet of cliffs on three sides to get to a man who had fallen down a mountainside on the South Fork of the Tuolumne River. In the latter instance, the victim, hoisted to the chopper, was said to be suffering from a broken leg and possibly a broken back but was reported in good condition upon arrival at a civilian hospital in Sonora.

Senior Chief W.E. Moss, Leading

Chief Petty Officer of the SAR team, said Knapp has proven himself to be an adroit and vigilant corpsman, instrumental in rescues of at least two individuals that would otherwise have been unable to get medical assistance for several hours. "(He) has mastered mountaineering training including rappelling, belaying and single skid evolutions," the senior chief added.

Petty Officer Knapp told the *Oak Leaf* editor via Autovon that he was, indeed, "honored to be selected as the NRMCO Sailor of the Month."

Originally from Fresno, he joined the Navy in December 1976, and previously served in billets at NRMCO Camp Pendleton, aboard the USS FORRESTAL (CV-59), with Helicopter Support Antisubmarine Warfare Squadron Three, and TAD to the NRMCO clinic in Jacksonville, Fla.

He is a 1978 graduate of the Aviation Medicine Technician School and plans to work toward a degree and ultimately a commission as an optometrist.

Petty Officer Knapp and his wife are parents of three and make their home in quarters on the air station.

In his spare time, the corpsman enjoys repairing automobiles.

HM2 Barry D. Knapp

Chaplain speaks

Captain M.D. Seiders, Chief of Pastoral Care Service, was the guest speaker at a luncheon meeting of the Serra Club in a Merritt Hotel luncheon on Feb. 12.

Subject of Chaplain Seiders' talk was "The Navy Chaplain."

The Serra Club is a local Roman Catholic social organization.

Kudos.....

NAVY ACHIEVEMENT MEDAL

Hospital Corpsman First Class Russell Warren, Centerville Beach Branch Clinic.

LETTERS OF APPRECIATION

Lieutenant Larry Kilgore, Medical Service Corps, Patient Affairs.

Lieutenant Commander Clinton Lambert, Nurse Corps, formerly of Psychiatry.

Hospital Corpsman Second Class Jack H. Howell, Preventive Medicine Technician School student, from Naval Submarine Support Base, Kings Bay, Ga.

Mr. Gene Helmuth, formerly of Prosthetics Laboratory.

FROCKING

To Lieutenant, Medical Service Corps: Robert Vernon.

Navy physician appointed VP

Secretary of Defense Caspar Weinberger announced recently that President Reagan has appointed Captain William M. Narva to be Vice President of the Uniformed Services University of the Health Sciences.

Dr. Narva will be promoted to Rear Admiral upon Senate confirmation.

Comings and Goings-----

"Fair winds and following seas" to the following personnel who have recently departed this command:

Lieutenant Commander Robert Murphy, Medical Corps, to Long Beach.

Lieutenant Commander Clinton Lambert, Nurse Corps, interservice transfer to U.S. Army.

Lieutenant Clarice Nash, Nurse Corps, to San Diego.

Lieutenant Thomas Howe, Nurse Corps, to Guam.

Mr. Gene Helmuth, retired.

Hospitalman Patrick Seales, to FMSS, Camp Pendleton.

Hospital Corpsman Third Class Donald Robinson, released from active duty.

Hospitalman Joseph Jaremba, to 3rd FSSG, Okinawa, Japan.

Hospitalman David L. Quigley, to 1st Marine Division, FMFPAC.

Hospital Corpsman Third Class Linda D. Ramsey to Camp Lejeune, N.C.

Hospital Corpsman Second Class Howard V. Wagner, released from active duty.

Hospitalman Edward Dzmitrowicz, to 1st Marine Division, Camp Pendleton.

Hospital Corpsman Third Class Lonnie Sowders, NSHS, San Diego.

"Welcome aboard" to newly arrived:

Lieutenant John O'Neill, Chaplain Corps, ACDUTRA.

Commander Valaine Pack, Nurse Corps.

Lieutenant Commander Mark Perlman, Medical Corps, Anesthesiology.

Ensign Roger Serrano, Medical Service Corps, ACDUTRA.

Ensign David Rioux, Clinical Clerk.

Ensign James Timoney, Clinical Clerk.

Ensign Michael McCarten, Clinical Clerk.

Chief Hospital Corpsman Michael Larkin, Military Manpower Service.

Postal Clerk Second Class William Dorsey, Operating Management.

Hospital Corpsman Second Class Scott Marsh, Military Manpower and Public Affairs.

Chief Personnelman James Hernandez, Personnel Support Detachment.

Dentalman Patti Holly, Dental Service.

Dentalman Margaret Charest, Dental Service.

Hospital Corpsman Third Class Laurence Gurst, Nursing Service.

Hospitalman Jerry Brown, Main Operating Room.

Hospital Corpsman Third Class James Spinharney, Nursing Service (temporarily assigned to Drug Screening Lab).

Hospital Apprentice Warren Henderson, Drug Screening Lab.

Hospital Corpsman Third Class Clifford Towle, Patient Affairs.

Hospital Corpsman Third Class David Lowe, Nursing Service.

Hospital Apprentice Marleen Murakami, Nursing Service.

Hospital Corpsman First Class Lamberto Castello, Career Counselor's Office.

Lieutenant Mary Wheeler, Nursing Service.

Georgia Lopez retires with 25

Georgia Lopez, former Commodity Manager in Supply Service, retired in early January after 25 years of civil service.

A retirement party of friends and co-workers honored her at Jake's Lion in San Leandro. She told those gathered that she was really not retiring, but simply "going to work traveling and taking arts and craft courses at Berkeley."

She began service in 1955 at Yerba Buena Island as a clerk typist for the Supervisor of Shipbuilding. When the activity transferred to San Diego, she transferred to Education and Training, which soon also moved south. She then went from Naval Supply Center Oakland to the TDRL desk at NRMCO, soon after accepting the job in Supply.

Georgia's pleasant personality and "can do" spirit will be missed," her supervisors said.

She raised three daughters alone. Each became successful. One is a Wall Street lawyer, another completed a Master's degree and works for the Combined Federal Campaign in San Francisco, and a third attends college.

Larkin reports as staff detailer

HMC M.F. Larkin

Meet the new staff detailer... HMC Michael F. Larkin of Military Manpower Service.

Chief Larkin recently returned from a tour with Operation Deep Freeze in Antarctica. His 13 years of naval service have taken him to the 9th Marine District, Kansas City, Mo.; NRMCO Portsmouth, Va.; Guantanamo Bay, Cuba; a tour aboard the USS GUADALCANAL (LPH-7); NRMCO Great Lakes; and a tour aboard the USS REPOSE (AH-17).

He holds numerous awards and

decorations, including the Winter Over service medal and the rifle sharpshooter. His hobbies include basketball, swimming and he was twice a member of a national military championship softball team.

The Larkins, Michael and Terry, live on Treasure Island with sons Sean and Conner, and daughter Brianne.

Chief Larkin aspires to complete 30 years of active service and retire as Force Master Chief, after completing a master's degree in health care administration.

MC director to visit Oak Knoll soon

Captain J. Honigman, Director, Medical Corps Division, Navy Bureau of Medicine and Surgery, will visit Naval Regional Medical Center Oakland next week to offer career counseling and professional development guidance to staff medical officers.

He is scheduled to be at Oak Knoll Feb. 24, 25, 26. All those wishing consultation with Dr. Honigman should call Mrs. Mary Takai, Office of the Director of Clinical Services, Ext. 2451, for appointment.

COMFORTABLE CONTRIBUTION—Medical Corps Lieutenant Commander Lewis L. Ware, Jr. of Radiology Service relaxes in one of the comfortable, motorized chairs in the new Blood Center as Hospital Corpsman Second Class Kathleen Wright prepares to receive his gift of blood.

Progress made in stopping measles; parents urged to keep up immunizations

A nationwide survey during the 1979-80 school year indicated that 94 percent of America's school children had been vaccinated against measles.

This represents major progress in a campaign to eliminate measles in the United States by October 1982. The effort, launched by the Department of Health and Human Services in 1978 has had outstanding success in the school-age group.

In 1980, 13,506 measles cases were reported in all age groups, representing an all-time low and a greater than 97 percent reduction from the annual average of 500,000 cases in the prevaccine era. During 1981, only 3,302 cases were reported—a 78 percent drop from the 1980 cases reported.

Captain Harold M. Koenig, Chairman of Pediatrics Service at Naval Regional Medical Center, Oakland, says only 10 percent of all counties in the United States reported measles in 1981, but points out that the percentage quoted includes one report from the Alameda-Contra Costa area.

While the total number of cases is on the decline, the percentage of measles cases contracted by preschool children is increasing. This is because that age group is much more difficult to reach with immunization services and requires additional attention from parents and the medical community to achieve high vaccination levels.

Fatalities related to measles occur most in preschool children and adults, groups which are not protected by school immunization laws. Six fatal measles cases were reported in 1980. Pneumonia and encephalitis are the most common direct causes of measles-related deaths.

Military parents are encouraged to contact the NRMCO Oakland Pediatrics Service at (415) 639-2174 where further information and vaccination services are available. Also, parents should make sure they have the standardized immunization record card which is available at the hospital.

Dr. Koenig recommends the following immunization schedule for children:

Age	Immunization
2 Months	DTP (First) TOPV (First)
4 Months	DTP (Second) TOPV (Second)
6 Months	DTP (Third) TOPV (Third-optional)
15 Months	Measles Mumps)* Rubella)
18 Months	DTP (Fourth) TOPV (Fourth)

At school entry (4 thru 6 years)	DTP (Fifth) TOPV (Fifth)
14 thru 16 years and every 10 years thereafter	Td

DTP—Diphtheria and tetanus toxoids and pertussis vaccine adsorbed (5 doses recommended)

TOPV—Trivalent oral polio vaccine, live (4 doses recommended)

Td—Tetanus and diphtheria toxoids adsorbed (adult)

* (May be combined as a single injection vaccine—MMR)

Quality care seminar subject

The Patient Care Assessment Council presented a seminar here Jan. 27-28 "A Journey Through the Unexplored Areas of Quality Assurance" was the theme.

Sixty council members from Ukiah to Salinas discussed the principles, techniques and barriers to effectively implement quality assurance. The faculty included Quality Assurance Coordinators from Bay Area hospitals and the Chief Pathologist of St. Mary's Hospital. A history of Oak Knoll by LCDR John Kraft highlighted the welcome. Attending from NRMCO were CDR Joan Tulich, NC; Karoline Gunter, R.R.A.; Myrtle Cannon, A.R.T.; Lillie Thompson, A.R.T.; Frances Sheykhzadeh, A.R.T.; and Peggy Terry.

The conference satisfied 11 credits of JCAH continuing education for the American Medical Records Association.

ACT test offered

The American College Test (ACT) will be given at the Treasure Island Navy Campus office, Building 29B on Avenue H, Wednesday, Feb. 24, at 8 a.m.

Only active duty personnel and dependents are eligible to participate in this college entrance examination. However, dependents must be 18 years or older and must pay a fee of \$8.50 by check or money order. There is a study guide available at the Navy Campus office.

The examination is free for military personnel. Early registration is recommended due to limited space. Call 765-6329 or stop by the Navy Campus office.

NRMC Oakland opens new blood donor center

Official ribbon-cutting ceremonies were held Tuesday to open a new Blood Donor Center on the fourth deck of the main hospital next to the Neurology Clinic, Room 4-39-36.

The center will be open from 9 a.m. to 8 p.m. on Wednesdays, and from 2 to 8 p.m. on Mondays, Tuesdays, Thursdays and Fridays.

More than 5,000 units of blood and blood products are cross-matched each year at Naval Regional Medical Center, Oakland. This blood is often used in the treatment of cancer, in exchange transfusions for infants, in treatment of gastro-intestinal bleeding, anemia, hemophilia, traumatic injury, and other illnesses. In addition, blood is vital for most major surgery and with advances in medical science, the use of blood is constantly increasing.

Unlike many civilian blood programs, the Military Blood Program does not require patients to replace the blood they use. At NRMCO Oakland, blood is

available, without obligation, to patients who require it. To meet the need, the Oak Knoll Blood Bank opened the new center which will be open for donations from civilian and military staff, outpatients and visitors.

Normally, donors of all blood types are needed every day. Whole blood has a life span of only 35 days from the date of donation. In emergency situations there is little or no time to recruit donors and process units of blood must be ready in the Blood Bank, available for immediate use.

You can help by stopping by the Donor Center and donating a pint of blood. It takes about 45 minutes and often means more than any flower, candy or other gifts you can give a patient.

Anyone interested in donating should visit the center, or call 639-2329 for more information, or to make an appointment.

Medics assist at crash site

Following last month's crash of a commercial jetliner into the Potomac River, Navy personnel from a number of Washington, D.C. and Virginia-based commands responded to the emergency and assisted civil authorities in the initial rescue and subsequent salvage operations.

National Naval Medical Center (NNMC) Bethesda, Md., went on alert immediately after the crash, and prepared to receive survivors if it became necessary. Forty units of blood were donated to the Metropolitan Washington Blood Bank and the

hospital's helicopter pad was used by national health officials.

NNMC's Branch Clinic at the Washington Navy Yard sent eight corpsmen and two ambulances to the scene to assist authorities in treating rescue workers for exposure. One corpsman, qualified in diving medicine volunteered his services and worked as a salvage diver at the scene.

The Naval Medical Research Institute's Hyperbaric Medicine Program Center also provided assistance.

Columbia announces spring session

Columbia College will offer six courses at Treasure Island and two at Hamilton AFB during its March 15-May 9 session. Columbia is a fully accredited four-year college offering Associate and Bachelors Degrees in Business Administration, Psychology, and Criminal Justice.

Scheduled for the Treasure Island campus are: English Composition II (MWF, 11:05 a.m.-12:45 p.m.); Introduction to Criminal Justice Administration (Mon., 6:30-11:30 p.m.); Business Math (Tues., 6:30-11:30 p.m.); Management of Criminal Justice Agencies (Wed., 6:30-11:30 p.m.); English Composition I (Thurs., 6:30-11:30 p.m.); and Business and Its Environments (Sat., 9:00-12:00 noon; 1:00-3:00 p.m.).

At its Hamilton AFB location, Columbia will offer Accounting I: Financial

(Mon., 6:30-11:30 p.m.) and Organizational Behavior (Wed., 6:30-11:30 p.m.). Columbia is sponsored by Navy Campus at both Treasure Island and Hamilton AFB.

Because of its close relationship to the armed forces, Columbia has a policy of assessing military schools and experience for academic credit. The school also accepts CLEP and DANTES tests. Being a serviceperson's opportunity college, Columbia makes no distinction between credits accumulated at residence centers such as Treasure Island and Hamilton and those accumulated on the home campus.

Interested students should contact Larry Blades or Jeannie Hopper at (415) 397-5613 to obtain more information about the program or to set up an appointment.

MICROSURGICAL SKILL AT WORK—With the aid of microscopes, Drs. Charlotte Alexander and David Lichtman attach the big toe to Martin's hand.

(Story, Page 3)

Navy Relief offers advice on college student loans

This is the time of year when college or vocational school students submit their applications for admission—and one of the tough questions facing most families is "Where's the money coming from?" Paying for a post-secondary education involves a monetary commitment second only to buying a home, and requires the same kind of careful financial planning.

The first thing to do is, of course, to make a realistic assessment as to how much of this extra load can be carried out of savings and annual income without putting an unacceptable burden on other members of the family. If there is a big shortfall—as happens all too often—it's not the end of the world. There are many avenues of possible assistance which do not have to be repaid, including scholarships, grants and work-study programs. The Financial Aid Office at the institution to which you are making application can provide details on how to apply for aid for which your dependents may be eligible. Also, high school counselors in your hometown may be able to provide such advice.

II, after reviewing these avenues you still need financial support, then a Federal Guaranteed Student Loan should be considered. Although eligibility for this program was restricted and benefits reduced by 1981 legislation, it still offers substantial help to most students of our Navy/Marine Corps community. Navy Relief has made arrangements to see that such loans are available to eligible dependent children of active and retired members of the Navy and Marine Corps, who attend approved post-secondary schools full-time, as well as "fleet input" personnel in the NROTC, ECP, and MECEP Programs. Also, this will be the second year of a "pilot program" where the Society will sponsor such loans for a limited number of spouses of active duty servicemembers. This program was initiated by the Navy Relief Society to overcome the difficulties experienced by many servicemembers in getting such loans from financial institutions on their own. By serving as a "corporate sponsor" and placing money in escrow, Navy Relief has been able to ensure the availability of Federal Guaranteed Student Loans from its banks for applicants who meet basic eligibility. These governmental requirements are:

- Be a U.S. citizen (or an authorized immigrant alien).
- Be enrolled, or accepted for enrollment, in a post-secondary school approved by the Department of Education.
- Meet a financial "needs" test administered by the Financial Aid Officer at this school. (Students from families with an adjusted gross income of less than \$30,000 are normally presumed to "need" a loan, unless the cost of education is offset by other student aid.)

Under this program, a student may

borrow up to \$2,500 per year (\$12,500 total) from the bank to meet the following costs of undergraduate education: tuition and fees, room and board, books and supplies, personal needs and transportation. The authorized amount of such loans, however, will be reduced to reflect the value of other student aid such as Basic Educational Grants and Social Security Payments. Students at graduate or professional schools may similarly borrow up to \$5,000 annually to meet these costs. The maximum that can be borrowed for any combination of undergraduate and graduate education is \$25,000.

Repayment of the loans is the responsibility of the student, and parents are not required to co-sign loan agreements. The lending bank charges the student a fine of 3 percent one-time "origination fee" (\$125 for a \$2500 loan). The Federal Government pays the interest while the borrower is in school, and during a grace period of at least six months after leaving school. Thereafter, the borrower repays the principal plus nine percent interest to the bank in monthly amounts as specified in a repayment schedule. (Students who borrowed under the GSL Program prior to January, 1981, continue to pay seven percent on their new loans, and have a nine month grace period.) The maximum repayment period is 10 years.

Navy Relief is not in a position to offer an alternative loan program to most persons who are denied a Guaranteed Student Loan on the basis of the governmental "needs" tests. The Society will, however, consider providing such assistance in exceptional cases where the approved "needs" formula has not taken into account the family's financial circumstances adequately, and a loan is required to avert actual hardship to the family.

If you are interested in more detailed information, obtain a copy of the pamphlet, "The Navy Relief Society Guaranteed Student Loan Program", from your local Navy Relief Auxiliary/ Branch, or by writing: Director of Education Programs, Navy Relief Society, 801 N. Randolph Street, Room 1228, Arlington VA 22203. "Fleet Input" selectees for the NROTC/ECP/MECEP Programs may obtain this information from the Professor of Naval Science or the Marine Officer Instructor at their school.

Auxiliary to hold annual game night

The Naval Regional Medical Center Officers' Auxiliary has announced that it will hold its annual Casino Night at the Oak Knoll Officers' Club on March 13, beginning at 8 p.m.

Tickets will be sold in advance of the event at the Officers' Dining Room, March 8-12 for \$6 each. Admission

Local Red Cross needs volunteers

The Red Cross at Naval Regional Medical Center Oakland is recruiting for volunteers. Clerical workers are especially needed to assist in the office, with typing helpful but not necessary.

There is also an urgent need for volunteer caseworkers. Some college training in social science or a related field is required.

Volunteers are requested to work a minimum of four hours weekly.

Contact Mrs. Ardith Sklinchar or Mrs. Alice King at 639-2524 if interested.

FAMILY GATHERING—With the exception of one member who was unable to attend, the military Driscolls pose together upon the occasion of Sharon's graduation from the University of Virginia last summer. Left to right, they are: Michael, Sharon, Debbie, and father Jerome. The fifth member, Patrick, was at sea.

The Driscolls—a service family

Military bearing is something that many of us learn when we join the military, but for Nurse Corps Debbie Driscoll of 6 West it is a family affair.

Five members of the Driscoll family have worn a uniform of the military service. Her father, CAPT Jerome M. Driscoll, USN Retired, was a line officer pilot and also worked in Defense Communications, serving more than 31 years. Brothers, Army CAPT Michael J. Driscoll, and Navy LT Patrick G. Driscoll, and sister Air Force 2LT Sharon A. Driscoll are still on active duty.

Michael graduated from West Point in '76 and is now a line officer at a Field Artillery station in Kentucky. Patrick, a line naval flight officer for S-3s in Jacksonville, Fla., graduated from Duke University in '77, and Sharon graduated from the University of Virginia the year after her sister, but chose the Air Force. She is stationed with an Aerospace Division in Los Angeles as a systems engineer.

So why the Navy, or the military for that matter? "I was more familiar with

the Navy and I like to travel," said Debbie. "Navy nurses have more responsibility faster and more administrative opportunities than civilian nurses," she added.

After graduating from college in '80, her first duty assignment became Oak Knoll where she expects to remain at least two more years.

She enjoys piano, sewing, jogging and volleyball. Last year she competed in the tennis tournament, placing second here and fourth in the regional.

Ruling: No pay for ex-spouses

The United States Supreme Court has ruled that state courts may not treat military retired pay as community property in divorce settlements.

By a six to three majority vote, the Justices ruled that military retired pay is designed to fit in with other retiree-related programs such as the Survivor Benefit Plan, and state laws cannot be allowed to disrupt these federal programs.

The decision evolved from the appeal of retired Army Colonel Richard J. McCarty who had been ordered by the California courts to pay 45 percent of his retired pay to his former spouse.

The Supreme Court ruled that application of California's community property laws to retired military pay conflicts with the "federal military scheme" and interferes among other things with the military's manpower management system which may recall retired personnel to active duty.

The Justices made it clear that the ruling will apply in non-community property states that have similar concepts.

The ex-spouse still has a right to claim social security benefits and to garnishes military retired pay for the purpose of alimony or child support. The decision does not preclude individual divorce settlements providing for voluntarily shared military retirement pay.

Retirees who believe they are affected by the decision should seek specific guidance and details on the impact of the McCarty ruling from legal counsel.

The following new additions to the medical "family" have arrived at Naval Regional Medical Center, Oakland:

A baby girl to Lieutenant Arnold S. Kirshenbaum, Pediatrics Service, and his wife Joyce, Jan. 26.

A baby girl to Hospital Corpsman Third Class Keith B. Lambert, PMT School staff, and his wife Pamela, Feb. 2.

A baby boy to Hospital Corpsman Second Class William L. Fenstermacher, Jr., Moffett Branch Clinic, and his wife Michelle, Feb. 5.

Volunteer.

 American Red Cross

Together, we can change things.

75 YEARS OF FUN—The Santa Cruz Beach Boardwalk celebrates its 75th Anniversary in 1982 with special events and promotions lasting the entire year. Also new this year is an added Beachcomber Club discount. Discount cards at \$7 per person permit unlimited rides on all the features of the amusement center. These cards are now available in Special Services on base. Boardwalk attractions are now operating on weekends, beginning at 11 a.m., and will be open all of Easter Week, April 3-11.

Navy plays role in child's rescue

Dr. William Goodin, NAS Lemoore flight surgeon, and a Yosemite nurse worked together to stabilize vital signs and raise the 87-degree body temperature of little Donnie Priest who was the only survivor of a small plane crash in the high Sierras in early January.

A search and rescue team from NAS Lemoore sighted the wreckage on a mountainside five days after it had been reported missing. Unable to land on the steep slope, the helicopter departed and picked up permanent winter rangers who were familiar with the area. Landing about 200 yards from the wreckage, the rangers skied to the plane, dug through the snow and

crawled into the fuselage, where they found Donnie and the bodies of his mother and stepfather.

The 11-year-old child was hoisted into the helicopter in a fishnet harness after being wrapped in blankets to warm him and flown to the Yosemite Dispensary for emergency treatment by Dr. Goodin and the nurse. He was later flown to a Fresno hospital by the SAR crew, and still later transferred to Stanford, where surgeons found it necessary to amputate his frostbitten feet.

At last report, Donnie had been discharged from the hospital and was recuperating at the home of his father.

MOVIES

Friday, Feb. 19, 6:30 p.m.—RUCKUS—Dirk Benedict, Linda Blair—Action/R
Saturday, Feb. 20, 1 p.m.—OIL—Stuart Whitman, Ray Milland—Action/PG

Tahoe special slated

Special Services is now accepting signups from military, retired, dependents and Department of Defense civilians for a ski-gambling-show trip package to South Lake Tahoe. A deluxe motorcoach will leave Naval Regional Medical Center Oakland at 4:30 p.m. on Friday, March 19, and return to Oak Knoll on Sunday, March 21, at 8 p.m.

The package includes round-trip transportation, two nights at the Vagabond Motel, \$10 in cash bonuses and \$5 in food coupons from Harrah's and Harvey's casinos. Free transportation

will also be offered to the Heavenly Valley Ski Area and to the casino. (Major shows playing at that time will be announced later.)

Sally Young in Special Services urges those interested to sign up now so that space may be held. A \$2 deposit is completely returnable on March 1. Per person prices are: Double or Triple Occupancy, \$73; Twin, \$71; Single, \$100.

Call Sally at Ext. 2479, or stop in the Special Services Ticket and Travel Office in Room 216, Bldg. 38, for more details, or to sign up.

Lake Chabot—a park for all seasons

If the proverbial long winter's nap has lost its recreational appeal, then it is time to pay closer attention to Lake Chabot—a park for all seasons.

Fishermen, runners, bicyclists, babes in strollers, hikers and joggers may be seen in action along the shores of this urban lake most any day.

Paved trails along the scenic shores are indeed an attraction during the moist winter season. January storm washouts along the Westside Trail temporarily interrupted the regular jogging and running patterns from Chabot Park in San Leandro, over the dam, to Lake Chabot and the marina. But the Lakeside Trail along the eastern shore remains open for an exciting journey. Watch postings at the marina area for trail improvements.

Year-round fishing

There is year round fishing in Regional Park Lakes. Come lure the limit of rainbow trout, large-mouth bass, black crappie, red-ear sunfish, carp, channel and white catfish. Challengers of the lake's record catches will become members of the Lake's exclusive "Whopper Club," according to Lake Chabot Supervisor John Maciel, and their winning catches will be posted at the Marina Coffee Shop.

State Fishing Licenses and EBRPD Fishing Permits, both available at the Marina from 7 a.m. to 4 p.m. daily, are required for anglers aged 16 years and older.

Breakfast at lake

On weekends for early-rising fisherfolk, hikers and joggers, there is breakfast available at the coffee shop. On Saturday, a short stack, two eggs and beverage, \$1.65; on Sunday, enjoy the Jogger's Special of two eggs, hashbrowns, toast and beverage for \$1.75.

The Senior Citizen Special offered weekends at lunchtime includes hot soup, grilled cheese sandwich and beverage, plus a free ride on the Lake Chabot Tour Boat, the "Lake Chabot Queen," for \$1.70.

For all ages, winter purchase of any Coffee Shop special gives half off the price of a tour boat ride. Regular tours run Saturday and Sunday at 11 a.m., 1 and 3 p.m. Rates are \$1/adults 13 through 64 years; 50¢/children 6-12, senior citizens 65 years and older, and for handicapped individuals. Age six and under ride free.

Charter tours

Charter tours may be arranged on weekdays by phoning EBRPD Reservations, 531-9043.

There are also rental rowboats (with or without electric motors), paddle boats and canoes available to explore the remote inlets and coves of Lake Chabot or to reach choice fishing spots. No private boats are allowed.

If you yearn for the quiet found drifting in a canoe, but lack the paddling skills, consider a canoeing class. First

classes for 1982 will begin soon. To sign up or for more details, contact the American Red Cross office in Oakland, 533-2321. Instruction is free. There is a charge to cover cost of canoe rental.

Directions to Park

To reach Lake Chabot in Anthony Chabot Regional Park: Take Hwy 58 to 150th-Fairmont Ave. exit in San Leandro; drive east on Fairmont to Lakeside Chabot Road; ease right onto Lakeside Chabot Road and watch the left-hand side of the road for the Lake Chabot sign.

Parking, \$1/daily at Lake Chabot during the winter, takes four quarters... or park members may display their membership cards on the dashboard to waive the fee. (East Bay Log)

YUKON TERRITORY—Seen from atop Logger's Run, a water flume ride, this theme area is one of five new historical adventures at Marriott's GREAT AMERICA in Santa Clara. Something else new: Special Services now offers a season pass to the amusement center for \$31 (general public pays \$49.95). The ticket entitles the bearer to unlimited use of the park for the entire 1982 season, from opening day March 6 until it closes in the fall. If lost, the ticket can be replaced at no charge; however, no cash refund will be made. The offer is limited, first-come, first-served. Special Services also offers regular day tickets at a discount rate of \$10.

Credit Union check facility now open for business

The Alameda Coast Guard Federal Credit Union opened an expanded facility on base for share draft checking services on March 1. Featuring an express teller line for the handicapped, it is located in the old Bank of America building next door to the main credit union office.

The new location will be used by credit union members exclusively for all share draft checking account services. All other credit union services—savings, special certificates, IRAs, loans, new member accounts and safe

deposit boxes—remain at the former location.

According to Walter Terry, General Manager, the additional facility will allow the staff to serve members more quickly and efficiently. "We now have over 5,100 checking account members in the credit union," he noted.

The handicapped will be able to cash paychecks at the new annex, using the special handicapped express line.

The new phone number, only for the credit union's checking services facility, is (415) 569-2633.

TRILAB status reported

The TRILAB computer system is in its final stages of installation, with the majority of the ward and clinic CRTs now in place and available for use by hospital staff.

The computer operation and laboratory technician training was completed the end of January. The Nursing Service training was conducted on Feb. 17 and 18. Computer security codes are presently being assigned to physician and nursing service personnel. Hardware and software were officially signed over to the government on Feb. 15.

The system has been running very well, as the staff members from Outpatient Services, Patient Affairs and Laboratory began entering patient and test request data, reports Lieutenant Commander Robert E. Felton. The various functions within the system are being tested daily by the laboratory staff. A system implementation plan has been initiated and the system will be phased into operation over the next four weeks. During this phase-in process, he said, the laboratory will be virtually maintaining two information systems, the old manual filing system and the new automated system. This means double work for the laboratory staff during the phase-in process.

Several problems have been identified during this last week and resolved. This is typical of any installation and is a necessary evil to fine tune the system to the hospital's unique needs, the officer explained.

As of March 1, 40 percent of all inpatient and outpatient data were expected to be in the system and available to ward and clinic personnel for viewing on their respective CRTs. Nursing Service personnel are encouraged to continue their training by using the knowledge gained in the training sessions and passing it along to other ward and clinic personnel. A special class will be set up in the near future for house physicians.

LCDR Felton had one last word of caution to those individuals who have received their personal security codes. "These codes are an electronic signature utilized by the system to link transactions within the system to the individual initiating the transaction. The acts of signing-on, inquiring, etc. are logged by the system on an audit trail report which is forwarded to management. Therefore, **one should never let another individual know or use your security code**

Reserve clergy to attend drill

Pastoral Care Service will host a drill training period for several civilian clergymen who are reservists on Thursday, March 11.

Slide presentations on the hospital ministry will be given beginning at 8:30 a.m. in Staff Training Classroom, Ward 6S.

Hearings address open season

The Office of Personnel Management (OPM) held hearings in Washington on Feb. 22-23 to solicit views on a proposal to hold an open season May 3-28 for federal employees to change plans in the Federal Employees Health Benefit Program.

OPM Director Donald J. Devine said that there are more than 100 different insurance carriers offering group health plans to federal workers, and hopefully, printed materials describing these programs would be out within the next few weeks to allow employees to study the different plans before the open season, if permitted, begins.

If the delayed open season becomes reality in May, it would become effective for employees on the first day of the first pay period in July.

Also discussed at the recent hearings was a possible transfer fee that employees would have to pay if they switch from one plan to another, and the possibility that carriers could exclude certain pre-existing health conditions for enrollees who change plans.

Several congressmen and union representatives attended the Washington hearings last week. One congressman has introduced legislation that calls for a mandatory open season every year.

The open season which had been scheduled to take place last November and December was postponed by OPM amid uncertainty over the legal status of the benefits packages negotiated with the carriers in October. Several employee union health plans sued OPM over benefits reduction, claiming that the agency did not have authority to order the cuts. A Federal District Court ruled some of the cuts legal, and others illegal. OPM appealed the ruling, and a U. S. Court of Appeals panel ruled in OPM's favor on the question of whether the agency had authority to negotiate benefit reductions in order to stay within budget and to protect enrollees from unreasonably high premium increases.

FEHB premiums skyrocketed some 30 percent in January, with most plans reducing benefits by 16 percent.

OPM will review hearing findings and announce its decision after studies are complete.

Nearly three and a half million federal employees and retirees are enrolled in the FEHB program. Counting their dependents, nearly ten million persons are insured by the member plans. Enrollees and the government share the cost of premiums which pay for the coverage.

INSPIRATIONAL TALK—R. C. Owens, former wide receiver for the San Francisco 49ers, and Executive Assistant for the same football team, was guest speaker at the Oak Knoll observance of the National Prayer Breakfast in mid-February. Others participating in the program were Mr. Weldon Miles, Marine Corps Staff Sergeant James M. Cooper, Rear Admiral Walter M. Loneragan, Lieutenant Arnold S. Kirshenbaum, Lieutenant Commander Suzanne Norton, Captain M.D. Seiders and Lieutenant Jack O'Neill. Coordinators of the successful event were chaplains Commander Melvin J. Hary and Lieutenant Jay L. Hoppus. Organist was Dr. Paul Mauk.

Special menu at Porthole

St. Patrick's Day will be observed at *The Porthole* with a traditional corned beef and cabbage dinner March 17, it has been announced.

Planning was not complete when we called, but entertainment for that evening was also being considered.

Women officers to meet for lunch

A Bay Area Women Officers Luncheon is scheduled for 11:30 a.m. on Friday, March 19, at the Commissioned Officers Mess, NAS Alameda.

It is open to all active duty, reserve and retired officers in the San Francisco Bay Area. Featured speaker will be Captain R.L. Hazard, Commanding Officer, Naval Technical Training Center, Treasure Island, discussing "Career Line Opportunities for Women in the Navy."

Cost per person is \$6.75 and reservations must be made by March 10. Those interested should call the Oak Knoll coordinator, Nurse Corps Lieutenant Commander Kathleen Bonnet-Langston, Ext. 2110.

MARCH PROCLAIMED RED CROSS MONTH—President Ronald Reagan has proclaimed the traditional month of March as Red Cross Month—a time for the nation to recognize the humanitarian services of this organization, in civil disasters, in war, and in the routine community/military business world. Naval Regional Medical Center, Oakland, in particular, takes this opportunity to offer a salute to its devoted Red Cross volunteers and their daily contributions to patient welfare.

EDITORIAL

The gift of an angel

LCDR Stu Powrie

When *Oak Leaf* published his picture last July in promotion of the Travis Air Force Base show featuring the *Blue Angels*, several female military and civilian personnel asked for extra copies of the photo to dress up their bulletin boards.

He was handsome, his smile depicted a great personality, and male or female, one got the first impression that he'd make an interesting and loyal friend. More than that, his appearance was All-Navy, and it kindled a professional pride in belonging to the same service.

Chances are remote that few of us knew him personally, but most of us were heartsick when we heard last week that 34-year-old Lieutenant Commander Stu Powrie had been killed in the Feb. 22 crash of his A-4 Skyhawk jet in the southeastern California desert.

For those who attended the Travis show, you might remember that Stu then flew Opposing Solo in Plane No. 6. A competitive swimmer throughout high school and at the U. S. Naval Academy, he became a naval aviator in April 1972. He completed training in the F-4 Phantom and was deployed for two years aboard the USS MIDWAY (CV-41).

He later received a masters of science degree in aeronautical engineering at Naval Postgraduate School, Monterey, and was inducted into the Sigma Xi academic honorary fraternity in March 1977. There followed duty at Pacific Missile Test Center, Pt. Mugu, and after that, deployment aboard the USS CORAL SEA (CV-43) in the Western Pacific and Indian Ocean. When he joined the *Blue Angels* in October 1980, he had more than 1,700 flight hours and 320 carrier landings to his credit. He was married and the father of two children.

The cause of the accident was still under investigation at the time of this writing. Our initial reaction to the tragic event was disbelief, followed by a feeling of great loss and sympathy for his loved ones. Stu, like the four members of the Air Force *Thunderbirds* who also lost their lives this year, was one of the good ones—rare individuals who make us glad to be Americans.

We should be thankful for the gifts Stu Powrie gave us in his all-too-short life. He was a true ambassador of goodwill.

Fly on, *Blue Angel*. We won't forget you.

Our patients write...

On Jan. 12 I was admitted to CCU. . . bad went to worse, and but for the cooperative, knowledgeable, conscientious efforts of all shifts, I would not be writing this.

I was transferred to St. Mary's Hospital and Dr. Espiritu accompanied me in the ambulance. The following day (surgery was performed).

The surgeons were marvelous but it is the CCU I am writing about. I shall not name names because, in my befuddled state, I will surely omit someone and believe me, ALL receive equal credit. Shifts came and went and no people, regardless of rate, could have done more or been more efficient.

When I was released from the (civilian) hospital I thanked the surgeon and he said, "I don't deserve your thanks for saving your life. Oak Knoll did that. I merely repaired the damage nature had done."

So—how do you thank people for your life? I want you to know for all the patients who come and go through CCU and never say anything—here is one who will be forever grateful and I want you to be aware of the people in that unit who "give their all."

For 35 years I have used this facility and because of these people I hope to use it for another 35.

Shirley Steffen

A new blueprint tomorrow?

By LTJG Scott A. Marsh

To commemorate Black History Week, a program was held Feb. 23. I went with the attitude that I didn't think that I would be "culturally enriched." As the program progressed the tone was not what I truly expected but more what I had hoped that it would be.

For those of you who unfortunately had other things, or as others asked, "Why be reminded? Why have a Black History emphasis? Let me share with you my thoughts about the program.

The theme was "Blueprint for Tomorrow." The poet Frederick Douglas was quoted as saying, "without struggle there is no progress." But with whom is the struggle or the opponent? A Selected reading by GMG1 Reginald Day talked about his advice for the future. "It's not what a man wishes and prays for that he gets, but what he justly earns." Through songs and the spoken word, thoughts of courage and decision ("with a made up mind") emphasized the message.

We must work together. I say "we" not whites or blacks, but all men. Synergism is the cooperative action such that the total effect is greater than the sum of individual efforts.

We must share our opportunities and knowledge with all people. Growing together and working together as a team for the good of all.

We are all Americans, black, white, yellow or brown. All of us are citizens of this United States. All of us should be working toward the same goal. Who is our opponent? Hopefully not each other.

I'm reminded of the words to a song made famous by B.J. Thomas "Everything is Beautiful"

*"Everything is beautiful in its own way
under God's heaven the world will find the way. . .*

*There is none so blind as he who will not see
We must not close our minds and let our thoughts be free."*

I pray that I am not somebody's struggle and that my mind will open to help and contribute to the combined good. Are you somebody's opponent in their Blueprint for Tomorrow?

Chaplain's Corner

Lent—a time for new beginnings

By Chaplain Jay Hoppus

II Corinthians 6:2 "Behold, now is the acceptable time; behold, now is the day of salvation."

You may not believe it, or it just doesn't seem possible, but Lenten season began again last week. Ash Wednesday begins the theme of "now is the time." Lent should be a time for us to take personal inventory. Not from the rooms and shelves of our homes or offices, but of our own lives. Who are we serving and following after—the ways of the world or the ways of God?

"Now" says Paul in Corinthians is the day to ask ourselves how do we stand in relationship to God? The ways of the world point to a Medicine Chest God where we take out a God pill only when we're feeling bad, and then, it's back into the chest. The ways of God point to a God who immersed Himself totally into human life and especially with the suffering of humanity. Jesus Christ, the Son of the living God, took on our nature, suffered and died for us, and then gave us life as we've never known it before.

"For our sake He made Him to be sin who knew no sin, so that in Him we might become the righteousness of God." (2 Corin 5:21). "In Him" is what it means to be following the ways of God and it's a free gift this Lenten season. Just accept the gift and take it into our life. That's generally what we do isn't it, when someone has a present for us? It is just so simple. Yet in our jet age of computers, science, knowledge, wisdom and Madison Avenue, we want to spruce it up and work for it, change it, and package it up in paper and tinsel so it looks good.

The heritage and tradition of the Church has left the message that it is not what we can do for God but what He has already done for us. If we are to do or work for anything, it is in response to what God has done already for us—to accept or reject the gift of His Son. Now is the acceptable time to begin any future. May you just "keep it simple" and accept now God's salvation. "God was in Christ, reconciling the world to Himself."

NAVAL REGIONAL MEDICAL CENTER OAKLAND, CALIFORNIA

RADM W M. Lonergan, MC, USN,
Commanding Officer

CAPT Joseph P. Smyth, MC, USN, Director of
Clinical Services

CDR Frank D. Fisher, MSC, USN, Director of
Administrative Services

THE OAK LEAF is published biweekly on Friday produced commercially with appropriated funds in compliance with NNPR P-35, Rev Jan 1974. Deadline for copy is Thursday noon of the week prior to publication.

Opinions contained herein are not official expressions of the Department of the Navy. THE OAK LEAF receives American Forces Press Service and Navy News material.

Contributions from both staff and patients are welcomed and should be addressed to the Editor of the OAK LEAF, Naval Regional Medical Center, Oakland, CA 94627.

St. Pat's Day salute to the 'fighting' Irish

Info course for those getting out

Are you due to get out of the service soon? YNI Steve Garthwaite, Naval Reserve Counselor and member of the Pacific Fleet Naval Reserve Indoctrination Team at Alameda, presented an information course on VA Benefits and Reserve Programs on Feb. 25, and will repeat it in March.

This course is mandatory for those leaving the Navy. Other interested personnel may wish to attend and be advised of the opportunities available. This is not a recruiting endeavor.

For times and location consult the Plan of the Day.

'O club' closed on Mondays

The Naval Regional Medical Center Officers' Club is now closed on Mondays.

The club is open for lunch the remaining four days of the business week from 11:30 a.m. to 1:30 p.m.

Happy hour is held each Friday, beginning at 4 p.m.

GCM convicts Navy officer of drug offenses

A U.S. Navy officer was sentenced Feb. 9 by a general court-martial to dismissal from the naval service and two years confinement at hard labor for drug-related offenses.

The court-martial was convened by Commander, U.S. Naval Forces, Japan, and tried at Fleet Activities, Yokosuka, Japan. The officer, a lieutenant assigned to Commander, Fleet Air Western Pacific, was convicted of 12 specifications of violating a general order or regulation. The violations included wrongful sale, transfer, possession and use of marijuana.

Dismissal from the Navy for an officer is equivalent to dishonorable discharge of an enlisted member.

The roll of the 18th Pennsylvania Regiment during the American Revolution in 1779 showed foreigners outnumbering native born Americans two to one, with the Irish alone comprising nearly half of the men. The roster of the Pennsylvania State Regiment of Artillery indicates that former Irishmen made up one-third of the entire regiment. This high ratio was typical in many of the Colonial forces.

Thousands of Irishmen served in the Union Army during the Civil War. The famous Irish brigade commanded by General Thomas F. Meagher was composed of the 63d, 69th and 88th New York Regiments. Units of the brigade were particularly outstanding in the Battle of Mary's Heights at Fredericksburg, Va., when Irish regiments from the North faced Irish regiments from the south. Massachusetts, Pennsylvania, Indiana and Illinois each furnished two Irish regiments and several other states each provided one.

Irish participating in the Army that fought the Indians after the Civil War is borne out by the names of men who won the Army Medal of Honor: Irwin, Fegan, Carrol, Carter, Daily, Dowling, Farren, Foran, Golden, Higgins, Deenan, Brophy, Reed and Burke were all from Ireland.

During World War I, Pat Regan dashed with an empty pistol into a machine gun nest, capturing 30 Austrian gunners and four machine guns. Richard W. O'Neil in advance of an assaulting line attacked a detachment of about 25 of the enemy.

Who has not heard of those legendary heroes of World War II—the five Sullivan brothers who tragically went down with their ship, or of Colin Kelly, killed when he sank the Japanese warship. Irishmen as an ethnic group were awarded more Navy Medals of Honor than any other ethnic group and there were thousands of others—sons or sons of sons of the Old Sod.

There was Jonah Kelley who destroyed a machine gun nest before he was killed; Ova Kelley who inspired his comrades to destroy an enemy force of 36 men while capturing one light and two heavy machine guns; Charles L. Kelly who defended an ammunition storehouse against vastly superior enemy forces with his automatic rifle; Thomas J. Kelly, a medical-aid man, who made 10 separate trips through murderous enemy fire, each time bringing wounded men out of the death trap.

On and on the list could continue, down through the Korean War and Vietnam conflict, of the fighting Irish who contributed in protecting the nation that had given a home to them or to their fathers.

The Irish contributions were not unique; they were in league with contributions of a host of men who came or who were the offspring of men who came from many nations. But it seems their right to be singled out as we approach St. Patrick's Day, the day of the Patron Saint of Ireland.

Army general visits NRMCO

Brigadier General John H. Mitchell, Director, Human Resources Development in the office of the Army Chief of Staff, paid a courtesy call on the command and visited the Drug Screening Laboratory on base Feb. 16.

On his trip from the Pentagon, Brigadier General Mitchell also called on Letterman Army Medical Center in San Francisco and Ft. Ord near Monterey.

The Army's alcohol and drug abuse program is one of his responsibilities.

Pacific Fleet combats fraud, waste, abuse

More than 225 cases of fraud, waste and abuse were identified by Pacific Fleet counter-intelligence officers in 1981, saving the Navy hundreds of thousands of dollars, and supporting the actions taken by a steering group established by Admiral James D. Watkins, Commander in Chief, U.S. Pacific Fleet.

Some of the examples include:

- A sailor fraudulently obtained government transportation for his girlfriend and her child to travel overseas, and secured temporary living allowance and base housing for them.

- A teleprinter was recovered from a trash site at a naval air station. It was supposed to have gone from an aircraft carrier to a repair facility ashore for rework. Its value was \$30,000.

- A doctor assigned to a Naval Regional Medical Center started two civilian businesses, allegedly operating them primarily on government time. He is also alleged to have billed CHAMPUS for treatment of military

personnel.

At a recent meeting of the fraud, waste and abuse steering group, Admiral Watkins had blunt words for potential offenders: **"Some may be tempted to think that... a little bit of fraud might be all right. Well, it isn't, and the Navy is sending that signal strong and clear throughout the rank and file. The penalties are tough. Penalties can end a bright career and result in a stiff prison sentence. With the challenge of providing an adequate defense with finite resources, fraud, waste and abuse must be eliminated."**

Anyone seeing wasteful or criminal abuses taking place should report the encounter through the chain of command or call a "hotline" for fraud, waste and abuse. Nationally, the numbers are Commercial (800) 424-9098 (outside Washington, D.C.) or 693-5080 (inside Washington, D.C.), Autovon 223-5080 or FTS (202) 693-5080.

Military host families sought for educational exchange program

Military families are being sought to host foreign students visiting the western United States for the 1982-83 school year under auspices of American Intercultural Student Exchange (AISE), a non-profit organization recognized by the U.S. International Communication Agency.

Male and female students aged 16 and 17 will be visiting the U.S. from Sweden, Norway, Finland, Germany, Spain and the Philippines. All will be English-speaking. Host families would provide room and board and would be eligible for \$50 per month tax deduc-

tion for each student.

AISE is also looking for host families for Finnish students visiting the western U.S. for a five-week summer program in June-July 1982, as well as U.S. students interested in spending the 1982-83 school year in the above-named countries.

For more information, military personnel and dependents may contact AISE at 714-459-9761. Collect calls will be accepted. AISE can also be reached via letter at 7728 Lookout Drive, La Jolla, Calif. 92037.

Identification of drug abusers 'vital'

Unfamiliarity with the symptoms of drug and alcohol abuse can significantly reduce the chances of success in treating the abuser and jeopardize the safety of other personnel, according to a January 1982 report of the Navy Alcohol and Drug Abuse Program (NADAP).

The report calls on commanding officers, executive officers and supervisors to learn how to identify those individuals within their units who show symptoms of being in trouble with alcohol and other drugs.

According to NADAP, early discovery of a problem "short-circuits the manipulative skills of the alcoholic and other-drug dependent individuals" and shortens the dependency period and recovery process. It also prevents development of the alibi system that allows individuals to justify their drug or alcohol abuse.

Occurrences which may indicate a drug or alcohol involvement include: unusual absenteeism, an accident rate

significantly greater than normal, difficulty in concentration, confusion in understanding instructions and spasmodic work patterns alternating between periods of very high and very low productivity. Mood swings, fights or arguments with fellow workers, disheveled clothing and fear of learning new jobs or skills may also indicate a problem.

Ignoring the issue creates the risk of physical harm to command personnel who depend on the reliability of an individual's work, or harm to the abuser himself through abuse-related accidents or overdoses. The report says recognition of symptoms is vital to the interest of Navy operational readiness and manpower retention.

Hi-ho, Silver, —he's away!

A "Stallion" which could conceivably be called "Silver" is loose somewhere in the main hospital building and needs to be rounded up and returned to its corral on the third deck.

Twelve hands, or four feet tall, "Silver" carries a six foot grey tail and rolls, rather than gallops, on three round feet. His body is chrome-plated and he "snorts up" both wet and dry materials.

You guessed it... "Silver" is a vacuum cleaner with the trade-name of Stallion. He disappeared from the Housekeeping storeroom on or about Feb. 1. If he happens to be in your service (or pasture), please call Ext. 2204.

Call before donating publications to library

The General Library requests prospective donors of books call Ext. 2220 first to see if the donations are needed. Due to lack of space, the library cannot accept many gifts, a spokesman explained.

Paperbooks in good condition are welcomed, he said, and are used by our patients in the hospital wards, but gifts of Reader's Digest Condensed Books, old textbooks, five-year-old "best sellers," and any books in large quantities cannot be used.

'BIG E' RENOVATED—USS ENTERPRISE (CVN-65), the world's first nuclear-powered aircraft carrier, is back at her homeport of NAS Alameda after a three-year, \$276 million overhaul at Puget Sound Naval Shipyard where she is pictured as she nears completion. The overhaul included engineering updates, changes to the mast and the installation systems, as well as a general rehab to living quarters.

VA seeks former POWs

Veterans service organizations and some 500 military unit associations are being asked to help the Veterans Administration locate 57,000 special persons.

They are part of the 100,000 living American former prisoners of war (POWs) who became potentially eligible for benefits as the result of recent legislation.

The VA already has the names of 43,000 former POWs who have qualified for compensation or pension.

The POW Health Care Benefits Act of 1981 makes it easier for former prisoners of war, held by the enemy for as short a period as 30 days, to establish entitlement to compensation for certain disabilities.

These veterans may now be compensated for certain psychological and nutrition-related disorders regardless of when, in their lifetimes, they first appear.

Eligibility for inpatient and outpatient medical care, on a priority basis, now exists for all ex-POWs. The new law also provides that a vet's captivity need not have been during wartime for these new, more liberal, benefit rules to apply.

The agency's concern with the special health problems of former POWs stems from a joint study in 1980 with the Department of Defense which found POWs, whose confinement was characterized by starvation diets, lack of medical care and inhumane treatment, have a higher incidence of physical and psychological disabilities.

Former POWs may previously have had difficulties establishing claims for benefits based upon service connected disabilities due to inadequate repatriation examinations, the study points out.

The largest group of former POWs, 93,128, is from World War II. There are 3,844 ex-POWs from the Korean Conflict; 800 from World War I; 642 from the Vietnam War, and 80 from the USS PUEBLO incident.

Organizations cooperating with the VA are being asked to provide all pertinent information on their members who were POWs. The military serial number, social security number or VA claim number is especially important.

The VA plans to contact all veterans identified in this manner, to inform them of the details of the legislation and to answer any questions they may have.

The agency is also asking members of the public to advise any veteran they know who is a former POW of the new legislation.

Veterans benefits counselors at all VA regional offices have details of the new law, and will answer any questions concerning it. County service officers and service organization representatives may also be contacted.

The VA regional office in San Francisco is located at 211 Main Street (corner of Main and Howard).

Toll-free lines into VA regional offices may be found in the white pages of phone books under "U.S. Government."

MEMORIAL DONATION—This painting was donated to the Medical Center by Clark Vandenberg in appreciation for care given his wife, Hildegard. It is available for view in the Adolescent Clinic. Mr. Vandenberg has other works on display in local museums.

Seabees 40th Anniversary

The name and insignia for Seabees were authorized March 5, 1942.

The name 'Seabees' is derived from the first Construction Battalions (CBs). Seabees traditionally observe March 5 as their anniversary.

On March 19, 1942, the Civil Engineer Corps was given command of the Seabees, whose official motto is "Construimus-Batuimus." Literally, this means, "We Build—We Fight."

The first Seabees had no military training. One month after the units were formed, they found themselves at work building roads on Borabora, thousands of miles out in the Pacific.

They proved then that they live up to the saying "Navy Seabees can do!"

They're still proving it today.
Happy 40th, Seabees.

--- Career Capsules ---

Navy offers off-duty educational opportunities

By HMC G.L. Soileau
Career Counselor

If you are interested in advancing educationally while you are in the Navy, there are a number of opportunities available to you.

The Navy has a program enabling its members to complete a high school diploma and pursue a college degree. This voluntary educational program is called Navy Campus. Whether you are ashore or afloat, you can finish your high school education under the Navy High School Studies Program. And, if you would like to work toward a college degree, you can enroll in evening courses at your base, or take courses while aboard ship.

For those of you stationed at NRMC Oakland, Navy Campus has arranged to bring college level courses to you during off-duty hours. Your Education and Training Department or Career Counselor can assist you in contacting the nearest advisor's office.

The Navy will help pay for the cost of the education. For example, courses taken to complete a high school diploma are free. If you have achieved a high school diploma or equivalent, you can take college level courses and pay only part of the cost. Under the Navy Campus Tuition Assistance Program, up to 75 percent of the cost of college level courses are paid if you are an E-4 or below. If you are an E-5 or above and have less than 14 years of service, up to 90 percent of the tuition costs will be paid.

If you have any questions about what is available, or how to proceed, check with Education and Training or the Career Counselor.

Navy plans to recruit more women

The Navy will continue with a planned increase in the number of female officers to 6,400 and enlisted women from the current 35,000 level to 45,000 by FY 1985. The increase supports Defense Secretary Caspar Weinberger's goal of expanding the role of women in the military and removing obstacles to fully utilizing their capabilities.

In a memorandum to all service secretaries, Secretary Weinberger said, "Women in the military are a very important part of our total-force capability. Qualified women are essential to obtaining the numbers of quality people required to maintain the readiness of our forces."

Bachelor COLA begins overseas

A bachelor cost of living allowance (COLA) for single and unaccompanied members in high cost overseas areas was included in Navy paychecks in January. The COLA gives members receiving government quarters and messing 47 percent of the without-dependents rate paid to single or unaccompanied members on separate rations.

The new allowance corrects a long standing inequity that denied single and unaccompanied members who live on base and eat in Navy messes any compensation for additional expenses incurred in overseas areas.

Warrant/LDO applications due

Applications from all E-7/8/9 personnel for appointment to Chief Warrant Officer (CWO) and Limited Duty Officer (LDO) are due at the Naval Military Personnel Command by April 1. First class petty officers, who must compete in the E-7 exam, have until May 17 to complete their applications.

Selection opportunity for FY 1983 is expected to be nine percent for LDO, 25 percent for CWO, and 26 percent for CWOs who apply for appointment to LDO LTJG.

Application procedures and eligibility requirements for both programs are listed in NMPC Notice 1120 of Dec. 30, 1981.

Assistants needed

Applications will be accepted through March 12 for two Operating Room Nursing Assistant positions in Otorhinolaryngology Service.

The GS-5 employees will assist physicians in providing diagnostic services and specialized medical and surgical care for disease and injuries in this specialized field. They will also perform scrub and circulating duties as member of a surgical team, and transport Indian Health Service patients to and from San Francisco Bay airports.

The assistants will accompany physicians to Indian reservations in the western states in connection with an otitis medical program agreement.

Interested applicants may receive more detailed information from Maurine Tinsley in Civilian Personnel Service, Ext. 2116.

Comings and Goings -----

"Fair winds and following seas" to the following personnel who have recently departed this command:

Lieutenant Roger Edwards, formerly of Pharmacy Service, to Okinawa Hospital Apprentice Ralph Finley, released from active duty.

Hospital Corpsman Second Class Tanva Hernandez to NRMCM Guam.

Hospital Corpsman Second Class Brett Christensen, released from active duty.

Lieutenant Thomas Howe to NRMCM Guam.

Hospital Corpsman Second Class Antonio Alvarez to NSHS San Diego.

Hospital Corpsman Third Class Jon Chamness to NAMI, Pensacola, Fla.

Hospital Corpsman Second Class Michael Hopkins, released from active duty.

Hospital Corpsman Third Class David Kitchen to NSHS San Diego.

Lieutenant Clarice Nash to NRMCM San Diego.

Hospitalman Gerald Close to NSHS San Diego.

Hospital Corpsman Third Class Larry Shamblin to NAMI, Pensacola, Fla.

Dentalman Barry Walker to San Miguel, R.P.

Hospitalman Angelica Oliva to Alameda Branch Clinic.

Hospital Corpsman Third Class Alice R. Lambert to NRMCM Rota, Spain.

Hospital Corpsman Second Class Treadner Horton to NRMCM Hawaii.

Hospital Corpsman Third Class Carl Lindemann to El Centro, Calif., Branch Clinic.

Hospital Corpsman Third Class Frank Cruice to Naval Submarine Medical Center, New London, Conn.

Hospital Corpsman Third Class James Burrell to NNMCM, Bethesda, Md.

Hospital Corpsman Third Class Robert Harrington to NRMCM Bremerton, Wash.

Hospital Corpsman Third Class David Forde to Naval Support Activity, Diego Garcia.

Hospital Corpsman First Class Terry Roscoe to Quantico, Va. Branch Clinic.

Hospital Corpsman First Class Ronald Rhodes to USS SARATOGA (CV 60), homeported in Mayport, Fla.

Hospital Corpsman Third Class Clarence Sims to USS EMORY LAND (AS-39), homeported in Norfolk, Va.

Hospital Corpsman Third Class Michael Evans to NRMCM Long Beach, Calif.

Hospital Corpsman Third Class Zigfrid Tomson to NAEC Branch Clinic, Lakehurst, N.J.

Hospital Corpsman Third Class Gregory Stephens to NRMCM Orlando, Fla.

Hospital Corpsman Second Class Jerry L. Vernon to Marine Corps Air Station, 29 Palms, Calif.

Hospital Corpsman Third Class Allen B. Chackman to Quantico, Va. Branch Clinic.

Hospital Corpsman Third Class Mark McCormick, released from active duty.

Hospital Corpsman Third Class Gerald Lombardi to USS GUADALCANAL.

Hospital Corpsman Second Class Cynthia Dixon to NRMCM San Diego.

Hospital Corpsman Third Class Christopher Strainbrook to NRMCM Camp Pendleton.

...

"Welcome aboard" to recently arrived:

Ensign Martha Ann Van Clief, Clinical Clerk.

Lieutenant Commander Peggy Coffman, Nurse Corps.

Captain David Wallin, Medical Corps, Clinical Investigation Center, ACDUTRA.

Ensign Frederick Martin, Clinical Clerk.

Ensign John Hudler, Clinical Clerk.

Hospitalman Junior Shepherd, Pharmacy Service.

Operations Specialist Second Class Christopher Martindale, Operating Management Service.

Hospital Corpsman First Class Lamberto Castello, Career Counselor's Office.

Hospitalman Recruit Lawrence G. Zamora, Nursing Service.

Hospital Apprentice Roger Cook, Nursing Service.

Hospital Apprentice Edwin Santa Maria, Nursing Service.

Hospital Corpsman Third Class George Fargas, PMT School.

Hospital Corpsman Second Class Dale Johnson, Medical Repair.

Hospital Corpsman Third Class Christopher Curtin, Nursing Service.

Hospital Apprentice John F. Payne, Nursing Service.

Hospitalman Anthony Keaton, X-Ray School.

Hospital Corpsman Third Class Gordon Rector, X-Ray School.

Hospital Corpsman Third Class William Threet, Preventive Medicine Service.

Hospital Corpsman First Class James M. Griffin, Medical Repair.

Kudos.....

Sustained Superior Performance Awards

Mr. Juroid DeVaul and Mr. Frank Crump, both of Food Management Service.

Letters of Commendation

Lieutenant Roger Edwards, Medical Service Corps

Hospital Apprentice Francis Rockefeller

Hospitalman Patrick Malone

Hospitalman Recruit Greg Marlatt

Hospital Apprentice Richard Kline

Hospitalman Recruit Edwardo De Los Santos

Hospital Corpsman Second Class John Sharretts

Civilian Length of Service Awards

35 Years

Richard Griffin, Supply Service
Mary A. Clay, Operating Management Service

30 Years

Juilet W. Fair, Supply Service
Henry Stuart, Public Works Service
Katherine S. Taylor, Patient Affairs
Catherine L. DeWald, Comptroller Service

25 Years

Doris K. Grant, Patient Affairs Service.

20 Years

Frank D. Kieffer, Occupational Therapy
Violet M. Burdock, Patient Affairs Service

15 Years

Shirley L. Brown, Nursing Service
Grace M. Mitchell, Outpatient Service
Virginia W. Willis, Nursing Service
Fred J. Baringer, Patient Affairs
Elva L. Knight, Supply Service
Rosalee O. Warren, Patient Affairs
Calvin D. Nuckolls, Operating Management Service

10 Years

Vergie M. Payne, Patient Affairs
Jerry L. Wilsford, Outpatient Department

Letters of Appreciation

Hospital Corpsman Second Class Charles Harman

Hospital Corpsman Third Class Sharon Sharretts

APPRECIATED—Lieutenant Commander Gordon Poppell of Preventive Medicine Service has been commended by Rear Admiral Paul T. Gillcrist, Commander, Naval Base San Diego, for his role in evaluating Pacific Fleet dining facilities for the annual Ney Memorial Award competition. In a recent letter of appreciation to the Naval Regional Medical Center Oakland officer, RADM Gillcrist said, "The competition was strong among the activities, but in the course of your evaluation visits, you conducted on-site training, assisting in the improvement of food service operations and increasing patron satisfaction."

Operating School graduates seven

Seven members of Operating Room Technician School Class 81005 graduated in ceremonies here last Friday.

Completing six weeks of didactic instruction on aseptic technique and 20 weeks of clinical experience were: Hospital Corpsmen Third Class George R. Chadwell, Catherine L. Clampitt, David A. Foster, Ann M. Walters and Jeff J. Walters; and Hospital Apprentices Timothy C. Durrett and Louis R. Ronzitti. New duty stations are: Chadwell, USS CAPE COD; Clampitt, NRMCM Beaufort, S.C.; Durrett, Naval Hospital, Lemoore, Calif.; Foster and Ronzitti, NRMCM Jacksonville, Fla.; Ann Walters, NRMCM Portsmouth, Va.; and Jeff Walters, USS IWO JIMA.

Specialty students who were with the class during the first phase of training were DT3 Reuben K. Bideshi of Dental Service and HN Karen L. Wheeler of Urology.

Navy announces 'Upgrade 82'

"Upgrade 82," which allows commanding officers to discharge "those few individuals who routinely migrate between unsatisfactory and marginal performance," has been authorized by Chief of Naval Operations, Admiral Thomas B. Hayward.

The new program is based on the "unqualified success" of last year's upgrade. It increases the time officers and enlisted leaders will be able to spend with the majority of their men and women, thus improving morale and command readiness.

Commanding officers may discharge, for the convenience of the government, those few individuals who are no longer deserving of further counseling, guidance or command attention. The character of the discharge will be as warranted by the individual's record.

Details of the program were promulgated in a Jan. 16 message from the CNO to commanding officers.

NEW DONOR CENTER—Rear Admiral Walter M. Lonergan, Commanding Officer, and several of his staff were present for recent official ribbon-cutting ceremonies opening a new Blood Donor Center on the fourth deck. Here Commander John Compagno (left) explains center operations to Rear Admiral Lonergan, Captain Philip J. Vogt, Commander Frank Fisher and Captain Richard W. Poley. The center is now open from 9 a.m. to 8 p.m. on Wednesdays, and from 2 to 8 p.m. on Mondays, Tuesdays, Thursdays and Fridays. The next blood drive on base will be held March 9-10.

USS GUAM medics, crewmen save Yugoslavian seaman's life

A medical rescue effort by a team from USS GUAM (LPH 9) saved the life of an injured Yugoslavian seaman near New Orleans, La., on Feb. 9. The Norfolk-based amphibious assault ship was enroute from its homeport to New Orleans when it received a message notifying it of a medical emergency near its position.

A machinist on the Yugoslavian freighter UCKA had his left leg crushed by a main engine piston and was rapidly losing blood. Bad weather in New Orleans had delayed the launch of the land-based primary rescue helicopter, and GUAM'S Commanding Officer, Captain A.W. Weseleskey, after consulting the ship's medical officer, felt further delay in treatment would probably be fatal.

GUAM launched its UH-1N helicopter, "Astro Niner," with the ship's doctor, Lieutenant Ira Knepp and Corpsmen Third Class R. Roberts and A.J. Carotenuto onboard. With directions through the rain and fog provided by GUAM's Combat Information Center, Astro Niner's pilot, Commander Charles McLaughlin and co-pilot, Com-

mander Buck Carlton, found the UCKA near its reported position. The doctor and corpsmen had to be lowered by hoist to the small ship, where they quickly administered intravenous fluids to replace lost blood. During this time, a U.S. Coast Guard HH-3 helicopter arrived on the scene. It hoisted the injured man and medical team off UCKA's deck and returned to GUAM. The landing was the second ever made by the Coast Guard crew on a ship of GUAM's type.

Whole blood, which GUAM does not normally carry, was needed to replace that which the freighter crewman had lost. An announcement was made to GUAM's crew and 47 men volunteered their blood. After his wound was dressed, the Yugoslav was flown to a New Orleans hospital by the Coast Guard helicopter, where doctors were able to save his leg.

Rear Admiral W.H. Steward, Commander, Eighth Coast Guard District, praised GUAM for the quick action. He also relayed the appreciation of the master of the UCKA, and called GUAM's "can do" spirit "commendable and typical of Navy tradition." Vice Admiral James A. Lyons, Jr., Commander, Second Fleet, echoed the praise, and said GUAM's assistance was "in keeping with the finest time-honored traditions of the sea."

Top killers identified

Heart disease and cancer are the two leading causes of death in the United States, according to the National Center for Health Statistics, U.S. Department of Health and Human Services.

In order, the 10 leading causes of deaths in the United States are:

1. Heart disease.
2. Malignant neoplasms (cancer).
3. Cerebrovascular diseases (strokes).
4. Accidents.
5. Influenza/pneumonia.
6. Diabetes.
7. Cirrhosis of the liver.
8. Arteriosclerosis (hardening of the arteries).
9. Suicide.
10. Certain causes of mortality in early infancy.

A quick look
at recent health care
developments

It may be small consolation to the hittee, but the hitter's fist may suffer a much damage—or more—as the jaw he socked. If the fist connects with the teeth, according to *Emergency Medicine*, then the resulting lacerations are potentially the most serious of all bite wounds. And even the most innocuous-looking clenched injury may conceal finger fractures, tendon lacerations and joint problems that can over time lead to permanent disablement. The problem is that these wounds are usually on the hands of young men who too frequently dismiss them as inconsequential. They expect that the wounds will heal themselves, but too often the neglect leads to serious problems.

Fetal Alcohol Syndrome (FAS) is a specter threatening the well-being of a frightening number of as yet unborn children in the U.S., according to a review article in the *Journal of the American Dietetic Association*. Surveys indicate that less than 70 percent of pregnant women drink some alcohol. Although it can't be said exactly how much alcohol is damaging to the fetus, recent studies of women who drank one or more ounces of alcohol per day indicate that there is decreased intrauterine growth of the fetuses and some malformation like that of FAS. The symptoms of FAS include abnormally small head, small jaws and eyes, impaired intellectual development and poor coordination, and growth patterns well below the normal. Studies have shown that a woman can have a healthy baby if she stops consuming alcohol before conception. Although the mechanism by which alcohol causes these malformations is not known, it is irrefutable that alcohol is the cause of them.

To the news media and to concerned citizen groups, Love Canal (Niagara Falls, N.Y.) became the symbol of wanton abuse of the environment with consequent disastrous effects on humans. Toxic chemicals had been buried in the area and then, years later, homes had been built on the site. The fear was that the contaminated soil would cause a high rate of cancer among the residents of the area. A study published in *Science* using data from the New York Center Registry from 1955 to 1977, reveals that the incidence of cancer among the residents is not greater than for the rest of the state.

"Eating for two" has gained new meaning as obstetricians find that under nutrition of the pregnant woman may harm the developing unborn baby more than previously suspected. Researchers report in an article in the *Canadian Medical Association Journal* that if the mother's weight is below 100 percent of the ideal for her then it can be expected that the fetus will not prosper as it should, and after birth the new-born of severely malnourished mothers show impaired learning ability and abnormal responses to stimuli. Malnourished mothers have babies of low birth weight, and it has been found that new-born deaths and poor neurological development are all related to birth weight.

Epidemic typhus, which caused millions of deaths in the Balkans and Eastern Europe between the world wars, has recently been reported with increased frequency in the eastern United States. The carrier for this relatively rare disease is a uniquely talented mammal, the flying squirrel. According to an article in *Emergency Medicine*, the southern flying squirrel is a host for the disease, which is apparently transmitted to humans through fleas which will bite both squirrels and humans. The epidemiologists were led to the conclusion that it was the flying squirrel by trapping the animals living near the homes of patients suffering from typhus. Only the southern flying squirrel was found to have had typhus. Once diagnosed, patients respond quickly to either of two drugs.

Hay fever got ya? (You're not alone!)

Ah-choo!! Ragweed and other spring plant pollens are busy at work. Noses are running. Eyes are red and watery—another allergy season is upon us.

Not all allergies are caused by the changes in seasons, since your body can react abnormally to air, plant, insect, food and drug pollutants, or even to a sudden change in temperature. The most common allergy symptoms are watery eyes, stuffy nose, itchy skin and hives. In some cases, allergic reactions can cause headaches, upset stomachs or asthma attacks. Most allergies can make you feel like you're at the end of your rope, but they are seldom fatal. Two exceptions to this rule involve allergic reactions to particular drugs and insect stings.

Because allergies seem to be inherited, they can stay with you for life. But in many cases, with proper treatment, people who have allergies can lead normal, symptom-free lives. Proper treatment begins with finding out what substances adversely interact with your body chemistry. Once the doctor has discovered what you are reacting to, he or she may prescribe specific medicines or diets to relieve or stop the allergic reaction. There are also "allergy shots"—injections that help reduce or prevent allergic reactions to various pollens and insect venoms. Of course, if you avoid the cause of your allergy, you will also avoid its reactions. That might mean staying in an air-conditioned room dur-

ing "high-allergy" periods or "decontaminating" the rooms of your house by removing items that are quick to gather and hold dust.

For more information on allergies write the Consumer Information Center, Department 590G, Pueblo, Colo. 81009 for a free National Institute of Health fact sheet entitled, "Qs and As About Allergies."

Dental topic next in health program

The fourth presentation in NRMCO Oakland's *StayWell* program is scheduled for 1 p.m., March 18, in the third floor classroom opposite the Clinical Assembly.

Lieutenant Commander Hubert E. Morris of Dental Service will address the subject of "Preventive Dentistry."

All staff and patients are encouraged to attend.

Daddy's quit hunting

Bye, Baby Bunting.
Daddy's gone a 'huntin'.

Baby Bunting came into the world at Oak Knoll on Feb. 19, the daughter of Data Systems Technician First Class William C. Bunting of Naval Air Station Alameda and his wife Terri Elaine.

When we joked with the new father about the old nursery rhyme, he said, "It doesn't apply to me. I've got my daughter now and I'm not going to hunt anymore!"

Medications and driving: Is it worth your life?

By JO3 Joy Payne

Yearly, thousands of highway deaths are attributed to the misuse and abuse of drugs while driving. Millions of Americans take drugs daily and don't realize that drugs can affect their driving ability. Alcohol, tranquilizers, marijuana—or any other mind altering drug—affects the mental and physical ability a person needs to drive. Even over-the-counter medicines can affect driving skills.

Most people are aware that drinking and driving don't mix, but few realize that many so-called household drugs are just as dangerous.

Tranquilizers are commonly misused drugs. These are central nervous system depressants which help relieve tension and anxiety. For example, consider diazepam (Valium), the most commonly prescribed tranquilizer.

Studies have shown that even small doses of diazepam can slightly impair psychomotor skills, thus slowing reaction time, interfering with eye-hand coordination and affecting the speed at which the brain processes sensory information. Driving simulator tests show that persons on diazepam are somewhat less likely than others to check roadway conditions.

Sleeping pills are another type of tranquilizer that are often misused. Studies show that flurazepam (Dalmane), the most commonly prescribed sleeping pill, accumulates in the body and that its residual effects impair driving skills. When test subjects drank alcohol after only a single night's use of flurazepam, their skills became highly impaired.

Other sedative-hypnotic drugs, including barbiturates, are powerful depressants that calm people down or help them sleep. Sleepy or over-fatigued drivers are dangerous drivers who risk not only their lives but the lives of other drivers.

Stimulants—amphetamines,

cocaine and caffeine—stimulate the central nervous system. Modest amounts of stimulants under a doctor's prescription are used to make people feel more alert. However, studies and actual driving records show that people who use stimulants such as amphetamines are slightly more accident prone because they are inclined to overestimate their ability and take more risks.

Hallucinogens and PCP distort judgment and reality, cause confusion and panic and can produce psychotic-like reactions. After the use of hallucinogens, a person may also experience depression and tremors which could severely impair driving skills and judgment.

Marijuana research has shown that even small amounts can affect concentration, judgment, and the sensory and perceptual skills needed for careful driving. The drug slows coordination and dulls reflexes that normally may be needed to prevent an accident. Simulator studies have also shown that subjects on marijuana have trouble staying in lanes and do not readily respond to a horn's warning sound.

There are many over-the-counter drugs which produce reactions that can affect a person's driving. Always read the label and stay away from drugs that cause drowsiness or promote sleep—such as cold preparations—if you have to drive.

People are different, so are drugs.

Any drug you take might impair your ability as a driver. If you take one drug or if you mix several drugs, the result can still be the same: DISASTER!

Safe driving always requires an alert eye, a clear head and a steady hand. (NES)

Did your spouse help you obtain pro degree?

By LCDR Mark Dawson
Staff Judge Advocate

There is a growing trend toward treating the value of a professional degree as marital or community property to be divided when the marriage is dissolved. In the most typical case, the wife has made sacrifices to put her husband through medical school, law school, or a similar postgraduate training program. Soon thereafter, the husband files for a divorce. It used to be the law that the professional degree, and the earning potential it represents, was the husband's personal property. This appears to be no longer the case.

In the case of *In Re Sullivan*, decided very recently in a California court of appeal, the court held that a wife who put her husband through medical school could share in his future earnings, or at least be entitled to a reimbursement of the costs of education to the community. There are similar decisions in Massachusetts, Minnesota, and New Jersey, and more are expected.

The law is still unsettled, but it appears the amount of the non-degreed spouse's interest will depend upon the circumstances surrounding the training, and the amount of time since it was completed. Additionally, the method of measuring the value of the degree to the marriage has not yet been made clear. The more conservative approach would be to award as a reimbursement the actual expenses of securing the education. A more liberal approach would be to entitle the non-degreed spouse to a share in future earnings or a share of the prospective income value of the degree.

VALENTINE'S DAY GIFT—Members of the Blue Birds Rainbow Club of Piedmont baked cookies for Oak Knoll patients and delivered them to the hospital on Valentine's Day. Receiving the gift in behalf of the medical center is Officer of the Day, Ensign Deborah Prekker. Third grade cookie-makers shown are (l to r) Diane McDonald, Elizabeth MacDonald, Danielle Nelson, Betsy Sanford, Christine McPhee and Michelle Redford.

Navy to develop geothermal field

Discovery and plans for utilization of a major new geothermal field at the Naval Weapons Center, China Lake, Calif., were recently announced by Navy Secretary John Lehman. A well, drilled by the California Energy Company of Santa Rosa, under contract with the Navy, successfully yielded dry steam. A second well to confirm and test the discovery is now being drilled.

A geothermal resource is created when the heat of the earth's inner core intensely heats water in faults near the earth's crust. When tapped, this produces either dry or wet steam at temperatures and pressures sufficient to drive turbines to produce electricity.

It is estimated that the geothermal plant will produce the energy equivalent of 150 million gallons of fuel oil over a 30-year period.

Commercial development of 10 percent of the resource is being undertaken on terms compatible with the weapons center's mission. The contractor will complete evaluation of the resource and operate a power plant at no capital cost to the Navy. The Navy will receive electricity at a guaranteed rate no greater than 95 percent of the commercial electric rates.

Vets ask

Q—I am a widow of a Korean War veteran who died as a result of a service connected disability before using his GI home loan entitlement. Am I eligible for this benefit?

A—Yes. If not currently married, widows of veterans of World War II and later periods who died of service connected causes are eligible for this benefit.

Q—If I encounter legal difficulties while purchasing a home using the GI Bill, will the Veterans Administration pay or provide for any legal assistance I may need?

A—No. The VA does not pay or provide for any legal assistance a veteran may need to deal with troubles encountered in the purchase or construction of a home.

Gad, Maude! It's alive and in our closet

How would you feel about a primitive life-form quietly munching away at the things in your closet? It happens all the time, and it's called mildew.

The first thing you should know about these musty-smelling blotches is that they're alive.

Because they're alive, they need to eat. And one of the items in their diet is almost any kind of dirt. So if you store clothes when they're soiled, you're extending an invitation to mildew.

Mildew also requires a fair amount of moisture. If the air in your home is damp, that's another way you're making it easier for the molds that are called mildew to survive. A dehumidifier can be an effective weapon.

Finally, to remove mildew, remember that you have to kill the growth. Brush off the damaged article outdoors, so that the microscopic spores which reproduce the mildew are not scattered around your home. Clean the item, and then give it a thorough sunning and airing.

The following additions to the medical "family" have arrived at Oak Knoll:

A baby boy to Hospitalman Raul A. Sobero, 8 South, and his wife Irma, Feb. 13.

A baby boy to Hospital Corpsman Second Class Melvin G. Fabian, Alameda Branch Clinic, and his wife Cynthia, Feb. 14.

A baby girl to Lieutenant (junior grade) Kevin J. Marty, 7 West, and his wife Janet, Feb. 22.

Correction in date

Last issue carried an erroneous date for the birth of a little girl to Hospital Corpsman Third Class Keith B. Lambert, Preventive Medicine Technician School student, and his wife Pamela Kay.

Their daughter was born at Naval Regional Medical Center Oakland on Jan. 23, instead of Feb. 2 as previously published.

SPRING MEANS IT'S TIME TO CLEAN

EENT leads in basketball

EENT continues as the unbeaten league leader in intramural basketball. Games played Feb. 25

Medicine maintained a secure lock on second place with the victory over OPD. K. Williams and M. Terry combined for 48 points in the 68-54 win, each scoring 24.

Special Services continued its win streak with a wide edge over Anesthesiology, 45-34. C. Booker lead the victors with 14 points.

MSC stayed in the thick of the playoff hopefuls with a victory over last place ARS, 76-49. C. Drakeford lead the MSC team with 20 points. J. Johnson contributed 14 for the losers.

Standings thru 2/24/82

Team	Wins	Losses	Pct.
EENT	13	0	1.000
Medicine	11	2	.847
Special Services	9	4	.693
MSC	7	6	.539
OPD	7	6	.539
Anesthesiology	6	7	.462
NP	5	8	.385
Med Repair	3	10	.231
All Stars	3	10	.231
ARS	1	12	.077

The playoffs are scheduled for April. There is still time to come to the games and root for the team of your choice. Win or lose, the teams appreciate your support.

Interservice basketball meet hosted by NAS Alameda

All-star basketball teams from the Navy, Army, Air Force and Marine Corps will vie for the nation's military championship March 9-12 at the Naval Air Station, Alameda.

The 21st annual Interservice Basketball tournament represents the best of the Armed Forces teams. The opening game pits the Navy against the Army. Pre-game ceremonies begin at 6:30 p.m., competition starts at 7 p.m.

Two games are scheduled each night, March 9-10, at 7 and 9 p.m. On March 11, three games are scheduled for 1, 7 and 9 p.m. Depending on the outcome of previous competition, the final match will be held at 9 p.m. March 11, or 6 p.m. March 12.

In the 21-year history of the Interservice Tournament, the All-Army

team has grabbed 19 wins and the Air Force, two.

Recent Interservice Tournament participants who have achieved basketball fame elsewhere include Eddie Smallwood, Harlem Globetrotters; Terry Dischinger, Detroit Pistons; Mike Silliman, New Orleans Buccaneers; Garfield Heard, Virginia; and Darnell Hillman, Phoenix Suns.

Admission to the Interservice Basketball Tournament at NAS Alameda is free and open to the public. March 9 is Cap Night, and the first 100 youngsters 12 years of age and under will receive a free Interservice Basketball Tournament cap.

For general information on the 1982 Interservice Basketball Tournament, call 869-4752.

FASTER THAN SPEEDING BULLET—Seamore the sea lion literally flies through the air as he flees ghosts and goblins at the "Spooky Kooky Castle." This new Seal and Otter Show runs daily at Sea World of San Diego. Department of Defense employees and their dependents will receive a 30 percent discount on admission during Military Spring Fling, April 3-18. Coupons are available only at military recreational services offices in Southern California.

Driver's license still valid?

You in the military who may be carrying around a driver's license under the assumption that it is still valid, take note:

The following states automatically extend drivers' licenses for people on active duty. The license is valid for the number of days shown following one's discharge: **Arizona**-90 days; **California**-30 days; **Colorado**-90 days; **Minnesota**-90 days; **Montana**-30 days; **Nebraska**-60 days; **New York**-180 days; **New Jersey**-90 days; **North Dakota**-30 days; **Ohio**-180 days; **Pennsylvania**-45 days; **South Dakota**-30 days; **Tennessee**-60 days; **Texas**-90 days; **Utah**-90 days; **Washington**-90 days; **West Virginia**-180 days; **Vermont**-30 days, or four years after the original expiration date, whichever comes first.

The license is valid in **Indiana** for 30 days, or for the first four years (whichever comes first), and the **Virginia** license must be extended four years after original expiration date, or returned to the state.

These states issue extensions upon proper application: **Arkansas** (first tour of duty only), **Illinois**, **Maine**, **Rhode Island**, and **Wyoming**.

The following states do not allow extensions. However, license renewals may be obtained either in person or by mail: **Alabama**, **Alaska**, **Connecticut**, **Delaware**, **Florida**, **Georgia**, **Hawaii**, **Idaho**, **Kansas**, **Kentucky**, **Louisiana**, **Michigan**, **Mississippi**, **Missouri**, **Nevada**, **New Hampshire**, **New Mexico**, **North Carolina**, **Oklahoma**, **Oregon**, **South Carolina**, **Wisconsin** and the **District of Columbia**.

Iowa is the only state which extends dependent drivers' licenses; such

extensions may be obtained for a maximum of five years. (NES)

Fishing update

The East Bay Regional Park District furnished the following up-to-date information on fishing in nearby waters:

• **Lake Chabot**: High, muddy water, but a few trout being taken. Plant of 2,500 made last week.

• **Antioch Pier**: Only real action has been an occasional "keeper size" striped bass.

• **Contra Loma (Antioch)**: A few nice sized catfish being caught by hardy anglers using anchovies or chicken livers for bait.

• **Cull Canyon**: Some lunker catfish and parfishes are known to inhabit reservoir but little recent fishing activity observed.

• **Del Valle (Livermore)**: Trout action very good to excellent. The favorite fishing hole is at or near the creek inlet to the lake at the south end.

• **Lake Temescal (Oakland)**: If weather allows the lake to settle and water to clear, trout action could become "hot" here. Try marshmallow egg baits or worms.

• **Point Pinole (Richmond)**: Keeper sized sturgeon at the rate of one per day, plus a good quantity of starry flounders have rewarded hardy anglers.

IRS TAX TIPS

For Single Taxpayers

■ If you maintained a home for a parent, child, or other relative, you may be able to file as Head of Household and pay less than filing as a single taxpayer.

■ If you pay for the care of your child or a disabled dependent so you can work, you may be able to claim a credit up to \$400 if you have one qualifying dependent, or up to \$800 if you have two or more qualifying dependents.

■ If your income for 1981 is more than your average income for the past four years, try "income averaging." It could save you money. See Schedule G, (Form 1040,) Income Averaging

IRS TAX TIPS

On Tax Credits

■ Tax Credits are amounts you can subtract directly from the tax you owe, thereby reducing the amount of your tax on a dollar-for-dollar basis.

■ Earned Income Credit—If you had less than \$10,000 of total income and have a child, you may be able to claim this credit if you file as married filing jointly or as head of household.

Check your tax instructions for details.

A gift for Oak Knoll

Parcourse cluster to offer fitness for all

By LTJG Scott Marsh

It was a while coming, but Oak Knoll finally has its Parcourse, to be officially turned over to the command on March 26 in ribbon-cutting ceremonies that afternoon.

The 18-station complex located near the Swimming Pool, is the gift of the California Bowlers Association, and will be available both to personnel and patients seeking physical fitness.

This country is presently experiencing an awareness of physical fitness unlike any that has taken place in our history. Unfortunately, most Americans have not been educated about the basic fundamentals of fitness, and the problem has been compounded by popular claims that total fitness can be achieved with little work, and even without sweating.

The Parcourse Fitness Circuit has gone beyond running, and should dispel the monotony often associated with that exercise. The 18 stations of the Parcourse systematically go through the entire body. Each exercise isolates particular muscle groups, and the exercises are placed in sequence to provide the correct balance. The overall layout and the individual exercises are based on research with National Athletic Health Institute physiologists and sports medicine experts.

The concept is a significant move away from the "big muscle" theory of exercise. You don't have to be muscular to be physically fit, or to feel good. The course provides a warm-up and

STRETCH—Stretching is important at the beginning and end of the workout. Ensign Katherine A. Douglass of Physical Therapy demonstrates the proper leg stretch technique.

stretching group, a strengthening and toning group, a cardiovascular conditioning group, and a stretching and cooling down group. A "heart check" station is included with the exercise through the course at regular intervals to monitor your heart rate and ensure that you are exercising at a pace that is exactly right for your level of fitness.

All of the stations have pictures and charts to explain the method of properly performing the exercise and the pulse check. The course does more than exercise the participant—it also educates by showing the exerciser exactly which muscles are being conditioned at that particular station and whether they are being stretched or strengthened.

Because the program is self-guided, it requires no supervision or any other equipment or partners to participate. Your level of fitness is based on par for the number of repetitions for that exercise. Regardless of size, sex or ability, each participant is offered a wide range of challenge by the specially designed apparatus.

What most people lack is the motivation to start. People who exercise realize that they do feel better with regular exercise, their endurance

(Continued to Page 5)

FIRST SALUTE—LTJG Scott A. Marsh returns the salute of SA Diane Cannavo shortly after Marsh became commissioned in the Medical Service Corps. Following through with Navy tradition, the new officer autographed and dated a \$1 bill, and passed it to Diane, the enlisted member who rendered the first salute. (Story and more photos on the former HM2 who was commissioned, Page 3.)

Trauma training symposium slated at Oak Knoll tomorrow

The Naval Regional Medical Center Oakland and Reserve Readiness Command Region 20 will co-sponsor a Trauma Symposium in the Clinical Assembly tomorrow. Active and reserve Medical, Dental and Nurse Corps Officers are invited to attend to review and update management of multiple injuries in a field situation.

The program scenario is of a military transport loaded with a combat ready mannequin brigade which crash lands in a small civilian community. The crash is followed by fire and munition explosions.

Invitees from as far away as St. Louis are signed up to attend, including one of three reserve admirals. Another will attend from Michigan State University.

Captains W. W. Hodge, MC, USN, of our command, and E.A. Novak, Jr., MC,

USNR-R, are the course moderators. Faculty members include NRMCO's CAPT Richard R. O'Reilly, MC; LCDR Suzanne M. Norton and LT Elaine M. Scherer, NC; and medical reserve officers CAPT Larry O. Goldbeck, CDR Steven C. Gibbs and LCDR Michael S. Baker, CDR William W. Farrell, reserve dental officer, is also participating as an instructor.

Continuing education credits of seven units for the medical and six and a half for the dental officers will be offered to the more than 180 anticipated attendees.

Active duty personnel must be in the uniform of the day. Registration begins at 7:30 a.m., but advance sign-up may be made today with Mary Takai, Office of the Director of Clinical Services, Ext. 2451.

PULL-UPS—The rings can be a real challenge. Ensign Douglass (left) watches as Hospital Corpsman First Class Joyce Burris, also of Physical Therapy, performs a pull-up.

EXPERT—Commander Thomas P. Dresser of Nuclear Medicine shows championship skill while vaulting the bar.

EDITORIAL

COUNTERFEIT!

A counterfeiter knows that perfect counterfeit currency—paper money that would fool an expert—is almost impossible to make, so he adopts a more modest objective: he relies on his camera to produce work that will deceive an inattentive person.

Can you spot a counterfeit bill? Perhaps the following suggestions from the United States Secret Service will help:

- Study genuine currency. Look closely at the workmanship of the portrait, seal, serial numbers and scroll work.
- Paper used in genuine currency is of very high quality. Small red and blue threads are in it, but may not be visible if the bill is badly worn or dirty. Counterfeit money may feel different, or may be whiter than genuine bills. Threads may be imitated by fine red and blue lines made by a pen.
- Rubbing a bill on a piece of paper is *not* a good test. Ink can be rubbed off genuine as well as counterfeit notes.
- If in doubt, consult an experienced money handler—a bank teller, for example.
- If YOU get a counterfeit bill:

- write your name and the date on the back of it, so you can identify it later.
- write down all the details about how you got it: WHO gave it to you. WHERE you got it. WHEN you got it.
- contact the nearest U.S. Secret Service office, the local police, a commercial bank, or any Federal Reserve Bank.

Anyone convicted of passing a counterfeit note may be fined as much as \$5,000 or imprisoned for up to 15 years, or both.

Genuine

Stands out sharply from background. Eyes appear lifelike. Background is a fine screen of regular, unbroken lines.

Counterfeit

May merge with background. Eyes, etc., may be dull or smudgy. Background may be dark, with some irregular and broken lines. Face may seem unnaturally white.

Genuine

Saw-tooth points around rim are even and sharp.

Counterfeit

Saw-tooth points may be uneven, blunt, or broken.

Genuine

Figures are firmly and evenly printed, well spaced. On Federal Reserve Notes, prefix letter always agrees with District letter in seal.

SERIAL NUMBERS*

(Counterfeit)

B 86733513 A

(Genuine)

F 93310058 A

Counterfeit

May be out of line, poorly spaced, printed too light or too dark. Prefix letter may not agree with District letter in seal.

Genuine

Fine crisscrossing lines are sharp and unbroken.

Counterfeit

Lines may be blurred and are often broken.

*Although shown in black here, serial numbers on Federal Reserve Notes, the most common type of U.S. paper money, are in green. Serial numbers on United States Notes are in red. Treasury regulations prohibit reproduction of these portions of currency in color.

We need each other

Financially, last year was a banner year for naval service personnel. Congress voted you the largest pay raise in years. For the first time in nearly a decade your increase in pay and allowances exceeded the national inflation rate. Your vital contribution to our nation's security was tangibly recognized by the substantial increase in sea pay, a recognition of the hardships you endure to protect our freedom. A grateful nation said "thank you," in real money.

There still are times however, when military pay just can't cover the special circumstances of military living. Life and death emergencies occur when you are far from home. PCS transfers wreak havoc with the most carefully planned budget. Medical bills, home fires, car repair bills, thefts of paychecks, even pay problems occurring through no fault of your own, can and do tax your ingenuity and finances.

That is the reason for the existence of the Navy Relief Society—the Navy and Marine Corps' own self-help organization. For 78 years you have donated to Navy Relief to help in their time of need both active and retired members of the Navy and Marine Corps as well as their dependents, or survivors.

1981 was again, your year. You contributed \$5.5 million. Your help enabled the Society to provide about \$12 million in financial assistance (interest-free loans or grants) to 56,000 eligible personnel. Another hundred thousand of your peers received free layettes, visiting nurse services, budget counseling, child care in hospital-affiliated Children's Waiting Rooms, and other types of personal service.

Your Society, through the 3,000 volunteers whom you provide to our branches, auxiliaries and shipboard offices around the world, uses your donation to help those in need. Navy Relief does not, and should not, subsidize those who are unwilling to adjust their standard of living to their income. But the Society will hold to its course of providing assistance for all valid requests for help from those of our shipmates in need.

Navy Relief says "thank you" for your support of its goals. In turn, the Society pledges to remain responsive to the valid needs of our servicemembers. We need each other. Your Navy Relief is represented locally by the East San Francisco Bay Auxiliary, Building 135, NAS Alameda, Phone 869-4188.

That's a horse on us!

"Silver," the wet-dry vacuum cleaner carrying the tradename of Stallion, has been rounded up and herded back to his home corral in the House-keeping storeroom.

In the last edition, we solicited everyone's help in tracking down the

missing work horse, which at that time was believed to be somewhere in the main hospital building.

Well, it seems "Silver" needed a little more "hi-ho" in his life to break the hospital routine. He was found in the CPO/Enlisted Club.

Share

Doubling up can cut your commuting expenses in half. And make the daily grind twice as nice.

Two are more fun than one.

Does public speaking set you all a'quiver?

Have you ever attended a meeting and marveled at the ease with which a speaker delivered his or her remarks to the audience? Are you fearful of talking to a group of people? Eighty-five percent of Americans share that fear.

Toastmasters International, an organization devoted to improving public speaking skills, will be starting a Toastmasters Club at Oak Knoll. Toastmasters learn the arts of communication and leadership necessary to become gifted public speakers.

The team involved in creating the Oak Knoll Club are members of Alameda Toastmasters, one of the leading clubs in Northern California.

For further information contact Lieutenant Commander John Kraft in Patient Affairs, Extension 2422 or 2423.

Career capsules

Academy appointments possible without help from Congressman

By HMC G.L. Soileau

Many people are unaware that many appointments to attend the Naval Academy are possible without help from a Congressman. The Secretary of the Navy may appoint 85 enlisted members of the Regular Navy and Regular Marine Corps each year. While it is not mandatory, most appointments have come from the Naval Academy Preparatory School (NAPS). Eligibility criteria for this school are:

- Be a good citizen of the United States.
- Be of good moral character.
- Be at least 17, but not more than 22 on July 1 of the year entering the Naval Academy.
- Be unmarried and have no children.
- An enlisted member must be on active duty for one full year prior to July 1 of the year of entering the Naval Academy.
- He or she must have minimum ASVAB scores WK + AR of 120 (or GCT + AR of 120).

If you meet these requirements you should read OPNAVINST 1531.4C for more details. The application deadline is Feb. 15 of the year you would enter the Naval Academy or Preparatory School, so there is plenty of time to register for and take the Scholastic Aptitude Test (SAT) or American College Testing (ACT) Program Test.

THE OAK LEAF is published biweekly on Friday produced commercially with appropriated funds in compliance with NNPR P-35, Rev. Jan. 1974. Deadline for copy is Thursday noon of the week prior to publication.

Opinions contained herein are not official expressions of the Department of the Navy. THE OAK LEAF receives American Forces Press Service and Navy News material.

Contributions from both staff and patients are welcomed and should be addressed to the Editor of the OAK LEAF, Naval Regional Medical Center, Oakland, CA 94627.

Marsh leaps from HM2 rate to LTJG rank

Scott A. Marsh sailed through the rates and a rank and managed to bridge a Hospital Corpsman Second Class rating to the rank of Lieutenant (junior grade) in the Medical Service Corps earlier this month.

Through off-duty study with the University of Northern Colorado and Southern Illinois University while stationed at Oak Knoll, Marsh earned a bachelor of science in health care administration and a master of science in business administration to qualify for commissioning under the outservice procurement program.

"I'm thankful to all the people who afforded me the opportunity to continue my education—my wife and family, my parents and friends," he said. "I feel honored to be selected, but proud of the recognition for what I have accomplished, and still humbled to know that there will still be people from whom I will learn. Together we'll be able to share our knowledge."

The 31-year-old officer joined the Navy six years ago, and spent most of that time at Naval Regional Medical Center Oakland, working over the years in Pediatrics, Labor and Delivery, Pathology, Supply, Medical Repair, and the Neurosurgery Clinic. Presently assisting on special projects in both the Public Affairs and Military Manpower

offices, he will depart the command on March 29 for Officers' Indoctrination School, followed by a new assignment with the First Medical Battalion at Camp Pendleton, Calif.

The son of Herbert J. and Mary Marsh of Patterson, Calif., was commissioned during ceremonies held in the Clinical Assembly where his family and friends witnessed the event. Administering the oath to his newly commissioned son was Retired Navy Chaplain (Lieutenant Commander) Marsh.

LTJG Marsh completed boot camp and corps school in San Diego and more recently graduated with honors from the Aviation Medicine and Aerospace Physiology Technician School in Pensacola, Fla.

He and his wife Marion, sons Stephen and Christopher, and daughter Ana Maia have been making their home in quarters on base.

Scott enjoys woodworking but has been seriously involved in sports at Oak Knoll, playing for five years with the Lab Softball Team which beat out the MSC Team for the championship, and with the Peds/OB Basketball Team that placed second in 1976. He also played with the second place Lab Volleyball Team in 1978.

HELPING HANDS—With Commander Frank Fisher working on the starboard side and his father, retired Navy Chaplain Herbert Marsh at port, newly commissioned Lieutenant (junior grade) Scott Marsh is dressed with shoulder boards displaying his rank.

Learning to be assertive

Phase I of a training course in applied assertiveness/effectiveness began here yesterday under the sponsorship of Civilian Personnel Service.

Both military and civilian personnel are attending the free 16-hour course, held four hours every morning over a four-day period.

Phase I is continuing throughout today. Phase II will be held March 25-26.

In the first phase, students are given an introduction to tools and concepts of assertiveness training for use in per-

sonal and professional life; learning to recognize the difference between assertive aggressiveness and passive ways of acting, and learning to communicate clearly, directly and effectively. The second phase covers techniques for giving and receiving positive strokes and criticism, and for handling stress.

All instruction is being conducted in the Education and Training Building No. 75B under direction of Ms. Aliyah Stein of Vista College.

DLA official here to assist

Mr. Norman R. Banda of the Defense Logistics Agency field office in Sacramento, Calif., will pay a customer supply assistance courtesy visit to Naval Regional Medical Center Oakland on March 31.

He will be available to meet with

staff members at 9 a.m. that date in the Supply Service conference room to discuss any Defense Logistics Agency-related problems.

Advance appointments are not necessary.

THANKS TO ALL—Newly commissioned LTJG Marsh expresses his appreciation to co-workers and family during a March 3 ceremony in the Clinical Assembly. He says his new career goal is to become chief of the Medical Service Corps.

ACG Credit Union slates annual meet

The 23rd Annual Meeting of the Alameda Coast Guard Federal Credit Union will be held Thursday, March 25, at 3:30 p.m. in the Oak Knoll Officers' Club. All credit union members are invited to attend.

Rear Admiral Walter M. Lonergan, Commanding Officer, Naval Regional Medical Center Oakland, has been invited to address the membership, as has Captain Melvin Hallock, Commanding Officer, U. S. Coast Guard Training Center, Government Island, Alameda.

A short business meeting detailing past growth and future opportunities for financial rewards to credit union members will be followed by door prize drawings. Prizes include an all-expense paid weekend for two in Carmel, cases of imported wine, gift certificates to leading stores and dinners for two.

Food and refreshments will also follow adjournment of the business meeting.

'O Club' revises menu, open hours

The Commissioned Officers' Mess-Open, known more informally as the "O Club" at Oak Knoll, has adopted the following hours of operation:

Monday—CLOSED

Tuesday—Friday—11:30 a.m. to 1:30 p.m., open for lunch.

Friday—4 p.m. and on, Happy Hour in the Galleon Room.

For lunch the "O Club" now offers a variety of luncheon specials and an added extra staff to improve service. The luncheon menu is in the process of revision.

For Happy Hour in the Galleon Room, the club continues to provide hors d'oeuvres and reduced bar prices. Starting this afternoon and continuing every third Friday of each month thereafter, the club will bid farewell to departing officers and welcome those reporting to the command with a complimentary bottle of champagne.

The "O Club" also has meeting and conference rooms available Tuesday through Friday, from 8 a.m. to 4 p.m.

For answers to questions, or to pass along suggestions, patrons are invited to call Ext. 2181.

Cost-shared health benefits under the Civilian Health and Medical Program of the Uniformed Services (CHAMPUS) are described in detail in a series of fact sheets issued by the Department of Defense.

Six of 10 titles planned for the series are currently available from Health Benefits Advisors in the Outpatient Service of Naval Regional Medical Center Oakland. They are:

Nursing Care, DOD CHAMPUS FS-2 (1981): Describes benefits for care provided by a private duty nurse, visiting nurse or staff nurse.

Eligibility, DOD CHAMPUS FS-4 (1981): Answers questions about who is eligible for CHAMPUS benefits.

The Effect of Medicare, DOD

CHAMPUS FS-5 (1981): Tells what you should know about Medicare and how it affects CHAMPUS eligibility.

Program for the Handicapped, DOD CHAMPUS FS-6 (1981): Discusses eligibility and benefits under the CHAMPUS Program for the Handicapped.

Maternity Care, DOD CHAMPUS FS-8 (1981): Explains the program's maternity care benefits.

How CHAMPUS Bills Are Paid, DOD CHAMPUS FS-9 (1981): Explains how allowable charges are established and how payments are made. Also discusses the difference between participating providers of medical services and non-participating providers.

Navy procedure for processing EEO complaints

The correct procedure for processing complaints in the Department of the Navy is as follows:

1. Employee (complainant) contacts activity Equal Employment Opportunity (EEO) counselor within 30 days of the discriminatory action. EEO counselor has 21 days to attempt an informal resolution and to issue a letter at the final interview advising the aggrieved person of his or her right to file a formal complaint of discrimination.

2. Employee may file a complaint with an activity head who is an EEO officer (or other appropriate Department of the Navy (DON) official) if informal resolution cannot be effected within 15 days after the final interview with the EEO counselor, or after 21 days from the first attempt to contact the counselor about the matter if no informal resolution is reached.

3. EEO officer advises cognizant director, Navy Civilian Personnel Com-

mand, who will, in turn, provide an investigator who is not directly or indirectly under the jurisdiction of the head of that part of the organization in which the complaint arose.

4. After the investigation is conducted, the activity head and the complainant are given a copy of the investigative file. EEO officer provides opportunity for resolution.

5. If a resolution is not made, EEO officer notifies complainant by letter of proposed disposition to advise him or her of the right to a hearing or a decision without a hearing.

6. If the complainant does not reply to the EEO officer within 15 days after receipt of the proposed disposition, the EEO officer may adopt the proposed disposition as the decision of the DON authority and advise the complainant of his or her right to appeal to the Equal Employment Opportunity Commission (Office of Review and Appeals) or file

civil action in court.

7. If complainant asks for a hearing, the agency must request the EEO Commission to assign an EEO complaints examiner to conduct the hearing.

8. The complaints examiner reviews the file; if it is complete, he or she will schedule and conduct the hearing. If the file is incomplete, the examiner may remand the complaint to the agency for further investigation before conducting the hearing.

9. The hearing is transcribed verbatim. Complaints examiner develops findings, analyses and forwards these, with the complaint file, to the Employee Appeals Review Board (EARB).

10. The EARB makes the final decision on behalf of the Secretary of the Navy, based on the file. Complainant is given a copy of the complaints examiner's recommended decision which must also state the reasons for the decision.

11. The complainant has the right to appeal to EEOC's Office of Review and Appeals within 20 days of the

DON's decision. Complainant also has a right to file a civil action in a federal district court within 30 days of agency's decision.

12. If complainant appeals to the Office of Review and Appeals he or she may also file a civil action in a federal district court if he or she is not satisfied with the decision in the appeal.

The complainant may also file a civil action in a federal district court if a letter of final action on the complaint is not taken by the agency within 180 days of filing, or if final action is not taken on an appeal to the Office of Review and Appeals within 180 days of filing.

Note: Complainant has the right to be represented by a person of his or her own choosing at any stage in the presentation of a complaint, including the counseling stage, and the opportunity for resolution exists at any stage throughout the entire process. Specific questions regarding the process should be directed to the EEO Office, E 2554 (NES)

CREDIT UNION EXPANSION—Walter Terry, General Manager, and Carole Dawson, Department Manager, pose at a new sign in front of the recently opened facility for share draft checking services.

EARLY CUSTOMERS—Bellaflor Rosal, Share Draft Processor in the new Credit Union annex on base, greets two of the first customers to use the facility. The new location is for share draft checking account services only. All other credit union services are still conducted at the main Credit Union.

Origin of some Navy traditions

By Ensign Alexis Allen

Have you ever wondered why we wear "Navy blue," how the custom of saluting the quarterdeck originated, or how "grog" got its name? Many of the customs and traditions we follow in today's Navy are more than just curiosities—they are our bond with the past and our foundation for the future.

• The custom of saluting the quarterdeck is thought to have originated in the days of Greek and Roman seapower, when shrines of gods (placed in that section of the ship) were honored. The Virgin Mary, and then the king's colors, replaced the shrines as an object of respect. The quarterdeck, a seat of authority and respect since the early days, is an integral part of Navy tradition.

• One of the oldest ceremonies is the burial at sea. The Greeks and the Romans placed coins in the mouths of the deceased to ensure their passage to the home of the dead. Similarly, the ancient British navy sailmaker, in preparing the body for burial at sea, took the last stitch of the shroud through the nose of the deceased as a kind of insurance.

• Our Navy blue uniform comes from the British navy. In 1775, a group of officers petitioned the admiralty for an official uniform. The final decision rested with King George III, who is said to have selected blue and white after

observing the Duchess of Bedford riding in the park in a habit of those colors.

These are just a few of the many traditions and customs that are still honored today. Preserving this knowledge is an important task as our horizons continue to expand. Also cherished is the sense of pride gained from preserving the knowledge of the experiences of the sailors and aviators who took the first steps across the oceans and through the skies. (NES)

Model maker job open

Civilian Personnel Service is recruiting for a qualified modelmaker to be employed by Orthopedic Service in its Prosthetic Laboratory Branch.

The position, a WG-14, pays \$12.75 to \$14.88 per hour and applications will be accepted through April 6.

The person selected will lay out designs, set up and operate a variety of machine tools, perform precision bench work, rework or change dimensions, participate in scientific tests of models, etc.

Further information may be obtained from Michael Cotter in Civilian Personnel, Ext. 2116.

Drug offender finds penalty severe

Drug offenders who have been sentenced in a civil court may not have reached the end of the judicial process, as a former third class petty officer in San Diego learned recently. The petty officer, who was arrested by San Diego city police for possessing and attempting to deal in a controlled substance, was placed on one year's probation by the civil court and received a suspended sentence of six months' confinement in the county jail.

Following the trial, his command sought permission from appropriate authorities to convene a general court martial for the offenses. Although court martial for charges previously tried in a state court is unusual, it is not considered "double jeopardy" since military and state judicial processes are conducted by different "sovereigns." At the general court martial, the member was sentenced to three years' confinement at hard labor, reduction in rank to the lowest enlisted paygrade and a dishonorable discharge.

The case highlights the Navy's

determination not to allow the illegal use of drugs on, or off duty. Explaining the requirement for different and more stringent standards of conduct in the Navy, Chief of Naval Operations Admiral Thomas B. Hayward said, "The illegal use of drugs constitutes a serious breach of discipline which undermines the very fiber of the combat readiness of our Navy," adding "the Navy is not a mirror of society."

Reunion for VNs

Oak Knoll vocational nurse graduates are invited to attend the Hayward Fairmont Alumni Association's annual Dutch treat dinner and class reunion on Saturday, May 1, at Denny's Restaurant, 15015 Freedom Ave., San Leandro.

Registration will begin at 6 p.m., followed by dinner at 7:15 p.m., and a business meeting. Annual dues to the association remain at \$1.

Par course — —

(Continued from Page 1)

improves, and they are reducing the risk of developing many of the degenerative diseases which plague our society. Others experience a feeling of euphoria or a "high" following a particularly good workout. You may even undergo changes in your life reflective of your new feelings. One is physical. You will feel different, maybe with a sense of new energy or an ease in getting through the day, as well as losing unwanted pounds. The other change is mental. Your confidence should change as you become more competent and feel a sense of accomplishment. You may even feel like you're able to think easier. You will then come to feel what fitness—complete fitness—is.

To be fit, think F.I.T. (Frequency, Intensity, Time). Frequency means exercising at least three times a week, on an every-other-day basis. Intensity is exercising enough to raise your heart rate at least above the bottom level of your exercise heart range. Time means keeping your heart rate up to the level for at least 20 minutes. These are the

minimum requirements necessary to improve cardiovascular fitness.

But the Parcourse is not just for people who are already "in shape." Our physical therapists recommend the course for rehabilitation patients also, providing proper clearance has been obtained in advance from their doctors. The apparatus is designed so that even handicapped patients may participate in most of the exercises.

Our Parcourse is the Fitness Cluster. All 18 stations are in the same location. This affords the opportunity for the individual to choose the regime to follow, perhaps to complete the course and then run or break up the groups with running, or running in-between the groups. It's exactly a half-mile around the ball fields and tennis courts, so the participant can still jog a few miles with the workout.

Everyone is invited to attend the ribbon-cutting ceremonies at approximately 1 p.m., March 26, but you don't need to wait until then to start your fitness program.

FITNESS CLUSTER—All exercise stations are at the same site. Submarine Sonar Technician Stanley L. Atkins (left) demonstrates the hand-walk, while physician's assistant, CWO3 Vito G. Almaraz masters the log jump, Interior Communications Electrician Donald J. Baptista (left background) performs the body curl, and Dr. Dresser flies over the vault bar.

SG CONGRATULATES SOQ—Vice Admiral J. William Cox, the Navy's Surgeon General, congratulates Dental Technician First Class Richard Gonzales upon the latter's recent selection as the BUMED Sailor of the Quarter for the first quarter of 1982. DT1 Gonzales is the senior advisor

for the Navywide manpower planning system, SHORSTAMPS (Shore Requirements, Standards and Manpower Planning System), and is responsible for assisting 23 regional dental centers located worldwide in documenting manpower requirements.

Lutrick named top sailor

Shortly before he departed this command to join the First Marine Division at Camp Pendleton, Hospitalman Donald G. Lutrick, Jr., was named Naval Regional Medical Center Oakland's Sailor of the Month (for February).

In the nine months he spent at Oak Knoll, he served as the Anesthesia Senior Corpsman. In nominating him for the award, Captain D.J. Sass, Chairman of the department, wrote **"HN Lutrick is without question the finest anesthesia corpsman I have had the pleasure of knowing and working with during my naval career. . . he is an exemplary corpsman (and) a credit to the Navy."**

"I feel greatly honored to receive the Sailor of the Month award," the hospitalman said. "I couldn't have ever been considered for such an elite award as this if it hadn't been for the tremendous people in the Anesthesia Department nominating me and writing the recommendations. I owe it all to them."

HN Lutrick, 23, is from Little Rock, Ark., the son of Donald G. and Bettye C. Lutrick.

He entered the Navy a little more than a year and a half ago, completed Corps "A" School, and served aboard the USS SAMUEL GOMPERS (AD 37) before assignment to Oakland. His career goal is to become a medical

HN Donald G. Lutrick, Jr.

deep sea diving technician in the Navy.

Lutrick enjoys tennis and bowling, and played basketball with the Anesthesia team.

He is married and the father of one.

Nurse holds Navy Cross

There's a new nurse on 9 South, but what makes this one a little different is the number of awards, medals and ribbons he's entitled to wear.

Lieutenant (junior grade) Larry S. Jacobs, 29, comes to Oakland from similar duty at Naval Regional Medical Center, Camp Pendleton, Calif. A former corpsman, he earned his commission under the former Navy Enlisted Nurse Education Program (NENEP).

Ten years ago, while a Hospital Corpsman Third Class with the First Reconnaissance Battalion, Third Marine Division, he and 16 other military members of Army, Air Force and Marine Corps infiltrated several hundred miles behind enemy lines to rescue American prisoners of war of the North Vietnamese. The only medic in the group, he assisted in evacuating the prisoners by helicopter and was one of only two of the original rescue party who made it back to home camp alive and on their own. For this act of heroism in the presence of great danger and at great personal risk, he was awarded the Navy Cross. His other decorations include the Silver Star, Bronze Star, Navy Achievement Medal, Navy Commendation Medal, Presidential Unit Citation, and the Good Conduct Award.

Although LTJG Jacobs is exceedingly modest in speaking of his own exploits, he is quick to sing the praises of Navy corpsmen in general. **"Navy corpsmen are a unique part of the Navy and oftentimes are overlooked as such,"** he says. **"The title**

alone stands for pride and tradition. It may not appear so when you're doing menial tasks, but visiting the fleet or a Marine group awakens that knowledge. Navy corpsmen should and need to stand tall and project that image of pride to all those whom they come in contact with. We all need to project more pride in our duties and never be afraid of what we are. The hospitals, fleet and Marine Corps could not function without you, the corpsman."

Although the NENEP program by which he earned his commission is no longer in existence, the Nurse Corps officer points out that there are many other opportunities available in the Navy and enlisted personnel should pursue them. "It often takes some looking into to find the programs, but they are there," he emphasizes.

The officer is a graduate of Brigham Young University and holds a bachelor of science in nursing and a master of science in cardiovascular nursing. He is originally from Ogden, Utah.

Married and the father of three daughters, LTJG Jacobs and his family are making their home in Alameda.

He enjoys softball and racquetball as hobbies.

LTJG Larry S. Jacobs

Kudos

LETTER OF COMMENDATION

Hospital Corpsman First Class James Carter, CSR/ORT School.

LETTERS OF APPRECIATION

Hospital Corpsman First Class Rodney Jaynes, Preventive Medicine Service.

From Commanding Officer, Naval Regional Dental Center, San Francisco, to LCDR Barney Rabold, MMC Richard Spencer and Mr. Francis "Scotty" McFadyen for correction of fire deficiencies and assistance with energy conservation program.

GOOD CONDUCT AWARD

SMC Edward L. Tilton, Security Branch, Operating Management Service.

The uncommon, unsung mission of cytotechnologist has other rewards

Few know about many groups of people in our hospital who nevertheless play important roles in the function of this institution. Cytotechnologists comprise one of these groups.

The cytotechnologist prepares and evaluates specimens for disease processes—specifically, malignant and pre-malignant conditions. "Cytotechs make decisions, (we're) not med techs," mentioned one during an interview, explaining that the cytotech makes subjective decisions on what he or she sees.

The highly trained and specialized techs screen about 20,000 cases a year at this medical center alone. Specimens are received in many forms from all sources—gyn smears, respiratory or urinary tracts, breast discharge, or GI or other body cavity fluids. Of the cases screened, 87 percent are usually negative and one percent malignant (others are inconclusive and retests are ordered), but each case is dealt with individually, not just for the numbers. Other labs have a "quota," here time is allowed to properly evaluate the slides that are made. Review time can range from three minutes to eight hours per slide, because it's easy to see a frank positive and results must be accurate.

So why feature the cytotechs? Their job is stressful. They have little patient contact for recognition, but the doctors who understand what they do hold them in high regard. The close work, demand for early results, and toxic work environment contribute to the stress of the job. There is no room for error. Decisions made affect lives and health.

Sometimes these professionals feel like they are signing a death warrant. It's easy to see why some surveys have placed cytotechnology between the second and seventh most stressful occupation in the job market.

So why be a cytotech, especially since the pay is about the same as many others in less responsible jobs? "It's doing something to help people," one declared. "Diagnosing an early lesion that is curable, for example. However (we) don't get enough feedback to know of all the cures, but we

do take much satisfaction in those that we hear about."

What are the requirements to become a cytotechnologist? For the civilian, after completing a BS degree in biology or the equivalent, which is two years of college and additional experience or training, four years of specialized experience are required to meet the standards for GS-7. The International Academy of Cytotechnologists requires 180 continuing education hours over a four year period. The military Cytotechnologists attends a "C" school for one year. His or her requirements also include 60 semester hours of collegiate training, 14 of which are courses in biology, and a GCT/ARI of at least 105.

Cytotech training is devoted to both pathology (lab and autopsy) and cytology, and professionals are eligible for membership in the American Society of Clinical Pathologists (ASCP).

PREPARING SPECIMENS—HM2 Dennis Wilkinson filters a fluid specimen. Filters are strained and mounted on a slide for careful review and analysis.

TOOLS OF THE TRADE—The screening process requires full concentration. Susie Banks (front), Bill Pshea, Jerry Smith and HM2 Wilkinson review the slides for diagnosis.

Sometimes personal habits qualify you as April Fool

April Fool's Day might be a good time to ask yourself if you are one—in the way you treat your body.

If some of your 1982 resolutions have already broken down or been forgotten, why not use April 1 as a day you resolve to get better? Here are a few ideas guaranteed not to be foolish.

If you plan to quit smoking and do so successfully, you will be among millions of Americans who feel better and will enjoy a longer life. Smoking is a major contributor to lung cancer, heart disease, emphysema and chronic bronchitis and is associated with other serious diseases. So, increase your defenses against these problems and breathe easier for it.

Also for your resolution list, consider drinking less alcohol or not drinking at all. Prolonged and heavy use can cause problems ranging from inflammation of

the stomach to ulceration and internal bleeding. Alcohol is linked to external problems as well. It is involved in half the fatal automobile accidents in the United States. Remember, alcohol is not a stimulant, it's a depressant.

Start a fitness and exercise routine to fit your body's conditions and needs. Proper exercise can be a significant factor in the control of obesity, diabetes, heart and circulatory problems, orthopedic problems and emotional disorders. The best exercise is doing something physically active which you enjoy, with the exercise aspect secondary. Incorporate it into your lifestyle and live better with it.

Stop fooling yourself. Start your own health plan now and make it part of your life plan for this and all the years to come.

Comings and Goings-----

"Fair winds and following seas" to the following personnel who have recently departed this command:

HM2 Laurence Soto to 3rd FSSG, Okinawa, Japan.

HA James Boyd, released from active duty.

HM3 David Foster, NRMJ Jacksonville, Fla.

HR Louis Ronzetti, NRMJ Jacksonville.

HM3 Catherine Clampitt, NH, Beaufort, S.C.

HM3 Ann Walters, NRMJ Portsmouth, Va.

HM3 Jeff Walters, USS IWO JIMA (LPH-2), homeport Norfolk, Va.

HA Timothy Durrett, NH Lemoore, Calif.

HN George Chadwell, USS CAPE CODE (AD-43), homeport San Diego.

HM3 James A. Kimes, USS ENTERPRISE (CVN-65), homeport Alameda, Calif.

HM2 John Harris, NSHS, San Diego, Calif.

HM3 Dale Duty, NSHS, San Diego.

HN Margaret Dusa, NRMJ Yokosuka, Japan.

HN Rodolfo Silva, 1st Mar. Div., FMFPAC, Camp Pendleton, Calif.

HA James Rainey, 1st Mar. Div., FMFPAC, Camp Pendleton.

HN Karen Wheeler, NRMJ Okinawa, Japan.

HM2 Daniel Richards, NSHS, San Diego.

HM3 Sharon Sharretts, NAS North Island Branch Clinic, San Diego.

HM3 Gregory Bean, Coronado, Calif. (school).

HN George Imburgia, released from active duty.

HN Robert Backe, 1st FSSG, Camp Pendleton.

LT Kyle Wills, released from active duty.

HM2 Gerald Prettyman, released from active duty.

HA Orlando Powers, released from active duty.

HA Christopher Megdalski, released from active duty.

HN Brian E. Malone, 1st Mar. Div., Camp Pendleton.

"Welcome aboard" to newly arrived:

Hospital Apprentice Larry Steward, Nursing Service.

Personnelman Second Class Kay Stauner, Personnel Support Detachment.

Hospitalman Recruit Jeffrey Towns, Nursing Service.

Hospital Apprentice George Alfonso, Nursing Service.

Hospital Corpsman Third Class Allen Zdeb, Eye Clinic.

Hospital Corpsman Third Class

Tomas Kelley, Nursing Service.

Lieutenant Harvey Adkins, Microbiology.

Hospital Corpsman Second Class Gary Myhra, Laboratory Service.

Hospitalman Ronald Matthews, Nursing Service.

CAPT Francisco Gonzales, MC, Clinical Investigation Center ACDUTRA.

CAPT David Cowan, MC, Urology ACDUTRA.

LTJG Larry Jacobs, NC, Nursing Service.

Reserve Unit from Colorado Springs: CAPT Alfred Martin, MC; CDR Emerson Clark, MSC; LCDR Merry Ann Gotch, NC, and LT Jeffrey Johnson, DC.

ET2 Gary Wheaton, Operating Management.

HR Todd Cosgrove, Nursing Service.

HA Jeffrey Conley, Nursing Service.

HM3 Paul Long, Psychiatry.

HA Thomas Grout, Nursing Service (TAD Centerville Beach Branch Clinic).

RM2 Teresa Draper, Operating Management.

HM1 Harold Rader, Security.

HM3 Angela Hearn, Anesthesia.

HM1 Ray Thomas, Outpatient Service.

HR Brian Kelly, Nursing Service.

HA Michael Clark, Nursing Service.

LCDR Jeffrey Jaindl, X-ray Department.

HM2 Daniel Spicer, PMT School.

HM3 Michael Allanson, OR School (TAD Special Services).

HM3 Jackson Brown, OR School (TAD Public Affairs).

HM3 Joe Cepeda, PMT School.

HM3 John Arnold, Nursing Service.

HR Ian Anderson, OR School (TAD Special Services).

HMC Christopher Belluto, TAD Moffett Field Branch Clinic.

HN Agustin Bohorquez, OR School.

HA Mary Granstedt, Nursing Service.

## VA Qs and As

Q—Do I report my Veterans Administration benefits on my Federal income tax for 1981?

A—No. By law, veterans benefits are not taxable and should not be reported to any taxing authority (Federal, State, City, etc.).

~~~~~

Q—Can I buy a VA repossessed home if I am not a veteran?

A—Yes. The VA sells repossessed homes to any individual who has a good credit rating.

Friday, March 19, 1982

Child Life program

Dealing with anxieties of hospitalized children

Were you ever in the hospital when you were a child? How did you feel? Scared, deserted or betrayed?

Generally, the primary fear of children under 6 is parental separation. The school-age child fears body

damage and has a hard time understanding why there is pain associated with getting better. Teens are more sophisticated and value their independence and appearance.

Sometimes children feel that hospitalization is punishment for something that they did at home or school. Some children fear that their parents will leave them in the hospital. Others fear that they will look different.

When a child is not prepared for the hospital or their daily routine is altered and contact with family and friends is interrupted, anxiety, regression or depression may result. This does not occur in all children and usually is of short term. On rare occasion, hospitalization may lead to long-term behavioral disturbances.

As a parent, you are the best person to help your child **before, during and after** hospitalization. You are part of a team with the doctor, the nurse and a Child Life worker. Together you can meet the emotional and physical needs of your child. No one team member can provide all the needed support alone.

The week of March 22-29 has been proclaimed Children and Hospitals Week by the Association for the Care of Children's Health. Here are some of their suggestions to help your child cope with hospitalization and make it a positive experience:

—**Be honest**—Never lie to your child. If something is going to hurt, say so. Children need to trust you.

—**Tell your child where you will be**—There will be times when you can't be there or have to leave. Tell the child your plans and comply with them.

—**Make the child feel comfortable**—Familiar surroundings lessen the feeling of being away from loved ones.

—**Allow the child to play**—There may be times when out of bed play is not possible. But, sick children need play too. It is a way for them to work out their feelings. Schoolwork adds to the feeling of normalcy.

—**Become involved in your child's care**—Ask the staff what you can do for your child. All of the other needs may be met, but sometimes just "being there" makes it.

MEDICAL PLAY ESSENTIAL—Tammy Hoffman (left) explains to Child Life intern Sheri Szeles that IVs are used to replace fluids and give medicine, while Joshua Elms, at right, listens intently. The other young patient in the striped t-shirt seems less interested.

IS THERE A HEARTBEAT HERE?—Michael Simon tries to find a heartbeat in "Bad Betty," as he instructs the one-eyed bear to take a deep breath and hold it. "You'll be okay," he comforts.

Keeping your whites WHITE

Is your white jumper uniform looking a bit dingy? Perhaps you're not washing it correctly. So, to help you out, the Naval Supply Systems Command has provided the following test-proven instructions for home laundering.

Wash the white jumper uniform only with other white items. Heavily soiled clothes should not be washed with lightly soiled clothes because the soil is redeposited, giving the clothes a gray-colored appearance.

Pretreat those "rings" around the collars and cuffs with a concentrated liquid detergent, a paste of heavy-duty detergent or a laundry pretreatment product. Work lather into stain with a soft brush or sponge and allow it to stand for at least 15 minutes before washing the garment. (A pine-oil type laundry pretreatment product will remove black shoe polish stains, while a drycleaning-type spot remover will

remove oily substances.)

Whiten your jumper by using chlorine or oxygen-type bleaches that are diluted in water first. Allowing full strength bleach to contact the fabric will cause yellowing and fiber damage.

Wash uniforms with regular detergent on a regular hot wash cycle with a cool rinse. Spinning clothes rinsed in hot water can cause set-in wrinkles.

Dry jumpers on a "wash and wear" or a "durable press" cycle. Do not overload the dryer, and if it doesn't have an automatic cool-down period, remove the jumpers immediately after drying to help prevent wrinkles.

Use a steam or dry iron at a low setting when pressing is needed.

Make sure stains are removed before clothes are tumble-dried or pressed to avoid setting the stain.

WE'LL MAKE IT BETTER—Tammy Hoffman (left) assists Daniel Mora, an orthopedic patient, in casting a doll's legs, although Daniel knows a little bit about it as he was in a spica cast himself at one time. Child Life intern Sheri Szeles (center) explains that it is important to have the children's play reflect feelings about their own treatment.

Art auction slated in April

If you vowed to do your Christmas shopping early in 1982 when you found yourself caught short in time and money during the last holiday season, you'll have that early opportunity on April 24.

That date has been set for the Naval Regional Medical Center Officers' Auxiliary's fifth annual art auction. It will provide not only the chance to collect fine art at bargain prices, but allow you to deduct a portion of your purchase as a charitable contribution on next year's income tax report, as the annual benefit goes to support the club's scholarship fund.

If the word auction turns you off with an insecure feeling of the possibility of over and under-bidding in haste and with embarrassment, take heed. It doesn't work that way.

Attendees arrive about 6:30 p.m., pay a small admission fee, review the selections set up in the Ballroom at leisure and place a marker beside any interesting pieces (if they are not already marked). The auction/bidding begins at 7 p.m. All you have to do is raise your bidding number on the one you desire. If there is no competition, it is yours. You can bid on several pieces, or even win one of the large works of

art that will be given as door prizes. At the end you can pay with Master Charge, VISA, or check, then take your purchase home, stash it away for someone's special Christmas present, or hang it in your own house to add an instant decorating change.

The art works will include oils, lithographs, serigraphs, etchings, woodcuts and prints, all beautifully framed.

The following new additions to the medical "family" have arrived at Naval Regional Medical Center Oakland:

A baby boy to Lieutenant Commander Lolita E. Chiong, Alameda Branch Clinic, and her husband Divino, Feb. 24.

A baby girl to Hospital Corpsman Third Class Vanessa Lee Walker, Patient Affairs, and her husband David, March 1.

April 15th FEDERAL INCOME TAX DEADLINE

Scenes by the sidelines

By Ron Brown

INTRAMURAL BASKETBALL GAMES OF MARCH 5

Special Services 'stuns' ENT

Special Services, under "Coach" Marumoto's direction, took a tighter hold on third place in the 1982 Basketball League with a surprising upset victory over the previously unbeaten quintet from ENT by a score of 37-34. Special Services led at half time by a score of 20-14, which was enough of a lead as ENT outscored Special Services 20-17 in the second half. B.J. Baldwin led the winners with 14 points on 6 field goals and 2 free throws. Seven of his 14 points came in the first half. H. Burton led ENT with 16 points.

Medicine humbles Med Repair

After jumping off to a 50-4 half time lead, Medicine went on to defeat Med Repair by a final score of 86-14. Five out of six players hit for double figures for Medicine. Leaf scored six points for Med Repair, followed by Mills with 4 points.

OPD noses out Anesthesiology

With Josie Ford and Mays each getting 12 points, OPD outlasted Anesthesiology for the eventual 59-47 win and kept them in fourth place behind ENT, Medicine and Special Services. Eckman led all scorers with 25 points on 12 field goals and 1 free throw.

GAMES PLAYED MARCH 10

Medicine hangs in there

Medicine keeps hold on second place with a 44-41 squeaker over MSC. M. Terry led Medicine with 22 points followed by K. Williams with 9 markers. Doug Love, T. Carroll and Drakeford each had 10 points in a losing cause for MSC. "Tiny" Geer came out of retirement and split the net for 9 "big ones."

OPD still in picture

OPD stays in the playoff picture with a sounding 64-38 win over Med Repair. Thomas led the winners with 18 points followed by Ford with 14. Leaf led Med Repair with 12 points.

STANDINGS THRU MARCH 10

Team	W	L	Pct.

Come run the wilderness

If you are a runner and also love the wilderness, then save Sunday, April 25, to enter your fleet feet in the Sunol Regional Wilderness Run.

Entrants will tread the 10-kilometer course beginning at 9:30 a.m. to vie for first, second and third awards in four divisions. There will be free T-shirts for the first 75 entrants, with additional shirts on sale on race day.

Pre-registration (entries postmarked by April 15) is \$7.50; late registration on the day of the race (7:30 to 8:30 a.m.) is \$8.50.

For additional information on the race contact Paul Ferreira or Carleen Bruins at Sunol, 862-2244 or Joe Rubini at District Headquarters, 531-9300. Pick up entry blanks at Sunol

Wilderness or District Headquarters. (East Bay Log)

Shape up now for B to B run

The *San Francisco Examiner's* "Bay to Breakers," billed as the biggest race in the world, will be held Sunday, May 16, beginning at 8 a.m.

The \$7.50 entry fee goes to help the Red Cross, Guardsmen and other Bay Area charities, as well as making other *Examiner* events, such as Opera in the Park and Christmas Day Camp for Senior Citizens, possible. All entrants will receive a souvenir T-shirt of the big event. Entry forms are being published in the *San Francisco* newspaper.

Members of the Naval Regional Medical Center Auxiliary will get into practice for the race beginning March 31 and every Wednesday thereafter, meeting at 9:30 a.m. at the Officers' Club until the last Wednesday before the race.

Last year's event drew 40,000 participants. The course is 7.6 miles long.

'Whopper Club' seeks members

The Lake Chabot staff announces the formation of the "Whopper Club" for successful fishermen using the lake in Anthony Chabot Regional Park, Castro Valley.

Minimum size of catch must be as follows:

- Largemouth Bass..... 10 lbs.
- Channel Catfish..... 10 lbs.
- Rainbow Trout..... 17 inches
- Black Crappie..... 12 inches

Fish must be caught legally at Lake Chabot and verified at Lake Chabot Marina, open in winter from 7 a.m. to 4 p.m.

Storms continue to muddy the water in this lake and fishing has been slow lately. In spite of many trout plants, including some trophy fish, only a few anglers using eggs have landed catches. When the weather clears, however, those in the know are confident there should be some excellent action in this nearby recreation area.

KING CAROUSEL—Balloons, smiles and the world's largest carousel, Columbia, greet people as they enter the new Marriott's GREAT AMERICA theme park in Santa Clara, Calif. Columbia stands 100 feet high, has two decks carrying 106 historical carousel animals and cost \$1.8 million. Discount tickets are available in Special Services for \$11, which includes \$3 in bonus bucks for food, merchandise and non coin-operated games.

All aboard for Hearst Castle!

AMTRAK's *Coast Starlight* train will carry Oak Knoll passengers south in scenic comfort during a special Hearst Castle trip slated for May 8-9.

The train will depart the Oakland station at 7:40 a.m. on Saturday, May 8. Passengers may enjoy breakfast in the dining car while watching the passing view through wide picture windows.

Upon arrival at San Luis Obispo, there'll be a bus waiting to take the group on a lectured sightseeing tour of Mission San Luis Obispo and provide transportation to the San Simeon Lodge for overnight accommodations.

On Sunday morning Oak Knollites will be driven up the 1,600 ft. hill to the Hearst Castle, perched on top, and

select their choice of three offered tours of this fabulous estate.

After the castle visit, the bus will transport passengers to Morro Bay for shopping or lunch at one of the excellent seafood restaurants, and then return to the *Coast Starlight* for the trip home.

The entire package, covering round trip train fare, bus transportation, overnight's lodging and the Hearst Castle Tour, costs, per person: \$122 single; \$108 double/twin; \$104 triple; and \$99, quad.

Special Services requests that reservations be made early as space is limited. Further information may be obtained from Sally at 639-2479 or 632-0307.

A look at NRMCC Oakland's automated future

By LCDR Sid Gesh
Chief, Management Information Service

• A doctor on an inpatient ward orders STAT laboratory tests and needs the results as soon as possible. Within minutes, a cathode ray tube (CRT) "beeps," indicating the results are available for viewing.

• A retired military member walks into a remote branch clinic complaining of chest pain. The duty Hospital Corpsman performs an electrocardiogram that is transmitted to a computer system for computer interpretation. An interpretation of the ECG is printed at the branch clinic on a teleprinter indicating the ECG to be "normal." The following day, a "confirmed report" is printed on the teleprinter indicating that, after over-reading by a staff cardiologist, the ECG is confirmed as being normal.

• A patient arrives in the Radiology Service to find no waiting time for his scheduled procedure. X-ray technician, x-ray room and radiologist have been scheduled by a computer system. The same computer system will also produce the radiographic report.

• A patient presents a prescription to the pharmacy technician in the Pharmacy. After keying the prescribed medication into an automated pharmacy system via CRT, there is a "warning" flashed on the display screen. The computer system has reviewed the patient's medication profile and discovered that the medication ordered will produce an adverse reaction because of a medication the patient is currently taking.

• Clinical personnel in an outpatient clinic have noticed a dramatic increase in patient visits and a reduction in "no-shows". A computer system has assumed the task of patient appointment scheduling.

Excerpts from George Orwell's best seller 1984? A description of medical center operations at El Camino Hospital, known for its application of computers in the management of

(Artist's concept by Trudy Silva, Urology Service)

hospital information? No, these situations describe the operations of Naval Regional Medical Center, Oakland approximately 18 months from today.

The Management Information Service is currently involved in the installation, or the installation planning, of five major clinical computing systems funded by Triservice Medical Information System (TRIMIS) Program. The five systems are: Laboratory System (currently operational), Computer Assisted Practice of Cardiology System (June 1982), Radiology Reporting System (October 1982), Pharmacy Reporting System (October 1982), and the Patient Appointment Scheduling System (November 1983).

The TRIMIS Program is following a building block approach to system development. In the first phase, the best ways to meet needs of work centers in hospitals are being verified through examining existing capabilities and implementing pilot systems. While Initial Operational Capabilities (IOC's) are being installed in high volume work centers, other systems are contributing to the development of technical standards and functional requirements. The IOC's include Pharmacy, Laboratory, Patient Appointment Scheduling and Radiology. These initial efforts reduce the risk associated with attempting to develop a completely automated health care delivery system in one step. At the same time, they provide assistance to high work load areas. Knowledge gained from these initial systems will be used in developing requirements for standardized systems which will be acquired and released to the military medical departments to meet additional work center requirements. Composite needs will be met by integrating standardized systems to perform a Composite Health Care System to meet the information requirements of medical and management personnel at the hospital level. In short, TRIMIS Systems will evolve carefully, logically, and step by step into a total medical information network instead of remaining as isolated automated medical systems.

Previous issues of the *Oak Leaf* have highlighted the installation and operation of the Laboratory System. Watch this column for future articles describing in detail the capabilities of the Computer Assisted Practice of Cardiology System, the Radiology Reporting System, the Pharmacy System and the Patient Appointment Scheduling System.

Health benefits open season set May 3-28

Donald J. Devine, Director of the U. S. Office of Personnel Management (OPM), has announced that an open enrollment period for federal employees and retirees in the Federal Employees Health Benefits (FEHB) Program will be held May 3 through May 28, 1982. Enrollment changes for employees, including those at Oak Knoll, will become effective July 11, 1982.

During the open season, employees and annuitants will have the opportunity to change from one health plan or option to another, or move from a self-only enrollment to a family status. Also, employees not presently enrolled in the FEHB program will have an opportunity to enroll.

Distribution of informational pamphlets containing a plan comparison chart and pamphlets containing the bi-weekly benefit rates will be distributed to all eligible employees during the open season, according to Beverly Keller of Civilian Personnel Service. Her office will also furnish brochures covering the plans available locally to employees requesting them.

Plans available are: Indemnity Benefit Plan; Service Benefit Plan; Kaiser/Northern California Plan; Rockridge Health Care Plan, and the Take Care (BC/BSCMP Network) Plan. In addition, there are a number of employee organization plans in which any federal employee can enroll by becoming a member or associate

EDITORIAL

Navy motor vehicle deaths down last year

Although the final tally for 1981 is not complete due to some late reporting, it is safe to say that a substantial reduction in motor vehicle related fatalities has taken place throughout the U. S. Navy. Congratulations and a great big "ATTA BOY" to all who helped achieve the reduction in fatalities. Such a reduction could only be realized through a team effort.

CNO praises selection

... Selection by the President of Admiral Jim Watkins to be my successor was a great day for the Navy. Admiral Watkins, presently CINCPACFLT, is a proven tactician with extensive command at sea, is highly respected in Washington for his unique ability to be objective and flexible while maintaining a tough-minded approach to naval superiority, and is a people-oriented leader who possesses the finest qualities desired and expected of the CNO. He will bring to this job an enthusiastic appreciation of pride and professionalism at its best.

We are a Navy on the move today. We are assured, through this appointment, that our positive momentum will continue on into the future.

Admiral T.B. Hayward
Chief of Naval Operations

Does the bunny know?

Easter— which Sunday?

Why does Easter always come on Sunday but seldom the same Sunday? This has puzzled more people over the years than why there is an Easter bunny.

Easter, on April 11 this year, is the Christian festival which honors the resurrection, or rising from the dead, of Jesus. It takes its name in English from that of an Anglo-Saxon goddess, Eostre, who represented light, or spring.

Fixing the date of Easter each year has involved the churches in a complicated mathematical problem accompanied by prolonged ecclesiastical controversy.

Present-day Christian doctrine indicates that Jesus celebrated the Passover on Thursday, was crucified on Friday and arose on Sunday, on the first day of the week. Jewish Passover, however, falls on the 14th day of the lunar month, Nisan, which may be any day of the week.

Since the early Christians were Jews, the Hebrew tradition was powerful in their minds and they celebrated Easter on the day of the Jewish Passover. Gentile Christians, on the other hand, wanted the day to be observed on Sunday, the first day of the week.

The dispute continued into the 4th century, with Western churches celebrating Easter on Sunday and Eastern churches following the Jewish tradition of celebrating it on the 14th day of Nisan.

In 325 A.D., the Nicean Council was convened by Constantine where a decision was made that Easter should be observed on the first Sunday after the full moon following the vernal equinox, to be fixed each year at Alexandria, then the center of astronomical science.

There continued to be some controversy and uncertainty, however, which lasted in various parts of the church down to the 8th century when the majority of Christian churches accepted the new method of determining the date of Easter. In the Eastern Orthodox Church, a slightly different calculation is followed, with the result that the Orthodox Easter, although sometimes coinciding with that of the West, can fall one, four or five weeks later.

A fixed date for Easter has been discussed and supported among some churchmen—the second Sunday in April being proposed. Adoption would depend on agreement being reached among the various churches.

In addition to its religious significance, Easter is a time of other observances born of traditional celebrations of spring.

Just as the earth is dressed in a new cloak of greenery, people often wear new clothes for Easter. The idea of Easter eggs comes from ancient Egypt and Persia. The eggs are a sign of new life.

Rabbits, being fertile and prolific, are also symbols of the regeneration of life. Legend has it that the eggs are laid by the Easter rabbit on Easter eve.

In 1980, 277 Navy people died as a result of motor vehicle related mishaps. The 1981 figure (subject to change) is 246. This is an overall reduction of 31 — about 11 percent.

About 80 percent of the Navy population consists of grades E1 through E6. It might be expected, because of these numbers and age range (generally 17-26), that involvement in motor vehicle mishaps is high. While making up 80 percent of the Navy population, they suffered 93 percent of the fatalities. Non-use of safety belts and helmets continues to result in needless death, injury, disfigurement, and permanent disability.

Government motor vehicle fatalities totaled six in 1981. One serviceman was lying in the road when struck by a Navy truck. Two Navy men were killed in separate mishaps as a result of falling from the cargo area of Navy trucks. Both of the deaths were due to carelessness on the part of supervisors, the drivers, and the victims. In each case, the passenger was ejected from the vehicle by improperly secured cargo and the effects of wind on that cargo. The speed of each vehicle involved was less than 25 miles per hour. Additionally, two Navy men were killed in separate mishaps after being ejected from the driver's position in a military vehicle. Both the men probably would have survived if they had been wearing safety belts. A Navy woman was killed as a result of hitting a tree while driving a Navy van at a speed between 15 and 25 miles per hour. She was not wearing safety belts.

As in past years, alcohol and darkness proved to be a deadly combination in many of the 23 pedestrian fatalities which occurred during 1981.

Seventeen less persons died in 1981 from accidents involving privately-owned four-wheel vehicles than the previous year. This is a reduction of approximately 3 percent. Increased safety belt use would have resulted in less fatalities.

The greatest reduction in terms of percentage occurred in the area of motor vehicles—slightly more than 18 percent. Actual numbers were reduced from 71 in 1980 to 58 in 1981. Don't be lulled into a false sense of security by these numbers, however, because during the period Jan. 1-Feb. 22, 1981, only four motorcycle deaths were reported, while the same period in 1982, the number was 10. Operation of a motorcycle is a risky business. Fifty-eight Navy people found this the hard way in 1981. A motorcycle doesn't forgive too many operator mistakes.

In 1981 one fatality and 10 injuries resulted from moped mishaps. One Navy man was killed when the rented moped he was riding collided head-on into an automobile. The mishap occurred in the Bahamas, where motor vehicle traffic travels on the left side of the road. At the time of impact, the moped was traveling on the right side of the road against oncoming traffic.

Although 1981 certainly showed general improvement, statistics clearly indicate that an all-hands effort is needed to continue the downward trend in the number of fatalities incurred through all types of motor vehicle operation in the Navy.

Chaplain's Corner

'Without the shedding of blood, there's no remission for sin'

By LT M. Kathy Brown
Chaplain Corps, U.S. Navy

"And when they came to the place which is called 'The Skull,' there they crucified him..." Luke 23:33.

As we rapidly approach the Easter season, many people are beginning to reflect on the death, burial, and resurrection of Jesus Christ in that the shedding of innocent blood was for the remission of our sins. Yet others revere this season as a time of new clothes and bunny rabbits.

It's a very simple thing to say that Christ died for the sins of the world. But it's a different thing to make it personal by saying that "Christ died for my sins."

If we could just for a moment look in retrospect at the Cross experience where the crowd gathered and mocked him. It's hard for us to visualize ourselves standing there; but we were. The words uttered from Jesus as he hung there, "Father, forgive them for they know not what they do," included us—that we, too, might be saved.

Christ died, but rose again that "we should walk in the newness of life" (Rom. 6:4). This "newness" is expounded upon as the Apostle Paul declared, "... he who has died is freed from sin. But if we have died with Christ, we believe that we shall also live with him." (Rom. 6:7-8).

The songwriter expressed the thought, "He was hung up for my hang-ups on the cross," which says Jesus died for all of my guilt, doubt, disappointments, etc.—everything negative. He hung there for. Nevertheless, as the song goes, on the third day "He rose again, couldn't no power on earth tie him down. He rose again, death couldn't keep Him in the ground."

Without the shedding of the innocent blood of Jesus Christ, God's son, there would have been no remission for sin. "But thanks be to God, who gives us the victory through our Lord Jesus Christ" (1 Corin. 15:57).

THE OAK LEAF is published biweekly on Friday produced commercially with appropriated funds in compliance with NNRP P-35, Rev. Jan. 1974. Deadline for copy is Thursday noon of the week prior to publication.

Opinions contained herein are not official expressions of the Department of the Navy. THE OAK LEAF receives American Forces Press Service and Navy News material.

Contributions from both staff and patients are welcomed and should be addressed to the Editor of the OAK LEAF Naval Regional Medical Center, Oakland, CA 94627.

Training emphasis on EEO

Training sessions are now being held throughout the command to acquaint military and civilian supervisors and all workers with the Equal Employment Opportunity (EEO) program.

In most instances, the training, of less than an hour's duration, is conducted by Weldon Miles or Mary Smith in the work spaces of the various hospital services, however, personnel at the larger services may receive the presentation in the Clinical Assembly or a conference room, as appropriate to the size of the group.

Subjects being discussed are the organization of the program, its functional areas, the roles of the Commanding Officer and his deputy, the EEO collateral duty counselors, and the employees themselves. Each session will be followed by a question and answer period where personnel are invited to submit questions about the program.

EEO complaints and/or comments may be also called in to Ext. 2554 at any time of the day or night. Questions recorded will be answered by the full-time EEO counselors.

Additional advanced EEO training for all hands is scheduled to begin in mid-July after all personnel have completed the initial phase.

IG team to visit May 18-June 4

Rear Admiral R.C. Elliott, Inspector General (Medical), and several members of his staff will visit Naval Regional Medical Center Oakland and its branch clinics during the period of May 18-June 4 for the purpose of a routine inspection. This will be the first such inspection of this medical center since April 1979.

The purpose of the Navy's Command Inspection Program is to ensure readiness, effectiveness and efficiency in performing the assigned mission of the unit. The process functions as an advocate to identify problems and facilitate corrective action. Compliance with regulations, directives and professional standards will be reviewed.

Following its Bay Area visit, the team will inspect Lemoore Naval Hospital during the period June 7-10.

NEA membership open for civilian employees

New memberships are being taken and it's also renewal time for those already belonging to the Naval Employees' Association, according to Gladys Mitchell, NRMCO Oakland representative.

Membership in the NAS Alameda-based civilian employees group offers merchant discounts, dental plan and

whole life insurance, among other benefits. Membership fee is \$6 per year.

Gladys also has the latest Federal Employees Almanac for sale to NEA members at discount price.

For more information, call her at Ext. 2518 or 2519.

CAT scanner slated for repair

The Computerized Axial Tomography (CAT) scanner on the first deck is tentatively planned to be inoperative during the period April 19-30 to allow for previously scheduled maintenance and installation of air-conditioning components.

Urgently needed scans will be performed at other local hospitals having

should be postponed during that period, said Captain Joseph P. Smyth, Director of Clinical Services (DCS).

The period set for shutdown is tentative, depending upon the delivery of parts. Those physicians wishing to confirm the equipment's availability during that period may call either the DCS Office, Ext. 2451, or Public Works, Ext. 2211.

SECURITY—A sign on the door reading "Keep Linen Doors Locked" emphasizes BUMED instruction for safeguarding hospital linens. Lieutenant Robert Burg, Assistant Chief of Operating Management Service, checks adherence to the policy as Nurse Corps Commander Shirley Hicks obliges. The medical center completed its twice-a-year linen inventory last week. (For feature on the laundry operation, see Pages 6 and 7.)

ANTICIPATION—Ana Maia Marsh, "nearly" 3, isn't going to let Easter Day arrive and find her unprepared. While she dons her holiday finery for Mommy's final fitting, she clutches a couple of Easter baskets just in case the bunny comes early. The little miss is the daughter of Lieutenant (Junior Grade) and Mrs. Scott Marsh. (Photo by Dad)

New CNO nominated

President Ronald Reagan has nominated Admiral James D. Watkins to succeed Admiral Thomas B. Hayward as Chief of Naval Operations this summer.

If confirmed by the Senate, Admiral Watkins, presently Commander in Chief of the Pacific Fleet, will assume the responsibility in July.

Admiral Watkins, 55, is a Navy propulsion expert and former submarine skipper whose other service also included commanding the Sixth Fleet in the Mediterranean. A 1949 graduate of the Naval Academy at Annapolis, he is a native Californian.

The President also announced General Charles A. Gabriel as his choice for Air Force Chief of Staff. He earlier named Army General John Vessey to become Chairman of the Joint Chiefs of Staff, effective July 1.

Admiral Hayward's future plans had not been announced at this writing.

Open season

(continued from page 1)

member of the organization.

OPM reports that it has tentatively scheduled another open season for later this calendar year. It would run from Nov. 22 through Dec. 10, 1982.

The decision to hold an open season in the health benefits program was made following administrative hearings held in Washington, D.C. by OPM Feb. 22-23.

Easter Services at Oak Knoll

Pastoral Care Service announces the following special events and emphasis for Easter Week at Naval Regional Medical Center, Oakland:

Holy Thursday
April 8
Chapel of Hope

12 noon—Catholic Mass of the Last Supper
12:30 p.m.—Protestant Holy Communion

Good Friday
April 9
Clinical Assembly

12 noon—Catholic Solemn Good Friday Liturgy
12:30 p.m.—Protestant Devotions

Easter Sunday
April 11
Chapel of Hope

8:30 a.m.—Catholic Mass
10:30 a.m.—Protestant Divine Service
12 noon—Catholic Mass

Former Oak Knoll intern killed in midair plane crash

Medical Corps Lieutenant Charles W. Gehrke, Jr., who completed a basic surgery internship at NRMOC Oakland last August, was killed as two Navy T-34 Mentor aircraft collided in midair over Florida last month.

Dr. Gehrke, who was in flight surgeon training, and a Marine Corps flight instructor in the same plane died in the crash. Two crewmembers in the second aircraft parachuted to safety, but suffered slight injuries. Cause of the crash is under investigation.

The 34-year-old physician was a former aviation jet mechanic in the Navy, working with pilot survival equipment, and served aboard an aircraft carrier for one year. He subsequently earned a master of science at the University of Missouri and a doctorate of osteopathy at the Kansas City College of Osteopathic Medicine.

In an information sheet sent to this command before he began his internship here, the doctor said, "Aviation

has always held a special interest for me." He told friends here he planned on entering into a pathology residency after completion of his flight surgeon training.

Dr. Gehrke is survived by his parents, Mr. and Mrs. Charles W. Gehrke of Columbia, Mo., and an eight-year-old son.

College credit now available for HN and HM ratings

Two hats are better than one.

The American Council on Education has evaluated recommended credits for the ratings of Hospitalman (HN) and Hospital Corpsman (HM). These credits are effective now and will be published in the 1982 ACE Guide-Navy.

For Hospitalman (E3) the recommended semester hours are 2-health and hygiene, 3-nursing techniques, 4-5 clinical nursing, 2-emergency medical techniques, and 1-medical terminology. These 12-13 credits are added to each of the Hospital Corpsman ratings.

Credits for HM3 are 1-cardiopulmonary resuscitation (CPR) and 2-advanced first aid, for a total of 15.

Credits for HM2 are 1-CPR, 2-advanced first aid, 3-medical laboratory techniques, 3-records management, and 1-human relations, for a total of 22.

Credits for HM1 are 1-CPR, 2-advanced first aid, 3 medical laboratory techniques, 3-records management, 2-human relations, 2-supervision, 3-sanitation, and 3-personnel office procedures, for a total of 31.

Credits for HMC are 1-CPR, 2-advanced first aid, 3-medical laboratory techniques, 3-records management, 3-human relations, 3-personnel supervision, 3-sanitation, 3-personnel office procedures, 2-communication skills, and 3-business organization, for a total of 38.

Credits for HMCS are the same as that for HMC. Fifteen semester hours

of upper division credit may be used in lieu of lower division credits. They are 3-personnel management, 3-business management, 3-field experience in management, 3-human relations, and 3-health care administration, for totals of 38 lower division or 27 upper division credits.

Credits for HMCM are the same as HMC in the lower division: 38. For upper division, credit recommendations are 3-personnel management, 3-business management, 6-field experience in management, 3-human relations, 3-health care administration, and 3-health care planning, for a total of 33.

An evaluation has also been received for "Leadership and Management Education and Training." In the upper-division baccalaureate category, three semester hours in industrial management or industrial psychology or leadership development or management elective are recommended.

Your Navy Campus counselor will give you the DD295 form and advise on college acceptance of these credits, as well as other ratings and service schools. Appointments may be made by calling 639-2003, or stop by Staff and Education Training, 6 South, and meet Mrs. Marj Stillings, Navy Campus counselor, who is here from Treasure Island every Tuesday and Thursday from 8 a.m. to 3 p.m.

Good places to retire

The 10 best retirement areas for civilians in the United States according to Consumers Digest are:

Mountain Home, Arkansas
Edisto/Beaufort, South Carolina
San Antonio/Austin, Texas
Clayton, Georgia
New Port Richey, Florida
Richmond, Virginia
Medford, Oregon
Asheville/Hendersonville, North Carolina

Truth or Consequences, New Mexico

Port Isabel, Texas

These areas were identified as providing all usual benefits retirees look for. The listing illustrated, also, the existence of a wide range of options outside the traditional retirement centers.

Cycle 92 advancements slated

Some 37,595 Navy men and women who competed in the Cycle 92 advancement exam will be promoted to paygrades E-4, E-5 and E-6 in the next three months. 5,211 will advance in April, another 5,211 in May, and the remaining 27,173 will receive promotions in June. The advancements will be "fair-shared" within all ratings and will be effective on the 16th of the month.

2,061 regular and reserve personnel on active duty will be promoted to petty officer third class, 1,831 to second class and 701 to first class in both April and May. In June 12,267 will advance to E-4, 10,714 to E-5 and 3,990 to E-6. Personnel in the TAR Program will receive 21 hikes to E-4,

32 to E-5 and 25 to E-6 in both April and May, while in June, 67 will be promoted to petty officer first class.

Detailers to visit

Master Chief Dental Technician C.E. Hall, Dental Technician Detailer, will visit this command on April 6, while Senior Chief Hospital Corpsman R.B. Littlejohn, Hospital Corpsman First Class D.B. Marinas and Hospital Corpsman Second Class M.F. Sheridan, detailers for that corps, are expected to be onboard April 5 through 7.

Personnel desiring to submit school requests, Guard III requests, or whose PRD/EAOS is within six months, should call the Career Counselor's Office (Ext. 2235) for appointments with the detailers.

Course for sickle cell counselors

Sickle cell counselor training and certification program will be conducted at Alta Bates Hospital in Berkeley, May 18-21.

This program is designed to train and certify sickle cell counselors and educators to provide advice and education to individuals found to have various hemoglobinopathies, and to offer education about these disorders to a variety of audiences. It is held three times a year at the hospital in Berkeley.

All nurses successfully completing the three-and-a-half day course and workshops will receive 22 continuing education units. A fee of \$25 is charged to cover the cost of printed materials.

For more information, call Sarah Jane Nelson at Children's Hospital Medical Center, 428-3452.

PATRIOTIC—As one way of observing Patriots Day on March 16, members of the Castro Valley Chapter, Order of Demolay, brought boxes of paperbacks to donate to the inpatients at Oak Knoll. Dropping off one box of paperbacks with Lieutenant (Junior Grade) Michael Watkins of 6 West were Matt Wilson (left) and Kevin Lee. Also assisting in the delivery of the books to all the nursing stations was Brent Goodale, another Demolay member. Escorting the youths in their hospital visit was Lieutenant Mary K. Brown, Duty Chaplain.

ONI marks 100th birthday

The Office of Naval Intelligence (ONI) reached the 100th anniversary of its founding March 23. It is the oldest intelligence agency in the United States, and may be the oldest in continuous existence in the world.

Before ONI was founded, the collecting of information on naval matters was spread through several different Navy bureaus. A small group of naval officers was dissatisfied with the situation, and the uncoordinated approach toward intelligence gathering that it created. They founded the U.S. Naval Institute, a private organization not associated with the Navy Department, and established the unofficial magazine *Proceedings*, to publicize their views. The magazine, which is no longer tied to persons in the Navy Intelligence Community, influenced the views of many high-ranking Navy officials, military and civilian.

One of the early secretaries of the group, LT Theodorus B. Mason, took leave of absence from the Navy to tour Europe and observe the directions that European navies were taking in tactics and naval architecture. Mason returned to the U.S. and became the first "Chief Intelligence Officer" when ONI was established by General Order of Navy Secretary William Hunt in 1882.

Over the years, ONI's responsibilities grew to include War Planning, Strategic Studies, Decoding Cable, Censorship, Public Affairs, Photo interpretation, The Naval Attaché Program and Translation. Many of these duties have since been transferred to other Navy Department offices.

USS SAN DIEGO aids all survivors of sunken ship

In early March, while returning to Norfolk, Va., following a six-month Mediterranean deployment, the combat stores ship USS SAN DIEGO (AFS 6) was called on to provide medical aid to survivors of a tragedy at sea. The Swedish merchant vessel "NORRLAND" had earlier rescued 16 crewmembers of the "GOLDEN DOLPHIN," which had burned and sunk that day in the Northwestern Atlantic. One survivor was a diabetic. His insulin had been left behind when he was forced to abandon ship.

Through contact with Atlantic Fleet Headquarters, the U. S. Coast Guard determined that SAN DIEGO was in a position to rendezvous with the NORRLAND and offer aid. On the morning of March 9th, believing NORRLAND to be near, SAN DIEGO launched both its embarked helicopters (from Helicopter Combat Support Squadron Six, Detachment Two) to search for the Swedish ship. The NORRLAND was sighted soon after, 40 miles away. LT Martin Bacon, SAN DIEGO's medical officer, was already airborne and transferred quickly to the NORRLAND.

SAN DIEGO steamed in company with the Swedish ship for three hours

while LT Bacon treated survivors. After the medical officer returned by helicopter, the ships resumed opposite courses to Norfolk and Gibraltar.

By radio, as the ships parted company, the master of the sunken GOLDEN DOLPHIN expressed his sincere thanks for SAN DIEGO's help. "In the tradition of men who go to sea."

West Virginia OKs tuition rate

West Virginia is the most recent of 33 states to grant resident tuition rates to active duty service members and their families taking college courses in the state. Active duty members must be stationed in the state to qualify.

The Department of Defense is continuing efforts to obtain resident tuition rates for service members in the remaining 17 states. They are: Alabama, California, Colorado, Connecticut, Delaware, Indiana, Maryland, Massachusetts, Michigan, New Hampshire, New Jersey, New York, North Carolina, Pennsylvania, Vermont, Virginia and Wyoming.

Some people have wrong idea on fluorescent energy use

Does a fluorescent light have to be turned off for a half-hour before the energy saved equals the energy used in initially energizing the light? Many people think so, but this is a misconception.

With a two-tube rapid-start fluorescent luminaire the total starting current lasts for about one second. The initial in-rush current lasts for only one-half cycle (1/120 second) and has a peak value about five times as large as the steady state peak. This in-rush current does not use a significant amount of energy since it lasts for such a short time. Thus, fluorescent lights only have to be turned off for ONE SECOND in order to save the amount of energy that will be expended when the lights are initially turned on again.

Lamp replacement

Fluorescent lamp life is dependent on the filament electron emissive coating. The coating slowly evaporates during lamp operation. Usually more important is that each time the lamp is started, some of the coating erodes. When fluorescent lamps first became popular in the '40s, lamp life was substantially reduced if the lamp was operated for short periods of times. Throughout the '50s and '60s, lights in numerous buildings were left on continuously—24 hours, every day. It was calculated that the cost of electricity to operate these lights was less than the cost of more frequent lamp replacement. Many people left the lights on when they left a room, even for as long as the lunch hour. Again, they thought that turning off the fluorescent lights simply was not economical.

While this may have been true years ago, advances in the construction of fluorescent lamps have increased their life. Lamp life is still reduced if they are operated for short periods of time, but this is not as detrimental as it was once. It must be remembered that while switching lamps on and off reduces

lamp life, it also reduces the operating time. For example, a standard F40 rapid-start fluorescent lamp operating continuously has a lamp life of 38,000 hours. Since a year has 8,760 hours, this lamp should burn out in 4.3 years. On the other hand, the same lamp operating 12 continuous hours per day has a lamp life of 30,000 hours. Although lamp life is reduced 20 percent, operating time is reduced by 50 percent. Thus, the lamp would take 6.8 years to burn out. In this instance, both replacement and electric costs have been substantially reduced.

Rated fluorescent lamp life is normally based on a three-hour operating cycle. This assumes the lamp will be switched on and off several times during the day. Under these conditions the F40 lamp is rated at 22,000 hours. For a 40-hour work-week, the lamp would last for about 10 years based on rated life. In fact, detailed economic studies of trade offs between fluorescent lamp replacement and electric costs have shown that anytime a room is to be vacated for more than a couple of minutes, the fluorescent lights should be turned off. Therefore, turning off lights as you leave a room is a good habit to develop.

Other lights

What about other types of lamps? Since short operating periods have little effect on the life of incandescent lamps, they should ALWAYS be turned off when a room is vacated. High intensity discharge (HID) lamps, such as mercury vapor, sodium vapor, and metal halide, require several minutes to warm up. In addition, when they are turned off, they need several minutes to cool off before the ballast will restart them. Consequently, HID lamps should not be turned off unless the shut-off period is longer than 20 minutes. (Civil Engineering Laboratory, Naval Construction Battalion Center, Port Hueneme, Calif.)

Great Lakes apprehends 23 for drug offenses

An investigation of alleged drug trafficking at Naval Regional Medical Center, Great Lakes, Ill., resulted in the March 8 apprehension of 23 Navy personnel.

The Naval Investigation Service operation also resulted in the seizure of two private vehicles from which drugs were being sold.

Our patients write...

I was treated in your Ophthalmology Clinic on Feb. 17, 1982 and was favorably impressed with the facilities and treatment. The personnel at the reception desk were most courteous and very cooperative. I was especially impressed with the professional manner in which LCDR Lynn W. O'Neal treated my case.

In an age where long waiting lines and service "by the numbers" is so common, I was glad to see that you and your clinic are going out of your way to become an exception. Please pass on my sincere appreciation to LCDR O'Neal for a job well done!

Jerome N. Davis, Jr., Major, USAF
Castle Air Force Base

This is to inform you that I am very pleased with the results of my weight reduction program. I entered Commander (sic) Love's program in June 1981 weighing about 35 pounds more than I should. By using a combination of Commander Love's diet program and my own exercise regimen, I was able to lose 35 pounds before Christmas 1981. I now feel more comfortable, I eat less, I am complimented on my appearance, and I can wear clothing that shows off my new physique rather than trying to hide it.

Without the Commander's interest in my well-being I could very easily have slipped back to my old eating habits. He has helped show me the way to a better way of living.

Please convey to Commander Love my sincere thanks for all he's done for me.

Terrance I. Easton, MSgt, USAF-Ret.
Union City

I wish to express my appreciation to the staff of Oak Knoll Naval Hospital for the wonderful care accorded me as a patient after being admitted to emergency Jan. 26, 1982 for...

The receiving room personnel were efficient and comforting. Dr. Van Wagnen, the physician from Internal Medicine whom I had been seeing on a regular basis, arrived in minutes and was both supportive and reassuring.

During the three and one half days I spent on 9 West, I was treated with professionalism and courtesy. I was made aware of all medications, treatments and procedures so I would be better able to care for myself. Each of the corpspersons, technicians, nurses and doctors with whom I came in contact were genuinely concerned for my well-being.

I would particularly like to thank Doctors Gullickson and Chapman who attended me on 9 West and Dr. Van Wagnen who continues to work patiently with me, always encouragingly, to control my troublesome...

It is nice to know that they are there when I might need them again.

Patricia Anne Coyne
Orinda

Lost documents may not preclude applying for benefits from VA

The director of the San Francisco Veterans Administration Regional Office, Paul D. Ising, says some veterans and their dependents do not apply for benefits because they cannot locate a marriage or birth certificate.

Veterans or dependents are encouraged, Ising advised, to apply for benefits even though they do not have these documents. In some cases, he said, a certified statement from the applicant is sufficient.

If additional evidence is needed, the VA will assist applicants in obtaining documents or advising of secondary

forms of evidence that may be acceptable.

Veterans or dependents with questions about eligibility for benefits are urged to contact the San Francisco regional office; a representative of one of the national veterans organizations, or a local county service officer.

The VA regional office is located at 211 Main Street (corner of Main & Howard). Toll-free phone lines into the regional office are listed in the white pages of local phone books under 'U.S. Government.'

JOURNEY BEGINS—Bags of dirty linen are brought to the back dock where David Lankford (left), a team leader involved in the laundry service, instructs Ernest Starks and Ray McDowell, while Fred Taylor, housekeeping head, checks the load at right.

IN TRANSIT—From the dock to Bldg. 8, Santos Marin (left) receives the soiled linen as driver Gene Armstrong assists with the cart and Warren White waits for the platform to be lowered.

HEAVY LOAD—Jerry Davis unloads 400 lbs. of wet linen from one of the four large washers.

Laundry employees clean linens vital to

One of this medical center's primary missions is to provide quality health care to its patients. That care may be given in ward beds, in operating room suites, or on clinic exam tables. In each location, linen is used and with usage, must be laundered.

Just how important is clean linen? How often does the linen need to be laundered in a hospital?

Clean linen in the Operating Room (OR) is essential, and on most wards, imperative in the treatment of patients, so the answer to the last question is obvious—linen needs to be washed daily, and beds often changed several times a day. The linen used in the OR is made up into packs and sterilized in the Central Sterilizing Room.

NRMC Oakland's laundry, supervised by Tom Payne, **averages 8,200 pounds a day.** The 27 employees of the Laundry Branch of Operating Management provide service for all the inpatients, operating room suites, outpatient clinics and the Bachelor Enlisted Quarters at Oak Knoll. Additionally, they launder the linen of Naval Hospital Lemoore, eight of our branch clinics and the Naval Regional Dental Center and its branch clinics.

Items cleaned include blankets, pillow cases, pillows, washcloths, towels, cubicle curtains, window

drapes, patient gowns and pants, diapers and pajamas, mattress pads, sheets, surgical apparel and drapes, and mop heads for the housekeeping crew. The Laundry's Mending Section manufactures specialty items such as restraints and sheets for circular beds used in certain patient care situations.

The most recent twice-a-year linen inventory was conducted here March 23. Its primary purpose was to provide an accurate count so that replacement linens may be ordered. This replacement is predicated upon an estimate of 150 washings per item, based on a survey inventory of linen on hand, and an average lifespan of 2.5 years per item. Accordingly, the expected annual linen replacement cycle for survey is 20 percent of the total inventory on hand. Allowing a 20 percent per year turnover for unaccountable linen losses, total annual replacement equals 40 percent per year.

Our current laundry inventory valued at approximately a half million dollars. The replacement budget, \$120,000, only 24 percent of the inventory amount. This leaves management with two possible alternatives: reduce the survey percent by increasing the lifespan of the linens, or reduce the percentage of unaccountable losses.

DRYING—Pauline Bennett oversees dry gowns and blankets spun out of the largest dryer in the laundry.

NEARING COMPLETION—Towels and pillow cases are dried and folded on one of two machines. Here Sivilean Merchant feeds a three-roll ironer.

OUT—Edmond Singleton receives folded sheets from the ironer and sends them down a conveyor belt to be wrapped.

Story by LTJG Scott Marsh

Friday, April 2, 1982

keenly aware — quality patient care

Several actions have been taken to ensure the efficiency of in-house operations. A change to polyester/cotton sheets, for example, allows the laundry persons to skip the conditioning process and move the linen directly from washer to ironer. Par levels have been established in an attempt to control the amount of pounds per patient day. The use of bedspreads and draw sheets has been eliminated. Cover gowns for visitors to maternity wards have been replaced by those made of paper. Wash-and-wear coats for doctors replace the former cotton ones, and the physicians are now responsible for maintaining their own coats. These changes have contributed to the overall efficiency of the laundry operation by reducing processing time and thus increasing productivity with a reduction in cost. "Control of linen consumption and replacement requires a commitment from top administration on down," said Lieutenant Robert Burg, Assistant Chief of Operating Management. "With this team support we have been able to move in a direction of greater control with fewer linen losses."

Officials believe that any action considered appropriate to the local situation should be taken to eliminate pilferage and stop the flow of linens

into unauthorized uses. Recent Bureau of Medicine and Surgery instructions direct that clean linen storage areas, including the linen issue room, linen carts and closets, will be kept locked at all times while unattended. According to Lieutenant Commander Joseph J. Criscitiello, Chief of Operating Management, if surveyed items can be reduced and unaccountable losses eliminated, the amount not spent in upkeep can go to upgrade the quality and increase the linen supply from four to the ideal objective of six days on hand.

Anyone who has ever been a patient, either in a hospital or in a doctor or dentist's office, will agree that there is something psychologically comforting about clean, fresh-smelling linen. No matter how much we hurt, being wrapped in clean gowns and sheets seems to impart the feeling that everything is going to be all right, after all. And when we see a doctor, a nurse, or a corpsman attending us in an immaculate frock or uniform, we know we are in the hands of professionals. Not often, however, do we remember that another brand of specialist—the man or woman who launders and presses these linens—also performs the valuable service of contributing to high quality health care.

TEAMWORK—Alma Davis (left) and Siscily Brant work together at the six-roll iron which folds linen 36-inches or smaller.

FOLDING—Farrell Harris, Ruth Riggins and Galvin Nuckolls hand-fold scrub tops, pants and pajamas.

IRON—Luther Williams and Betty Washington feed the eight-roll hypo-ironer.

SEAMSTRESS—Eunice Turner repairs some 25,000 pieces of linen each year and manufactures specially-needed items as well.

WRAPPING—Tony Adanandus plastic-wraps sheets, towels and pillow cases before placing them in the clean linen bins.

FINAL DESTINATION—Hospitalman Lillarosa Blake (left) and Nurse Corps Lieutenant (Junior Grade) Margaret

Minogue remake a patient's bed with clean linens returned from the laundry.

Cannabis and its adverse effects on health

"Son, we used to smoke that stuff while standing on the street corner singing, so, I know what you're talking about," said the old man. "But, I had this best friend who couldn't stop like the rest of us, and today he's out in that city sanitarium. The man just can't think for himself any more."

Marijuana (alias "grass," "pot," "smoke" or "weed") is a common plant with the botanical name of *Cannabis sativa*. The main psychoactive (mind-altering) ingredient in marijuana is delta-9-tetrahydrocannabinol or THC, although more than 400 other chemicals are also contained in the plant. A marijuana cigarette (joint) primarily determines its psychoactive potential. In recent years, the strength of street samples of marijuana has increased substantially. In 1975, samples exceeding 1 percent were rare; by 1980, samples with 5 percent THC were common. The more potent marijuana increases the physical and mental effects and the possibility of health problems for the user.

Most users of marijuana experience an increase in heart rate, reddening of the eyes, and dryness in the mouth and throat. Studies of marijuana's mental effects have revealed that the drug temporarily impairs short-term memory, alters sense of time and reduces the ability to perform tasks requiring concentration, swift reactions and coordination. Many feel that their hearing, vision and skin sensitivity are enhanced by the drug, although these reports have not been objectively confirmed by research. Feelings of euphoria, relaxation, altered sense of body image and bouts of exaggerated laughter are also commonly reported.

In some users, a single dose of cannabis can produce adverse reactions ranging from mild anxiety, through panic and paranoia, to an acute psychosis characterized by detachment from reality, delusions, hallucinations or illusions and bizarre behavior. These reactions occur most frequently in individuals who are under stress, anxious, depressed or borderline schizophrenic. But, they can also occur in normal users who inadvertently take much more than their usual dose. Limited evidence from survey studies suggests that the mild reactions have been experienced on one or more occasions by more than half of regular users. The severe reactions, which appear to occur in only a small percentage of users, usually respond well to psychiatric treatment and last no longer than one or two days.

There has been a great deal of controversy about the effects of chronic heavy use of cannabis on brain function. There is evidence that such use can lead to lasting behavioral changes in some users. Apathy, lack of concern for the future and loss of motivation have been described in some heavy users, and psychotic and paranoid symptoms in others. These symptoms usually disappear gradually when regular drug use is discontinued and recur when drug use is resumed. These reactions are relatively rare, although case studies suggest that certain cannabis users may be particularly susceptible. Many psychiatrists are concerned about such reactions in youthful drug users (11-15 years of age) because of the possibility that regular use may produce adverse effects on psychological, as well as physical, maturation. This concern, of course, applies to the use of all psychoactive drugs used by juveniles. For reasons that are still unclear, a few users experience spontaneous recurrences of the symptoms of acute intoxication ("flashbacks") days or weeks after consuming marijuana.

Physical dependence on marijuana has been demonstrated on research

subjects who ingested an amount equal to smoking 10 to 20 joints a day. When the drug was discontinued, subjects experienced withdrawal symptoms—irritability, sleep disturbances, loss of appetite and weight, sweating and stomach upset. Tolerance to marijuana—the need to take more and more of the drug to get the original effect—has been proven in animals and humans.

In essence, clinical observations from many parts of the world have long suggested that regular heavy use of cannabis may produce lung damage, impair reproductive and endocrine functions; cause long-lasting distur-

bances of behavioral and brain function; and lower resistance to infection. People especially at risk with even moderate doses of marijuana include anxious, depressed or unrecognized-psychotic individuals; heavy users of other drugs (prescription or non-prescription); pregnant women; some epileptics; diabetics; individuals with marginal fertility; patients with chronic diseases of the heart, lungs or liver. In addition, adolescents who are undergoing rapid physiological and psychological development may be particularly susceptible to the development of a life-long pattern of use and to the effects of long periods of can-

nabis intoxication. They may also be more prone to cannabis-related traffic accidents because of their lack of driving experience and may be affected more by possible hormone balance disruptions.

"I'm telling you, there's no such thing as a good joint," warned the elder. "Isn't it time for you to quit smoking that mess?" (NES)

Note: A recent report from the American Medical Association's Division of Scientific Activities has confirmed that marijuana is hazardous to one's physical and mental health for the same reasons cited in this article.

You and the drug alcohol

Even if you don't drink, alcoholism affects you. Do you have a child in school? It's there. Are you driving tonight? It's waiting. It's where you live, work, play and worship.

It's the nation's second most prevalent disease. Alcoholism kills, maims, destroys and breaks hearts. In 1980, it cost the taxpayers tens of billions of dollars. This year, it could cost you more—including your life.

Alcohol has been found to be a constituent in the following crimes:

- Murder—86 percent of offenders and 60 percent of their victims
- Rape—50 percent of perpetrators
- Assaults—72 percent of offenders and 79 percent of their victims.
- Drownings—69 percent of victims
- Suicides—64 percent of attempts
- Fires—83 percent of fire and burn victims.
- Job accidents—18,000 deaths and 10 million injuries.
- Highway accidents—23,000 deaths.
- Domestic violence—52 percent of spouse abuse and 38 percent of child abuse. (NES)

Civil authorities aid Navy fight on drug abuse

Local law enforcement agencies in Seattle, Bremerton and Kitsap County have pledged "complete cooperation" with Navy commanders combatting drugs in the Puget Sound Area.

The police departments have announced they will turn over any sailor involved in drug-related offenses to Navy authorities. Any evidence or information obtained by civil agents in their investigation also will be forwarded to the Navy to assist in disciplinary or administrative action.

Naval personnel involved in drug trafficking in the civilian community will continue to be liable to prosecution by both civil authorities and the Navy.

Treatment available for drug problems

Chief of Naval Operations Admiral Thomas B. Hayward, in NAVOP 172, established the Navy's policy of zero tolerance toward drug abuse. The policy stresses the difference between Navy operational requirements and society in general, and concludes that the Navy cannot afford to be a "mirror" of society regarding drugs. "Not on my ship—not in my Navy" in the phrase used by the CNO to describe the Navy's attitude.

Recognizing that some drug users who want to stop using drugs may be psychologically or physically unable to do so without guidance and assistance, the Navy has established three levels of help, based on the degree of an individual's need and perceived capability for further useful service. These are counseling or remedial education provided by the local command, outpatient counseling provided by the Counseling and Assistance Centers (CAAC) and inpatient treatment provided by the Naval Drug Rehabilitation Center (NDRC) at NAS Miramar, Calif.

Local rehabilitation is aimed at the Navy member who is looking for a reason not to use drugs—one who is feeling the effects of peer pressure. Though it consists primarily of leadership, guidance and counseling provided by officers and petty officers within the individual's command, it may be the most important type of rehabilitation. It provides the opportunity to cut off the drug problem before it becomes rooted, with positive alternatives such as education, recreation or spiritual and moral guidance, if requested. It also reinforces an attitude of intolerance toward drug "experimentation."

The Drug and Alcohol Program Advisor (DAPA) is a key member who can assist in command counseling efforts. DAPAs have knowledge of the rehabilitation and counseling facilities available, can assist in referrals and processing, and are capable of conducting drug and alcohol abuse awareness education. The Navy is also developing a motivational education program called the Navy Drug Safety Action Program (NDSAP). It consists of 36 hours of motivational education and attempts to change harmful behavior of individuals. The program, which is conducted after hours while participants continue on duty at their commands, is presently being piloted at selected Navy activities.

The mission of a CAAC is to provide a program of education, prevention and counseling service, to assist local commands in developing ways of identifying and rehabilitating the drug abuser and to enable an individual to return to useful naval service. CAACs provide screening services for local commands, serve as crisis centers and provide follow-up counseling to personnel

returning to the fleet after treatment at the NDRC or Alcoholism Recovery Facility. They also provide drug and alcohol information and education for shipboard or unit personnel and to Navy dependents. One advantage of CAAC assistance is that sailors remain attached to their parent command during the period of counseling. Assistance is scheduled to achieve minimum interference with normal duties.

The NDRC is designed to help the sailor who is physically or psychologically dependent on drug use. There is one such center, at Naval Air Station Miramar, near San Diego, Calif. It provides professionally supervised rehabilitation for those whose health, welfare and military effectiveness have been adversely affected to the point of physical or psychological dependence on drugs. It treats only those abusers whom the command believes can be restored to productive service. Those who can't be will be discharged directly from the unit or from the center.

More information about Navy Drug Rehabilitation Programs is contained in OPNAVINST 5300.6B and in NAVPERS 15511, the Command Drug and Alcohol Program Guide. Above all, anyone earnestly seeking help, who is not otherwise subject to criminal prosecution, will receive the help, treatment, counseling and assistance he or she needs from trained, professional personnel who will gladly respond to their shipmates' need.

Marijuana use affects driving skill

According to the National Institute on Drug Abuse, marijuana users suffer from impaired driving ability and slowed reactions to dangerous situations.

A publication by the institute says that marijuana use delays a person's response to sights and sounds and affects the ability to perform sequential tasks. As a result, unexpected events, such as a car approaching from a side street or a child running from behind parked cars pose the most severe hazards. The greater the demands of a situation, the less able the marijuana user will be to cope.

The driver who doesn't feel "high" may still be under the influence of marijuana since its effects on driving last after the feeling of intoxication has passed.

THIS MONTH'S DECOR—April's exhibit wouldn't be right without Peter Rabbit, a duck and a couple of chicks typifying the season.

LAST MONTH'S DECOR—The Pediatric Clinic's bulletin board carried a St. Patrick's Day theme in March to the delight of all the kids, whether Irish by ancestry or only in spirit.

Cold tummy? Take heed

Hypothermia can be called a "silent killer" because many of its victims are not aware of the threat. Contrary to popular belief, it can be brought on by exposure to relatively mild weather as well as severe cold.

Meaning, literally, "low heat," hypothermia is a condition marked by an abnormally low internal body temperature—typically 95 degrees or under. It may occur in anyone who is exposed to cold without enough protection.

Hypothermia can cause illness and death. Some people die because they or those around them do not recognize the symptoms. A victim may have one or more of the following:

- Puffy face
- Uncontrollable shivering or complete lack of shivering even though a room is chilly
- Mental confusion and forgetfulness
- Sleepiness and difficulty in waking
- Slow breathing; slow heart rate.
- Stomach that is cold to the touch

If you believe someone may be a victim of hypothermia, call an ambulance or rescue squad immediately. Before help arrives:

- Limit movement. Insulate the victim with available covering such as blankets, towels or newspapers.
 - Do not give a hot shower or bath. This may cause sudden shock or death.
 - Do not give alcohol or drugs. This may cause a greater loss of body heat.
- To avoid hypothermia, here is some practical advice:

- Wear warm clothing. Wear several layers of loose clothing instead of heavy or tight clothing.

- Use extra blankets because hypothermia can develop during sleep.

- Be aware that certain medications prevent the body from regulating temperatures normally, such as medications for anxiety, depression and nausea. (Check with your doctor or a pharmacist for information on drugs that increase susceptibility to hypothermia.)

- Remember that alcohol gives you a "sensation" of warmth but it actually increases the loss of body heat.

VA seeks bids from counselors

The Veterans Administration has announced that it is seeking bids for private contractors to provide readjustment counseling services to eligible Vietnam-era veterans living in areas which cannot be adequately or conveniently served by existing VA-run Vet Centers.

Readjustment counseling, for purposes of the contracts, will involve counseling by social workers, psychologists, psychiatrists or other counselors, individually or in concert, to help Vietnam veterans still having readjustment problems.

Interested parties may request bidding documents by writing the Contracting Officer (134C), Veterans Administration Medical Center, 4150 Clement Street, San Francisco, Ca. 94121.

Ped Clinic has colorful decor

For those who have experienced the often drab and sometimes boring atmosphere surrounding hospital clinics, a stop by Oak Knoll's Pediatric Clinic may make you feel young at heart again.

Colorful decor, including mobiles and decorations of the season, greet

UNDER THE RAINBOW—Young as she is, little Jessica Black, held in the arms of nurse Lenore H. Brady, seems to appreciate the colorful decor of the clinic waiting room.

young patients and help to relieve the anxiety of the little ones.

When charge nurse Lenore H. Brady, RN, transferred to the clinic in August 1980, she felt it didn't have the cheerful and child-oriented feeling it needed to make the children comfortable when they came to see the doctor or receive immunizations. "Drab surroundings don't do much to cheer up or distract little ones when they are feeling ill or getting their shots," she said.

An effort was made to brighten-up the place. The immunization room was repainted in bright yellow, green and blue, and a colorful mobile hung to distract infants while they receive immunizations. The waiting room area was also decorated, and a special bulletin board, changed monthly, was set up to focus parents' attention on specific aspects of children's health care. March emphasis, for example, was on poisons in the household and how children can be protected from their dangers.

Decorating ideas for the same month focused on leprechauns and Irish green, and we hear that the Easter Bunny and decorated eggs are right around the corner.—**HM3 Jackson Brown**

ALL-HANDS EFFORT—Pediatrics nurse Lenore Brady often gets a hand from young patients in seasonal decorations. Assisting her in coloring paper Easter eggs are (clockwise) Ricardo, Conrado and Roberto Ferrer, Charles Dunlap and Jomeca Coats.

Outpatient surgery rules change

Some patients will be able to save money by having surgery performed on an outpatient basis instead of in a hospital, due to a recent change in CHAMPUS procedures.

The new ruling, approved recently by Dr. John F. Beary, III, the senior health official in the Department of Defense, allows CHAMPUS to share the costs of outpatient surgery on the basis it had shared inpatient costs in the past.

The change, which is retroactive to Dec. 19, 1980, is intended to save money for both the beneficiary and the government. Inpatient rates under CHAMPUS are less than outpatient rates and the overall costs of outpatient surgery are normally less than those for surgery performed in a hospital.

Active duty dependents will now pay \$25 for outpatient surgery. Under outpatient cost-sharing they were required to pay \$50 deductible (if it had not been paid already for the fiscal year) plus 20 percent of all subsequent charges.

For retirees and their dependents, the rates for inpatient and outpatient surgery are the same (25 percent of authorized costs) except that a deductible is not required under inpatient cost sharing.

CHAMPUS officials estimate that savings to the government will amount to \$1.3 million over the four-year period 1982-1986.

A list of surgical hospital procedures that qualify for the special cost-sharing procedure is being made available through local health advisors and CHAMPUS fiscal intermediaries.

To qualify as authorized providers under CHAMPUS, ambulatory (outpatient) surgical centers must be accredited either by the Joint Commission on Accreditation of Hospitals (JACH), the Accreditation Association for Ambulatory Health Care, Inc. (AAAH), or such other standards as authorized by the Director, OCHAMPUS.

Ambulatory surgical centers will be paid on the basis of CHAMPUS-determined reasonable costs.

Jan Rusnell

Ms. Jan Rusnell joins civilian staff

Ms. Jan Rusnell, new Position Classification Specialist in Civilian Personnel Service, is a recent transfer to this command from Letterman Army Medical Center, San Francisco, where she was employed in the same capacity for a year and a half.

Ms. Rusnell, born in Alba, Mich. and educated in the same state, has 26 years' federal civil service.

She was employed in the U. S. Attorney's Office in San Francisco for 15 years, and previous to that job worked in the Washington, D.C. area where she was employed at various times for the U. S. Information Service, the Federal Aviation Administration, and the Federal Bureau of Investigation.

During her federal career she has received three quality step increases and two awards for beneficial suggestions.

"I'm delighted to join the staff here," she said. "Everyone thusfar has been very nice and I'm looking forward to working at Oak Knoll."

Single, she makes her home in Emeryville, enjoys hiking and the hobbies of arts and crafts.

Kudos..... New mechanical engineer onboard

FROCKINGS

To Captain, Sidney Blair, Medical Corps, and Michael Lucas, Dental Corps.

CIVILIAN LENGTH OF SERVICE AWARDS

30 years

Rosalina Adler, Supply Service.
Eunice Delahaye, Patient Affairs.
Julie Fair, Supply Service.
Helen Strahan, Public Works.
Elizabeth Beck, Public Affairs.

15 years

Mabrie Huff, Patient Affairs.
Mettawee Youngblood, Supply Service.
Christine Davis, Housekeeping.
Raymond McGrath, Housekeeping.
Dolores Robinson, Food Service.
George Schmidt, X-Ray File Room
Sivlean Merchant, Laundry.

Bruce R. James

Bruce R. James is a new mechanical engineer in the Public Works Office of

Naval Regional Medical Center, Oakland, transferring recently from civilian employment with the Facility Planning Division, Public Works Center, San Francisco Bay.

Mr. James, originally from Marysville, Calif., is a graduate of the University of California, Davis. He holds a bachelor's degree in mechanical engineering and material science and engineering.

He served three years on active duty as an Army officer and is currently on Army reserve status. His military training included the Armor Officer Basic Course, the Motor Officer Course at the Armor Officer Advanced Course, at Ft. Knox, Ky., and the Airborne School at Ft. Benning, Ga. His Army decorations include the service ribbon, overseas ribbon, and the basic parachutist's badge.

Single, he makes his home in Alameda and has hobbies of stamp and coin collecting, antique cars and motorcycles.

His parents, Mr. and Mrs. R. James, live in Marysville.

HM1 Perkins earns dual SOY honors

Hospital Corpsman First Class Billie J. Perkins may well remember February 1982 for a long time to come. During that month, she was named both the Naval Air Reserve Unit Alameda Sailor of Year and the Naval Air Reserve Forces Alameda Sailor of Year. She also completed her bachelor of science degree in health care administration with Southern Illinois University through classes offered by Navy Regional Medical Center, Oakland.

The dual honor of earning both the NARU and RESFORCES Sailor of the Year involves two different selection boards. Each candidate is interviewed and the selection is based on a combination of the interview and the nomination by the individual's command.

HM1 Perkins had already received multiple honors throughout 1981. She was selected as the NRMCC Branch Clinic Sailor of the Quarter in August, the NARU Sailor of the Quarter and the Reserve Forces Sailor of the Quarter in October. She had also been advanced to petty officer first class in April.

Petty Officer Perkins lends her time to Treasure Island Little League Baseball, functioning as a team member, even though her own son is too young to participate. She is a member of the Fleet Reserve Association and a member of the intramural bowling team in Captain's Cup competition.

She transferred recently to the Ship Intermediate Maintenance Activity where she is tasked with occupational safety and health responsibilities. She is the only hospital corpsman assigned to the activity.

On top of her many activities, she is also the mother and single parent of an active four year old. She calls her son Tony, "one of the greatest things that could ever happen to me."

With a justifiable sense of pride, Perkins points to her recent accomplishments and says, "I've been fortunate to blend the Navy, parenting and education."

(Courtesy of NAS Alameda Carrier)

Comings and Goings

"Fair winds and following seas" to the following persons who have recently departed this command:

HA Bert L. Querry, to 3rd FSSG, Okinawa, Japan.

HR Edward Litchfield, released from active duty.

HN Donald Lutrick, to 1st Mar. Div., Camp Pendleton, Calif.

HM1 Rodney Jaynes, to 2nd Marine Air Wing, Cherry Pt., N.C.

HA Anthony Holder, released from active duty.

SMC Edward Tilton, to USS DUBUQUE.

HN Paul Brooks, released from active duty.

LCDR Karen Born, to Moffett Field Branch Clinic.

EMC Rolando Gonzales, to USS HOLLAND.

HA Warren Henderson, released from active duty.

HN Gregory M. Loya, to 1st Mar. Div., FMFPAC.

HA Donna Glass, to NSHS, San Diego, Calif.

HA Louise K. Shiril, released from active duty.

HN Nancy Estrada, to NSHS, San Diego.

HN Steven Koczarski, to 1st Mar. Div., FMFPAC.

HM3 Sandra Stoney, released from active duty.

HM2 Steven Shoup, released from active duty.

HN Yvonne Phillips, to NRMCC Naples, Italy.

RP2 Brian Carroll, released from active duty.

HN Verlone Johnson, to Naval Support Facility, Diego Garcia.

HM3 Arthur Mitchell, to DVECC, Alameda, Calif.

"Welcome aboard" to newly arrived:

CDR Thomas Snyder, MC, TEMAC.
LCDR Donald Phillips, NC, Nursing Service staff.

LTJG Herbert Hollinshed, MSC, ACUTRA.

HM3 Warren Windham, Psychiatry Service.

HM3 Stephen Farmer, PMT School

HM1 Esmeraldo Ranches, PMT School

HA Spinie Moore, Nursing Service.

HM3 Michael Witt, PMT School.

HM3 Deborah Langlois, PMT School.

HM3 Julie Neal, Nursing Service.

HM3 Richard Philbrook, Orthopedic Clinic.

HM3 Joseph Hardin, Nursing Service.

HM3 Randall Scott, PMT School.

HN Teddy Macabugao, Xray School.

HA Teresa Conrad, Nursing Service.

HM2 Doris Barry, PMT School.

HN Donald E. Snay, Jr., Main Operating Room.

HM2 John Kercheval, PMT School.

HM3 David Dominique, PMT School.

HR Edward Vranian, T.A.

Orthopedics (OR School in June).

HM3 Kelly Reber, PMT School.

HM3 John Kelly, PMT School.

HM3 Barry Grubb, PMT School.

HM3 Patricia Finlan, PMT School.

HM3 Gregory King, PMT School.

HM1 Nelson Jenkins, PMT School.

HM2 Loreto Torres, PMT School.

HM3 Kevin Smith, PMT School.

Smead, Cardo X-Ray grads

Hospital Corpsman Third Class Brian E. Smead and Hospitalman Donna M. Cardo completed five weeks of didactic training and seven weeks of practical rotation at the Moffett Field Branch Clinic to earn certificates for their March 26 graduation from the Basic X-Ray School here.

A small ceremony to honor the two was held in the Office of the Commanding Officer, with Rear Admiral Walter M. Lonergan and Captain R.L. Houts offering congratulations.

Honorary Smead's next assignment will be at NRMCC Beaufort, S.C., while HN Cardo has departed for new duty at NRMCC Guam.

Officers selected for augmentation

The following officers attached to this command have been recommended by a selection board for augmentation into the regular Navy:

Medical Corps

LT Paul D. Garst
CDR Robert A. Callaway
LCDR David R. Field
LT Thomas J. Geller
CDR Blaine Z. Hibbard
CDR Ben T. Ho
CDR Martin D. Kung
LCDR John P. Navins
LCDR William G. Runyon
CDR Richard P. Umfrid

Medical Service Corps

LT Kay L. Schneider

Nurse Corps

LT Christina Castellanos
LT Heather L. Myers
LT Robert J. Marine

Family Is Most Fun Says Recent Survey

What gives people the most personal satisfaction or enjoyment?

Their family—according to a survey by the Roper Organization summarized in *Public Opinion*.

People were asked what three or four things gave them the most personal satisfaction or enjoyment day in and day out. There were multiple responses, so percentages added up to more than 100. According to the survey, the percentages were:

Family	72%
Television	48%
Friends	47%
Music	31%
Reading	28%
House or apartment	24%
Work	23%
Radio	21%
Socializing	20%
Meals	18%
Hobbies	17%
Car	16%
Physical exercise	15%
Following sports	13%
Clothes	6%

All local family quarters due for inspection

Once again it's April and time for the annual fire safety inspection of all family housing units at Oak Knoll, according to Fire Chief Bruce B. Bobbitt.

The inspection, conducted in conjunction with the national spring clean-up campaign, is underway now and will continue throughout the month. Inspecting are base Fire Department personnel, who may be accompanied by Housing Office representatives.

"This check will be conducted with the least possible inconvenience to occupants," Chief Bobbitt said. It is desirable that sponsors be present at the time of inspection, but not necessary. No inspection of quarters will be made, however, unless an adult member of the household is present. A notice will be left at the residence for the convenience of those working couples who want to schedule a more convenient call-back appointment.

The inspection will include:

- Fire safety inspection of living areas.
- Fire safety discussion with occupants.
- Instructions for emergency exit plans, smoke detectors, utility shut-off points, hazard control, and babysitters.

More information may be obtained by calling the fire department at Ext. 2327.

'Weekend Husband, Weekend Dad'

At times in a military career, a person may find that his duties require that he is away from his family during the week, able to be with his wife and children only on weekends. The circumstance calls for some fine-tuning in family living.

Dr. Alice Ivey Snyder, Deputy Director of the Navy Family Services Center, Norfolk, recently discussed the issues at a wives workshop. Subject of the remarks she made was "Week-end Husband, Week-end Dad." Dr. Snyder's remarks were keyed to the problems that many Navy families experience when the husband/father is assigned to a ship which is in a shipyard for an extended period of time, and returns home only on weekends.

The problems revolve around the stressful circumstances which result from the "week-long absence, weekend presence" cycle. Dr. Snyder notes that it is a "far simpler, and less

stressful, task to have 'holiday routine' after deployments rather than once a week."

She stressed the importance of understanding the wide-range of reactions which can accompany the "weekend husband" situation and how helpful it is to make positive adaptations.

Weekend reunions, Dr. Snyder pointed out, should "not even begin to approximate end-of-deployment reunions," and families should establish and use a workable set of rules to cope with the weekend adjustments. Dr. Snyder quotes an authority on stress who says:

"The trick is to identify the stressors in your life and cope with them before they can grow beyond your control and slide across the very fine line into the dangerous area of *distress*."

The remarks made by Dr. Snyder were directed to the issue of Navy men whose ships are temporarily assigned to shipyards, but the experience is shared by other segments of the military community, such as recruiters, for example, who often must be away from their families during the week.

Copies of Dr. Snyder's remarks may be obtained from the Military Family Resource Center. Dr. Snyder's address is: Deputy Director, Navy Family Services Center, 7920 Hampton Blvd., Norfolk, Va. 23501. (*Military Family*)

Helping the elderly

At first blush the problem of aging does not seem to pertain to military family matters, since military people usually retire from active duty at relatively young ages. However, aging problems do arise occasionally in regard to elderly members of the extended family.

Questions, which are raised by military families regarding the elderly and which cannot be resolved locally, may be addressed to the Social Gerontology Resource Center in Silver Springs, Md. A common request to the center is for information about what services are available for elderly people in specific areas of the country.

For more information write: The Social Gerontology Resource Center, P.O. Box 231, Silver Spring, Md., 20907; Telephone: (301) 565-4269. The Center operates a toll free number between the hours of 2 and 5 p.m. It is (800) 638-2051. (*Military Family*)

Wrong papers? Trouble with a capital 'T'

Entering a foreign country without the proper paperwork can mean trouble all the way around for passengers—and aircrew members, as well.

A recent incident involving a military flight is a good example.

Soon after the aircraft touched down in the foreign land, customs officials detained four passengers who were flying on a space-available basis.

Two of the people carried no entry visas, the third had nothing to show he was on leave, and the fourth was traveling without a passport.

Not only did the trip end unexpectedly for the passengers, but the

crew's rest period was cut short to fly the deported passengers out of the country.

Transportation officials say this incident could have been avoided easily if the travelers had taken the time to be sure they carried the proper documents.

Basically, all active duty travelers must at least carry copies of their orders and their military identification card.

People moving on Space-A should have their leave orders, ID cards, immunization certificates and passports with appropriate visas.

Aid offered families with handicapped

Not knowing what to expect at the other end of a military reassignment is always difficult for a military family, and is a cause of concern even to veteran movers. But to military families with handicapped members, it is an especially difficult time.

An organization called "Closer Look" in Washington, D.C., is an excellent resource for professional workers serving families which have received orders.

"Closer Look" is able to provide

packets of information on any handicap plus information about services and agencies in the state or territory to which the military family is moving.

Requests for information should be forwarded to: Closer Look, Box 1492, Washington, D.C., 20013.

BIRTHS

The following additions to the Navy medical "family" have arrived at Oak Knoll:

- A baby boy to Lieutenant Commander John C. Kirby, Radiology, and his wife Teresa, March 14.
- A baby girl to Lieutenant Harvey L. usually retire from active duty at P.O. Box 231, Silver Spring, Md.
- A baby boy to Hospital Corpsman Second Class Kevin L. Smith, Patient Affairs, and his wife Sheryl, March 20.

Yosemite trip planned

Special Services has been successful in reserving space during the popular summer season at Yosemite National Park and announces a tour leaving from Oak Knoll on June 19 and returning June 21.

The trip is open to all Naval Regional Medical Center Oakland personnel, dependents and retired, but space is limited, so first-come, first-served. Active duty will have first preference until April 15.

Per person package prices run from \$39 to \$99, depending upon the type of accommodations and number of persons sharing the tents or cabins. The flat fee includes round-trip transportation via deluxe bus, two nights accommodations, and a bus tour of the valley. A bus tour up to Glacier Point is also available for \$2 extra, providing that there is a minimum signup of 15 persons.

The accommodations reserved for the Oak Knoll group are 14 tent cabins and eight wooden cabins with baths. Both tents and cabins have beds, linens

and blankets. Prices for tents are \$58 single, \$46 double, \$42 triple, \$39 quad; per person prices for cabins are \$99 single, \$66 double, \$56 triple, \$52 quad.

The Glacier Point road is expected to be open at the time of the trip and the bus ride will highlight one of the greatest views in the world (also an excellent point for photographs). The tour of the valley floor will include the Ahwahnee Hotel, Yosemite Village (including a real Indian camp), Yosemite and Bridal Veil Falls, and a tunnel view for another overlook of the valley.

One or two-hour horseback tours led by expert wranglers take riders on trails for sights impossible to see otherwise. Bikes are always available for renting and there are plenty of paved bike paths to steer you to see other scenery, including Mirror Lake.

For more information, call Sally, (415) 639-2479 or 632-0307, or Autovon 855-2479.

A's meet Angels in baseball opener

The *Oakland A's* will play the *California Angels* in an opener slated to begin at 7:35 p.m., April 6, at the Oakland Coliseum. It will be the first local American League game of the season for the Oakland baseball team managed by the colorful Billy Martin.

Although tickets had not yet been received by Special Services at *Oak Leaf* deadline, a spokesman was confident that tickets would be available on base before game night. Queries may be directed to Ext. 2479.

Spring opening set for Marine World

Marine World/Africa USA will be open for a week-long celebration, April 3-11, and every Wednesday through Sunday during the spring months from 9:30 a.m. to 5:30 p.m.

Featuring exciting new shows, the season premiere of the top-ranked water ski and boat show, and the spring unveiling of "Tiger Mountain Rapids," the 14th season promises to be the finest ever.

The amusement park is located in Redwood City. For further information, dial (415) DOL-PHIN.

Sea World offers Easter discount

Personnel planning on spending the Easter holidays in the San Diego area may be interested in learning that Sea World is featuring a Military Spring Fling with outstanding discounts on park admission to coincide with the holidays.

For two weeks in April, Department of Defense personnel and their dependents will receive 30 percent off admission to the famous marine life park.

Discount coupons are available in the Special Services Office, second deck, Bldg. 38 on base. With the discount, effective April 3-18, adults will be admitted to the park for \$6.95, children for only \$4.85.

Six exciting aquatic shows, 30 educational exhibits and Cap'n Kids' World creative play area are all included in the cost of admission.

MIGHTY BOW—A new killer whale show, "Shamu—Take a Bow," premieres during Sea World's Military Spring Fling, April 3-18.

Calling all 'shutterbugs'

Is photography your hobby?

Chances are you've taken many good photographs that you'd like to share with your shipmates, and *Oak Leaf* may be the medium to show off your talent. Especially needed are shots of after-hours athletic events, department parties, etc. Family photos depicting seasonal human interest are also welcome, but the family must belong to military and civilian staff members.

Black and white prints reproduce best in newspapers; however, a good color shot with much contrast and good composition can often be used.

If you think you have a photo (in good taste, please) that might be acceptable for publication, stop by the Oak Leaf Office on the third deck of Bldg. 500 and let us take a look at it.

Those accepted will be published with a credit line for the photographer and the print will be returned intact to its owner. No payment can be made.

Don't be a weekend athlete

It's T.G.I.F. day, and you're all revved up for the weekend of fun, frolic and physical fitness. But a weekend filled with strenuous exercise, followed by a week of inactivity, won't do you or your heart any good. In fact, the American Heart Association says that the best kind of exercise is moderate exercise done on a regular basis.

To help your heart, you should exercise every other day for at least 15 to 30 minutes. For the weekend warrior, this means slowing the pace and scheduling some exercises during the week.

All exercises are good for you, but some are better for your heart. Exercises that improve circulation and help the heart, lungs and muscles to work together more efficiently include exercises that are rhythmic and repetitive, like walking, jogging, cycling and swimming.

To improve cardiovascular fitness, you should begin exercising at a comfortable level. Then, when you have become accustomed to that level, go on to something more demanding. Remember that it's important to include a warmup period of three to five minutes and to allow a few

minutes "cool down" after exercising.

Only exercises that challenge the circulatory system and significantly increase blood flow to the muscles for an extended time length improve cardiovascular fitness. If you are planning to start an exercise program to improve the functions of your heart, the association suggests that you check with your doctor. Many physicians recommend stress tests or give patients an exercise prescription tailored to the individual's needs.

Burglars read too

Burglars read the newspapers, too.

Here are a few tips to keep your name in the papers, just that, and not an advertisement for an "open house" you hadn't planned on:

- don't include your address in a classified ad.
- announce social events and vacations after they happen—not before
- if there is a death in the family, arrange for a house sitter on the day of the funeral.
- ask a trusted neighbor to keep an eye on your home whenever you're out

the

Oak Leaf

NAVAL REGIONAL MEDICAL CENTER. OAKLAND. CALIFORNIA.

Friday, April 16, 1982

Repro policy change**No 'rabbit,' no copies**

Within the next two weeks new copiers will be installed at Naval Regional Medical Center, Oakland, and by May 1, authorized representatives of hospital services will have to use mechanical counters (a special key, known in Pentagon circles as a "rabbit") in order to reproduce correspondence, purchase orders, and other forms or papers required for the legitimate accomplishment of mission.

In addition, a key operator shall be assigned to each location. He or she will be responsible for machine maintenance and resupply, and for maintenance of a copy machine log sheet detailing who made copies, number of copies made, department charged, and type of original reproduced.

This duplicating system will be used

only for those departments requiring less than six copies of material. The Navy Publications and Printing Service Office on the third floor of Bldg. 500 will continue to service the command's requirements for larger amounts of copy.

"The medical center must exert positive control over forms reproduction and other duplication," an Operating Management Service officer said. "With continuously spiraling costs, duplicating proliferation must be cut back and individuals or departments held responsible for funds spent in this manner."

A new instruction, NRMCOAKINST 5600.2B, just off the press, explains the new policy in full.

SNIPPING THE RIBBON—Following a March 26 luncheon at the Officers' Club, Rear Admiral Walter M. Lonergan, Commanding Officer, and Mrs. Elaine Hagin, Vice President of the Women's International Bowling Congress, (center) officially dedicate the new parcourse donated to the medical center by bowlers throughout the state, who last year contributed \$171,000 to projects for military and veterans throughout the nation. Funds are administered by the California Women's Bowling Association and a group known as the Bowlers Victory Legion are the "shakers and movers." (More photos, Page 4).

Civilian pay distribution order 'temporarily deferred'

The Naval Supply Center Oakland recently announced that it is temporarily suspending its previous order of discontinuing hand delivery of pay checks, Leave and Earning Statements (LES) and U.S. Savings Bonds.

In a message to Naval Regional Medical Center Oakland and all the other California naval bases it serves for purposes of civilian employee pay, the NSC Disbursing Office said, "In light of continuing negotiations being conducted by serviced activities with unions, the implementation date for mailing civilian pay checks, LES and savings bonds to a non-work address is temporarily deferred."

Employees who may have diverted pay to a financial institution or by mail to a residence, but who strongly prefer receiving paychecks on the job, may revoke their previous instructions by

completing the necessary forms obtained from the Civilian Pay Office on the third deck of Bldg. 500.

If the discontinuance of hand delivery once more becomes mandatory, these employees will be required once again to complete still more forms.

Graduation today for OR students

Graduation ceremonies are being held in the Clinical Assembly at 10 a.m. this morning for nine students who have completed 26 weeks of specialized training with the Operating Room Technical School.

Graduates and their new duty stations are: HN Sharon L. Abel, NRMC Portsmouth, Va.; HM3 Barbara A. Butler, NRMC Yokosuka, Japan; HM3 James H. Ceely, Marine Corps Air Station, Iwakuni, Japan; HM3 Mark K. Horton, NRMC Naples, Italy; HM3 Mark G. MacFadden, Naval Hospital, Keflavik, Iceland; HN Keven J. Perry who will join the Oak Knoll staff; HM3 Roland E. Phillips, 1st FSSG, Det. B, El Toro, Calif.; HM3 Charles C. Risley, 3rd FSSG, Okinawa, Japan, and HA Henry B. Starr, Naval Hospital Cherry Point, N.C.

HM3 Christopher Barclay of Ophthalmology Service and HN Norman E. Cooper of Orthopedics also completed the first seven weeks of didactic instruction. The other students had 19 additional weeks of clinical rotation through the various surgical specialties.

New quarters for staff CPOs

A ribbon-cutting ceremony will be held at 2 p.m., April 22, for new accommodations in Bldg. 69B for single Chief Petty Officers attached to the staff.

In a self-help project and help from the Seabees, the World War II building which once housed ill officers, has been refurbished and restored to house 11 rooms.

Execs to meet April 23

The quarterly Regional Executive Planning Committee will be held at the Oak Knoll Officers' Club on Friday, April 23, beginning at 10 a.m.

Included in the agenda for discussion are professional, administrative, public works, legal, and financial matters, and the urinalysis testing program. Speakers will include Rear Admiral Walter M. Lonergan, Captain Warren W. Hodge, Captain Joseph P. Smyth, Commander Frank D. Fisher, Lieutenant Commander Barney Rabold, Lieutenant

Commander David Kouns, Lieutenant Commander Mark Dawson and Commander Robert Legg.

Expected to attend are officers in charge and/or representatives of all branch clinics within the medical region and Lemoore Naval Hospital.

A no-host luncheon (steak sandwiches) will be served for \$5 per person. Luncheon reservations should be made in advance with Ensign Phillip Fordice at Ext. 2181.

Art exhibit, auction tonite at Oak Knoll

Tonight's the night for an unusual opportunity to view and acquire exclusive editions of original graphics, oils, and water-colors in the fifth annual NRMC Officers' Auxiliary benefit art exhibition and auction in the Oak Knoll Officers' Club, beginning at 6:30 p.m.

Featured will be international award-winning artists such as Hinte, Kelly, School of Paris Artists and many, many more, with prints from such world famous masters as Dali, Picasso, Miro and Chagall. Each work of art is in a frame individually selected to complement that particular piece.

A door prize ticket and assorted hors d'oeuvres are included in the \$2.50 per person door donation. Reservations are not necessary and personnel are invited to bring guests.

The auction will begin at 7:30 p.m. Those pieces of art which have generated the most interest will be auctioned first.

All profits will go toward college

scholarships for deserving military dependents.

This saucy young lady with a rose between her teeth and a very relaxed cat at her feet may someday soon grace your wall if you're the lucky winner of tonight's door prize.

TO HEAD DRIVE—LCDR Robert K. Ridgeway of Physical Therapy has been named to head the 1982 Navy Relief Society drive at Naval Regional Medical Center Oakland. The campaign will run May 4 through June 6 and a kickoff meeting with keypersons will be held April 20 at 3 p.m. in Room 456.

EDITORIAL

NATIONAL CONSUMERS WEEK

APRIL 25-MAY 1

"Consumers count everywhere."

Sometimes I'd like to dispute the above statement. As a consumer who is often ignored by an insolent sales clerk, one who feels a "rip-off" frequently in shoddy merchandise and faulty service, I get angry.

Have you ever bought a full jar of mayonnaise date-stamped and supposedly guaranteed fresh two months from purchase only to find after you've brought it home, refrigerated it, and pulled it out a day or so later to spread on your sandwich that the contents are rancid?

Take it back to the store and recoup your money, you say. Sure—Waste \$2 worth of gas to drive to the store, stand in line for 20 minutes only to be told by the checker that the manager is the only one who can reimburse you, and she doesn't know where he is at the moment? It's more logical to throw away the \$1.39 item and go without

mayonnaise on your sandwich.

Sometimes I get so frustrated I'm tempted to eat the stuff, get a good case of botulism and take up the recently popular American custom of bringing lawsuit against someone. But that might bring about my untimely death and cash doesn't mean much to cadavers.

I'll tell you what I am most likely apt to do. The next time I'm pushing my cart down the grocery store aisles, I'll probably pick up a replacement for the bad jar of mayonnaise. Only this time, I'll watch out for my own interests. I'll furtively unscrew the top first to see if the contents are fresh, and if they look a bit questionable, I'll keep unscrewing jar lids until I find one that passes inspection. Sure, I'll guarantee a fresh product in my refrigerator the next time I need it to bind the tuna fish together, but what of all the other consumers who trustingly buy the jars I've already

uncapped? Might I not have contaminated the contents from the ever-present microorganisms around us? Worse yet, suppose some other consumer doesn't inspect it carefully, eat the stuff and heaven forbid, dies from food poisoning?

There's a moral to the story, of course. In case you haven't spotted it, it's the old Golden Rule of doing unto others as we would have done unto us. A happy consumer doesn't cause trouble for the product, store or manufacturer, and is likely to sing the praises of all three. Conversely, one who is neglected, robbed of dignity or cash, or otherwise cheated in product or service, retaliates to cause much more trouble.

It behooves all of us to remember that at Oak Knoll, patients are our consumers, and yes, they certainly do count here.

--Betty Beck

Our patients write to express appreciation

I am writing this letter upon the request of Woodrow W. Hawkins, my father. I saw him only a couple of hours after he was moved from the Intensive Care Unit to 908 West and his main concern at that time was for me to write this letter. . .

He wishes to express his appreciation for the excellent care that he received while being in Intensive Care. He was very much impressed with the professional manner in which the whole staff carried out their duties. Specifically, he wishes to thank and commend the following: LT Susan Kowalski, LT Terry Logston, LT Pat Woods and HN Barbara Miller. He feels that they especially are a definite credit to their profession and the Navy.

Personally, I must add that I, too, am most appreciative. Knowing that my father is pleased and in good hands has given me and my family great comfort.

Thank you from the bottom of our hearts!

Nancy Scott

. . .

Please forward my sincere appreciation to Dr. Carmick (Dermatology) for treating a . . . problem that plagued me for several months before I finally felt I needed expert help. Of great importance to me was first of all his expertise but of equal efficacy was the inner feeling I derived from his genuine personal concern helping me in the midst of his very busy schedule.

"A merry heart doeth good like a medicine." . . . Proverbs XVII,22.

Robert J. Agostinho
Colonel, USAF (Ret.)

. . .

I wish to take this opportunity to express my thoughts on my recent . . . surgery at your hospital.

My doctor is Sameshima (LT Steven S.). He and all your doctors, nurses, corpsmen were so good to me. . .

I asked to have (a) Protestant chaplain come to have prayers with me and my room mate. . . He came right up. Thank him again for me.

Also don't forget the men in the kitchen. The food was so good.

I think CAPT Rasmussen was in the operating room. Give a well done to him and everyone.

I was in 8 South. Will you (also) give a well done to everyone in 8S?

. . . I never have been admitted to a naval hospital previously.

George N. Hunt
(Retired CPO)

. . .

The courteous personnel at the medical facility in Oakland must have been chosen carefully for their positions.

I was a new patient recently and am very much impressed with the physicians. Dr. Erwin was a gentleman; competent, and a very caring human being. Dr. Van Wagnen was every bit the same, plus an excellent sense of humor, a rare quality in the medical field.

I have been an active registered nurse for many years, two times working in military facilities. . . this has led me to be most observant and the NRMC should have a rating of EXCELLENT.

Mary P. Taylor
Dependent Wife of
Retired Air Force Major

. . .

Please accept my heartfelt thanks for the superb service rendered to me by your emergency room and urology clinic personnel. . . the personal sensitivity and caring attitude displayed by the duty medical officer, Captain Weber, gave me a great sense of reassurance, relief and confidence.

Dr. Weber's eminently human approach to treatment was emulated by Dr. Harris and his assistant, Lynn, of your urology clinic, both of whom were called in from home in the middle of Saturday night to tend to my affliction and both of whom reacted with an eminently cheerful, professional and thoroughly human response to my needs.

Please accept and convey my grateful appreciation for the super treatment.

Richard D. McKay
Fremont

. . .

During my wife's (Hilde Vandenberg) confinement and treatment lasting over 14 months up to her passing on Feb. 7, I know everything possible was done by your staff to save her life. . .

To all your fine doctors, nurses, corpsmen and technicians, all of whom took personal interest in Hilde's welfare and worked so hard and diligently, I owe a debt of gratitude.

To the good Dr. Shaffer fell the dreaded task of having to tell us both that the operations he performed and all the months of chemotherapy had failed—it took lot of courage and compassion on his part.

My gratitude to the very compassionate Dr. Fern who made such special efforts to make her comfortable and peaceful during her last days as much as was humanly possible—her comfort meant so much to me. Doctor Navins, who performed some of her surgery, kept up her spirits by explaining step by step all the procedures. Also Doctors Tedesco, Tostack, Moon, Griffin and others, all of whom were so good to Hilde.

I will not even try to mention the names of all the wonderful nurses, aides and technicians who did so much, because I know I couldn't give the proper credit to each and every one of them, who gave her their love and care. I would just single out that wonderful Colostomy Expert, Mrs. Sandell, who handled what could be such a distasteful task with such kindness and caring.

Also a special thanks to Chaplains Hoppus and Hary who comforted us all with their daily visits to Hilde's bedside, offering their prayers and words of consolation sustaining us all through the terrible ordeal.

Each time the hour came to say goodnight to Hilde each day after spending many hours with her, I knew there would be young corpsman "Patrick" who would be watching over her through the long, long nights.

Please extend to them all my deepest thanks and best wishes.

Clark Vandenberg
U. S. Navy, Retired

Navy mothers add that 'little extra'

Navy Mothers Club No. 213 of Modesto, Calif., which recently disbanded because of a lack of mothers to carry on the organization, donated the remaining \$59.84 of their treasury to Naval Regional Medical Center Oakland for patient welfare.

In a letter of thanks to Mrs. Julia Stern of the organization, Rear Admiral Walter M. Lonergan, Commanding Officer of the medical center, wrote:

"On the first of July this year Naval Regional Medical Center, Oakland, will celebrate its 40th anniversary. Although no special ceremony is being planned, it is time to reflect on the past and remember the many good things that we have enjoyed through the years, and the many friends who have willingly given of their time and talents in caring for thousands of Navy men and women who have been treated here.

"Perhaps no one has been more dedicated and loyal than the Navy Mothers Club of America who without fail have contributed regularly to the well being of our patients. The doctors, nurses and corpsmen on our staff have made every effort to provide the very best medical care available, but we depend on organizations such as yours to add that little extra that means so much to the young men and women many of whom were returning from battlefields around the world and far from families and friends.

"... No one can say how many lives you have touched, whose pain has been made a little easier to bear, knowing that someone cared. . ."

NAVAL REGIONAL MEDICAL CENTER OAKLAND, CALIFORNIA

THE OAK LEAF is published biweekly on Friday, produced commercially with appropriated funds in compliance with NNPR P-35. Rev. Jan. 1974. Deadline for copy is Thursday noon of the week prior to publication.

Opinions contained herein are not official expressions of the Department of the Navy. THE OAK LEAF receives American Forces Press Service and Navy News material.

Contributions from both staff and patients are welcomed and should be addressed to the Editor of the OAK LEAF, Naval Regional Medical Center, Oakland, CA 94627.

Outpatient group therapy—doing more with less

By HM2 Patricia Jones

The closing of the psychiatry residency program in July with the resulting loss of several mental health professionals, will undoubtedly lead to numerous changes in services provided by Psychiatry Service. Two of the most significant changes anticipated by the Psychiatric Outpatient Department are an increase in group therapy and a greater relative emphasis being placed on the treatment of active duty personnel.

Despite the impending personnel losses associated with the closing of the residency, the Psychiatry Outpatient Department feels it can provide more and better service for local active duty members. An emphasis on short term, problem-solving forms of group therapy will make this possible. Two group therapy innovations already underway are the Outpatient Coping Skills Group and the Marital Growth Group recently started for NRMOC Oakland staff members and spouses.

The Outpatient Coping Skills Group is coordinated by Dr. John Brown and LT Susan Colligan, both clinical psychologists, and HM2 Patricia Jones, psychiatric technician. The group is essentially a series of workshops with each session's content tailored to various problems presented by participants. Sessions include explanations and demonstrations of skills such as assertiveness, relaxation, cognitive restructuring and self-directed behavior modification. Patients are encouraged to become more fully aware of their thoughts, feelings and actions, and to assume responsibility for the consequences of these.

Dr. Tasneem Raja, psychiatrist, and Dr. Brown are co-therapists for the Marital Growth Group. "We started the group with the idea of helping fellow hospital staff members solve relatively minor marital problems before they became serious," one explained. "As much as we'd like to think that work and home life can be separated, experience clearly indicates that problems at home often undermine morale at work. If the marital problems are fairly serious they can interfere with work and reduce the quality of patient care. So, we thought we could 'help the helpers' and indirectly help maintain the high quality of patient care available here." Both Drs. Raja and Brown feel quite strongly that many of the problems dealt with in the Marital Growth Group could eventually destroy a marriage if not resolved.

The group encourages couples to look at problems honestly and to look

WORKING OUT PROBLEMS—Dr. John Brown, clinical psychologist, leads a discussion in the new Marital Growth Group therapy program of Psychiatry Service. Seated in chair nearest blackboard is LT Susan Colligan, another clinical psychologist involved in the therapy.

for mutually satisfying solutions before permanent damage is done. Unfortunately, some couples seen for counseling are already too tired, angry, or detached to carry out the hard work of rebuilding a marriage.

I posed several questions to Dr. Brown about the "group process":

Q: Dr. Brown, why would you recommend group treatment for such personal problems as those that arise in a marriage?

A: When people are first encouraged to attend group sessions they sometimes feel that they are being shortchanged or that they are getting second class treatment. For most problems, including most marital problems, group therapy actually has advantages not available in individual counseling. Most obviously, the person gets more than just the therapist's viewpoint; other participants also give him or her feedback. Another advantage to group therapy is that participants learn to trust and communicate more with others rather than remain basically secretive while confiding in one therapist. Simply learning to talk meaningfully and honestly with several other people goes a long way toward solving life's problems. A more subtle advantage is that the groups are more likely to recreate

realistic problem situations than in individual therapy. I am continually impressed by the ability of group members to clearly see the problems of others, even when they are unable to sort out and correct their own.

Q: Who may attend the group?

A: The marital growth group is presently limited to active duty hospital staff and their spouses. Another group which would include nonstaff personnel may be started if there is sufficient demand.

Q: Are there any rules in the group, or does "anything go"?

A: The rules for all the groups are similar and quite simple. Confidentiality is the most essential rule. What is said in group stays in group. Violence is prohibited and pointless verbal attacks are discouraged. Honesty in all aspects is strongly encouraged—a participant must share his real thoughts, feelings and expectations if any improvement is to take place. Perhaps most importantly, once participants have an understanding of their problems, they are encouraged to commit themselves to taking corrective action. The rules and procedures of the groups are all designed to promote honesty, understanding and improvement.

Psychiatry staff members unders-

tand and realize that taking the first step toward seeking therapy of any nature is often a frightening and anxiety-provoking decision. New participants are almost always nervous in their first group session. First, they may be embarrassed about seeking counseling. An unfortunately large number of people feel that getting outside help in exploring and solving personal problems is disgraceful—they feel as if it is somehow better to suffer alone.

Second, and more common, is the anxiety of meeting new people and adjusting to a new situation. Also, most new participants have some specific fears about the group—that its members will attack them or not understand, or that they will talk too much or too little. A common fear is that once a new participant starts talking he or she will be unable to hold back all the accumulated hurt or anger. Almost without exception, the fears prove completely groundless and new participants quickly become "old timers" in the group, comfortably sharing thoughts and feelings which have been hidden too long.

Drs. Raja and Brown insist that if someone is dissatisfied with his or her marriage, it is better to face the situation honestly while love and determination to make the marriage work are still alive. Although there are no guarantees, the improvements usually experienced in groups such as the Marital Growth Group are well worth the initial discomfort and investment of time.

The Marital Growth and Coping Skills groups are only part of the outpatient department's overall program to make psychotherapy more available and less mysterious. Part of this is helping people realistically deal with everyday problems. "My ways of viewing and solving problems are ones that my patients can easily learn and apply themselves," says Dr. Brown. "Therapy doesn't take that long when people are genuinely interested in solving fairly specific problems."

With implementation of both the Marital Growth and Outpatient Coping Skills groups, the doctors in the outpatient psychiatry department will have more time available for other patients and hopefully at some point, be able to help people solve little problems quickly before they become tough and time-consuming issues.

For more information on any outpatient psychiatric service, call Ext. 2387 or 2388.

Early reenlistment policy changed

NAVOP 26/82 announced a change to early reenlistment policy for reenlistments that involve payment of Selective Reenlistment Bonus (SRB). Effective March 22, reenlistments involving SRB are permitted up to three months prior to end of obligated service (EAOS) without Commander, Naval Military Personnel Command approval. Past policy allowed reenlistments up to one year early.

An exception to the revised policy is early reenlistment under the STAR program for personnel in 33XX series (Nuclear) NECs contained in OPNAVNOTE 1160, which lists ratings and NECs eligible for SRB.

This policy adjustment will enable all SRB eligible personnel who are approaching EAOS during the remainder of the fiscal year to continue to receive bonus payments at FY 1982 levels. Eligibility for SRB is currently established by OPNAVNOTE 1160 of Oct. 21, 1981. This eligibility may be modified by subsequent award level changes resulting from the normal mid-year SRB program review.

MAKING A POINT—Larry Cummings, National President of the Fleet Reserve Association, visited the medical center April 1, lunched in the Porthole with members of the Chief Petty Officers' Association and addressed enlisted personnel later the same day in the Clinical Assembly. Mr. Cummings reported on current legislation before Congress affecting active duty military personnel. He urged the Navy men and women to write their elected representatives about legislation affecting military persons and advised his audience to register and vote in all national and local elections. Accompanying Mr. Cummings to Oak Knoll were Dave Maise, FRA Past Regional President; Harold Zeer, Regional President, and Shipmate Lou Bayers.

Interested in 6 mo. cruise?

Navy men interested in a unique experience should consider volunteering for this year's Unitas XXIII/82 and West African Training Cruise (WATC) 82.

These cruises consist of combined training exercises with South American navies and visits to ports of unusual interest in South America, the Caribbean and West Africa. The U. S. task group will circumnavigate South America. Some units will visit West Africa. The six-month cruise begins in June 1982.

Sailors in any rating who speak Spanish, Portuguese or French will be considered. Personnel in the OS, EW, QM, RM, ET, MS, SH, PC, DT, PH or JO ratings may be considered, regardless of language ability. Selectees will be notified by May 10.

For more information on eligibility requirements and how to apply see ALLANTFLT 34/82.

GETTING ACQUAINTED—Agnes Duffy and Rear Admiral Walter M. Lonergan enjoy some light conversation while waiting for their meal to be served at the recent luncheon in honor of the bowling association. Others shown are Elaine Hagin, Tommy Marks and Earl Earhardt.

FOR FITNESS—LCDR Patricia Hoggatt, the medical center's chief physical therapist, explains to bowling association members how use of the various exercise stations enhances physical fitness for patients and staff.

Career capsules

Volunteering for HARP

By HMC G. L. Soileau

The Hometown Area Recruiting Assistance Program (HARP) is designed to return outstanding Navy personnel (officers and enlisted) to their home areas to assist local recruiters in locating and enlisting quality recruits. Individuals assist the recruiter by relating Navy experiences to their peers and reflecting their views on Navy life and programs. Individuals volunteering to participate in the HARP program do so on permissive, no-cost TAD orders to hometown recruiting stations. Usually when an individual requests HARP duty (TAD), it is in conjunction with a period of leave which either precedes or follows such duty. However, leave is not a prerequisite for HARP duty. Only officers may perform HARP duty (TEM DU) in conjunction with PCS orders; HARP duty (TEM DU) must be approved by the officer's detailer. General eligibility requirements are as follows:

- There is no limit to rate, rank, or age for HARP participants.
- For Officers (OHARP): Be a resident or have attended college in the area requested for at least two years prior to entry into the Navy.
- For Enlisted: Be a high school graduate or GED equivalent from the town in which you are requesting HARP duty.

Requests for HARP duty should be submitted on a special request chit at least three weeks prior to requested dates of HARP duty (TAD).

Information needed for requests is name, race, ethnic group (for statistical information), social security number, hometown, zip code, high school/college (if applicable), primary and alternate dates desired, command, point of contract (career counselor) and command telephone number.

The length for HARP is determined in the initial request by the individual's command. Minimum requirement for the length of HARP duty is 10 working days, preferably starting on a Monday and ending on a Friday.

For further information contact your Career Counselor's office.

Oldest ammo ship celebrates 25th

The ammunition ship USS MAUNA KEA (AE 22) celebrated the 25th anniversary of its commissioning on March 30.

It is a veteran of 18 deployments to

the Western Pacific and is the oldest ammunition ship in the Pacific Fleet.

MAUNA KEA, homeported at Mare Island Naval Shipyard in Vallejo, is commanded by CDR James P. Breece.

TRYOUT—Elaine Hagin of the California Women's Bowlers Association tries out one of the exercise stations in Oak Knoll's new parcourse with some guidance from HA Ian Anderson of Special Services.

NBME wins judgment on alleged exam sale

The National Board of Medical Examiners (NBME) has been awarded a \$100,500 judgment in an action it instituted after learning of the sale of a copy of one of its examinations.

Although there have never been any discrepancies in the administration of the exam here, Naval Regional Medical Center Oakland is one of the examining centers and Kris Clemens of Graduate Training serves as Chief Proctor.

The legal action, brought by the national board in the U. S. District Court for the Central District of California in 1981, asserted several claims, the major of which was a claim of copyright infringement. In its complaint against the alleged seller of the examination, the national board demanded injunctive relief, as well as compensatory and exemplary damages.

The court awarded judgment on Feb. 18, 1982 in favor of the national board and against the defendant on all claims. Additionally, the court awarded judgment against the defendant in the form of an injunction which permanently enjoins the defendant from directly or indirectly infringing copyrights held by NBME and from "reproducing or causing, contributing to or participating in the unauthorized reproduction, dissemination or distribution of any copyrighted National Board

of Medical Examiners property."

As indicated by its successful pursuit of this litigation, the national board is prepared to investigate reports of breaches in the security of its examination materials and to take vigorous and appropriate action in response to such violations.

The national board has a strong and continuing commitment to assure integrity of scores on its examinations which are used for purposes of certification leading to medical licensure, a board spokesman said, adding that an important part of maintaining this integrity is securing the examinations from any unauthorized access or disclosure.

To prevent any such violations, the national board has detailed security procedures which are carefully monitored through all phases of production and administration of examinations. Additionally, the national board reserves all rights of copyright in the test questions which are contained in its examinations, provides notice to that effect on all examination booklets, and obtains registration of its copyright of this examination material in accordance with the provisions of federal copyright law.

The majority of Oak Knoll physicians take these tests to qualify for licensing.

Navy units to aid in drug interdiction

Vice President George Bush recently announced that the U. S. Navy will work with U. S. Customs officials and the U. S. Coast Guard to help intercept ships and aircraft attempting to smuggle drugs into the United States.

The Vice President stated that assistance may include the embarkation of Coast Guard teams on Navy ships to perform law enforcement functions and the operation of E-2 "Hawkeye" aircraft to detect airborne smuggling.

Since 1978, the Navy has been providing sighting and surveillance infor-

mation obtained from various units during normal operations to support U. S. drug interdiction efforts. This assistance will continue as before.

From Oct. 1 to Dec. 16, 1981, Navy Hawkeyes in "Operation Thunderbolt" reported low-flying aircraft transiting from the Bahamas to Florida. Customs aircraft were vectored to intercept these planes, resulting in 97 drug-related arrests, 45 seized aircraft and a large amount of confiscated drugs. Navy E-2 aircraft are now deployed to Homestead Air Force Base from Norfolk to conduct similar operations.

Kudos.....

LETTER OF COMMENDATION
Lieutenant Commander Patricia
Lauermann, Nurse Corps

LETTER OF APPRECIATION
Hospitalman Charles Collins, Nurs-
ing Service

Comptroller staff earns compliment

In a recent letter to this command from J. G. Radcliffe, Comptroller, Bureau of Medicine and Surgery, the Naval Regional Medical Center Oakland was complimented for consistently meeting reporting requirements vital to good financial management.

Mr. Radcliffe wrote, "Please accept my congratulations to you and your staff in order to achieve this required continuing attention to report requirements and a commitment to meet them. It is through the efforts of activities such as yours that we can best present our funding requirements and provide the necessary history to document the need for increases."

According to Commander Robert Egg, Oakland comptroller, Margaret Gulson, Ann Painter, Barbara Walker, Barbara Thompson and Art Limongco, of the Accounting Section, are those primarily responsible for reports and deserve the most welcome praise from our higher command.

Fleet hospital support staff receives awards

An Army officer, Navy chief and a civilian employee of the Fleet Hospital Support Office are recent awards recipients.

Lieutenant Colonel David J. Kitchin, MSC, USA, Facilities Department Director, received a Certificate of Achievement from the 7th Medical Command, Germany, for his participation in a Medical Service Corps training conference.

Chief Hospital Corpsman William A. Alexander, Bio-Medical Equipment Technician, currently assigned to the Equipment Branch, received the Good Conduct Award.

Mrs. Juanita J. Reyna, Editorial Assistant in the Administration Office, received a Sustained Superior Performance Award from the Commanding Officer, Naval School Physical Distribution Management, Oakland.

The awards were presented by Captain E. L. Jones, Supply Corps, USN, who is Officer in Charge of the Alameda-based Fleet Hospital Support Office.

Carrier returns to Alameda home

The aircraft carrier USS CORAL SEA (CV 43) returned to its homeport of Alameda March 23, after its 14th deployment with the U. S. Seventh Fleet.

During the seven-month cruise the carrier steamed more than 65,000 miles, including 78 consecutive days of operation in the Indian Ocean. CORAL SEA was named the winner of the Admiral Flatley Memorial Award for navigation safety and logged its 10,000th arrested landing during the deployment.

The carrier, commanded by Captain Johnson, visited five countries and participated in numerous operations after departing its homeport Aug. 1, 1981.

HN Theresa D'Ambrosio

Sixth Deck LPO is Oak Knoll SOM

Hospitalman Theresa D'Ambrosio, 6th Deck Leading Petty Officer for Nursing Service, has been selected as the Naval Regional Medical Center Oakland's Sailor of the Month for March.

Her superiors report she has a high sense of loyalty to the Navy, is a quick learner and an effective, responsible leader, all with a cheerful and cooperative attitude. Nursing Service named her its corpsman of the month for February.

Theresa, the daughter of John and Barbara D'Ambrosio of Roslyn, Pa., has been in the Navy nearly two years. Following recruit training in Orlando, Fla., she completed Hospital Corps School at Great Lakes, Ill., and was assigned to the Oak Knoll staff about 17 months ago. She will depart in the near future for a new assignment in Little Creek, Va.

"I feel extremely honored to have received this award," she said. "Not just for myself, but for Nursing Service. I think it's important for all the corps staff to now they are recognized as an important part of the hospital, as well as the Navy."

Former Navy doctor dies in avalanche

Dr. Leroy Nelson, 39, a former Navy physician, and his 11-year-old daughter Laura were among those killed in the massive avalanche which struck the Alpine Meadows ski resort near Lake Tahoe on March 31.

According to press reports, Dr. Nelson, who was an orthopedic surgeon in private practice in Eureka, Calif., was an athlete who nearly made the Olympic team while in college, and who would run up to 15 miles at a time.

Born in Marion, Ohio, and educated at Purdue University and Jefferson Medical College, he interned at Mercy Hospital in Pittsburgh, Pa., 1969-70, and completed an orthopedic residency at Jefferson Medical College. He served two weeks' active duty at Norfolk, Va., and from 1975 to 1977 was on the staff of Naval Regional Medical Center, Guam. He was never assigned to NRMC Oakland.

His wife Carolyn (Katie) and son Eric were also on the same ski vacation which ended so tragically.

The family moved to Eureka two years ago.

HM3 Daugherty receives NROTC Purdue scholarship

Hospital Corpsman Third Class Shannon F. Daugherty, Administrative Office assistant with collateral duty as driver for the Commanding Officer, has only been at Oak Knoll for about a year, but he is already making plans for his departure.

Shortly after he was assigned here, he set his sights on a civilian education and immediately pursued it, taking calculus at Chabot College in off-duty hours while he applied for a Naval Reserve Officer Training Corps (NROTC) scholarship.

He recently was notified that his goal has been realized—he is accepted into Purdue University, West Lafayette, Ind., and will begin studies on Aug. 25. While in attendance, Petty Officer Daugherty will major in electrical engineering with a concentration in computer sciences. Upon graduation, he will receive a commission in the U. S. Navy and serve as a line officer.

"My advice to any person seeking a NROTC scholarship," said Petty Officer Daugherty, "is to get started early." He added that those wanting a scholarship for the 1983-84 season should start as soon as possible in getting the paperwork completed.

The Spokane, Wash. native enlisted in the Navy in November 1980. He attended Basic "A" Hospital Corps School in San Diego, served as the Educational Petty Officer for his class, and graduated with top honors.

HM3 Shannon Daugherty

His principal hobby is automotive mechanics—"modifying for performance and economy."

The 20-year-old corpsman is the son of Virginia Daugherty of Spokane and James Daugherty of Wheaton, Ill.

Comings and Goings-----

"Fair winds and following seas" to the following personnel who have recently detached:

Lieutenant Commander Patricia Lauermann, Nurse Corps, to Pearl Harbor.

Lieutenant (junior grade) Pauline Suszan, to NRMC Guam.

Hospital Corpsman Second Class Ellen Hopkins, released from active duty.

Hospital Corpsman Third Class Brian Smead, to NRMC Beaufort, S. C.

Hospitalman Eric G. Wynne, released from active duty.

Hospitalman Donna M. Cardo, to NRMC Guam.

Seaman Apprentice Robert Cox, released from active duty.

Hospital Corpsman Third Class Clifford Towle, released from active duty.

Hospitalman Julian Gardner, to 2nd Marine Division, FMFLANT.

Hospital Corpsman Third Class Gregory Leavitt, to USS SHREVEPORT (LPD-12).

Hospitalman Charles Collins, to 1st Marine Division, Camp Pendleton.

Hospitalman Jerome Christensen, to 1st Marine Division, Camp Pendleton.

Hospital Corpsman Third Class David Osborne, to NSHS, Bethesda, Md.

Hospital Corpsman Third Class Mark Hill, to NSHS, San Diego.

Hospitalman Donald Lewis, to 1st Marine Division, Camp Pendleton.

Hospitalman Vernon Langford, to 3rd Marine Division, FMFPAC, Okinawa.

Hospital Apprentice Preston Thrift, to 1st Marine Division, Camp Pendleton.

Hospital Corpsman Third Class Rodney Taylor, released from active duty.

"Welcome aboard" to newly arrived:

Lieutenant John Chemycz, Nurse Corps.

Lieutenant Elizabeth Nolan, Medical Service Corps, to Pharmacy, Treasure Island Branch Clinic.

Ensign John Mitchell, Clinical Clerk.

Commander Steven Gibbs, Medical Corps, ACDUTRA.

Ensign Ross Dykstra, Clinical Clerk.

Ensign Karen Mehalek, Clinical Clerk.

Hospital Corpsman Third Class Leslie Hopper, PMT School.

Hospital Corpsman Third Class Richard Justice, PMT School.

Hospital Corpsman Second Class David Mickey, PMT School.

Hospital Corpsman Third Class Michael McMahon, PMT School.

Hospital Corpsman Third Class Joseph Clark, PMT School.

Hospital Corpsman Third Class Janis Colokathis, PT/OT School.

Hospital Corpsman Third Class Timothy Mueller, Nursing Service.

Hospital Corpsman Third Class Troy Johnston, PT School.

Lieutenant Commander Donald Phillips, Nursing Service.

Hospitalman Patti Sis, OR School.

STSSN Stanley Atkins, Operating Management.

Hospitalman Michael Morgan, OR School.

Hospitalman Howard Hart, Nursing Service.

Hospital Corpsman Second Class Charles Purdin, Psychiatry Service.

Hospitalman Recruit Thomas Ferrer, Nursing Service.

Hospital Corpsman Third Class Robert Denicola, Special Services.

Hospitalman Timo Saarinen, Nursing Service.

Hospital Corpsman Third Class Mary Ann Smith, Pharmacy.

Hospitalman Recruit Michael P. Baskerville, Nursing Service until June, then OR School.

Hospital Corpsman First Class Dorian Carranza, Pharmacy.

Hospital Corpsman Third Class Dennis Clark, Clinical Investigation Center.

Hospital Corpsman Third Class Rodney Cheser, Medical Repair.

Hospitalman Recruit Scott Schwenkler, Nursing Service.

Hospitalman Recruit Neil R. Collinge, Nursing Service.

Hospital Corpsman Third Class Martin S. Blanko, ER/Primary Care.

Hospital Corpsman Third Class Gary Smith, Laboratory.

AMONG THE LUCKY ONES—Three of the top winners in the recent Blood Donor Drive raffle were (l to r): MM3 Jeffery Smith, Operating Management; HA Donald W. Brewer, Drug Screening, and LT William H. Noble, III, Radiology. Petty Officer Smith won dinner for two at Carlos Murphy's; HA Brewer, dinner for two at Scoma's on Fisherman's Wharf, and Dr. Noble, dinner for two at the Elegant Farmer. Winners of three lines of bowling were LT John C. Ticer, DT Valerie J. Barbeauld, Mr. Walter L. Short, LCDR Robert K. Ridgeway, Mr. Michael D. Cotter, Ms. Melinda L. Rexford, HM1 Rose L. Hymel, and Mr. Dwayne L. Sanders.

Blood Bank appreciative of support

Blood Bank personnel would like to thank all of those who have given blood this past quarter, either at the Irwin Blood Drive on March 9-10 (260 donors!), or at our own donor center.

Much of this blood has been used to support surgical patients. Other units were used to help premature infants get a good start in life. Platelets, white blood cells, cryoglobulin, plasma, and hemofil (Factor VIII) were used by patients with special problems, such as those undergoing chemotherapy.

Blood Bank officials would also like to thank all the keypersons who helped recruit donors for the Irwin Blood Drive, especially Ruthie Minarik of Housekeeping and HM3 Cynthia Moss of PMT. Both these keypersons put even more effort than most into this duty.

AND OF COURSE... special thanks to Pastoral Care Service, which had 100 percent participation by their staff in the same recent drive.

Parents alerted re drug-laced tattoo transfers making rounds

Drug abuse prevention officials warn parents to be on the lookout for drug-laced paper tabs, sometimes called "blotters," "stamps" and "tattoos."

These are small squares of absorbent paper or tattoo transfers that have been soaked in liquid LSD. They may have pictures of Superman, Mickey Mouse dressed as the Sorcerer's Apprentice, Dopey or other familiar cartoon characters. Tattoo transfers may be in the form of blue stars or other figures.

Officials say the age group deliberately using the drugs is between 15 and 20 years, but warn that little brothers and sisters may happen upon the items and absorb the drug accidentally. This can be done by placing the paper in the mouth and licking it. Youngsters may also be given the tabs

or tattoos by older children wanting to "have some fun."

Authorities report that the bright colored tabs of paper impregnated with LSD first showed up in New England but have spread to other areas of the country. They report also that there has been a gradual resurgence of LSD use in the past three years.

For more information, contact the local drug abuse prevention office, security police, or local police. (AFPS)

NEW INSTALLATION—It was a busy scene near the loading dock at the rear entrance to the hospital a couple of weeks ago as a new trash compactor was being installed. The updated equipment will handle 40 cubic yards of refuse, twice the former capacity. It is more sanitary, safer, quieter, and easier to use. In a normal day's operation, the hospital accumulates two to three tons of refuse each day.

Telling your doctor about pain

By HMCM Kennedy

Pain is the body's alert system that tells you something is wrong. During a routine medical examination, the doctor will ask you to describe the pain as accurately as you can. So it's important that you know how to answer your doctor's questions.

In describing your pain, begin with the first time you noticed that something is wrong. Inform the doctor of all the things you have done or medicines you have taken to relieve the pain. This is important because if you have taken aspirin or a similar drug, your pain may have lessened and your doctor may not be able to make a proper diagnosis.

As you continue your description, tell the doctor where the pain began and whether it has moved or spread from its original place. To help describe the intensity of the pain, try rating it on a scale of one to 10, with one being the least amount of pain and 10 being the greatest.

Describing the actual pain is probably the hardest part of the examination, but words like sore, achy, sharp, dull, throbbing and cramping are quite helpful. Include in your description, too,

whether the pain is constant and whether, if anything, makes it better or worse. If the pain is recurring, indicate when it seems to turn it on or off.

A side note...

• Medically speaking, pain is a symptom, while tenderness is a sign. This means that pain is what you usually complain of because it is there even when you rest; tenderness is pain you or the doctor may produce by touching or pressing parts of your body. Sometimes there is a very small difference between pain and tenderness. But when you undergo a physical examination, you should be able to distinguish them.

• If the doctor presses on a spot that never hurt before—but does now—he or she has found a tender spot. If such a spot is found, the doctor may press that same place on the opposite side of your body for comparison.

• If you already have a tender spot, pressing it will make it feel worse. It's important if a little pressure produces a lot of tenderness. You can use the one to 10 scale to tell this to your doctor, too. (NES)

Director predicts lower cost for CHAMPUS beneficiaries

Changes in the Defense Authorization Act that went into effect the first of this month will result in lower out-of-pocket costs for CHAMPUS beneficiaries. The changes should also increase participation by physicians and other health care providers in the military health program.

CHAMPUS is a cost-sharing program for the health care received in civilian facilities by military dependents, retirees and their dependents. After yearly deductibles are paid by beneficiaries, CHAMPUS will pay either 80 percent (for dependents of active duty members) or 75 percent (for retirees and their dependents) of an allowable charge. The "allowable charge" is the maximum that CHAMPUS will pay for a specific medical procedure or service.

"The legislation simplifies the procedure for determining allowable charges and permits an update every six months instead of annually," explained Theodore D. Wood, OCHAMPUS Director. "This means CHAMPUS payments will more accurately approximate the current fees charged by physicians and other noninstitutional health care providers."

Under the new procedure, CHAMPUS profiles the fees of specific medical procedures charged the year before by health care providers who billed CHAMPUS. Profiles of professional

fees for both in-and out-patient services are established for each specialty. The allowable charge is then set at a level that would cover the fees charged by eight of 10 health care providers.

According to Wood, "The change in CHAMPUS reimbursement will add an extra \$8 million in benefits to the first year. We'll be relieving beneficiaries of some of their medical costs and hopefully attracting more health care providers into the CHAMPUS program."

Overseas drug penalties severe

A new "dangerous drug" act, which became law in the Republic of the Philippines March 2, substantially increased punishment for many drug offenses. Under the provisions of the new law as presently understood, U.S. servicemembers will no longer be eligible for probation if convicted in Philippine court, and any drug offense will result in a mandatory prison term.

Penalties under the new law range from a minimum of six years imprisonment for possession of any amount of marijuana (12 to 20 years confinement if the marijuana includes seeds), death or life imprisonment for sale of drugs to minors or to an individual who dies from drug use. A person who maintains a residence in which drugs are used may also be subject to a minimum sentence of 12 years in prison.

Since July 1, 1979, 15 Navy Department personnel have been convicted of drug offenses by Philippine courts. All but one received probation. If the new law had been in effect at that time, all 15 would probably now be serving sentences ranging from six to 12 years in Philippine prisons. Most cases involved possession of less than one ounce of marijuana.

Interns visit ship

Thirty-seven Oak Knoll medical interns are learning a bit about shipboard medicine this month as they take one-day orientation periods aboard the USS CORAL SEA (CV-57), homeported at NAS Alameda.

The shipboard introduction is part of the operational medicine training of Navy physicians.

"The editor of an Army publication wants you to write an article on how NOT to throw a grenade."

ed Cross volunteers recognized

About 50 Red Cross volunteers who have given many long, faithful years of service to this Navy hospital, were

ING IN SPIRIT—Mrs. Ella Rose, recently retired Red Cross volunteer, approaching her 93rd birthday but she already misses coming to hospital to deliver home-baked pies and chat with patients. After receiving an award from Captain Joseph P. Smyth, she landed a friendly kiss to his cheek. He invited her to visit the medical center anytime she likes, and she came back. "What are you doing tomorrow?"

arry career goals to Navy needs advises senior woman line officer

TJG Beverly Dart
Bay Area women officers took advantage of an unusual opportunity to meet and share their experiences, as women attended a recent luncheon at Alameda.

Featured speaker for the occasion was CAPT Roberta L. Hazard, commanding officer of Naval Technical Training Center, Treasure Island, and a female line officer in the Bay Area.

The luncheon, hosted by NAS Alameda commanding officer CAPT Alan D. Campbell, drew women from 28 local commands and a wide variety of communities. The initial reason for many was the forum to meet informally and exchange ideas; the outcome was a positive yet realistic assessment of the role of women throughout the Navy.

Speaking of "a measured response to the 'uncertain trumpet' which calls military women," CAPT Hazard stressed the developing role of women in Navy surface, aviation, and restricted line communities. That reality, she points out, is both external and internal. It is an uncertainty of progress at the highest levels of leadership, as well as an uncertainty to modern women's conflicting needs and aspirations.

Formerly assigned to the Office for Women's Affairs, OPNAV, CAPT Hazard offered down-to-earth advice in searching subspecialties with an eye for future competitiveness. Explaining the outlines of the leadership career progression (division officer through commanding officer), she nevertheless stressed the need for individuality in selections.

Decide what your own career goals are, she urged, "and marry up the needs with them." She addressed her audience, "In guiding selections, you can't fault the man for the choices you have made for yourself. Set your sights on what

you want—then go after it wholeheartedly."

Although recognizing current legislative constraints on women's career development, CAPT Hazard exuded enthusiasm in evaluating the current bank of talent and skill from which the Navy must inevitably benefit. "New ideas take time," she acknowledged, "but that time is coming."

"The biggest contribution we can make," she concluded, "is through our outstanding performance. It's the simplest key to success."

Luncheon attendees represented the Navy's unrestricted line community, Nurse Corps, Medical Corps, Medical Service Corps, Supply Corps, Judge Advocate General Corps, and the U. S. Coast Guard.

Also, William Brett, Leta Palmer, Pat Rasmussen, Bessie Bradley, Doris Gibson, Edna Hudson, Marjorie Leffler, Marion Nelson, Mary and Francis Pateroster, Pat Accord, Kim Boulware, Gary Brown, Anita Browning, Barbara Elkins, Irene Hodge, Caroline Nelson, Margaret Baily, Rose Butz and Cliff Henderson.

Also, Tess Bryner, LT Joyce Campano, Rose Chapman, Neal Evans, Dolly Helbush, Vickie Keys, Rose Lody, Robin Offerman, Kevin Pike, Beverly Portillo, Mercedita Del Rosario and Diane Shigley.

They come from Oakland, San Lorenzo, Newark, Half Moon Bay, San Leandro, Walnut Creek, El Cerrito, Piedmont, Richmond, Livermore, Castro Valley, Hayward, Berkeley, Lafayette, Concord and Mountain View.

you want—then go after it wholeheartedly."

Although recognizing current legislative constraints on women's career development, CAPT Hazard exuded enthusiasm in evaluating the current bank of talent and skill from which the Navy must inevitably benefit. "New ideas take time," she acknowledged, "but that time is coming."

"The biggest contribution we can make," she concluded, "is through our outstanding performance. It's the simplest key to success."

Luncheon attendees represented the Navy's unrestricted line community, Nurse Corps, Medical Corps, Medical Service Corps, Supply Corps, Judge Advocate General Corps, and the U. S. Coast Guard.

The following additions to the Navy medical family have arrived at Oak Knoll:

A baby boy to Lieutenant Suzanne Rae Drebing, 8 West, and her husband Laurence, March 29.

A baby boy to Captain Lowell Kallen, Psychiatry Service, and his wife Erica, March 31.

NOTE: Last edition of Oak Leaf was supposed to carry an item on the birth of a daughter to one of our staff members. Due to a problem at the printer's (it happens to the best), the item read: "A baby girl to Lieutenant Harvey L. usually retire from active duty at P. O. Box 231, Silver Springs, Md."

With apologies to the proud parents, please make that read:

A baby girl to Lieutenant Harvey L. Simpkins, Physical Therapy, and his wife Dawn, March 18.

GREETING THE VETS—Captain Joseph P. Smyth, Director of Clinical Services, congratulates Red Cross volunteers who have given more than 20 years service to the hospital. Left to right, they are Peg Gruner, 32 years; Ella Rose, 40 years; Mary Passanisi (kneeling), 26 years; Helen Ayres, 40 years and Gloria Hewitt, 32 years.

RECREATION VOLUNTEERS—Captain L.H. Kallen of Psychiatry Service, presents special awards to fifth floor recreation volunteers. They are (l to r): Gloria Hewitt, Peg Gruner, Beverly Portillo and Hazel Daniel.

Coupons may cut costs

Those money-off coupons found in the newspapers and magazines might not lower your commissary shopping bill after all if you fall for the manufacturer's ultimate scheme.

A substantial savings may be possible if a concentrated effort is made to clip coupons for products that you normally buy. However, many of the coupons are for new products with large "savings" of 25 to 50 percent off the regular price. The intention of the manufacturer is for you to add this product to your shopping list. If you do, you've just added more money to the total of your bill.

Coupons are not really "free." The

prices you pay for many items include markups by the manufacturer that allow the company to recover the value of the number of copies it expects will be redeemed. Despite this, it is to your advantage to use coupons if restricted to those items on your regular shopping list. A few minutes a day clipping coupons could reduce your monthly shopping totals.

At most commissaries patrons are asked to give coupons to the cashier before the order is rung up. Remember to provide only those coupons for items you are purchasing and be sure to check the expiration date of each coupon.

Faulty toys recalled by exchange service

The Army and Air Force Exchange Service (AAFES) has found that four infant's squeeze toys sold in exchanges are defective.

AAFES is recalling the toys, Style Number 06273 manufactured by Reliance Productions Corporation, because paint can be removed easily by a child and swallowed. Although the paint is labeled non-toxic, AAFES' quality assurance specialists consider the condition undesirable in a children's product.

The toys, a squeezable vinyl dog, cat, monkey, and mouse, sold for \$1.35 in exchanges. The manufacturer's name is printed on the bottom

of the toys.

AAFES has removed them from sale and urges customers to return the items to an exchange for full refund.

Also, a potential hazard has been found in teething beads, Style Number 6265B, manufactured by Baby World. AAFES is recalling the infants' item and has removed it from exchange shelves.

The strand knots holding the multicolored plastic beads are loose and not hidden. The knots can be easily untied resulting in the infant swallowing the loose heads. Customers who have bought defective Baby World teething beads should return them to the exchange for full refund.

CPO BALL—HMC Al Esporo and his wife Lori keep step with the band at the April 2 Spring Ball sponsored by the Chief Petty Officers' Association at the Porthole.

Amusement discounts

GREAT AMERICA
Regular price (4 to 54 years) \$13.95; thru Special Services Ticket Office, \$11. (Seniors 55 and up may purchase tickets at the park for \$7.95). Center is open Saturdays and Sundays only until May 28, then daily thereafter from 10 a.m.

MARINE WORLD AFRICA USA
Regular price \$9.95 adults, \$6.95 children; thru Special Services, \$8 and \$5.50. Open Wednesdays through Sundays until May 31; daily thereafter from 9:30 a.m. to 5:30 p.m.

SANTA CRUZ Beach Boardwalk—Regular price \$8.50 for entrance and all rides; our price \$7 when purchased with Beachcombers Club Card. Private picnics and beach parties can be arranged with the Santa Cruz Beach Boardwalk and prices include unlimited rides for the entire day.

Sun Room—A new restaurant on the Boardwalk. Sunday brunch (both buffet and ala carte, 9:30 a.m. until 2 p.m., \$6.95 to \$8.95.

Coconut Grove—Separate from the Boardwalk. Name bands play there during the summer months.

Golf team forming
Active duty personnel are needed to form the 1982 Varsity Men's Golf Team at Naval Regional Medical Center Oakland.

Contact Ron Brown at Ext. 2350 if you are interested. League play commences in early May.

Get tickets now

Due to popular demand of A's fans at NRMCOakland, the base Special Services Office has purchased a limited amount of tickets to what promises to be the best games of the season at the Oakland Coliseum. Bumper stickers are also available free.

The June 6 day game where the A's meet Milwaukee, and the July 11 day game between the Oakland team and Baltimore have been designated Naval Regional Medical Center Oakland days at the Coliseum. These games and the ones with New York (May 13 and 14 night games; May 15 and 16 day games; July 7 and 8 night games) are extremely popular. Our tickets are limited and must be sold for the New York May games BY THE END OF

APRIL. All other tickets must be ordered three weeks prior to game.

Tickets purchased through Special Services will be one-half price for active duty military, children under including age 14, and seniors (55 and over); one dollar off for regular price tickets. The seats for all games are limited. Prices: Active duty military, children and seniors, \$4.25 each; other regular tickets, \$7.25. In case of a game cancellation, only rain checks are given.

Don't be shut out when the A's (hopefully) shutting out New York Milwaukee and Baltimore! Orders for tickets are being taken now and must be paid for when placed.

Scenes by the Sidelines

By Ron Brown

ENT and Special Services met for the NRMCOakland basketball crown on April 15 and results will be published in the next Oak Leaf edition.

The week previously, ENT maintained its momentum with a stunning defeat of fourth place OPD by a score of 56-44.

Special Services had it a little rougher as they had to go into an overtime period to seek out a close 48-47 win over Medicine.

Special Services will have to beat ENT twice to win the overall championship. (This is the structure of the playoffs since ENT won undisputed first place in regular league play with a 16-1 record.)

Following is the box score from the league playoffs held March 31.

		ENT			TEAMS		
Player		FG	FT	TP	Player	FG	FT
Smythe		6	4	16	Tosig	0	0
Barclay		3	0	6	Parker	0	0
Burton		8	3	19	Daniel	11	3
Bonilla		4	5	13	Ford	0	0
Johnson		0	0	0	Graham	0	0
Spinks		1	0	2	Thomas	1	2
Trapp		0	0	0	Tyrone	4	0
Alfred		0	0	0	Mays	3	1
		22	12	56		19	6

		MEDICINE			OVERTIME

NAVAL REGIONAL MEDICAL CENTER. OAKLAND. CALIFORNIA.

Friday, April 30, 1982

Keypersons appointed, game approved to benefit NRS

Keypersons have been appointed and the annual Navy Relief Society fund drive is going into full swing throughout Naval Regional Medical Center Oakland under direction of project officer Lieutenant Commander Robert K. Ridgeway. The drive will run through June 6.

A fun (and fund raiser) game of challenge has been approved for all who wish to participate. This game pivots on one or more individuals who challenge performance or regulation in return for a donation to the Navy Relief Society. These are the rules:

- The challenger initiates the challenge by submitting a written note containing name of challenger(s); name of the individual or group being challenged; statement indicating the task or modification of behavior/rules requested; amount of money to be donated if the challenge is accepted.

- All challenges must be submitted to OS1 Randy Franks at the Information Desk, Ext. 2411, and will be screened for appropriateness prior to the beginning. No challenge will be accepted if it is unsafe or degrading to an individual.

- Any member of the NRMCO staff may participate, military or civilian.

- The challenge must be accepted by the individual or group being challenged.

- The individual or group being challenged has the right to (a) Refuse the challenge; (b) Accept unconditionally; (c) Modify the terms of the task or the amount to be donated and have the challenge returned to the challenger for his acceptance.

- Payment in the form of cash or check made out to the Navy Relief Society must be received by OS1

KICKOFF SPEAKER—Retired Navy Captain Seth Howard of the Navy Relief Society office at Alameda Naval Air Station reports to NRMCO Oakland keypersons on the accomplishments of Navy Relief in assisting personnel in need.

Franks prior to activation of the challenge.

- Challenges may be submitted between now and May 28.

- Accepted and paid challenges will be posted on a bulletin board on the third deck.

To make direct contribution to the Navy Relief Society, contact the appropriate keyperson for your service. They are: HN Dion Duncan, Orthopedics; HM3 Joel Welter, Neurosurgery; LT Mark Terry or HM2 Aurelio Esguerra, Ophthalmology; LT Faythe Weber, Food Management; SH2 Ronald Abad, Special Services; CAPT Ricci Larese, Pediatrics; HM3 Stephen Palmer, Dermatology; LT Kathy Brown,

(Continued to page 4)

WITH PLEASURE—Rear Admiral Walter M. Lonergan, Commanding Officer, makes the first donation from the medical center for the 1982 Navy Relief Society Drive. Accepting his personal check is Lieutenant Commander Robert K. Ridgeway.

MOTHER' TO THOUSANDS—Nursery Charge Nurse Carol Shore tenderly holds newborn Amber Jade Moore, only one of the thousands of infants she has lovingly cared for during 18 years of employment at Oak Knoll.

Surrogate mother has loved 100,000 newborn infants

Mother's Day is just around the corner and *Oak Leaf* would like to honor the woman who is something special.

Although she has four grown children of her own, nursery charge nurse Carol Shore has probably played surrogate mother to nearly 100,000 newborn babies born at Oak Knoll in her 18 years of employment here.

Though in a supervisory position, she personally does much of the nursing, feeding and caring for the newborn in the intensive care, intermediate care and normal nursery wards—and she forms an emotional attachment with all of them, especially the preemies or others needing extended care.

"They all have different personalities, as young as they are," she says, adding that she truly enjoys her work and the satisfaction it brings. "It's especially rewarding when a seriously ill baby you've cared for makes a full recovery and grows into normal child."

Many of the infants' natural mothers keep in touch by bringing their babies to spring by to show Carol how they've grown. Others correspond regularly, even from Europe, to send snapshots and report on their children's progress. The nurse assures this correspondence and keeps a scrapbook to preserve the reports.

In her employment here, she has cared for several sets of twins and one set of triplets. The smallest newborn

under her care weighed 1 lb. 13 oz.; the largest, a little over 13 lbs.

Her own children are two daughters, 24 and 22, and twin boys, now 20 years old.

Libby heads participation in AF Day

Lieutenant (junior grade) Joel Libby is serving as this year's project officer for coordinating Naval Regional Medical Center Oakland's participation in the Bay Area observance of Armed Forces Week, May 10-15.

Key events include an Armed Forces Week luncheon for the San Francisco business community May 13; an Armed Forces parade featuring units from all uniformed services on Friday, May 14 in downtown San Francisco; Navy exhibits and displays throughout San Francisco May 14-15, and visiting ship open house and special boat unit demonstrations at the Embarcadero, May 14-15.

Capping Armed Forces Week again this year will be the Armed Forces Ball to be held at Naval Station Treasure Island on Saturday, May 15. The Navy, in cooperation with the San Francisco Chamber of Commerce, will again host this gala black-tie affair. An "Admiral's Buffet" will be catered by the Fleet Admiral Nimitz Officers' Club; entertainment will be provided by both the civilian and military communities, and bands from the Army and Navy will play for dancing.

Invitations are extended to all members of the Armed Forces, active duty, reserve or retired, and to civilian friends of the Armed Forces. Participation is open this year to all ranks and rates and, like last year, promises to be a sellout. For tickets and complete information, contact the COMNAVBASE San Francisco Public Affairs Office at (415) 765-6056.

National theme for the 1982 Armed Forces Day observance is "Peace Through Strength."

EDITORIAL

Navy's top leaders stress need for maritime strength

Secretary of the Navy John Lehman, Chief of Naval Operations Admiral Thomas B. Hayward, Commandant of the Marine Corps General Robert H. Barrow, and Vice Chief of Naval Operations Admiral William Small joined in stressing the need for strengthening our maritime forces in addresses to the Navy League of the United States' Sea-Air-Space Symposium and Annual Convention in Washington, D. C., earlier this month.

Speaking to an audience of 1,900 Navy League members, industry leaders, sea service guests and their families, Secretary Lehman noted the increased support of the American people for a strong Navy, and described the Navy's budget program as an opportunity "that will enable Congress to break out of the cycle of cost-overruns and deferred cost growth that has plagued defense policy for at least the past decade, 'History,'" the Secretary added, "clearly shows that nothing is more costly than the outbreak of war."

The Secretary described former President Theodore Roosevelt as a primary architect of the restoration of American seapower nearly a century ago. He praised Roosevelt as a "practical idealist," and said, "we can restore our naval strength—not in the great by-and-by—but now."

Admiral Hayward told guests of the Navy League Chief Executive Officer's

luncheon that 1982 has been a "good year," and he predicted that planned increases in naval strength would offer the U. S. total global flexibility in conjunction with its allies by the mid-to-late 1980s. The CNO described a dramatic change in the personnel picture between this year and last, and called Navy men and women "proud, capable people doing a superb job."

General Barrow, the convention's keynote speaker, speaking to convention delegates, highlighted as this year's "brightest picture" the quality of Marines being recruited and retained. He called modernization proposals for the Marine Corps "significant leap" forward and described the Marine Corps' portion of the budget as "a judicious improvement over years past."

Admiral William Small, Vice Chief of Naval Operations, also addressing convention delegates at the annual awards luncheon, welcomed the supportive attitude of the Congress and administration for valid defense needs and the encouragement and respect shown military personnel by the American people. He pointed out that the Navy must continue to earn that respect through good management, urging those responsible for program acquisition to "give the taxpayers the best buy for the money." The VCNO stressed the importance of cost-effective management by both military and industry in making maritime superiority truly affordable.

Our patients write...

I would like to express my sincere appreciation to your entire staff for the professional and courteous treatment I received during a recent stay. From entry to exit they gave me the "Red Carpet."

I was admitted on March 24, 1982 as one of Dr. Umfrid's... patients. He performed a... test on the 25th and I was released on the morning of the 26th. The doctors, nurses and corps persons of Wing 9 South were especially super.

J. E. Morrison
Commander, U. S. Navy
Oakland Army Base

Political activities restricted for Navy military, civilian staff

As another election year begins, Department of the Navy personnel should be aware of the regulations regarding participation in, or support of, political election activities.

Acts of omission may be equally as damaging as acts of commission.

It is the civic responsibility of every citizen, uniformed or civilian, to exercise his or her voting privilege. Information on the Navy Voting Campaign 1982 is contained in Military Personnel Manual Article 6210220 and Navy Military Personnel Command Notice 1741 dated Jan. 12, 1982.

Although as citizens individuals are encouraged to vote in elections, there are restrictions on Department of the Navy personnel engaging in public activities which could be construed as attempts to influence the outcome of the election or to solicit votes. Permissible and prohibited activities are detailed in Secretary of the Navy Instruction 5370.2G (Standards of Conduct), Military Personnel Manual Article 6210220 and 6210240, Marine Corps Manual Paragraph 1742.3, and Federal Personnel Manual Chapter 733.

Government facilities are not to be used, or even appear to be used, to endorse, benefit or favor any political organization, nor is Navy participation to be associated with the solicitation of votes in a political election.

Political information disseminated through Navy channels must be factual only. Features such as commentaries and political polls are not allowed.

Crisis management—all in a day's work

Whatever gave you the idea that a normal day was a day without interruptions? A perfectly normal day is full of interruptions. Interruptions are your job. It's an attitude. Learn to accept the non-controllable. Control the controllable.

Keep interruptions short. **Be ruthless with time but gracious with people.**

Learn to say "no." But don't let them go away empty-handed.

Turn the crisis into an opportunity. **Run the crisis, don't let the crisis run you.**

Before making crisis decisions, step back, **allow some thinking time.**

To stave a crisis, don't start a second crisis.

Practice crisis prevention—anticipate crises. It's all in a day's work, and often in our home life as well.

May is Mental Health Month

'Forces of freedom preserve peace'

We know only too well that war comes not when the forces of freedom are strong, but when they are weak. It is then that tyrants are tempted.

--Ronald Reagan

The strength of the United States serves to protect the American people and helps preserve the peace. We need strength to deter attack, to support the cause of freedom, and to work for a peaceful world. But our nation can be strong only if our defense and foreign policies enjoy broad support at home. For it is in the American people that the ultimate strength of the United States resides—in the patriotism and convictions, in the skills and courage of each of us.

--Secretary of Defense Caspar W. Weinberger
(Annual Report to Congress, Feb. 8, 1982)

When we 'blow it' it's a blast!

Whatever you think of our little paper, you'll probably agree that when *Oak Leaf* "blows it," it's really a blast! And we really outdid ourselves on the last issue, apparently.

In this business we automatically memorize the publication dates of the following two or three issues so that we can plan when stories must run. This gets to be such an obsession that were you to ask us today's date, we might automatically reply with either the date of next issue's deadline, or the day the paper's supposed to be on the street. (We've even been known to date our checks accordingly.)

Our sources and contributors seem to have trouble remembering deadlines, however, and often we don't get information on graduations until after the event has passed and the graduates are on their way to new duty stations, completely unaware that they made news. Naturally, when one of the technical schools gives us the information well in advance, we're delighted and do everything possible to give that story top position and billing.

Such was the case in the advance story Lieutenant Commander M. E. Cornesent us on the graduation of Operating Room Technician Class 82001. Although her memo stated clearly that the graduation was slated for Friday, April 30, at 10 a.m. in the Clinical Assembly, somehow our elevator didn't run to the top deck past the stop that read "publication day." So—we printed it in the April 16 issue as occurring "today." Front page, at that! To all the new OR technicians graduating today, we apologize—and thank all the readers who pointed out that we may be getting ahead of ourselves.

NAVAL REGIONAL MEDICAL CENTER OAKLAND, CALIFORNIA

RADM W.M. Lonergan, MC, USN,
Commanding Officer

CAPT Joseph P. Smyth, MC, USN, Director of
Clinical Services

CDR Frank D. Fisher, MSC, USN, Director of
Administrative Services

Editor: Betty Beck

Editorial Clerk: HM3 Jackson P. Brown

HM2 Larry Marchionda

THE OAK LEAF is published biweekly on Friday, produced commercially with appropriated funds in compliance with NNPR P-35, Rev. Jan. 1974. Deadline for copy is Thursday noon of the week prior to publication.

Opinions contained herein are not official expressions of the Department of the Navy. THE OAK LEAF receives American Forces Press Service and Navy News material.

Contributions from both staff and patients are welcomed and should be addressed to the Editor of the OAK LEAF, Naval Regional Medical Center, Oakland, CA 94627.

Weekend patrol**Surgeon serves Moraga as volunteer policeman**

By Betty Beck

Most Navy physicians work long, arduous hours under usually stressful, and sometimes emotionally debilitating circumstances, so most would agree that they are justified in spending their off-duty hours in sports or other recreation.

Quite a few are joggers, some play team sports, many are woodcarvers, and at least one or two surgeons have been known to take up needlepoint as both a relaxing, creative hobby and a craft that helps develop the dexterity so important to their profession.

It's a rare Medical Corps officer, however, who spends his precious duty-free weekend nights on patrol as a fully-qualified city policeman, risking his life fighting crime and protecting his community. Naval Regional Medical Center, Oakland, has such an unusual individual on its staff in the person of Commander Ben Tsun-Lin Ho, eye surgeon.

Soon-to-be Assistant Chief of Ophthalmology and one of only four eye specialists in the Navy to perform both retina vitreous and laser surgery, Dr. Ho is also a police academy graduate trained in pursuit, firearms, hand cuff procedures, hostage situations, combat shooting, reflex timing, night-time patrols and legal implications.

The native San Franciscan and father of three moved his family from Oakland to the small, although affluent, town of Moraga three years ago because it appeared to be the safest community in the San Francisco Bay area. He quickly found out, however, that because of its geographical proximity to high-crime areas, it interfaced significantly. Also, because it is a college town, quite a bit of rowdiness occurs on Friday nights. Although he has already coaching a soccer team and donating time to a scouting program, he felt attracted to police work because "to assist there makes a bigger difference." Thus, as an unpaid, volunteer member of the Moraga Police reserves, Dr. Ho contributes one or two full shifts on weekend nights.

"Enforcing the law in a small community does have its advantages," he says, pointing out that "strangers are easily recognized, traffic patterns are familiar to us, we know where the kids hang out," and we know our neighbors' habits. Also, people tend to respect the law more when it's coming from one of their own."

He finds only a small segment confrontational, arrogant and disrespectful police officers and other public servants. "There is a new breed of adolescent," he says, "who is aggressive,

aware of the limits of the law, and who has an entirely different attitude toward authority, home and society than my generation, often making it more difficult for enforcement officers. Our hands are tied in so many ways."

The Navy doctor says he finds his military and medical training compatible with his responsibilities as a police officer, as all three professions require discretion and decision-making under stress.

At the scene of an automobile accident or other medical emergency in his community, Dr. Ho may perform triage and stabilize the injured if he is first on the scene. Once the highly-trained paramedics arrive, however, the surgeon, an EMT and ATLS instructor, steps back and lets the emergency team take over, standing by to assist victims being extracted from a crashed vehicle, placing flares for oncoming motorists, and offering medical advice only when asked.

There is a unique comradery among the law enforcement team members, Dr. Ho explains. "Because of the stressful situations, we depend totally upon one another." His fellow police officers, many of them also college graduates, respect his profession and call him "Doc," but they consider him one of their own when he suits up in police uniform.

The trim, physically fit surgeon has been in the Navy 15 years. He is a graduate of Amherst, Mass., College and obtained his medical degree from University of Maryland School of Medicine. He trained at Bethesda National Naval Medical Center, San Diego Naval Hospital, Royal Infirmary in Edinburgh (Scotland), Maryland State Penitentiary, Johns Hopkins School of Medicine, and Naval Regional Medical Center, Oakland. Duty assignments have included the Taipei, Taiwan, Defense Command and the Military Assistance and Advisory Group, Addis Ababa, Ethiopia. He completed a fellowship in phakoemulsification, retina and vitreous surgery at Pacific Medical Center and has taught at the same San Francisco hospital. He is currently a retina consultant to the U. S. Public Health Service and conducts a course in combat ocular injuries at Letterman Army Institute of Research.

Dr. Ho is a board-certified ophthalmologist, and has been licensed in California for more than 10 years. He has been twice recognized with awards from the American Medical Association.

The physician-policeman began shooting as a hobby while still in col-

COMMUNITY DUTY—Dressed in police uniform and wearing a .357 magnum revolver, baton, mace and a portable radio, Dr. Ho begins his weekend shift on patrol in his hometown.

lege. He has been a member of Navy pistol teams for several years and earned the Expert Marksman award for skill with a .45 caliber automatic pistol. Eight years ago he became interested in scuba diving and is a former member of the Professional Association of Div-

ing Instructors.

Whether wearing a badge on high-risk weekend nights, or performing delicate surgery in a hospital scrubsuit, the modest Ben Ho holds the safety, health and happiness of many others in his obviously capable hands.

'Open season' begins Monday for civilian health benefit plans

The U. S. Office of Personnel Management (OPM) announced recently that an open enrollment period for federal workers and retirees in the Federal Employees Health Benefits Program (FEHB) will be held from May 3 through May 28. Enrollment changes will be effective on July 1 for retired personnel and on July 11 for most active employees.

During the May open season, employees will have the opportunity to change from one health plan or option to another, or move from a self-only enrollment status to a family status. Employees who are not presently enrolled in the FEHB Program will have the opportunity to enroll. No transfer

fee will be levied on those who change enrollment.

In addition to health plan brochures which are now available, OPM will soon distribute open season instructions and a booklet containing charts comparing coverage offered by the various plans in the FEHB Program.

GUEST SPEAKER—NRMCOakland's Sailor of the Year, OS1 Randy W. Franks, has been invited by the Veterans of Foreign Wars to speak in a 25th Annual Loyalty Day Program on May 2. The event will begin at 2 p.m. in the Veterans Memorial Building, 22737 Main St., Hayward. Attendees will include representatives of all the Armed Forces, state, county and local governments, veterans organizations and the general public.

NAVY DUTY—Commander Ben Ho (right) performs delicate eye surgery at Naval Regional Medical Center Oakland.

Hill found guilty in OR robbery

Hospitalman Jon C. Hill, one of the two Navy men charged with robbing the medical center's operating room staff at knifepoint on Jan. 16, 1982, was found guilty in an April 19 general court-martial. He was sentenced to six years' confinement at hard labor at a federal penitentiary, a dishonorable discharge from the U. S. Navy, forfeiture of all pay and allowances, and reduction to pay grade E-1.

His alleged accomplice, Seaman Apprentice Quince Evans, is held in the brig awaiting trial.

Hill was a member of the Naval Regional Medical Center staff and Evans on unauthorized absence from USS ENTERPRISE (CVN-65) at the time of the incident.

'That nice lady at the Officers' Club'

"Why don't you say something nice in *Oak Leaf* about Betty Hawkins at the Officers' Club? She's always so courteous to others."

After hearing the above comment or a variation several times from our readers, we decided to do just that.

Betty is the club's head waitress and has been employed at Oak Knoll for more than six years. Usually she works the luncheons, where she not only

serves the patrons, but does cashiering duty as well. Upon occasion, when parties or special events are on the calendar, she also works in the evening.

This very cordial little lady lives in San Lorenzo with her retired, disabled husband and has raised six children, five of them still living.

The next time you lunch at the club, give her a big smile. She has earned it.

A LITTLE WARM-UP? — Betty Hawkins gives Captain Rainer Schmidt a coffee refill.

Services in South Dakota for NRMCO surgeon's wife

Funeral services were held in Rapid City, S. Dak., on April 21 for Marie M. Cameron, 58, who died of heart failure shortly after arriving at Naval Regional Medical Center, Oakland, for emergency treatment April 15.

Mrs. Cameron, daughter of the late William and Mae Dickinson, was the wife of Navy Captain Douglas E. Cameron, surgeon on the staff of NRMCO Oakland. The couple's children are Douglas E., II, 35, of Fairmont, Minn.; Debra Cameron, 29, of Salt Lake City, and Catherine Jaehn, 33, Madeline Larson, 31, and Bruce Cameron, 26, all of Rapid City.

Madeline was born at Oak Knoll in 1950 while her father was doing his medical internship here and her mother active in the local officers' wives club.

Other survivors include five grandchildren and three brothers—John Dickinson of Nebraska, Robert Dickinson of Washington, and Kenneth

Dickinson of Idaho.

Like two of her daughters, Mrs. Cameron was a nurse by profession and a graduate of the Mercy Hospital School of Nursing, Denver, Colo. She was a nurse cadet in World War II and later worked as an office nurse for her husband while he was in private practice in Rapid City. The couple married July 5, 1946 in Raton, N. Mex.

Over the past 10 years Mrs. Cameron volunteered many hours to Families Anonymous, a humanitarian group offering support to families who have members dependent on alcohol and drugs. She was also a member of the South Dakota Nursing Association and sang in the choir of the First Methodist Church when Rapid City was her home.

Funeral services were held in that church with interment in the Black Hills Cemetery, Sturgis, S. Dak.

Columbia announces summer sessions

Columbia College will offer six courses at Treasure Island and one at Hamilton AFB during its May 24-July 17 session. Columbia is fully accredited and offers Associate and Bachelors degrees in Business Administration, Psychology, and Criminal Justice.

Scheduled for the Treasure Island campus are: General Sociology (Monday, 6:30-11:30 p.m.); Oral Interpretation of Literature (Tuesday, 6:30-11:30 p.m.); Accounting I (Tuesday, 6:30-11:30 p.m.); Police (Wednesday, 6:30-11:30 p.m.); English Composition II (Thursday, 6:30-11:30 p.m.), and Personnel Management (Saturday, 9:00-12:00 noon; 1:00-3:00 p.m.). Columbia will also offer Accounting II at its Hamilton AFB campus (Wednesday, 6:30-11:30 p.m.).

According to Columbia officials, General Sociology and Oral Interpretation of Literature are intended to satisfy

general education requirements in, respectively, social/behavioral sciences and humanities; Accounting I and II and Personnel Management are requirements in the Business Administration Program. Police is an upper-level Criminal Justice offering, and English Composition II is required for all Columbia College degrees.

Columbia assesses military schools and experience for academic credit and also accepts CLEP and DANTES scores. Being a Servicemembers' Opportunity College, the school makes no distinction between credits earned at residence centers and those earned on the home campus.

Interested students should contact Larry Blades or Jeannie Hopper at (415) 397-5613 to obtain more information about the program or to set up an appointment.

Grand opening ceremonies slated for Airport USO

The Bay Area USO Board of Directors announces the grand opening of the Oakland Airport USO Center, 12:15 p.m., May 12, with opening ceremonies planned in the main lobby of Oakland International Airport.

Participating guests include major military commanders, elected officials, celebrities, corporate chief executive officers, media personalities and Port of Oakland authorities.

Moffett Field air show set

Naval Air Station Moffett Field will host a free two day air show and open house this year on May 15th and 16th.

The show will feature the "Canadian Reds" aerobatic precision flight team in its first performance at Moffett Field. In addition more than 15 other aerial acts and demonstrations will be given.

Static display aircraft from all services, ranging from WWII to the present, will also be on hand for viewing.

Inside the historic old airship hangar many interesting displays and exhibits will be shown while hot air balloon rides are offered in the rear of the huge structure.

Gates open at 9:30 a.m. and the main show begins at noon on both Saturday and Sunday.

Refreshments and food services will be available on the station.

Admission and parking are free.

Thirteen states to hold June primaries

California, Iowa, Maine, Mississippi, Montana, New Jersey, New Mexico, North Dakota, Ohio, South Carolina, South Dakota, Virginia and West Virginia will hold primary elections in June to select candidates to appear on the ballot in the Nov. 2, 1982 general elections. Individuals claiming residency in any of these states who desire to vote should complete a Federal Post Card Application (FPCA) and forward it to the appropriate state office.

Each of the states, except Montana and North Dakota, holds its primary election by political party. Voters must indicate their party affiliation on the FPCA or their application may not be processed. Most states require a separate FPCA for each election. Voters should make sure they specify the election for which they are requesting a ballot.

Information concerning registration and application requirements by state is available from the medical center's Legal Office.

Steno opening

Psychiatry Service is seeking a Clerk Stenographer, GS-4 (\$12,256-\$15,703) for its Social Service Branch.

The job involves considerable contact with staff and community agencies.

Applications will be accepted by Civilian Personnel Service through May 4. Queries may be directed to Maurine Tinsley at Ext. 2116.

Britt returns to Navy

HM3 Henry Warren Britt, former shipmate at this command, reenlisted at Navy Recruiting District San Francisco earlier this month.

He was transferred to RTC San Diego for outfitting and further assignment to Naval Regional Medical Center Guam.

Operating since the first of the year from temporary quarters, the new permanent location will make Oakland the 15th city in the United States to have a USO Center located at its airport.

Opening of the Oakland Airport USO, which serves military personnel and their families in travel status, results from the transfer of certain contract military flights from Travis Air Force Base in Fairfield to Oakland. Proximity to the commercial airlines is expected to facilitate military personnel and families with their travel plans.

A planning committee of community volunteers preparing for the opening ceremonies include: Donna Kent, Oakland Airport Hilton (chairperson), Captain Roger Kirkman, Alameda Naval Station, Jo Hemphill, California Carousel; Joe Ploman, Oakland Convention and Visitors Bureau; Frank Ogawa, Oakland City Council; Marv Carlisle, Oakland Airport Terminal Lodge; Al De Grassi, Pettler, De Graaf and Hill, Jerome Ignash, Navy Translocation, Treasure Island; Hank Munro, Action East Bay; Dick Evans, Radio Station KABL, and William H. Morgan, Executive Director, Bay Area USO.

The Oakland International Airport USO Center is expected to serve nearly 300,000 military personnel each year. Facilities are open 24 hours a day, staffed with volunteers and a small core of paid staff members.

IG visit postponed

The previously scheduled May 4 visit of the Inspector General (Medical) team to Naval Regional Medical Center, Oakland has been postponed until later this year, tentatively in August.

The routine, periodic inspection reviews compliance with regulatory directives and professional standards to identify any problems and facilitate corrective action.

Last visit of an IG team here was in April 1979.

NRMCO officers elected Credit Union directors

LCDR Douglas R. Sperry

LCDR Patricia B. Hoggatt

Two members of the medical center staff were elected by the membership at the recent annual meeting of the Alameda Coast Guard Federal Credit Union to fill vacancies on the board of directors. They are Lieutenant Commander Patricia B. Hoggatt, head of Physical Therapy, and Lieutenant Commander Douglas R. Sperry, officer in charge of the Personnel Support Detachment, Oakland.
They replace Mr. James B. Elder and Mr. Woodrow Robarge. Mr. Robarge, however, remains a member of the Credit Union's Supervisory Committee.

Management's review of 1981 pinpointed the growth of the credit union over the past five years as a prologue to its future.
Gifts and certificates of appreciation in honor of long and loyal service were presented to four credit union staff members during the annual meeting. Two of them are located in the credit union's Naval Regional Medical Center Oakland office. They are Dorothy Oliver, NRMCO Assistant Manager and Controller, 16 years, and Beverly Curwen, Personnel Director and Loan Supervisor, 10 years service.

Comings and Goings -----

"Fair winds and following seas" to the following personnel who have recently detached from this command:

Security training program rolling

All members of the Security Branch of Operating Management Service are to be complimented on their assistance in the drafting and proving of the new Personnel Qualification Standards training system, which took a solid year of team effort to get an effective training program rolling.
Congratulations to Hospital Corpsmen Third Class Michael S. Kellett, Brian D. Fawcett and Jon G. Bangs for completion of Personnel Qualification Standards for NRMCO Security Patrolman through 45 days of research, practical experience and formal training.
Petty Officer Kellett simultaneously completed the required training for NRMCO Security Patrol Supervisor as well.

Oak Knoll nurses participate in operational readiness course

Lieutenant Commander Louise George and Lieutenant Maureen Clary, both of this command, were among 40 Navy Nurse Corps officers from across the United States who participated in an Operational Readiness course at the Marine Corps base in Quantico, Va., last week.
The scenario involved the following situation:
A military disaster erupts overseas and the United States becomes involved. U. S. Navy nurses on a hospital team are flown to a country near the site to set up a field hospital. A Navy ship 60 nautical miles away has been hit. Wounded soldiers are swiftly being evacuated to the field hospital and will arrive within minutes.
Attendees learn how to prepare for the surge of victims in a life-and-death situation where seconds count; how to quickly and accurately determine the types and degree of trauma, and specific techniques to care for these casualties of modern warfare.
Sponsored by the Navy's Health Sciences Education and Training Command (HSETC), the program was the

Navy's first totally field-oriented nursing course. Participants slept in tents, wore camouflage uniforms and gained experience in helicopter evacuation. The training was designed to give them techniques and concepts for performance in the field, as well as an idea of what their patients would experience.
"The Surgeon General of the Navy is totally committed to operational readiness for the Navy and Marine Corps," explains Rear Admiral Frances T. Shea, Director of the Navy Nurse Corps. "To support him in this goal, it is very important that all health care professionals know how to perform under adverse conditions. As far as the Nurse Corps is concerned, the time to learn the necessary skills is not during those conditions, but prior to them."
To enhance course participants' skills, medical experts discussed a wide range of topics, including cold and heat stress, casualty management, triage and surgical priorities, and combat injuries. The April 19-23 exercises featured night triage and simulated attack.

NEWLY FROCKED—Four popular Oak Knoll chief petty officers were recently frocked to higher rate. From left to right, they are HMCS Malcolm McGregor, Preventive Medicine; MACS Phil Sharp, Security; HMCM Nathaniel Jenkins, Preventive Medicine, and HMCM C. Ray Graves, Patient Affairs.

NEW HAIR STYLISTS—Recent additions to the Navy Exchange Beauty Shop staff in Bldg. 38 are Linda Gibens and Cruz Olgin. Linda has made quite a following for herself in the Oakland area, while Cruz recently arrived from Hawaii where he worked in the beauty salon of one of the Hilton hotels. Whether it's a haircut, a perm, a tint, or an entirely new hairstyle, these experienced operators are here to serve you. Call 562-4762 for appointments.

TI Legal Office expanded

The Naval Legal Service Office in Bldg. 450 on Treasure Island recently expanded to five attorneys and added a large, new resource center.

Available attorneys now include: LCDR John T. Oliver, division head (concentrating on wills and estates, tax, real estate, and immigration and naturalization); LT Michael J. Suszan (concentrating on domestic relations cases); LT Dorothy J. Ulmer (con-

centrating on landlord/tenant and consumer law problems); LT Ken M. Shearn (concentrating on contract disputes, tort/personal injury cases and bankruptcy law), and LT Walter L. Singletary (general practice at NAS Alameda).

Call DOT toll-free for car problems

Motorists now have a hotline for car problems.

The Department of Transportation has started a new program to give consumers more information about the safety of their cars. The program involves the use of a toll-free hotline that permits consumers to call for automobile recall and safety-related information.

Here's how it works. A car owner calls the hotline number for residents of the Washington, D. C., metropolitan area. She identifies her car, hears some computers humming, and is told two recalls have been made on her car. She is also told she will receive details of the recalls in the mail, along with fuel economy ratings, crash test results, car maintenance figures and other information.

The toll-free hotline number is: 800-424-9393 (for continental U. S. only).

Residents in the Washington, D. C., metropolitan area may call 426-0123.

Residents of Hawaii and Alaska have no free service but they may call 202-424-9393 at their own expense.

Crewman unhurt in fall from ship

The guided missile destroyer USS SOMERS (DDG 34) was performing "lifeguard" duties for a night underway replenishment in the Indian Ocean early the morning of April 1, when the ship was notified by USS CONSTELLATION (CV 64) that a crewman had fallen overboard. Aided by flares and life rings dropped from the combat stores ship USS WHITE PLAINS (AFS 4), the man was sighted near SOMER'S portside.

The destroyer's whaleboat was launched, guided to the sailor by the beam of a searchlight from SOMER'S signal bridge. The quick reaction enabled the man to be pulled from the water less than 15 minutes after he had fallen off the carrier. A quick examination by SOMER'S leading corpsman, Hospital Corpsman First Class Joseph Madrigal, determined that the unlucky sailor was uninjured, though wet and tired.

NRMCO Security Blotter

REPORT CRIME!—Help yourself and your shipmates. Report crime. Call Ex 2401/2402/2582. All information will be treated in a confidential manner. Become an active partner in the solution to crime prevention. Allow your Security Branch to be effective by sharing the information only you may have. Don't allow yourself to become a victim. Be sure all valuables are locked up in a secure area.

RECENT CRIMES

* Suspect (unknown) entered victim's room through unlocked door (defective lock). Suspect stole a Panasonic Cassette Recorder, Model RX-5200, Serial No. OCHNA 18464. Stolen item valued at \$240.

* Victim left Sanyo stereo radio on the floor in Main Dining Hall. When victim returned approximately 20 minutes later the item was gone.

* Unknown suspect entered barracks lobby and removed a Windsor Super Camera 10-speed bicycle.

* Victim left an Olympus OM-2 35mm camera, Serial No. 833227, with 50mm lens, Serial No. 8975250, one Olympus T-20 flash, carrying case and strap on table at the Officers' Club during a party. When victim returned the \$476 camera and equipment were missing.

* Victim left wallet in bedside locker on ward. When victim returned wallet was missing.

* Suspect was apprehended by Security Patrol for allegedly removing food articles without authorization from Food Service.

* Suspect broke the side windows on two locked vehicles. Suspect was seen by one of the victims who took corrective action when the suspect pointed a firearm at him, by leaving the scene and contacting Security Patrol through the OOD Desk. Damage to both vehicles: \$400.

Social Security offset explained

Were you on the verge of grasping all the options and other details of the Survivor Benefit Plan (SBP) when the "Social Security offset" set you off-muttering and tearing your hair? If so, perhaps the following explanation of the SBP's tie-in with Social Security benefits will help.

If you served on active duty after Dec. 31, 1956, you earned Social Security wage credits (and started making contributions) by virtue of your military service. Based on those wage credits, your surviving spouse may receive a Social Security widow(er) benefit in addition to the SBP annuity you elect. Since the government contributes to both the Social Security benefit and the SBP annuity, and not wanting to pay the same benefit twice, the government enacted the Social Security offset provision.

Here's what the offset does. It reduces a surviving spouse's SBP annuity at age 62 by the dollar value of the spouse's Social Security entitlement based on the member's active duty service after Dec. 31, 1956.

The spouse's SBP annuity cannot be reduced by more than 40 percent, however, regardless of the amount of the offset as determined by the standard formula. **Thus, the total amount the survivor receives is equal to at least the full amount of the SBP annuity had there been no Social Security survivor benefit.**

An important point to remember is that the SBP annuity reduction is made at age 62, **even if the surviving spouse has not yet applied for Social Security benefits.** The fact that the spouse is entitled to benefits based on the member's military earnings makes the reduction mandatory.

The surviving spouse applies for and receives every penny of Social Security to which he or she is entitled. The service finance center bases the Social Security offset only on that part of the spouse's Social Security benefits that result from the member's active duty service after Dec. 31, 1956.

HRS can help Navy families with off-base housing needs

The continuing rise of housing costs, together with a decline in rental units, has resulted in more and more personnel relying on assistance provided by the Housing Referral Service (HRS) of the Navy's Family Housing Offices.

There are, however, many personnel who have never contacted HRS, or are of the opinion that HRS is only for those subject to PCS orders. Not so. HRS is available to all Navy personnel, married or not, with or without dependents, at any time.

At most Navy activities the HRS maintains the largest selection of rental and sales listings in the area and has established an excellent relationship with local realtors. In addition to assisting personnel with listings in the size, price range and location desired, the referral staff can also provide helpful information regarding schools, shopping areas, churches, public transportation and other community support facilities. Personnel can also receive advice on matters dealing with laws and regulations concerning equal opportunity in off-base housing, leases, deposits, landlord-tenant rights and responsibilities, insurance, and the importance of the "military clause" in leases.

HRS maintains close liaison with the Department of Housing and Urban Development concerning its subsidized and non-subsidized housing programs and will provide information regarding these programs as well as assisting personnel interested in the purchase of homes through FHA, VA or conventional financing.

Should personnel experience problems with their landlords, they can call upon the HRS staff who will attempt to get the matter fairly resolved. Helpful handouts, including local maps, are also a part of the service provided by the housing referral staff.

With the recent enactment of the Variable Housing Allowance (VHA), you may be interested in relocating to a better unit. If so, contact the local referral service before accepting the possible costly advice of others. After you have selected several listings of interest, the HRS representative will indicate locations and provide directions on your

map. Prior to leaving the office, so that you won't waste time going to occupied units, the HRS representative will verify vacancies or provide you the use of office phones for this purpose.

Remember, the HRS can assist you when you arrive at your new duty station, during your tour, and prior to your departure. If you want to obtain information on the housing situation at your new duty station prior to departing from your present activity, ask your HRS to contact the HRS at your new location to provide the desired information. You will then be able to better plan housing needs in advance and allow the office to better assist you upon arrival.

If it's housing assistance you want, see your Navy Housing Referral Service representatives. They live in the community, know your housing needs, and have helped thousands of others like you to get the best housing possible. How much does all this service cost you? Absolutely nothing. It's free for the asking. For more information please call the Housing Referral Coordinator, Bldg 101, NAS Alameda 869-4718 or 4725.

--Bonnie Williams

Small claims limit increased

Since Jan. 1, the jurisdiction of the small claims courts in California has expanded to include claims as large as \$1,500 (increased from \$750). Additionally, these courts must provide legal assistance in planning a case of defense.

No attorney or representative may appear in court; the dispute is settled by a judge after hearing the real parties in interest present their respective cases.

The filing fee has been increased to \$12. However, the Treasure Island Legal Service Office says this is a bargain compared to legal costs in regular courts.

To help determine whether your claim has any merit, call for a legal assistance appointment at TI, (415) 765-6532, (A/V) 869-6532.

Yosemite at its finest in June

By Sally Young

There is nothing like Yosemite in summer—especially this summer after all the rainfall. The park should be at its maximum lush greenery with sparkling streams and roaring falls.

Our reservations this year for the June 10 to 21 trip are at Camp Curry in rustic wood cabins and baths, or, if you prefer to rough it, in tent cabins. (Both tents and cabins are furnished with beds, linens and blankets.)

These prices include round trip directly from Oak Knoll to Yosemite via deluxe bus, two nights accommodations and bus tour of the valley: Tent Cabins: Single, \$58; Double, \$46; Triple, \$42; Quad, \$39. Wood Cabins (With Bath): Single, \$99; Double, \$66; Triple \$56; Quad, \$52.

Our bus will also take those who wish to see an unparalleled view up to Glacier Point for picture taking, or just to see a breath-taking sight, for the small charge of \$2 per person extra.

This trip is open to all Naval Regional Medical Center Oakland personnel, their dependents and retired military. A deposit of \$10 will hold your reservation until May 14.

Please call me at 639-2479 or 632-0307 to reserve your space.

Classifieds

HELP WANTED

Babysitter needed for 3 month-old female infant. June through mid-September, Monday through Friday, 6 a.m. to 4 p.m. Our house or yours. Call 635-0547.

VEHICLES FOR SALE

Puch Moped and accessories. Gets 100 mpg. Excellent condition, 1,000 miles. Call 562-4276.

1979 Datsun 200 SX, A/C, 5-speed, AM/FM, radials, 33 mpg. Excellent condition. 36,500 miles, \$5,000. HM2 Dale Johnson, Ext. 2511 (work); 434-1726 (home).

BEATING THE GAME—HN Carlos Uhrbach takes a break from his Operating Room Technician School studies to try out "Pac-Man," one of the new video games at the base bowling/amusement center.

Video games perk up Bowling Center activity

Special Services personnel recommended that you get down to the Oak Knoll Bowling and Amusement Center in Bldg. 103 and take on the monster "Pac Man," just one of six new machines offered for off-duty fun at the "new look" center.

Other machines offered include "Space Fury," "Donkey Kong," "Battle Zone," "Gorf," and "Missile Command."

Also featured at the center are these new and longer hours: Monday through Thursday, 9 a.m. to 10 p.m.; Friday, 9 a.m. to midnight; Saturday, 1 p.m. to midnight, and Sunday, 1 p.m. to 9 p.m.

For those who want to take a break from the video machines, the center offers six bowling lanes and seven pool tables for further enjoyment.

Chess players to meet for Armed Forces championship

The silence of the room may be broken by an occasional "Check," "Gardez" (guard your queen) or clearing of the throat as the 23rd annual Armed Forces Chess Championship gets under way in Washington, D. C., Sept. 7-15, 1982.

The early announcement of tournament dates is to give all chess players on active duty throughout the world as much time as possible to prepare for the competition.

The Army, Air Force and Sea Services (Navy, Marine Corps and Coast Guard) will each field a six-player team for the championship contest, which will take place in the American Legion's Hall of Flags in the nation's capital.

The Thomas Emery Trophy will be awarded to the winning team. Highest

scoring player at the tournament will be declared the individual champion and receive a trophy. Additional awards will be provided by the American Chess Foundation, USO, Bulova Watch Company, U. S. Chess Federation and other donors.

Team-selecting competitions will be held sometime prior to the tournament. Everyone on active duty is eligible. Instructions for those who wish to compete will be available in the Special Services Office, Bldg. 38, Ext. 2350, or may be obtained from Dr. William Flemming, Recreation Services (NMPC-65IE), Navy Military Personnel Division, Washington, D. C. 20370; Tel: (202) 694-4388, (Autovon) 224-4388.

Law day ---

The President has designated tomorrow, May 1, as Law Day.

Law Day was conceived 25 years ago to call attention to both the principles and practice of American law and justice. The objectives of Law Day are promoted by projects sponsored by the American Bar Association in cooperation with local bar associations and military lawyers.

This year's theme is "A Generation of Progress."

Bones get joggled

Every time a jogger's foot strikes the ground, 26 bones, about 20 muscles, and more than 100 ligaments are jolted.

Running puts the foot under pressure equal to about three times the body's weight.

BIRTHS

The following new additions to the Navy medical "family" have arrived at Naval Regional Medical Center Oakland:

A baby boy (son No. 5 of 7 children) to Lieutenant Commander Thomas J. Allred, Laboratory Service, and his wife Mary, March 13.

A baby girl to Hospital Corpsman Third Class Mellisa Ann Vancura-Kezlarian, Physical Therapy Clinic, and her husband Lieutenant Jeffrey A. Kezlarian, Psychiatry Service, April 8.

A baby boy to Lieutenant Beatrice E. Harrold, Nursery, and her husband John, April 13.

A baby girl to Hospital Corpsman Second Class Dale E. Johnson, Medical Repair, and his wife Doreen, April 15.

Housekeeping mops EENT in Navy Relief benefit game

By LT Larry Kilgore

On April 20, the 1982 Navy Relief Fund Drive was bounced off with a basketball game between the base intramural champion EENT team and players from the Operating Management Housekeeping Branch. The Bob Burg-coached Housekeeping section prevailed 63-62 with the game in doubt until the final buzzer.

The Op Mgmt team jumped off to a quick 12-2 lead. They increased this lead to 15 points behind the fine shooting of David Eaton and Tony Adanandu. The EENT team battled back to narrow the deficit to five points, 34-29, with Chris Barclay's fine three point play in the remaining 20 seconds of the first half.

Second half action saw each team playing erratically. The EENT team finally reverted to mid-season form and scored nine unanswered points to take a seven point lead. The teams exchanged baskets until EENT Coach Alfred directed his team to go into a four-corner, stall offense. The strategy

was good, but the execution poor. Ill-advised shots and a critical turnover permitted Lloyd Broussard to score eight points in the final three minutes. The EENT team, behind 63-62, had the ball with 24 seconds running and played for what they hoped to be the game-winning shot. EENT's Ken Williams was fouled with seven seconds to go but missed the crucial foul shot. The game ended with each team scrambling on the floor for the loose ball after the missed foul shot.

EENT's Al Drakeford and Housekeeping Branch's Lloyd Broussard shared scoring honors with 17 points each. Ken Anderson of EENT led both teams with 24 rebounds.

The game's most valuable player, Al Drakeford, presented \$52 to Captain Warren Hodge for the Navy Relief Fund.

The command congratulates both teams for their superb sportsmanship and fine effort in supporting the 1982 Navy Relief Drive.

CLOSING IN—Frank Newton (No. 30) of the Housekeeping team leaps into midair as Dan Daniels of EENT tries to get the ball in the basket. Also closing in are Lloyd Broussard (No. 50) and Howard Carter (No. 43), while Daniels' team mate Mark Ford (No. 4) runs in to lend support. A last minute sweep by the housekeepers won them the edge over the intramural champs, 63-62 in the recent exciting NRS benefit game.

EENT Captures 1982 Basketball Crown

Championship game won at buzzer by J. Halliburton

With the game tied at 33 all and only seconds left, EENT worked the ball into the front court. J. Halliburton ended up with the ball and let fly with virtually no time left on the clock, scoring the most important two points in his illustrious career. The ball was in the air as the buzzer sounded the end of the game and give EENT the 1982 basketball crown.

C. Barclay led EENT with 9 points on 3 field goals and 3 free throws, while O. Smythe and J. Halliburton each had 8 points for EENT.

B. Baldwin led all scorers with 15 points on 7 field goals and one free throw, followed by A. Peralta with 8 points.

"Coach" Marumoto gave all the credit due to EENT, but hinted that injuries hurt his team, along with losing one key player on orders.

Bad Weather Hampers Start of 1982 Softball Season

With 15 teams (not including the men and women's varsity teams) chomping at the bit, the weather (all bad) slowed down the softball program at NRMCOakland, delaying the start of league play.

Public Works employees have given the fields a new look, completely redressing the entire playing surfaces. (The workers were also slowed down as a result of the "unusual" rainy season.)

It is hoped that the league will start near the last week of May.

Teams entered in the 1982 Intramural League are: PMT School, Pharmacy, Ortho, MSC, Nursing Service, Med Repair/SS, CPO, Gen Medicine, Lab, EENT, Dental, 6th Floor, NP, Peds/OB and Anesthesiology.

'Peace Through Strength' theme of Armed Forces Day

STRENGTH IN UNITY—An all-sergeant color guard will lead off today's Armed Forces Week Parade in San Francisco beginning at 11:30 a.m. The route is Justin Herman Park, California, to Montgomery to Ward. The Reviewing Stand is on California.

(US ARMY PHOTO)

Each year, the third Saturday in May is designated Armed Forces Day by Presidential Proclamation. This year, Armed Forces Day will be observed on May 15th.

For the third consecutive year, San Francisco is serving as a major focal point for the nation's observance of Armed Forces Week, May 8-15.

San Francisco is one of a select few cities in the United States chosen by the Department of Defense to act as a national site for official tributes to American armed services.

The city's salute to members of the United States Army, Navy, Marine Corps, Air Force and Coast Guard stationed in its area, is sponsored by the City Affairs Committee of the San Francisco Chamber of Commerce.

According to Committee Chairman Morris, "It is fitting that San Francisco, with its long tradition of military service and involvement, should again be chosen by the Department of Defense for the honor of playing host to this tribute to our armed forces."

During Armed Forces Week-82, representatives of all uniformed military services in the Bay Area are conducting special ceremonies and observances at popular locations in San Francisco. These activities will emphasize the theme for this year's Armed Forces Week, "Peace Through Strength."

Reflecting on the city's military history, Morris said, "San Francisco, the site of the first Spanish cavalry camp more than two centuries ago, through the settlement of Yerba Buena, the emergence of California into American statehood, has been vital in American military history."

The first building in what was to become San Francisco was erected at Presidio. The Navy has long played a commanding role in local development at Treasure Island and Alcatraz Point, while the Coast Guard

has long contributed to the life of our community," Morris said.

Morris also noted, "The 1982 Armed Forces Week theme, 'Peace Through Strength,' is a timely reminder of the vital role our military forces, including the National Guard and Reserves, play in the preservation of freedom gained on our nation's bat-

tlefields starting with the War of Independence."

General Edward C. Meyer, Chief of Staff, United States Army, is San Francisco's guest of honor for the week's activities. He was keynote speaker at an Armed Forces Week luncheon in the Hilton Hotel yesterday and is the Grand Marshall of today's parade.

Throughout the entire week, concerts have been given by military bands at Hallidie Plaza, Crown Zellerbach Plaza and Union Square. On Wednesday, the USO also held an open house at their new facility in the Oakland International Airport.

Military exhibits, demonstrations, current and historic equipment (including ordnance vehicles) and band performances are open to the public today between 10 a.m. and 3 p.m. at both Civic Center and Justin Herman Park.

Tomorrow, more demonstrations, displays and military band concerts will be featured at piers 39, 45, Marina Green and Ghirardelli Square, also between the hours of 10 a.m. and 3 p.m.

The military week will conclude tomorrow night with a formal, combined Armed Forces Ball at Treasure Island.

NRMCO role in AF weekend

Our command will be well represented at this year's Armed Forces Observance weekend activities in San Francisco. We will be at the Civic Center on May 14 and Pier 39 on May 15. Both days are from 9:30 a.m. to 2:30 p.m.

NRMCO Oakland presentations will include a Triage Unit, cardiopulmonary resuscitation techniques, blood pressure checks, a Naval Prosthetics Research laboratory display, and our "Crackerbox" ambulance, an exhibit in itself.

LTJG Joel Libby, Project Officer, says the list of participants is extensive and includes representation from many departments. The command thanks the

following service members and civilians for their participation and enthusiasm: HN Robert Arrowsmith, HM3 Stephanie Atkinson, HM3 Allen Boatman, HM2 Thomas Bowman, HM3 Steven Butler, LT Glenn Butner, LT Maureen Clary, LCDR Mark Dawson, ENS Kaki Douglass, HM2 Carrie Findley, LT Art Fox, OS1 Randy Franks, LT Jo Ann Fritch and LCDR Louise George.

Also, LCDR Greg Gibbons, Mr. Andre Gilmore, LT Lisa Halton, Mr. Phillip Harkov, HM2 Pat Jones, LCDR Daniel Lancaster, HN Greg Marlatt, LT Bill Morrison, HN Darlene Perry, LCDR Don Phillips, HM3 Dwayne Rudd, HM3 Joel Wetter, Mr. Dave Williams and DT3 Betty Williamson.

'Spectacular' free air show this weekend at Moffett Field

The public is invited to participate in the 1982 Armed Forces Day celebrations at Moffett Field. On May 15th and 16th from 9:30 a.m. until 4:30 p.m. a spectacular Free Air Show and Open House is scheduled, a spokesman said.

This year, the featured attraction will be the "Canadian Reds" precision aerobatic team. The "Canadian Reds" perform dazzling aerobatics in their customized biplanes with split-second precision. This team is made-up of two world class pilots who spend many

hours both performing and rehearsing their dual-formation maneuvers.

Also featured are the following exhibitions:

- WW II P-51 aerobatic routine
- Sailplane Ballet
- NASA demonstration flights
- SNJ and "Akro" aerobatic performance
- California Parachute Club drop
- Hot Air Balloon races

EDITORIAL

One Navy, with everyone pulling together

The U. S. Navy employs almost 320,000 civilians who comprise nearly one-third of this service's total manpower.

At Naval Regional Medical Center Oakland the military staff outnumbers civilian employees by only about 350 persons.

Armed Forces Day
MAY 15

Recognizing the importance of the civilian constituency, the Navy Department established a new position at its headquarters in Washington, D. C. to gather report news and information of interest to Navy civilians and to tell the fleet meaningful and often vital contributions to the Navy's mission by its workforce.

Most civilian employees, here and at other naval bases, are conscientious, fully supportive of the sea service and its missions. They provide the very continuity necessary to successfully bridging the gap when military personnel transferred and new ones report, and perhaps more significantly, they all play in the command's relationship with the community.

At this particular medical center military and civilian personnel seem to work satisfactorily with each other and lasting friendships are made every day. In Navy tradition and humor, the uniformed members have a nickname for their partners in mufti. They call us "Sandcrabs," probably because we're most at home on shore assignments. (Let's hope it doesn't mean we've always got our heads in the sand!)

It's encouraging to learn that the "powers that be" in the Pentagon believe an important element of the Navy team, "One Navy, with everybody in it together," and it's heartening indeed to know that some positive communication steps are being made.

'Peace Through Strength'

George said it long ago

George Washington's influence on our country and our lives is well known and regarded as America's greatest hero.

But did you know that "PEACE THROUGH STRENGTH" was also an essence of General Washington's defense policy? His attitude toward a strong defense was aptly expressed way back there in 1793:

"There is a rank due to the United States among nations which will be won if not absolutely lost, by the reputation of weakness. If we desire to avoid war we must be able to repel it; if we desire to secure peace, one of the most useful instruments of our rising prosperity, it must be known that we are at all times ready for war."

As it was in 1793, so it is in 1982.

If you ride a motorcycle, read and heed

By John R. Dennis, Safety Specialist

Since Jan. 1, 1982, 15 Navy deaths have occurred as the direct result of motorcycle accidents. This is two and one half times the number experienced during the same period in 1981. Another 99 motorcycle accidents have resulted in lost time injuries. This represents a 37 percent increase in injuries over the same period in 1981. As might be expected, the majority of accidents happened in fair weather areas which are more conducive to motorcycle usage during this time of year.

The most common causes associated with motorcycle accidents continue to be:

- Alcohol and excessive speed (ran off road/hit by something).
- Lack of operator experience (lost control due to unfamiliarity with equipment).
- Failure by others to see motorcycle rider.
- Other drivers violating right of way (run off road/hit by others).

In order to reduce the rate of increase in motorcycle mishaps, the motorcycle driver should become more familiar with the use of protective equipment (helmet, eye and face protection and proper clothing), and how to avoid blind spots. Motorcycles have "blind spots" just like cars have. When you change lanes, make sure to turn your head and look over your shoulder behind you.

The proper use of brakes is important. Your motorcycle has two brakes. You need both of them to stop effectively. Use both brakes every time you slow down or stop, and apply both brakes at the same time.

Even a quick stop may not be enough to keep you from hitting something in your path. A piece of debris or a pothole might appear suddenly in your path as the car ahead passes over it, or the car ahead might stop suddenly. The only way to avoid a collision would be with a quick turn. The trick to making a quick turn is to get the motorcycle to lean quickly in the direction you wish to turn. The sharper the turn the more you must lean.

Bright colored clothing and reflective helmets help make riders more noticeable. Yellow, orange and red are the colors most easily seen. The best thing you can do to make the motorcycle visible to oncoming drivers is to keep the headlights on, at all times. Motorcycles become up to one and one-half more noticeable to oncoming drivers when the headlight is turned on during the day.

The best way to stay out of trouble is to see it coming. Experienced riders make a practice of looking well ahead. In the city they are always looking from one-half to a full block ahead. On highways, they look about as far ahead as they can see clearly.

It is extremely dangerous to drink and ride. Over half of all highway deaths involve the use of alcohol. Riding a motorcycle requires a high degree of skill and judgment. It also requires a good sense of balance. Alcohol limits these skills. It is particularly dangerous to ride at night if you have been drinking. Alcohol tends to affect your vision. It becomes difficult to see things clearly and to judge distance. It is hard enough to ride a motorcycle at night when your vision is normal.

The losses mentioned earlier, if allowed to continue unchecked, will prove 1982 to be the worst year for motorcycle accidents on record.

Personnel interested in obtaining assistance in motorcycle training may call the

Safety Office, Naval Air Station, Alameda, phone 869-2964. They offer a motorcycle training course, held two times a month on Monday and Tuesday.

Remember, before traveling, or when in a new location, review local regulations to ensure your best effort in reducing this unacceptable loss of our most valuable resource—people.

A fish story of a different color

Why is it trout meat from some trout has a different color than meat from other trout?

People often ask, "Why is it that some trout have white meat and some have pink meat that is pink?"

The answer is that trout meat color, which can range from snow white to pink, is determined by these factors:

- Political affiliations.
- What they've been feeding on.
- Emotional instability (some blush more easily than others).
- What they've been feeding on.
- Environmental factors.
- What they've been feeding on.

Trout feeding on pistachio ice cream and cucumber rinds invariably have pink meat. And hatchery trout, which everywhere are fed a diet of polished uncolored marshmallows, have ghostly white flesh.

Hatchery trout also have rounded tails, which come from batting them against the sides of the cement troughs where they hang out. Thus it's easy to tell the sharp-tailed (and witted) native trout (*Angler's Edge*)

NAVAL REGIONAL MEDICAL CENTER OAKLAND, CALIFORNIA

RADM W.M. Lonergan, MC, USN,
Commanding Officer

CAPT Joseph P. Smyth, MC, USN, Director of
Clinical Services

THE OAK LEAF is published five days a week, produced commercially with funds in compliance with NNPR P-3. 1974. Deadline for copy is Wednesday the week prior to publication.

Opinions contained herein are expressions of the Department of the Navy. The OAK LEAF receives American Forces and Navy News material.

Contributions from both staff and civilians are welcomed and should be addressed to the OAK LEAF, Naval Regional Medical Center, Oakland, CA 94627.

NRS drive update

Enthusiasm and support for the Navy Relief Society drive currently underway at Oak Knoll remains high for the annual campaign that typifies the message that "the Navy takes care of its own."

Once again, the dramatic color night photo of the hospital, mounted and in 11 x 14 size, is on sale, with proceeds beyond printing costs going to the society. The photo is on display at both the Information Desk in the main lobby and at the Navy Exchange. It sells for \$20.

Additional keypersons have been appointed by Nursing Service. They are: HM3 Charles McNally, HR Jack Means, TJG Susan Basile, HM3 Rosemary Nichols, HN Barbara Miller, HM3 Michael Hogg, LCDR Margaret Burns and LCDR Peggy Marine.

Technologist job opening

Applications will be accepted through Monday by Civilian Personnel Service for the job of Therapeutic Radiologic Technologist, GS-7 in Radiology Service at this command.

Four years of specialized and one year of general experience are required. Applicants will be evaluated in their skill positioning patients for a wide variety of difficult treatments, and for knowledge of radiation protection standards, devices and techniques, anatomy and physiology and basic physics, and therapeutic exposure techniques.

Detailed information may be obtained from Maurine Tinsley at Ext. 116.

Rector, Keaton new X-ray grads

Certificates will be presented this morning in the CO's office by Rear Admiral Walter M. Lonergan, Commanding Officer, and Captain Robert L. Rector, Chief of Radiology, to the two most recent graduates of Basic X-Ray School—Hospital Corpsman Third Class Gordian A. Rector and Hospitalman Anthony E. Keaton.

The two successfully completed five weeks of didactic training and six weeks practical rotation at the X-Ray Department of the Moffett Field Branch Clinic. Class honorperson Rector had a practical grade of 97.44.

Petty Officer Rector will next be assigned to NRMCO Jacksonville, Fla., while Hospitalman Keaton will see new duty at the Fayetteville branch clinic, Norfolk, Va.

Intern activities

An Operational Medicine Seminar will be held on Tuesday and Wednesday, June 1-2, at the Officers' Club. All interns and dental general practice residents are required to attend.

The annual intern picnic is scheduled Thursday, June 3 and the intern "mail and farewell" party will be held at the Officers' Club on Friday, June 25. Incoming interns will commence their training here at 8 a.m. on July 1.

CUTTING IT CLOSE—The Canadian Reds, in close formation, fly their Pitts S-S-2A customized biplanes. Team members Rod Ellis and Bill Cowan are airline pilots whose hobby is aerobatical flying. See them at the Moffett Air Show.

Moffett Air Show--

(Continued from Page 1)

There will also be many static displays of aircraft ranging from WW II warbirds to the latest fighter and attack aircraft flown by the armed forces today.

In addition, there will be many exhibits, displays and performances such as the National Air Racing Group, the West Valley Flying Club and many others; military bands, California Air National Guard Band, the "Spirit of Sunnyvale" marching band, barbershop quartets, hot air balloon rides and drill teams. These will be set up inside the historic landmark, Hangar One.

This impressive structure was built as the home of the airship USS Macon in 1933 and is now used as the main center for all Pacific Fleet patrol squadron replacement training.

The Air Show will be a terrific outing for the family. It's right here in the Bay Area. Aircraft enthusiasts can get together and enjoy the shows and exhibits in historical surroundings. There is no cost for admission or parking.

Air Show Schedule of Events
(For both Saturday, May 15 and Sunday, May 16)

Training slated to prevent harassment

The Department of the Navy and Office of Personnel Management have issued policy statements and guidelines for the prevention of sexual harassment.

To comply with and support the Department of the Navy policy, NRMCO will begin prevention of sexual harassment training in July. Additional information will be disseminated by the Equal Employment Opportunity Office.

Department of the Navy, Office of Personnel Management and Naval Regional Medical Center, Oakland sexual harassment policy statements are posted on all official bulletin boards throughout the command.

Armed Forces Day message

Each Armed Forces Day our nation pauses to give special honor and recognition to the men and women of our Armed Services. This fitting tribute conveys America's great pride in those of you who serve with that spirit of selfless sacrifice so that freedom can be preserved. For over two centuries, our uniformed personnel have willingly stepped forward, each in their turn, to pay the patriots' price for maintaining America's unique dream. In both peace and war Americans in uniform—and their families—have given whatever was required to keep our nation strong.

Thank God for these many fine people. You are certainly among the most magnificent of our national assets—absolutely dedicated, selflessly loyal, exceptionally skilled—*Strong and Ready*. Americans everywhere join with me today in a salute to you, our uniformed men and women—and in acknowledging the immense debt our country owes to our soldiers, sailors, airmen, and marines. Thankfully, America has now begun to give much-increased recognition of the vital sacrifices and contributions you make to our society.

To each of you wonderful people in the Navy-Marine Corps team—and to the members of your families—I send my best wishes and hearty congratulations for a job well done.

John Lehman

"PASS IN REVIEW"—This nearly 200-man Army marching unit steps out smartly before reviewing officials in last year's Armed Forces Day parade in downtown San Francisco.

(US ARMY PHOTO)

MS1 Lopez named Sailor of Month

MS1 Avelino Lopez

Mess Management Specialist First Class Avelino G. Lopez, assistant manager of the Bachelor Enlisted Quarters (Bldg. 501), is Naval Regional Medical Center Oakland's Sailor of the Month for April.

He was cited for professional excellence, military bearing, initiative and devotion to duty, and is said to have had a tremendously positive influence on his peer group.

"This is my first duty station with Hospital Corps personnel, so I was naturally surprised and very happy to be selected," Petty Officer Lopez said.

He has been stationed at Oak Knoll for 22 months and has nearly 12 years' service. He will soon be transferred to NMCB 4 (Seabees), Port Hueneme, where he will serve as either food service or BEQ manager.

Lopez expects to make the Navy a career until retirement time. Previous duty has been aboard the USS HOEL (DDG 13), NAS Meridian, Miss.; VA 155, NAS Lemoore; USS ROOSEVELT (CVA-42), and USS KILAUEA (AE 26). His decorations include National Defense, Vietnam Service, Vietnam Campaign, two Good Conducts, Combat Action, Korean Expeditionary and Commendation Unit.

In his off-duty time he is active in the Men's Club of St. Basil's Church in Vallejo where he makes his home with his wife Angie and daughters April, 6, and Tisha, 1. Hobbies include playing basketball and automotive mechanics.

Petty Officer Lopez is the son of Benjamin Lopez and the late Feliza Lopez of Pampanga, P. I.

Affirmative action plan revised

ADM Thomas B. Hayward, Chief of Naval Operations, recently announced steps to update the Navy's Affirmative Action Plan. The CNO emphasized that equal opportunity in the Navy is not merely reflective of a federal legal requirement, but reflects the Navy's desire to attract capable people of all backgrounds and fully develop the abilities of servicemembers already on board.

Explaining the revision, ADM Hayward said, "The Navy has sponsored mandatory affirmative action programs for the past 10 years. Many

of the actions prescribed in the plans have achieved their objectives and are no longer needed. Others require continued effort. New initiatives have been introduced in the 1982 plan to improve further our equal opportunity performance.

ADM Hayward called on Navy members to demonstrate their commitment to equal opportunity through personal example, and concluded, "Equal opportunity will prevail in the Navy not because it is part of our military professionalism and discipline, but because it is right."

Insurance dividend rumors false

The Veterans Administration reminds all veterans living in Northern California that there is no truth to the stories circulating that veterans can apply to the VA for a special insurance dividend. The rumors or "hoax" continue to cause confusion among the veteran population and are costly to the VA.

There was a special dividend declared in 1948, but all action was terminated on this special dividend by an act of the Congress. The only dividends paid on Government life insurance policies are to veterans of World War I, World War II and the Korean Conflict who have continued their Government life insurance in force. Policies on which dividends are currently paid have one of the following prefixes: "K", "V", "RS", "W", "J", "JR", and "JS."

These dividends, declared annually around the first of the year, are almost always paid on the anniversary dates of

in-force policies. A veteran holding such life insurance need not apply for the annual dividend as it is paid automatically.

Drug trafficker found guilty

On April 9 a Navy man was sentenced by a military judge to three years at hard labor, forfeiture of all pay and allowances and dishonorable discharge from the naval service. The sentence was pronounced by a court-martial which found him guilty of possessing illegal drugs with intent to distribute.

The sailor, a fireman recruit attached to a guided missile cruiser, was implicated in a "controlled buy" aboard the ship, in which he sold marijuana to crew members who were cooperating with government investigators.

Women assigned to Diego Garcia

The Navy has begun permanent assignment of women to Diego Garcia. The first contingent of three officers and 32 enlisted women arrived on the island April 5. It is expected that women, those permanently assigned and those on temporary additional duty with rotation units, will eventually make up about 10 percent of Diego Garcia's uniformed population.

Although women had been attached temporarily to units on the island as early as last summer, permanent assignment had not been made because appropriate accommodations, medical facilities and ship's store merchandise had not been available. These items are now considered adequate.

A final total of 192 enlisted women and four to six women officers will

eventually be ordered to billet on Diego Garcia.

Sixteen enlisted women each month will be added to the original 32 until a final total is reached. One-year, unaccompanied tours are open to women with most ratings. Those women interested in assignment should contact their detailers for more information.

Volunteers recruited for counselor rating

Qualified first and second class petty officers, "who are willing to accept the challenge of helping plan their future in the Navy," are being asked to switch to the Counselor rating. The call for volunteers marks the first time that members in paygrade E-5 have been allowed to convert to that rating.

Navy counselors have been a factor in recruiting and retention successes, according to Commandant Navy Military Personnel Command (CNMPC). The need for additional counselors now must be met by lateral conversion.

Those wishing to convert must be first or second class petty officers at their second enlistment. They must have any disciplinary action in their records for the last two years and agree to remain on active duty for two years after changing rating. "Special Duty Request" (NA 1306/7) must be completed to enter the process.

Several factors will be considered by CNMPC. These include previous experience as a Career Counselor, Command Retention Team Member, performance as a recruiter, other counseling experience (civilian work and alcohol rehabilitation), performance in the applicant's present rating and military appearance.

More information on lateral conversion to the Navy Counselor rating appears in NAVOP 44/82 of April

VADM Foley named new CINCPACFLT

Secretary of Defense Caspar Weinberger announced April 27 that the President has nominated VADM Sylvester R. Foley, Jr., for appointment to the rank of admiral and assignment as Commander in Chief, U. S. Pacific Fleet.

VADM Foley currently serves as senior Navy member of the Military Staff Committee of the United Nations and Deputy Chief of Naval Operations (Plans, Policy and Operations).

Legal help available

Recent changes to the law on drunk driving have made penalties much more severe, including a greatly increased chance of going to jail.

The best advice remains: Do not drink and drive. However, if you are arrested for driving while drunk, see a legal assistance officer for advice.

REAL-L-Y READY!—When Lieutenant Commander Louise George (center) and Lieutenant Maureen Clary came to Captain Jan Emal's office to report on the Operational Readiness Course they recently completed in Quantico, Va., they dressed for the occasion in camouflage uniforms and combat boots, much to the nursing director's amusement. The two Oak Knoll nurses were among 40 Navy nurses from throughout the nation who gained experience in helicopter evacuation and techniques for performing in the field. The April 19-23 exercises featured night triage and simulated attack.

Low in vet population

number of veterans has declined for the first time in 16 years. and other data on veterans and their programs have been compiled by the Veterans Administration in a 52-page booklet, "Trend Data 1957-1981." Prepared by the Agency's Office of Reports and Statistics, the booklet covers 25 years of data.

The number of veterans has declined from an estimated 30,118,000 in 1957, an all-time high, to 30,083,000 in 1981. There has been an almost constant decrease in the number of visits for outpatient medical care, especially by the aging veteran population. Over the past 25 years—from 3.3 million visits in 1957 to 17.9 million in 1981.

Total VA expenditures have doubled since 1972, increasing, in 1981, to \$25.2 billion.

Expenditures by VA for medical services have increased 615 percent over the past 10 years, from less than \$1 billion to \$1.6 billion.

Total employment in the Veterans Administration has increased 10 percent, to 232,417 employees, in 1981. The number of full-time employees, since 1957, has increased from 16,849, an increase of 47 percent.

The number of veterans receiving medical assistance has increased, in 1981, to 2,279,070, a 10 percent increase over 1972.

The average number of VA hospital operating beds has decreased from a 1958 peak of 121,201 to a low of 82,079.

The average daily patient census at VA hospitals has dropped from

111,599 in 1958 to 66,376 in 1981, a 41 percent drop.

The VA, and VA-supported, nursing home care average daily census has increased from a low of 324 in 1965 to a high of 22,347 in 1981.

Copies of "Trend Data 1957-81" may be obtained free of charge, while the supply lasts, by writing the Office of Reports and Statistics (70), Veterans Administration, 810 Vermont Avenue, N.W., Washington, D.C. 20420.

Navy to recruit more women

The Navy will move ahead with a planned increase in the number of female officers to 6,400 and enlisted women from the current 35,000 to 45,000 by FY 1985. Medical Department enlisted women will be increased to 4,500 by FY 1985.

These increases support Secretary of Defense Caspar Weinberger's memorandum to all service secretaries, which stated that women in the military are a very important part of our total force capability. Qualified women are essential to obtaining the numbers of quality people to maintain the readiness of our forces.

In recent interview, Secretary of the Navy John F. Lehman, Jr. stated that we have a reasonably ambitious goal to expand the role of women. We aim to do everything within the law to create a clear path for professional progression.—HMCN S.W. Brown, Force Master Chief

15 years at Oak Knoll

Helen Rutz honored upon federal retirement

Mrs. Helen Rutz, former secretary to the Chairman of Anesthesiology, was honored with two recent retirement parties.

About 35 friends and coworkers from other departments took her and her two daughters to lunch in the Trident Room of the Alameda Naval Air Station Officers' Club on April 29. There she received a golf bag to carry her recently purchased clubs, and a lovely floral arrangement.

Anesthesiology Service hosted a Sunday Brunch in her honor at His Lordship's on the Berkeley Marina on May 2, where she was presented an authentic ship's bell engraved with her name and a phrase complimenting her service for "guiding Anesthesiology through calm and troubled waters for 15 years." Nearly 40 persons attended the function.

"This has been the best place in the world to work," Helen said upon departure from Oak Knoll on April 30. "It's really been a great job, and I hate leaving the people." Her husband is retired, however, she explained, and she wants to spend more time with him.

The couple lives in Castro Valley. They are parents of two daughters and one son, and grandparents of a two-year-old girl.

Helen Rutz

Helen's civil service totaled nearly 17 years. Her only other federal employment was with the Veterans' Hospital in Livermore.

She reports she plans to spend her leisure in "reading, sleeping, traveling, and tending to my roses and violets." She is also taking golf lessons.

Discount fares underutilized

Servicemembers are not taking full advantage of special half-fare airline tickets, according to the Military Traffic Management Command (MTMC). An April 19 message from the command said, "We continue to receive evidence that many personnel on active duty are unaware of the special fares and their significance." The message described the tickets as "one of the most generous benefits ever offered to the Armed Forces by American industry."

Active duty military personnel are offered a 50 percent discount on coach class fares for most major U. S. Airlines. The discount is available on

domestic (non-overseas) flights only. Servicemembers may be required to show their green, active-duty I. D. card at the time of purchase, though travel in uniform is not required.

The fares have been in effect for the past year-and-a-half and are a dramatic improvement over the 25 percent discount previously offered. Tickets may be advertised as "Furlough Fare," "Leave Fare," or "YM" fare. They provide the traveler with a reserved seat, and may be bought at any travel agency, airline ticket office or Scheduled Airlines Traffic Office (SATO).

Navy honored for drug abuse program

The U. S. Navy was honored April 17 for its "significant contribution to bettering our understanding of drug problems and inspiring the work of those trying to reclaim victims whose lives might be ruined by untreated abuse." The award was presented by "Today, Inc.," A private, non-profit organization which provides therapeutic services for youth and young adults involved in drug or alcohol abuse.

"Today, Inc." President Joseph F. Catania, in a letter to Secretary of the Navy John Lehman, wrote, "We wish to recognize the value of the Navy's new 'get tough' policy in dealing with drug abuse. Your forthright action in identifying pushers and punishing offenders will eliminate those who risk the lives of their comrades when they are unable to perform critical duties because they are under the influence of drugs."

Catania said he felt that the Navy program would have a positive effect on those in the civilian sector looking for leadership and examples to incorporate in their own programs to counter drug abuse. He went on to praise the Navy's role in efforts to interdict drug smuggling operations, calling it "an example for cooperation among all government agencies."

Principal Deputy to the Assistant Secretary of the Navy (Manpower and

Reserve Affairs) J. Ronald Denny, accepted the award on behalf of the Navy.

Navy's first woman volunteer dies in LA

Virginia Stoddert Kendle, the first woman to be accepted as a volunteer for naval service, died recently in a Los Angeles, Calif., Hospital.

Mrs. Kendle enlisted in the "Yeomanettes" in 1917, becoming a secretary to Navy Secretary Josephus Daniels, and to then-Assistant Secretary of the Navy Franklin Delano Roosevelt.

Mrs. Kendle was the great-great-granddaughter of Benjamin Stoddert, the country's first Secretary of the Navy for Presidents John Adams and Thomas Jefferson.

"The sergeant got mad at me and started tearing the stripes off my shoulder. . . unfortunately, I didn't have any!"

Small Business Week, 1982

By the President of the United States of America

A Proclamation

Small business is the cornerstone of our free enterprise system and since the birth of this country has represented opportunity, independence, and the fulfillment of dreams for generations of Americans.

Combining the dynamic forces of individual initiative with an alertness to consumer needs, small business increases the flexibility of our economic system and is a leading source of innovation and technological advancement for much of our industry.

We are indebted to small business for its contributions to our success as a nation and dependent on its progress and vitality for our economic well-being. Small firms employ over half of the labor force and are leaders in employment creation and innovation; they also play an important role in expanding economic opportunities for women and minorities.

While small business is at the heart of our competitive system, it has been increasingly hobbled in recent years by excessive government regulation and taxation. We are currently addressing these problems through our programs for economic recovery. Our goal is to encourage the entrepreneurial spirit and to help usher in a new era of growth for small business. Toward that end, "The State of Small Business: A Report of the President," was sent to the Congress on March 1, 1982. It outlines key recommendations of this Administration.

Historically, small firms have enjoyed a special relationship with their communities. Now they not only will be leaders in the renaissance of their communities but also will be in the forefront of revitalizing the economy and bringing a new sense of direction to the American people.

NOW, THEREFORE, I, RONALD REAGAN, President of the United States of America, do hereby proclaim the week beginning May 9, 1982, as Small Business Week. I call upon every American to join me in this tribute.

IN WITNESS WHEREOF, I have hereunto set my hand this 5th day of April in the year of our Lord nineteen hundred and eighty-two, and of the Independence of the United States of America the two hundred and sixth.

Ronald Reagan

30 years in Navy

Senior chaplain to retire

Captain Marlin D. Seiders, Chief of Pastoral Care Service, will leave Oak Knoll May 21 and officially retire June 1 after more than 30 years' duty in the U. S. Navy. He has no immediate plans, but expects to travel for a time.

Chaplain Seiders arrived at Naval Regional Medical Center, Oakland, last summer from a three-year assignment as Special Assistant for Pastoral Care to the U. S. Navy Surgeon General.

While here the senior chaplain instituted a Management by Objectives' Program of Ministry, with emphasis on patients, staff, families and student populations. At the Bureau of Medicine and Surgery he developed a hospital ministry clinical education course for reserve chaplains and sponsored a like program at this medical center.

Born in Middletown, Pa., and educated at Lebanon Valley College and United Theological Seminary, he was ordained in 1949 by the Central Pennsylvania Conference of the United Methodist Church and served parishes at two Pennsylvania cities before pursuing postgraduate studies at Temple University and earning a master of theology degree from Harvard University. In 1973, Lebanon Valley College conferred upon him the degree of doctor of divinity. More recent studies and research have been in sociometry and organizational development.

Entering on active duty with the Navy as a Lieutenant (junior grade) in October 1951, he was assigned, progressively with Naval Training Center, Bainbridge, Md.; Escort Destroyer Squadron Six in the Atlantic and Pacific Fleets, and the Naval Training Center, San Diego. Upon completion of duty under instruction at Harvard in 1957, the chaplain served with the Third Marine Division on Okinawa.

In 1958 he returned to the Pacific Fleet for duty aboard USS PRAIRIE

Chaplain M.D. Seiders

(AD-15) and was then assigned a tour at Naval Hospital, St. Albans, N. Y. Other duty assignments have included Pearl Harbor, NAS Lemoore, Republic of Vietnam; Guantanamo Bay and Naval War College, where he was a student. Subsequent tours provided the officer with extensive supervisory responsibilities as Force Chaplain, Naval Air Force, Pacific; Senior Chaplain, Fleet Support Office, Athens, Greece; Fleet Chaplain, Commander in Chief, U. S. Naval Forces Europe, and Fleet Chaplain, U. S. Atlantic Fleet.

For meritorious service as Force Chaplain, Naval Air Force Pacific, he was awarded a Gold Star in lieu of a second Navy Commendation Medal, and for service as Atlantic Fleet Chaplain, he earned the Meritorious Service Medal.

He is married to the former Nancy Jean Deimler, Ph.D. Their only child, Lieutenant Commander M.D. Seiders, Jr., is an attorney with the Navy Judge Advocate General Corps.

Chaplain Seiders' replacement will be Captain L. Wayne Rushing, who was once before stationed at the medical center. He is expected to report in late summer.

Kudos.....

Veterans Ask

Q—I've just moved and am wondering if the Post Office will forward my VA compensation check to my new address?

A—Yes. Checks issued under laws administered by the VA may be forwarded if the payee has moved and filed a regular change of address with the U. S. Postal Service. However there is a time limit that the Post Office will forward VA payments. You should notify your nearest VA office of your new address as soon as possible. You might also consider contacting your bank to have your VA payments deposited directly to your account.

Retires July 1

Monday last day here for CAPT Rasmussen

Captain Bruce D. Rasmussen, a Navy physician who spent his first five years in the service as a line officer, will depart this command on May 17 and officially retire from the Navy July 1.

Dr. Rasmussen, Assistant Chairman of the Department of Ophthalmology and Acting Chairman since February, plans to open a private practice in La Jolla, Calif.

Originally from Mason City, Iowa, he earned a bachelor of science from Iowa State University and was commissioned an ensign in the Navy via the NROTC Program in June 1958. He then served aboard the USS SHANGRI-LA (CVA-38) in the gunnery department and as Special Services Officer and Officer of the Deck in port and underway.

From 1961 to 1963, he was an instructor of English, history and government at the U. S. Naval Academy, Annapolis, Md. Released from active duty and transferred to the Naval Reserve as a lieutenant, he next completed studies at the University of Kansas School of Medicine, earned his M. D., and was recommissioned in the same rank as a Medical Corps officer in 1967.

He completed a rotating internship and ophthalmology residency at Naval Regional Medical Center (NRMC), San Diego. Following duty included NRMC

CAPT Bruce Rasmussen

Long Beach, NRMC Naples and N. Oakland.

Dr. Rasmussen is board certified by the American Board of Ophthalmology and a fellow of the American Academy of Ophthalmology and Otolaryngology and the American College of Surgeons.

He and his wife Patricia are parents of three—Lisa, 15, Stephanie, 12, and Scott, 10.

Comings and Goings -----

"Fair winds and following seas" to the following personnel who have recently departed this command:

CAPT Charles Benninger, MC, retired.

CDR Helen Pike, NC, to Long Beach.

LCDR William Runyon, MC, to NRMC Charleston.

LCDR Melvin Hary, CHC, to Guam.

Mrs. Nancy Gilliland, transferred to NAS Alameda.

Mrs. Helen Rutz, retired.

HM2 Karl Brown, released from active duty.

HM3 Raymond Thompson, released from active duty.

HN Thomas Spracklin, released from active duty.

HM3 Michael Kellett, to Naval Amphibious School, Coronado.

FR Michael Walsh, released from active duty.

HM2 Charles M. Frye, to 2nd Mar Div, FMFLANT.

HM2 Michael Wagan, released from active duty.

HM3 Patrick Briggs, to Aerospace Medical Institute, Pensacola.

HM3 Elpidio Salanga, to USS HECTOR (AR-7).

...

"Welcome aboard" to newly arrived:

LT Michele J. Scott-Beach, NC.

ENS James R. Hunter, II, NC.

LT David Efimetz, CHC, ACDUTRA.

ENS Ronald Logan, MSC, Pharmacy.

HA Timothy O'Connell, Nursing Service.

HN Beverly Hall, Nursing Service.

HA Jacqueline Doverich, Nursing Service.

HM3 Ivan Morales, Nursing Service.

HN Lisa Bralliar, Nursing Service.

HM2 Ted Scott, Laboratory Service.

HM1 Kerry Foster, Drug and Alcohol Program Advisor.

HM3 Renato Ramirez, Pharmacy.

HM3 Susan Wainman, Nursing Service.

HR Sostenes Flores, Nursing Service.

HR Michael Maloney, Special Services.

HM3 Romano Roberson, Nursing Service.

HM3 David Gauthier, Nursing Service.

HN Roosevelt Wardell, Nursing Service.

HM3 Loida Malinis, Main Operating Room.

HM3 Shawn Sutliff, Nursing Service.

...

Musical message on anti-drug use

A musical show with an anti-drug theme is being performed nationwide by young Navy men and women at the Naval Technical Training Center, Great Lakes, Ill. The show was conceived by a student at the center who wanted to demonstrate that not all sailors are involved, or wanted to be involved, with drug use. Positive alternative drugs are highlighted in the hour-and-a-half performance, which will have appearances at the Navy bases in Memphis, Tenn., San Diego, Calif., Orlando and Pensacola, Fla.

The program features the musical performers who have died of overdoses and reminds audience of the waste of talent and life that drug abuse causes. Songs made famous by Janis Joplin, the Blues Brothers, The Beatles, Garth Brooks, and Marilyn Monroe are featured, along with those of musicians who have rejected drugs and found positive ways of using their abilities.

...

Former intern here into clinic delivery

LT Thomas E. Marfing, one of Oak Knoll's 1981 graduating interns now assigned to the Atsugi Naval Air Facility Clinic in Japan, has assisted in the birth of about seven babies since his arrival there last July.

Although most expectant mothers at the air facility go to Yokosuka for delivery where a Navy obstetrician is stationed, weather conditions and time considerations often do not make that possible.

In the most recent clinic delivery, Dr. Marfing and CWO2 Steve L. Parrish, physician's assistant, assisted in the delivery of an early arriving, but healthy baby boy.

New VA mortgage plan allows less down payment

Veterans Administration-guaranteed Graduated Payment Mortgages (GPM) are now available with lower downpayments for new home purchases, the VA has announced.

The new program is part of the Veterans Disability Compensation, Housing, and Memorial Benefits Amendments passed by Congress last year.

Under the GPM, monthly payments are lower for the first few years than the corresponding monthly payments on a traditional mortgage for the same amount.

In a GPM mortgage, a portion of the interest due on the loan each month is deferred and added to the principal balance of the loan. This is done during the early years. In a traditional

mortgage, all the interest and a portion of the principal are scheduled to be paid each month.

After a set number of years, the payments become a constant amount for the duration of the loan. From that point on, each scheduled loan payment includes all of the interest due plus a portion of the principal, as in a traditional mortgage.

The VA will guarantee only those GPMs which feature annual payment increases of 7.5 percent, implemented on each annual anniversary date of the loan, for the first five years.

On new homes, the downpayment with a Veterans Administration GPM may be as low as 2.5 percent of the sale price or reasonable value of the property, whichever is lower.

Bring no longer needed items to base flea market to earn \$

The Naval Regional Medical Center Officers Auxiliary will sponsor a flea market in the Oak Knoll Officers' Club parking lot from 11 a.m. to 6 p.m. on Friday, June 4.

All military families of the command are invited to participate if they'd like to earn some extra money and clean out their closets and garages of unused, serviceable articles. To reserve a space, call either Nancy Harris at 582-

9463 or Roseann Tedesco, 982-3641. A charge of \$3 per space will go into the auxiliary's fund for philanthropic projects. Mrs. Harris said some display tables are available for those who reserve early.

All profits from the sale of the merchandise will go to the seller and all personnel, military and civilian, are invited to shop the flea market during the day of the sale.

VA to conduct 'Agent Orange' physical exams

Arrangements have been made with Veterans Administration to conduct physical examinations of all personnel, including those on active duty, who have been exposed to "Agent

Orange" (a herbicide used during combat operations in Viet Nam).

Personnel desiring such an examination may write to the following:

Office of Environmental Medicine (102)
Room 848
Veterans Administration Central Office
810 Vermont Avenue, NW
Washington DC 20420

The VA Central Office will respond with the necessary forms and instructions concerning the examination and registry entry.

CAPT C.J. Benninger III

Dr. Benninger is the father of three daughters, 20, 17 and 15 years old.

Joggers advised to carry IDs or wear dog tags

Recently, an individual at a military base suffered a heart attack while jogging alone. Because the jogger was unconscious and carried no identification, emergency room doctors had to treat him without knowing if he had any other medical problems that posed a threat to his survival.

Medical records of a heart attack victim or a seriously injured person are always of concern to a medical staff when treatment is necessary.

People who participate in sports can help avoid problems that could arise in such a situation if they carry identification with them during their recreational activities. It is a good idea to carry dog tags, a military ID card or any other form of personal identification.

If any special medical attention is required, or if the person is on medication, this information should also be carried.

Medical effects of marijuana

"There is no doubt at all that marijuana is a dangerous drug with great potential for serious harm to young American users."

--from a report by the American Medical Association

The effects of marijuana on humans have been outlined for ready reference in a number of physiological and psychological areas:

Brain:

- Is the target organ for marijuana.
- Structural changes occur in the brain with use.
- Actual intoxication impairs learning, memory, thought processes, comprehension and general intellectual performance.
- At moderate use levels, impairs driving skills.

Lungs:

- Contains large amount of cancer-causing hydrocarbons (more than contained in tobacco cigarettes.)
- With daily usage, danger to lungs can appear in three months.
- Bronchitis and emphysema are common in regular marijuana users.

Heart and circulatory system:

- Increases heart rate—up to 140 beats per minute.
- Occurrence of miscarriages in users is more common than in non-users.
- Among laboratory animals, abnormalities in sperm have been noted as well as damage to the male reproductive organs.

Psychological damage:

- Many physicians believe that use may adversely affect psychological functioning, personality development, emotional growth and learning, especially in childhood and adolescence.
- Psychological damage may be permanent.
- Large doses of THC (an active ingredient of marijuana) can induce hallucinations, delusions and feelings of paranoia.
- Thinking may become confused and disoriented.
- Initial euphoria may give way to anxiety reaching panic proportions.
- Moderate use is associated with school dropouts, psychosis, panic state and adolescent behavior disorders.

Residual effects—half-life:

- Some active ingredients of marijuana remain in fat tissues of the body for approximately 30 days.
- One-half of the active ingredients remain in the body for seven days. (In comparison, alcohol is water soluble and used up in 24 hours or less.)

"Yes, you can go back to the base, but don't do any chewing out for the next few hours, Sarge..."

Symptoms of abusers—Excitability, anxiety, increased pulse rate, nausea, hallucinations, dilated pupils and possible violent behavior. Also often combined with heroin.

Symptoms of abusers—Odor of burned rope on breath, euphoria, mood swings, increased appetite, confusion

Layman's guide to drug education

Symptoms of abusers—Euphoria, lethargy, drowsiness, slurred speech, flushing of skin on face, neck and chest, chronic constipation, nausea, constricted pupils, needle scars on arms and legs and coma.

Symptoms of abusers—Similar to alcohol intoxication without its odor. Nausea, vomiting, liver, nerve and blood damage, hallucinations and psychoses. (NES)

One patient's view of Radiology

AIR FORCE BRIEFERS—Medical Service Corps Lieutenant Colonel A.H. Verona and Nurse Corps Captain K. Meisetschleager of the Patient Airlift Center, Scott Air Force Base, Ill., briefed Naval Regional Medical Center Oakland personnel on aeromedical patient evacuations during a visit here April 29.

Frequent nosebleeds Cause for concern?

You don't have to get in the ring with boxer Sugar Ray Leonard to get a nosebleed.

Nosebleeds can occur at any age and are especially common in childhood. Most occur in only one nostril and often stop by themselves.

Pregnant women sometimes have them due to increased blood volume or vitamin C deficiency. Other causes may include injuries, frequent nose blowing, colds or allergies.

Following are some first aid methods for simple nosebleeds and the warning signs of serious ones:

A small vein near the front of the nose is the most common source of bleeding. To help stop the bleeding have the victim sit down and lean forward with the mouth open. Press the soft parts of the nostrils together gently for several minutes, making sure the victim is not swallowing any blood. A cold cloth placed against the nose and face will also help constrict any open blood vessels.

Nosebleeds originating from the back of the nose may be more difficult to stop and will often require the aid of a physician. If blood comes from both nostrils or appears in the mouth, seek prompt medical attention. Have the victim lie on his or her side with the face turned down over the side of the bed and pinch the nose tightly or plug with cotton until a physician can be reached.

If nosebleeds occur often or continue for a long period of time, they should be investigated. They may indicate other health problems.

The following new additions to the military medical "family" have arrived at Naval Regional Medical Center Oakland:

A baby boy to Lieutenant Victor Verona, Medical Service, and his wife Zeffra, April 27.

A baby girl to Hospital Corpsman Second Class Charles Leotha Brewer, United States Coast Guard, Government Island, and his wife Zeffra, April 28.

Ear zone off limits

Don't forget the old adage, "Never put anything in your ear smaller than your elbow."

Self-inflicted injury to the ear canal is one of the most frequent causes of earaches and is the easiest to avoid. Objects such as writing pens, hair pins or swabs can cause considerable damage and children especially should be cautioned against putting things in their ears.

Earaches occur commonly, also, in relation to respiratory infections.

Symptoms such as pain, bleeding, inflammation, swelling, drainage and fever indicate an infection, probably to the middle ear, requiring medical care. Do not place anything in the ear until a physician can be consulted. If the ear is infected the condition could be aggravated and may spread beyond the middle ear. Inadequate or delayed care can cause serious complications or permanent damage, especially to children.

Earaches can be caused by other health problems. Referred pain from an area close to the ear, an irregular dental bite, low barometric pressure or blows to the head may cause pain that will be centered in the ear. If pain persists seek medical care.

VA Qs and As

Q—I am entitled to hospital treatment at Veterans Administration hospitals because I am 100% disabled from service connected causes. Is there any similar medical care available for my family?

A—Your family may be entitled to the VA's Civilian Health and Medical Program (CHAMPVA). This is a medical benefits plan through which the VA helps to pay for medical care obtained from civilian sources by certain dependents of veterans with permanent and total service connected disabilities. The surviving spouse and children of veterans who died as a result of a service connected disability, or of veterans permanently and totally disabled from service connected disabilities at the time of death, are also eligible.

Q—May on-the-job G.I. Bill training be pursued on a part-time basis?

A—No, you must use this training on a full-time basis.

Is a vaccine on the way to prevent tooth decay? Since the bacteria that cause caries (cavities) are on the surface of the teeth, a vaccine that would create antibodies in the bloodstream to fight the bacteria would be useless. But saliva is another thing. Saliva, along with tears, nasal secretions, gastrointestinal secretions and breast milk, is part of the immune system. Antibodies can be stimulated in the glands manufacturing saliva which would fight the bacteria. Another approach, according to *Sciquest* magazine, is to find a vaccine that would immunize against an enzyme that is located on the outside of the caries-producing bacteria. This enzyme, in conjunction with sugar, produces a substance called glucans which has a sticky quality that helps the bacteria to accumulate on the surface of the teeth.

Those clever TV commercials aside, which showed supposed centenarians eating yogurt, there is little reason to accept the many reports of super-old people thriving in mountainous regions of several countries. These groupings of people supposedly well into their second centuries, are in Abkhazia, Soviet Georgia; Kashmir's Hunza District; and the village of Vilcabamba in Ecuador. In an article in *Geriatrics* magazine the Soviet claims are effectively disputed. The most telling argument is that there is no documentation for any alleged Russian centenarian before 1932, physical and biochemical test results on the super-old resemble results expected of people in their 60s, and during World War I and II many men in the USSR took the names of their fathers to avoid military service, especially in the mountains of Georgia. The claims of the ancients of Kashmir and Ecuador are similarly debunked. But there is evidence that our life-span can be lengthened by calorie restriction, body temperature reduction and drugs.

Lancet, the British journal, discovered that British saints, like physicians today, tended to specialize. For example, St. Vitus is the patron saint of those people afflicted with demonic possession, epilepsy, chorea and nervous disorders. He also is good for snake bites, but for the bite of a mad dog St. Sithney is the one. For toothache a sufferer has several choices: Saints Appollonia, Kea, and Medard. If a rupture, paralysis or madness is the problem then St. Osmond, who was Bishop of Salisbury during William the Conqueror's time, will probably prove helpful. For a headache you have the choice of three saints: Gereon, who lost his head—literally—in 304, and Drnin and Armel. Armel also does a number on fever, colic, gout and rheumatism. If you're a nursing mother, St. Giles has an eye out for you, and if you happen to be pregnant, St. Margaret of Antioch promised that those women who invoked her would be free from danger during labor.

Federal automobile safety standards, enforced in 1968, resulted in the saving of some 37,000 lives in the period 1975-1978, a Yale University study has revealed. The effectiveness of the standards, including mandated safety belts, energy-absorbing steering assemblies and high penetration-resistant windshields, was examined using detailed data on 236,000 vehicles involved in fatal crashes during 1976-1978.

The ancient therapy of bloodletting hasn't had a good press for a long time. It's suspected that George Washington's death was hastened by a too enthusiastic opening of his veins during his last illness. And Charles II of England lost 24 ounces of blood to the lancets of his courtiers when he was stricken with a stroke. Of course, Charles' attendants went a little further than George's did. After dangerously depleting his blood supply, they made him vomit, and then they gave him a series of enemas. Those preliminaries out of the way, they got down to serious business. First they shaved Charley's head and applied blistering agents to his scalp. That done they heated a poker and gave him a little therapeutic singeing. Charles went into convulsions and succumbed shortly after. Yet ignoring the dark history of bloodletting, today's physicians are discovering that there are some advantages to reducing some patients' blood supply, particularly those patients whose red blood cell concentrations are so high that they are threatened with stroke. And some tentative studies in England suggest that bloodletting can increase blood flow in the brains of patients with abnormally "thick" blood. A team of researchers in London's National Hospital took a small quantity of blood—about seven to ten ounces—from 38 volunteers. After a series of "bloodletting" treatments, the hemoglobin (oxygen-carrying factor) level dropped by 13 percent—but the blood flow in the brain increased by 40 percent. Another research team in Scandinavia also got much the same results although the blood flow to the brain was not increased as greatly. Psychological tests demonstrated an increase in mental acuity.

(Editor's Tip: Clip and retain for your files.)

How To Respect And Display

Our Flag

Have you ever admired, maybe envied, the snappy way those people at your base or installation or aboard your ship handle the national colors?

Each military service has its own rules and regulations for proper care and handling of the flag. There are also a number of laws on the subject.

But how do you handle Old Glory on your own, at home, church, PTA, patriotic society meetings, or at school parades? Respect for the national colors and some knowledge of how the flag should be handled, displayed and cared for is the responsibility of every citizen.

Here are some general rules on handling and display of the flag:

The National colors should be raised and lowered by hand. Do not raise the flag while it is furled. Unfurl, then hoist quickly to the top of the staff. Lower it slowly and with dignity.

It is the universal custom to display the flag only from sunrise to sunset on buildings and on stationary flag-staff in the open. However, when a patriotic effect is desired, the flag may be displayed 24

hours a day if properly illuminated during the hours of darkness.

The flag should not be displayed on days when the weather is inclement, except when an all-weather flag is displayed.

Take every precaution to prevent the flag from becoming soiled. It should not be allowed to touch the ground or floor, or to brush against objects.

When carried, the flag should always be aloft and free—never flat or horizontal.

The flag should not be dipped to any person or thing, with one exception: Navy vessels, upon receiving a salute of this type from a vessel registered by a nation formally recognized by the United States, must return the courtesy.

When displayed from a staff in a church or public auditorium, the flag should hold the position of highest prominence, in front of the audience, and at the clergyman's or speaker's right as he faces the audience, with other flags at his left.

The flag should never be displayed upside down except as a signal of dire distress.

Do not use the flag as a

portion of a costume or athletic uniform.

Place no objects on or over the flag.

Never use the flag as drapery or to cover a speakers platform.

When the flag is used in unveiling a statue or monument, it should not serve as a covering of the object to be unveiled. If it is displayed on such occasions, do not allow the flag to fall to the ground, but let it be carried aloft to form a feature of the ceremony.

Do not use the flag as a receptacle for receiving, holding, carrying, or delivering anything. Never place upon the flag, or attach to it any mark, insignia, letter, word, figure, design, picture, or drawing of any nature.

No other flag may be flown above the Stars and Stripes, except: (1) the United Nations flag at U.N. Headquarters; (2) the church pennant, a dark blue cross on a white background, during church services conducted by chaplains at sea.

When the American flag becomes tattered and torn or too soiled to clean, it should be destroyed by burning, not dumped in the trash.

When displayed with another flag from crossed staffs, the flag of the United States of America should be on the right (the flag's own right) and its staff should be in front of the staff of the other flag.

When the flags of two or more nations are played they should be flown from separate staffs the same height, and the flags should be of approximately equal size. International usage forbids display of the flag of one nation above that of another nation in time of peace.

When flags of states or cities or pennants of societies are flown on the same halyard with the flag of the United States of America, the latter should always be at the peak. When flown from adjacent staffs the Stars and Stripes should be hoisted first and lowered last.

When it is to be flown at half-staff, the flag should be hoisted to the peak for an instant and then lowered to the half-staff position; but before lowering the flag for the day it should again be raised to the peak. "Half-staff" means the position of the flag when it is one-half the distance between the top and bottom of the staff. On Memorial Day display at half-staff until noon only; then hoist to the top of staff.

When the flag is displayed from a staff projecting horizontally or at any angle from the window sill, balcony, or front of a building, the union of the flag should go to the peak of the staff (unless the flag is to be displayed at half-staff).

When the flag is suspended from a rope or wire between a house and a pole at the end of the sidewalk, the flag should be hoisted out from the building toward the pole, union first.

Dates To Remember

- May 15
Armed Forces Day
- May 31
Memorial Day
- June 14
Flag Day
- July 4
Independence Day
- September 6
Labor Day
- October 11
Columbus Day
- November 11
Veterans Day

When a number of flags of states or cities or pennants of societies are grouped and displayed from staffs with our National flag, the latter should be at the center and at the highest point of the group.

When carried in a procession with another flag or flags, the Stars and Stripes should be on the marching right, or when there is a line of other flags, in front of the center line.

"OPEN MINDS"—High school students of the Oakland Unified School District visited NRMCOakland on April 27 and, in the photo on the left, are told of career pathways and jobs in federal service by Ms. Sherry Robinson, while at right Hospital Corpsman Second Class Margaret Rodriguez explains opportunities for Navy women. The "Open Minds" program, funded by the Voca-

tional Education Unit of the California State Department of Education in conjunction with the school district, acquaints female high school students with non-traditional occupational majors. The students provide feedback to the school district on information they have gained. Lieutenant Lisa Halton of Nursing Service coordinated their visit here.

Space A travel information — includes Oakland flights

Between 30 and 60 MAC contract flights per month now depart Oakland International Airport in the San Francisco Bay Area. Destinations served by one or two flights each per week include: Anchorage, Alaska, Yokota Air Base, Japan; Osan Air Base, Korea; Kadena Air Base, Okinawa; and Clark Air Base, Philippines. MAC counter staff reports about seven days wait is typical for Space A'ers departing Oakland. MAC passenger counter on the main concourse alongside commercial airline ticket counters is open 24 hours daily. Flight information may be obtained by calling (510) 635-8482.

The Airport USO offers travelers a place to sleep, wait or sip coffee 24 hours daily. Its permanent facility on the terminal's 2nd floor opened May 12.

Free child care for NAS shoppers

All military families from NRMCOakland, who use the facilities at Alameda Naval Air Station may take advantage of the CO-OP Play and Learn Center there.
CO-OP is a volunteer parent group which provides free drop-in child care. It has been designed for parents who need a place to leave the kids while going to the commissary, dispensary, or just taking some needed time to be alone. It does not provide full-time child care. Members volunteer time in proportion to the amount of time they utilize the center.
The hours of operation are:
Monday 8:30 a.m.-12:30 p.m.
Tuesday 8:30 a.m.-4:30 p.m.
Wednesday 8:30 a.m.-12:30 p.m.
Thursday 8:30 a.m.-4:30 p.m.
Friday 8:30 a.m.-4:30 p.m.
The CO-OP is located in the North Housing Community Center on Mosley Ave. For further information call during hours of operation at 522-8768, or the Family Service Center at 869-4256.

Chiefs to challenge MSCs in NRS benefit softball game

The second annual Navy Relief Society benefit softball game will be played on Field One at 2 p.m. on Friday, May 21, with Chief Petty Officers matched against Medical Service Corps Officers.

Each participant will donate \$2 and the basket will be passed among the spectators. All proceeds will go to the Navy Relief Fund.

The MSC's won last year so the chiefs are looking for a win this year. HMCM Mickey Maramoto is the coach and starting pitcher for the chiefs while LTjg Owens is the coach for the MSC team.

The game should be exciting and a lot of fun. Refreshments will be available.

Nimitz Run at TI

The Seventh Annual Nimitz Run, sponsored by the Special Services Department, Naval Station Treasure Island and the NROTC, UC Berkeley, will be held Saturday, May 29 at 8:30 a.m.

Runners will have the opportunity to run Treasure Island, taking in scenic views of San Francisco, Oakland, Alcatraz, etc. with a choice of two courses: 5K and 10K. The 5K will encircle flat Treasure Island and the 10K will cover Treasure Island plus the challenging inclines on Yerba Buena Island. Choose either course on race day.

Categories by age divisions for each race will include both men and women: 12 years and under, 13-18 years, 19-29 years, 30-39 years, 40-49 years and 50 and over.

Race day registration will be \$7. Awards will be presented. T-shirts to all finishers. Refreshments served.

To get to Treasure Island, take the Treasure Island exit off the Bay Bridge and follow the signs. Personnel at the main gate will direct you to parking and race starting line.

For further information call (415) 642-3551.

Tennis, anyone?

Tennis lessons will be available on base courts soon on Mondays from 9:30 a.m. to 12 noon with instruction from Dr. Paul Welles.

One-hour lessons cost \$20 for a group of four persons, \$18 for three, and \$16 for two. One-half hour private lessons are also available for \$8.

To sign up or for further information, call Dr. Welles at 359-4537.

Track, field meet slated next week

The Central Pacific Regional Track and Field Championships are scheduled for May 22 at Merritt College, 12500 Campus Drive, Oakland, beginning at 1 p.m.

Each command may enter three participants in each event except the relays, which are limited to one entry each. A participant may enter any three events plus both relays.

Events for men will be: Mile, 440 yard, 100 yard, mile relay, 800 yard, 220 yard, 2-mile run, 180 yard low hurdles, 880 relay, broad jump, triple jump, pole vault, shotput, discus, javelin and high jump. Women's events include the mile, 100, 220 shotput and long jump. Participants must provide their own equipment such as shotput, javelin, discus, pole vault pole, relay baton, etc.

Call Ron Brown, Ext. 2350 for more information.

Science camp slated for teens

A week of wilderness camping and studying such things as amphibians, insects and the stars is offered young people at the East Bay Regional Park District's Camp Ohlone Science Camp.

The once-a-year event is scheduled for June 21-27 and will be limited to 30 boys and girls, ages 11-15. In addition to meeting the age requirement, applicants must show they have a real interest in the natural sciences.

For that's what Camp Ohlone (rhymes with pony) is all about. A typical day's schedule might include a pre-breakfast bird walk, an insect program, study of aquatic and amphibian life, and to top it off, an astronomy program.

Setting for the camp is one of the few remaining true wilderness areas in the Bay region, a spot in Alameda Creek Canyon at the line dividing Alameda and Santa Clara Counties. The camp is part of Sunol Regional Wilderness.

Except for one rustic cabin that serves as camp headquarters, it is strictly an "under the stars" place.

The resident staff, all naturalists from the Environmental Education Center (EEC) at Tilden Regional Park, includes Steve Abbors and Alan Kaplan as co-directors, and Ira Bletz. Among guest leaders expected for one day sessions are two more EBRPD naturalists, Ron Russo, an expert on galls (those lumps that insects cause to grow on plants) and Alice Tetlow-Noyes, plant ecologist, along with Park Zone Manager Mel Thompson who makes spiders seem truly fascinating.

Abhors and Kaplan are asking that those interested in the camp call them at EEC, (415) 525-2233, any weekday between 8:30 a.m. and 5 p.m. Applications must be received by June 1.

The camp fee is \$115 for residents of the East Bay Regional Park District and \$135 for all others.

(East Bay Log)

Plans in progress

Dinner dance to mark Hospital Corps birthday

The Navy Hospital Corps will celebrate its 84th Birthday on June 17, and Naval Regional Medical Center Oakland corpsmen will mark the occasion with a dinner dance in the Officers' Club the following night.

A planning committee is in the process of meeting to work out the program and details will be published as they become available, said HMC

Rose Percival, committee chairperson.

Other planners are HM1 Jam Donadio, HM2 Gary Griffin, HM2 Clet Houmes, HM2 Jeffrey Bodson, HM Thomas Sharp, HM3 Lori Chase, HM Kelly McDonald, HM3 Carrie Findle, HM3 Gregory Primus, HM3 Donna So warzkope, HN Robert Arrowsmith, H Alechia Bellizare, and HN Lorea Tarpley.

Branch clinic representatives are HM2 Judy L. Grimm, Alameda; HM Ruddy N. Delumpa, Treasure Island; HM1 Gilbert P. Rubio, Moffett, and HM3 Dawn L. Dillman, Mare Island.

Advisors include HMCM Al Maramoto, HMCM C. Ray Graves and HMCM Charles Dackerman, Command Master Chief.

Fishing improved with sunny days

Along with our dispositions, fishing has improved in East Bay Regional Park District lakes with the advent of real spring weather.

At **Lake Chabot** trout are hitting salmon eggs or Velveeta cheese with limits and near limits the rule. Catfish are on the bite as well and a six-pound largemouth bass was caught over the weekend on a rubber worm.

A few stripers are being caught at **Antioch Pier**, but at **Contra Loma**, also in Antioch, almost everyone is catching two or three catfish a day.

Catfishing is also good at **Cull Canyon** with chicken livers, clams and nightcrawlers all proving effective bait.

Meanwhile the anglers at **Del Valle** in Livermore are in seventh heaven with large and small mouth bass really starting to get active now.

At **Don Castro** in Hayward, trout action is improving as the water clarity increases and chances of four to five fish per rod excellent.

The most active feeding time for trout at **Lake Temescal** is in the mornings with Velveeta cheese remaining the best bait.

Fishing is also excellent at **Pt. Pinole** in Richmond with both sturgeon and striped bass leading the parade, and at **Shadow Cliffs** (Pleasanton), the trout feeding frenzy has finally begun and anglers are regularly getting limits and near limits of 10 to 12-inch fish.

(Art work by Lefty Burgess)

A 3 and 5.3 mile "bedpan" fun run will be held on medical center grounds Saturday, June 5, beginning at 8:30 a.m. to benefit the Navy Relief Society.

Open to all, the entry fee is \$6.50 and all participants will receive a free shirt.

For course details, see the diagram on hospital bulletin boards.

Porthole events

SCHEDULE FOR MAY 1982

- Fri., 14th, 3:30 p.m. — Wine Tasting
- Fri., 14th, 8:30 p.m. — "Spokes" Country Western Band
- Fri., 21st, 8:30 p.m. — "Spokes" Country Western Band
- Sat., 22nd, 8 p.m. — Bucky Buckhorn D.J.
- Fri., 28th, 8:30 p.m. — Memorial Dance with Navy Dance Band
- Sat., 29th, 8:30 p.m. — Smoke John — Roller Disco D.J.
- Bingo every Sunday at 6 p.m.
- Brunch every Sunday 10 a.m. to 2 p.m.
- Buffet every Sunday 4:30 p.m. to 6:30 p.m.
- Monday night baseball on six foot wide screen T.V.
- New Video games "Pac-Man," etc. to be installed shortly.
- Video game contests planned Tuesday nights.

Gloria Grace selected command Family Advocacy Representative

Gloria J. Grace, an experienced and well-educated social worker and the mother of two, has been selected to become Naval Regional Medical Center Oakland's first full time civilian Family Advocacy Representative (FAR).

In the GS-12 Psychiatry Service position Mrs. Grace will develop a program involving the problems of child and spouse abuse and sexual assault. "It's good to see that we are putting this program into operation," she said. "There is a real need."

No stranger to the command, Gloria has been employed at Oak Knoll for more than three years, working as a social worker in the same service, and in that capacity as an advisor in child guidance to Pediatrics.

She has 10 years federal service, working previously as a psychiatric social worker for the VA Hospital in San Francisco and as a counseling supervisor for the VA Hospital in Martinez. One of her other previous jobs was in the mental health specialty with a private, non-profit agency in Berkeley. Mrs. Grace attended both San Francisco State University and University of California, Berkeley. She has earned a bachelor of arts in social welfare, and master's degrees in both social work and public health.

Born in Laurel, Miss., and raised in San Francisco since the age of six by her parents, Andrew and Ruth

Gloria Grace

Gonzales, Mrs. Grace now makes her home in Richmond with her husband Al and children Karla, 10, and Brian, 4.

Her community service includes serving on the board of a non-profit mental agency; as a friend of the board of the Richmond Ballet Company, and volunteer time with Girl Scout Troop 219, El Cerrito-Kensington Association.

cuts time lag

Purchasing authority increased for NRMCO

Purchasing authority of Naval Regional Medical Center Oakland has recently been increased from a \$10,000 to \$25,000 limit, according to Lieutenant Fred White, Chief of Supply Service.

The increased grant was authorized by the Naval Supply Center, Oakland, in half of the Naval Supply Systems Command, through an April 30 letter to Admiral Walter M. Lonergan, Medical region commanding officer.

"This increased authority will allow us to better support our customers," Lieutenant White said, "through reduc-

tion of time between requisitioning and actual purchase." He estimates that as much as six months may be saved on some procurements.

Execution of the authority is limited to small purchase procedures. Guidance and assistance in implementing the change will be provided by the Regional Contracting Management Staff of NSC Oakland.

Medical center purchasing personnel include Bill Abbott, Geneva Adams, Sharon Burdoff, Lil Comella, Delores Glazis, Elva Knight and Jackie Thomas. Their supervisor is David Strauss.

PM proposes CFC change

The Office of Personnel Management has issued proposed regulations governing operation of the government's annual charity drive, the Combined Federal Campaign (CFC). They establish a framework in which federal employees will have a wide choice of charitable agencies to which they may contribute, and will be encouraged to mark their contributions for specific charities, rather than make an undesignated gift which is then distributed among many participating organizations.

The regulations, on which public comment is invited for 30 days, implement the recently issued Executive Order 12353, and are designed to provide precise criteria for participation in operation of the campaign. Early this year, a Federal District Court found

that rules previously used to run CFC were vague and imprecise. The new regulations supply the precision and detail which earlier rules lacked.

"Much of the problem in the past in the campaign has been a very uncharitable dispute among the parties involved over undesignated funds," Director Donald J. Devine noted. "The only real solution to this problem is to eliminate, or at least sharply reduce, such undesignated contributions. All contributors will be warned on the pledge card, in red ink, that if they fail to designate specific charities, funds will be designated for them by a Principal Combined Fund Organization."

These organizations, he said, will have allocation committees which are

\$6,000 thus far

Fund-raising events support Navy Relief

LCDR Robert K. Ridgeway, NRMCO Oakland's project officer for the 1982 Navy Relief Society fund drive, reports a total of \$6,000 collected as the campaign reaches its half-way mark.

Sweet smell of success

The Mother's Day rose sale conducted in the hospital lobby a few days before the annual observance, swelled the coffers with a \$720 profit and brightened several offices around the medical center.

Bake-offs

Challenge bake-offs between departments are underway in the "goodie" class. Oncology did a great job, selling more than \$123 of delicious, homebaked pastries, but the Ninth Deck raced ahead with a \$221 sale. Yet to be reported are profits from last Friday's Fifth Deck bake sale.

Raffles

CDR Stanley R. Bagbey of Nursing Service is still raffling off the "Ugly Sailor—Modern Navy Nurse" art work, with the lucky number to be drawn June 4.

Meanwhile, LT Faythe Weber and LCDR Margaret Burns are organizing another special raffle for the good of the cause. It looks like the prize in this drawing will be a free flight to Hawaii for some lucky active duty military person.

Photo Sale

The dramatic night color photo of the main hospital building, taken a couple of years ago with much preparation and patience by HM1 Garry Silk assisted by Herb Queller, may be purchased for \$20 at the Information Desk in the main lobby. This beautiful print makes an excellent gift for a departing shipmate or a permanent reminder and souvenir for your own duty here. All proceeds go to Navy Relief.

Softball challenge

The annual Navy Relief Softball Game between the Medical Service Corps Officers and Chief Petty Officers of the command was played last Friday in the athletic field on base. Although our deadline prevents publishing results

this issue, all signs pointed to a good contribution to the fund, regardless of which team won. Two dollars was donated by each of the players and the basket was passed among spectators.

Car Wash

Next Friday, June 4, at 2:30 p.m., Operating Management, assisted by personnel of the Sixth Deck and Military Manpower, will wash anyone's private vehicle for a donation to Navy Relief. The car wash will be held behind the Porthole, Bldg. 130.

Bedpan Run

And, of course another way to help the worthy cause and have some fun on your own is to enter the first Bedpan Fun Run, to begin at 8:30 a.m. on Saturday, June 5. If you haven't yet registered, you may still sign up for a \$7 entry fee. The 3-mile and 5.3 mile flat and rolling course, including a steep, uphill grade, will begin and end by the Emergency Room/Outpatient entrance. All entrants will receive a T-shirt.

For those who prefer to give an outright cash or check donation, keypersons are still available throughout the medical center to receive your contribution.

Cultural workshops slated for military

Military rights and responsibilities and cultural workshops will be conducted in Room 3 of Bldg. 75A on June 1 for enlisted, and June 8 for officer personnel.

Personnel selected for these workshops must have six months to a year of duty remaining at NRMCO Oakland.

The classes will begin at 7:45 a.m. each day and run approximately eight hours.

LCDR Douglas Love, Commander Coordinator for the Phase II Equal Opportunity Program, is in charge of the training.

HELPING HANDS—At a "battalion aid station" set up at Pier 39 in San Francisco on Armed Forces Day, Commander Valaine Pack and her team of Oak Knoll nurses and corpsmen work rapidly to stabilize a "patient" as a huge crowd looks on. (More Armed Forces Day photos, page 6).

EDITORIAL

**Memorial Day
May 31**

For those who wonder why

I am an American—defender of freedom and guardian of the nation.

The service I render to my country is not only duty, but an honor and a privilege. Duty, as a citizen whose life holds responsibility for country in high regard. Honor, as an individual before God with respect for the ideals that make these United States a democracy. Privilege, for the ability to give, and fortunate enough to have been born in a land where my life, mind and ideals are my own.

To serve our country as a fighting man is a trust bestowed on me by the people. It is my hope for millions outside our borders who suffer under the rampage of tyranny, the absence of justice and freedom.

As an American fighting man, I find faith in my God and courage from

those who have gone before me. My reason for service is a symbol for all men to see that the sacrifice of my fellow Americans was not in vain.

I make no claim to another's land or government but stand ready at the borders of freedom, not as an aggressor, but as a defender; and the nations of the world will know that "the pursuit of happiness" is more than spoken words, but a way of life.

The orders I receive are derived from the people and I am responsible to them.

LT. JOHN L. BANKS, III, USAF

The words above are an epitaph for their author who was a friend of Lieutenant Commander Thomas J. Tomzak, physician on the OB/GYN medical staff.

John Banks III was 24 years when the four-engine transport he was copiloting in South Vietnam crashed, taking his life.

The short essay entitled "I Am American" was written by John Banks for an essay contest and between pages of a scrapbook that had entrusted to his best friend before he was killed. The friend returned the scrapbook to Banks' father, a resident of Superior, Wis.

Memorial Day Message From The Secretary Of Defense

There are certain times when the links between our past, present and future warrant recognition and clear focus. Memorial Day is such an occasion, a time set aside to bring brightly colored flowers and flags to the gravesides of our nation's honored dead. A day when the bugler's taps echo across our cities and towns and lonely country cemeteries. A day when we are all reminded that freedom is not bought cheaply. A time when we acknowledge the awesome price that a nation must be prepared to pay if it wishes to remain free. On this as other Memorial Days, we pause to honor those men and women in uniform who have given their lives so that we may enjoy and sustain that precious light of liberty. The link that this day has with tomorrow is our solemn pledge to future generations of Americans—that we too are ready to pay that price in defense of that cherished legacy. We owe tomorrow's Americans nothing less.

James A. Schlesinger

Human relations council seeks more members

Volunteers are being sought to become members of the Human Relations Council, a committee which represents every member, civilian or military, assigned to this command.

Its purpose is basically four-fold: (1) To resolve tensions and conflicts; (2) To promote equal civilian employment; (3) To ensure equal opportunity and

treatment of military personnel to the maximum extent practicable, and (4) To help establish lines of communication among all members of the command.

Those interested in serving on the council are encouraged to call either Weldon Miles at Ext. 2554, or Captain Rainer Schmidt at Ext. 2408.

Navy Relief has genuine concern

Like so many of the truly good things in this life, a wealth of myth and misunderstanding surrounds one of the greatest benefits available to naval personnel and families—the services of the Navy Relief Society.

Too many people are unaware of the variety of things Navy Relief can do for them. And once apprised of the society's resources, some are fearful of going to Navy Relief for help.

One of the tragedies which occurs frequently is when a family is utterly financially and simply cannot make ends meet. Because they feel they are "too proud" to go to Navy Relief, they will take out a large commercial loan and be faced with enormous monthly payments compounded by considerable interest charges.

This isn't saving face. This is folly!

"But how do I get a loan from Navy Relief?" one asks, "what do I do?" First, go to the Navy Relief office at Naval Air Station Alameda and tell the receptionist the purpose of your visit. An interviewer will see you next and help you fill out the necessary forms. (Yes, there is a form which has to be filled out so that Navy Relief can keep its records straight.) If, after your financial situation is considered it is found that you cannot pay the society for the loan, you will be given the money outright. If monthly payments are determined to be fair, you will be paying only for the principal of your loan—not for inflated interest rates.

Think of Navy Relief as a neighbor or family member to whom you would turn in time of need. The staff and volunteers are trained and considerate people. They want to see that you have the help you need. A Navy Relief volunteer would not come to your home and discuss cases over the dinner table than would a bank clerk who takes an application for a car loan. It's business, pure and simple—except at Navy Relief, where businesslike aspects are tempered with a genuine concern for your welfare.

OK, you say, we're making it and don't need money, so why do we need Navy Relief? Lots of reasons. If the purse-strings are a bit tight during maternity, for example, Navy Relief can furnish all or part of the beautiful layette, based on need. A Navy Relief nurse can also help and advise when the mother and baby come home.

You can also shop at the Navy Relief Thrift Shop and get great bargains on clothing and other miscellaneous items which are as good as new before they come out for sale.

Just don't be bashful about going to Navy Relief for help. Like medical commissaries and exchanges, Navy Relief is one of the great benefits of military service.

If you're in a position not to need any of the services this great society offers, you can volunteer to help and give your own time to make an already tremendous organization even better.

And... the once a year call for contributions ends at Naval Regional Medical Center Oakland next week. Your donation will be placed in reserve for emergencies you, your shipmates, families or surviving dependents may need. Remember, not one cent of any donation is used for overhead, operating or administrative costs. Navy Relief truly exemplifies the saying "the Navy takes care of its own."

Civilian FEGLI

Do your records reflect your choice?

If you, as a civilian employee, have had a Designation of Beneficiary form on file for your \$10,000 FEGLI optional insurance policy which simply names someone to receive your "optional insurance" and you have since signed up for the Additional Optional Insurance (multiples of from one to five times pay), that person named on your designation form may be entitled to the Additional Optional Insurance as well.

If this is not what you intended, you could submit a new designation, SF 1823, immediately. If you need a copy of a new designation form or if you wish to review the form you have on file, contact Civilian Personnel Service, Ext. 2116.

Employees are reminded that they do not have to file a designation of beneficiary form if they are satisfied with the order of precedence outlined in the FEGLI law. In the absence of a

designation of beneficiary, the following order of payment applies: (1) widow or widower; (2) children (including descendants of deceased children); (3) parents; (4) executor or administrator of the estate; (5) next of kin.

(FEGLI Bulletin)

Tuition assistance funding reduced

Navy Tuition Assistance Funding has been reduced on 50 percent of course costs for all applications received on and after May 5. The reduction is due to a significant increase in requests for tuition assistance funds and increased tuition charges.

The 50 percent funding applies to all Navy members who apply for the program for the remainder of this fiscal year (through Sept. 30, 1982).

PACE examinations eliminated

The Office of Personnel Management has announced that the PACE examination has been abolished, and will be replaced with a new appointing authority. Donald J. Devine, OPM Director, said greater emphasis will be placed on filling GS-5 and GS-7 professional and administrative career (PAC) positions through internal mobility and displaced employee programs.

The OPM action complies with terms of a consent decree entered by the U. S. District Court for the District of Columbia requiring that the federal government use a method of selection for PAC jobs which ensures that the percentage of blacks and Hispanics hired be proportional to the number seeking such positions.

The PACE hiring register is no longer available for appointment of individuals in professional and administrative career positions and the exam itself has been abolished.

Agency heads and personnel officials have been informed that most new PAC vacancies will now be filled through internal hiring, interagency transfer, and placement of individuals who have been displaced under reduction-in-force procedures. Internal hiring and transfers will benefit minorities, since they are represented in greater numbers in the federal workforce than the general population. These methods will also serve the affirmative action goal of providing for upward mobility of minorities. Placement of employees displaced due to RIF will have a similar effect since RIF retention relies heavily on seniority and blacks and Hispanics (as well as women) generally have less seniority and are disproportionately represented among RIF'd employees.

While internal hires, interagency transfers and placement of displaced employees are expected to provide candidates for many PAC vacancies during the coming years due to planned cuts in the number of federal personnel, they cannot provide candidates for all PAC positions which must be filled.

In order to provide a means for outside hiring which will be necessary, the President announced his intention to create new excepted service appointing authority under Schedule B to fill entry level PAC positions at the GS-5 and GS-7 levels. The new appointments will be allowed under the PAC Outstanding Scholar Program, the PAC Bilingual/Bicultural Program, the Federal Junior Fellowships Program, and other direct hire arrangements which may be negotiated between

OPM and individual agencies.

These hires will be non-competitive appointments, although appointees will be eligible for promotion to competitive positions at higher grades. Promotion will be based either on an examination or a review of the employee's performance. PAC appointees who participate in a cooperative education program or the Federal Junior Fellowship Program will be converted to competitive status in accordance with the terms of those programs.

In addition, proposed regulations implementing the new hiring authority provide for basic civil service protection for those appointed under the new system. They would enjoy rights similar to those given competitive appointees in the areas of removal, suspension, reduction in grade or pay, furloughs and retention rights in reduction in force after completion of the normal trial period of one year from initial appointment.

Military air fare discounts cut

Eight airlines have announced that they have reduced the discount offered to active-duty military members from 50 percent of the standard coach-class fare to 33-1/2 percent, effective May 1. The airlines are Air Florida, American, Continental, Delta, Eastern, Pan Am, Texas International and United. A ninth carrier, Western Airlines, has announced that it will cut its discount to 25 percent June 1.

Many airlines still offer the 50 percent discount. Trans World Airlines (TWA) and USAIR have assured the Military Traffic Management Command (MTMC) that they will continue their programs at that level for the foreseeable future.

According to MTMC, the discount reductions are part of an overall effort by the airlines involved to increase revenues. MTMC recommends checking with a Scheduled Airline Traffic Office (SATO), travel agent, or airline ticket office for the best travel rates.

MTMC will advise commands of additional changes to the discount fare program as they occur.

TEAM SPIRIT—When Nurse Corps Commander David Figgins was frocked earlier this month, a very special friend was present to offer congratulations—Mr. Franklin Mieuli, owner of the *Warriors*, Oakland's pro basketball team. Mr. Mieuli (holding the Sherlock Holmes type cap with which he has become identified) was a Lieutenant (junior grade) in the U. S. Navy during World War II. Commander Figgins' sister Shirley works for Mieuli but was unable to be present for the ceremony because of a dental appointment. The newly-frocked nurse is assigned to our NAS Alameda Branch Clinic.

Nursing supervisor job open

Applications will be accepted through June 4 by Civilian Personnel Service for a Supervisory Clinical Nurse, GS-10, in the Labor and Delivery Ward of this hospital.

The person selected for the job will work rotating shifts and some weekend duty may be required.

A full professional knowledge of the field of nursing is required.

The job entails directing the work of

all military and civilian personnel assigned to the ward, interpreting doctor's orders, assigning health care consumers to subordinates, establishing and implementing a quality assurance program, and training of staff members.

Detailed information may be obtained from Christine Lessler, Ext. 2116.

Savings Bonds—something to think about

The annual U. S. Savings Bonds campaign will begin here next month and keypersons will be appointed in the near future.

In the meantime, here are some points to consider:

- Savings Bonds pay more interest than any bank or savings and loan pass book accounts or savings certificates, and there is never a penalty for early withdrawal.

- Bonds are not taxable by the state and are subject to federal tax only when cashed.

- With the current interest rate at 9

percent, bonds have a rate equivalent to at least 11 percent and as much as 20 percent, depending upon your tax bracket.

- If bonds are lost, destroyed or stolen, they can be replaced without charge and still carry the original issue date.

- Bonds help reduce inflation. The national debt relies on the sale of Treasury bills and savings bonds. The more bonds sold, the less need to sell high interest T bills; consequently, less money goes out of the Treasury.

- Under the payroll deduction plan, as little as \$6.75 per month may be withheld and your bonds are delivered automatically to you as they are purchased.

CFC change—

(Cont'd from Page 1)

broadly representative of the community in which they operate. The CFC will remain decentralized, operating through local Federal Coordinating Committees. These committees, with both federal employee and citizen members, will determine which charitable agencies will be admitted to the campaign, subject to national eligibility criteria. They will also select the group which will serve as the Principal Combined Fund Organization. All major decisions will be made by the local Federal Coordinating Committees, subject to the approval of the Director of OPM.

'Helping Hand' offer for drug abusers

"The vast majority of Navy people want to come aboard and get rid of drug abuse in the Navy. Traditional sources of counseling and leadership are available and ready to help," according to RADM Paul J. Mulloy, Director of the Navy's Human Resources Management Division.

He adds that "the signal is clear. The Navy means business. Those who traffic in or use drugs, and won't change their ways don't belong and won't be tolerated in our Navy. But at the same time, we will always extend the helping hand of counseling and treatment to shipmates by a Drug and Alcohol Program Advisor (DAPA) and collateral duty Drug and Alcohol Advisor (CODAA), members of the Medical Corps, and Chaplains.

Eleven officer therapists

Occupational therapy—'basket-weaving'

WORKING THE TOE—Sonar Technician Second Class Martin L. Jumper, who had his left big toe successfully transplanted to the stump where his thumb used to be in surgery here on Feb. 4, works with a leather punch and hammer to coordinate movement in the repaired hand.

RETURNING NORMAL FUNCTION—LT Clark explains to ICFN Richard Trader how doing fine needle and thread work will strengthen a hand muscle following tendon repair.

Occupational Therapists (OTs) are on the Navy's endangered species list.

In February 1980, the Bureau of Medicine and Surgery elected to phase out occupational therapy services in all but four major regional medical centers. At the same time it was decided to eliminate the remaining OTs by attrition. The Navy's portion of the PT/OT Tri-Service Technician School was also discontinued, although the Army and Air Force continue to educate their technicians.

OTs began their profession in the military. They were initially called "reconstruction aides" and considered "worth their weight in gold" by General John J. Pershing. They served the Armed Forces in field hospitals by providing a level of work tasks and arts and crafts to aid rehabilitation of

injured limbs and to assist patients in diverting their otherwise painful hours while hospitalized.

Eventually OTs became the largest body of bio-medical professionals in the Navy, having a total of 27 clinics. This number was reduced to 12 after World War II due to a reduction in military strength.

In the early 1950s, the professional requirements for occupational therapy were upgraded. A 1953 Navy memo reported a critical situation in the procurement of certain qualified bio-medical specialists, including OTs. Nurses trained in the War Emergency Course for Occupational Therapy were given an option to become full-time occupational therapists.

In addition to registration requirements and degreed programs in occupational therapy, the OT theory

base began to be questioned within the profession and several diverse interpretations of practice began to appear. This state of influx presented difficulties in both the areas of practice and in explaining the occupational therapy mission to physicians and health care administrators.

Early literature presented findings that although occupational therapists were capable of organizing excellent clinical programs, few elected to assume administrative leadership roles. Interviews with retired occupational therapists have borne this out. Significant leadership did not emerge from the ranks of OTs although the numbers of therapists were greater in proportion to that of other bio-medical specialties in earlier years.

The "Bolton Act" in 1956 allowed male OTs to become commissioned officers. Up until then, all commissioned occupational therapists, as well as physical therapists and dieticians, were women.

The number of commissioned Navy OTs engaged in clinical practice now stands at only 11.

For years, the "basket-weaver" syndrome was applied to occupational therapy programs. What most people don't recognize, however, is that in the past 30 years occupational therapy has advanced its scientific data base just like other health care professionals. Although the tools of the trade, i.e.,

work tasks, arts and crafts, remain basic to treatment, methodology and application of these modalities have changed in order to reduce in-hospital treatment time, and to coincide with acute care medicine.

At present, the occupational therapy clinic at Naval Regional Medical Center, Oakland is actively engaged in an array of care: psychiatry, alcohol rehabilitation and hand-trauma rehabilitation under the direction of Lieutenant Commander Osborne T. Watkins, Medical Service Corps.

Occupational therapy also provides self-care evaluation and training for neurosurgical patients and others with varied disabilities.

In 1981 occupational therapy in the civilian sector was cited as the largest growing profession. OTs are presently active in school systems, industrial vocational centers, and in private practice, as well as in hospital settings.

Will the Navy someday change its mind and reinstitute this specialty, famous American general felt worth his weight in gold? The many patients whose mental anguish have been relieved through occupational therapy and the many more who have regained full function of their formerly used hands through the modalities of occupational service, would no doubt heartily endorse such action.

By LT Nelson Clark

O. T. makes *DOING* possible

(Editor's Note: LT Nelson Clark of NRMC Oakland's Occupational Therapy staff submitted the lead article on this page three or four weeks ago. Because of space limitations and the need to take photos to illustrate the story, it was not published in the last *Oak Leaf*, but held to run this issue. Coincidentally, and without collaboration between editors or OTs at either medical center, the *Courier*, NRMC Portsmouth's very fine monthly publication, used the same subject as its primary story in the May 10, 1982 edition. The Portsmouth story was written by the editor of the *Courier*—HM2 Donald E. Zboray II, who was himself introduced to the eastern Occupational Therapy Clinic as a patient 19 months ago. Ten months before coming to NRMC Portsmouth, Zboray was injured in an auto accident. He had brachial plexus and ulnar neuropraxia injuries to his right upper extremity, his dominant limb. He was treated by a civilian physical therapist for the loss of mobility and enervation in an attempt to retain

him in the isolated duty billet he held in central North Carolina. Later, he was transferred to Portsmouth and placed on limited duty. He was assigned to the OT Clinic as a student member and as an outpatient. He learned to write with his left hand and developed other fine and gross motor skills, effecting a successful change in dominance. Through the co-ordinated efforts of the three major areas of treatment available at the OT Clinic (hand therapy, orthotics and occupational psychology) Zboray gradually regained his right-handed skills while following a home program of self-help physical therapy to strengthen atrophied muscles. By May 1982 HM2 Zboray was well on the way to full recovery of the use of his right hand. He was discharged as an outpatient and given a new billet as the *Courier*'s editor and photojournalist. With his permission, we repeat the story here to complement the one written by our own occupational therapist.)

By HM2 Donald E. Zboray II

CDR Rob Zila, LCDR Jim Walker, LCDR Steve Faherty, HM2 Marie Burks, HM2 Brad French, HM3 Mitch Pierce, HM3 Rick Long, HN Julie Benton, and HN Janet Raven are very special members of the NRMC Portsmouth health care team. They are the Medical Service Corps officers, Physical Therapy-Occupational Therapy Technicians, and general duty Hospital Corpsmen who make "doing" the little and the great individual achievements in life possible... such as being able to hold a drinking glass, stand up straight, explore creative abilities, regain the use of an injured arm or leg, and finding a way to overcome a congenital disability.

They assist orthopedic surgeons to prevent physical disabilities following surgery. They straighten the spines of young adolescent women inflicted with

scoliosis. They guide psychiatric patients, through group projects and individual decision-making challenges. They support the efforts of alcoholics to rehabilitate.

CDR Zila is a highly skilled orthopedic specialist. The work performed by Zila and assisting corpsmen—splint and brace fitting and fabrication—reduces the operational expense the Navy would face without their expertise. I report on the OT Clinic's orthopedic construction during February 1982: only \$1,100 was expended to provide 169 various splints and braces which were fabricated in-house for patients referred by the Orthopedic Service.

The same services from civilian providers would have cost the government \$12,687. All orthotics are custom made for NRMC Portsmouth patients. Additionally, since they are produced

art--or significant patient therapy?

in-house, splints and braces can be put into use by their patients in less time because the need for return visits for fitting is greatly reduced.

LCDR Faherty is a registered occupational therapist who specializes in hand therapy. In February, he supervised or personally gave treatments to 27 outpatients. He is also a member of the Orthopedic Service Hand Clinic team, treating both outpatients and inpatients with the surgeons before and after surgery. The 327 outpatient visits in the O.T. Clinic would have cost the Navy approximately \$8,502 if provided through outside sources.

LCDR Jim Walker directs the occupational psychology mission of the O.T. Clinic which augments the outpatient care for patients of the Psychiatry and Alcohol Rehabilitation Services. Meeting these consultation needs accounts for the clinic's largest number of patient visits. In February, more than 1,200 patients visited the O.T. Clinic during group periods. Civilian care for these patients would have cost \$21,525.

Many more patients are seen by LCDR Walker and the technicians during relaxation therapy sessions which are held on the wards.

If February 1982 is considered as an average month in terms of patient load (1,469), comparable civilian care from out-of-water practitioners would cost \$42,674. That can be extrapolated into an annual expense of \$512,088 for services and materials.

Well, what does the O.T. Clinic cost? In addition to the \$13,200 spent annually for orthotic materials, another \$18,800 is expended for arts and crafts supplies and equipment and materials required for hand therapy patient care. Staff salaries approximate \$175,000, annually.

Helping people to make "doing" possible at NRMCMC Portsmouth will cost about \$207,000 in FY 82. Approximately \$305,088 will be saved by the Navy because this region has an Occupational Therapy Clinic.

Hospital Corpsmen who hold the Physical Therapy-Occupational Therapy NEC (8446) are a vanishing breed in today's Navy Medical Department. The last P.T.-O.T. technician class graduated in February 1981.

The numbers of Medical Service Corps officers who specialize in occupational therapy are also being reduced through normal attrition.

While Navy occupational therapists and technicians are being phased out, the Navy will begin to replace services now provided by military personnel by CHAMPUSing O.T. patients out to civilian therapists. It may also begin recruitment of occupational therapists as civilian government employees.

The people who make "doing" possible at NRMCMC Portsmouth still take care of the Navy's own more frequently with each passing month. During March 1982, the O.T. Clinic staff set a new monthly record for patient visits by logging 2,000 patients.

TESTING—Mrs. Mary Russell, wife of a retired Army officer, has her grip tested by LT Nelson Clark in the patient's first visit to the Occupational Therapy Clinic.

WOODWORKING—FTM2 Antonio Gonzales puts the final touches on a little wooden house he built during visits to the Occupational Therapy Clinic. The hand and arm brace assists in strengthening fingers which had become atrophied.

Physician's Assistant praises military educational opportunity

"I feel that the military presents a unique opportunity to advance oneself professionally, educationally and personally to individuals who apply themselves to looking for both the viable and not-so-obvious ways to build a profession that can last them a lifetime—especially Hospital Corps personnel."

The above statement, made recently by physician's assistant CWO3 Herb Johnson of the Concord Naval Weapons Station Branch Clinic, is not a hollow phrase, for here is a former 17-year-old high school dropout with no apparent prospects who now holds a bachelor and a master's degree and is putting his sights on a doctorate.

Originally from Baltimore, Md., Johnson joined the Navy 19 years ago. He served on the USS AULT (DD 698);

National Naval Medical Center, Bethesda; with the 9th and 12th Marines in 3rd Mar Div., Republic of Vietnam; at Naval Air Station Fallon, Nev.; with the Inshore Undersea Warfare Group One, aboard USS ILLUSIVE (ASO 448), and with the 4th Reconnaissance Battalion, 4th Mar. Div. He has been assigned to the Oakland Medical region nearly five years and will soon depart for new duty at the station hospital, Whidbey Island, Wash.

CWO Johnson completed "A" and "B" Hospital Corps schools, the Field Medical Service School, Search and Rescue School, Career Counseling School and Physician Assistant's school in the Navy, also earning a GED high school completion, a bachelor of science in health care from the University of Nebraska College of Medicine, and a master's in clinical psychology from John F. Kennedy University in Linda.

"Noteworthy is that the Director of Health Care in the region—CAPT W W Edge, and LCDR Karl Schweinfurth, (former) OIC of Concord Branch Clinic and Drs. (Lowell) Kallen and Lance Martin of Psychiatry all actively

encouraged my education and dovetailed my training with the curriculum at John F. Kennedy University's graduate school of clinical psychology," he said. "As a result, I had probably the finest internship year possible, completely within the structure of the Oakland Naval Regional Medical Center. This is important because it demonstrates again and again the assistance I've received since I've been in the naval service from both my contemporaries and my superiors whenever I wanted to get ahead. The tremendous encouragement from my line officer supervisors in both the Navy and Marine Corps, (and) the Naval Medical and Medical Service Corps superiors has always been both verbal and in the form of personal assistance. Role-modeling by these people, and their positive attitude about their naval careers, has done much to keep me actively pursuing education along my career path. I owe the folks, too numerous to mention, a great deal when I look at my master's degree."

CWO3 Herb Johnson

ADM Long extended

President Reagan has approved the extension of ADM Robert L. Long as Commander in Chief, Pacific, until July 1, 1983.

This is ADM Long's second extension as Commander of all U. S. Forces in the Pacific Area.

NEW TO OAK KNOLL—Patrick Heaphy is a recent transfer to Naval Regional Medical Center Oakland's Public Affairs Office from the Chaplain's Office at Presidio of San Francisco. Pat originally comes from upstate New York and holds a bachelor of science from St. Francis College in Brooklyn. He assists the PAO and Oak Leaf Editor in typing, research, coordination and administrative details, and also escorts visitors.

NRMC Oakland in public spotlight for AFD

Thanks to an excellent volunteer response, Naval Regional Medical Center Oakland's participation in Armed Forces Day activities in San Francisco May 14-15, was well-attended and appreciated.

Displays and demonstrations featured the Prosthetics Laboratory, cardio-pulmonary resuscitation and Heimlich maneuver, and free blood pressure checks for visitors.

In addition, a triage scenario was exceptionally well-coordinated. A small boat in the bay shot blank ammo at a military subject on the pier. The "patient" shouted for corpsmen, four of whom responded, running 50 ft. with a stretcher. The "patient" was put into the crackerbox ambulance and the siren sounded for three seconds. A medical officer then examined the victim and sent him to a Battalion Aid Station where nurses and corpsmen went to work, using supplies borrowed from Staff Education and Training.

LTJG Joel Libby was the medical center's project officer. Those working both days on the event were HM2 Thomas Boman, ENS Kaki Douglass,

HM3 Carrie Findley and HM2 Pat Jones.

Also at the displays on Friday were LCDR Mark Dawson, LT JoAnn Fritch, Mr. Andre Gilmore, HA Phillip Herman, HN Michael Maloney and HM2 William Threet, while Saturday's shift included HN Robert Arrowsmith, HM3 Allen Boatman, ENS Mark Boman, HM3 Steven Butler, LT Maureen Clary, HN Sparkle Duhe, OS1 Randy Franks, LCDR Louise George, LCDR Greg Gibbons, LT Lisa Halton, Mr. Phil Harkov, LCDR Daniel Lancaster, HM2 Larry Marchionda, HN Greg Marlatt, CDR Valaine Pack, HM3 Duanne Rudd, HM3 Brian Webb and HM3 Joel Welter.

BP CHECK—HM3 Brian Webb of the medical center takes the blood pressure of one of the visitors to our exhibit.

WOUNDED—Ensign Mark Boman, complete with realistic moulage, plays the role of a "gut-shot" victim as Hospitalman Robert Arrowsmith (with bull horn) narrates the scenario.

CPR—Using a dummy, HM2 Pat Jones shows the public the technique of cardiopulmonary resuscitation while HM3 Carrie Findley waits her turn to demonstrate the method on an infant model.

ON THE DOUBLE—With the injured "patient" now on the litter, corpsmen make a sprint to the waiting ambulance.

CHOKING—HM2 Pat Jones and HM3 Carrie Findley demonstrate the first step in the Heimlich maneuver to interested spectators.

FOR AMPUTEES—Phil Harkov (dark jacket) explains the manufacture and fitting of prosthetic limbs for amputees.

CNO says:

WASHINGTON (NES)... "Drug abuse is destructive to our efforts to instill pride and promote professionalism. It is costly in terms of lost man-hours, unnecessary administrative and judicial processing and a critical drawdown on morale and esprit de corps. It is not just the abuser who is affected, but the abuser's shipmates as well."

VA aid offered nursing students

The Veterans Administration has launched a \$4 million scholarship program in an effort to ensure sufficient nursing staff in its health care facilities.

Scholarships will go to about 300 qualified nursing students. The scholarships will provide educational benefits on a pay-back-in-service basis.

First impression: 'spirit of hope'

By Father Joe Ferraro
CDR, CHC, USN

Quite a change from Naples, Italy to NRMOC Oakland! I am still confused as to locations of wards, names, terminology; however, I am not confused about the spirit of hope I have seen in the eyes of very ill patients and in the concern and care of hospital personnel. In my early reflections on the first week at Oak Knoll I have come to understand hope as the changing of one letter: *cure* to *e*. In other words, hope is something that can and must be fostered and sponsored. Hope is learning to live in the balance, in the tension between the elements of health versus all the needs, pain and loneliness that serious illness entails. In just one week I have seen that sharing in the pain of the patient can help alleviate it. One first lesson came from a very young nurse on the 9th floor: "There's nothing wrong with crying with someone—they see you as another human being and not just a nurse." A hopeful beginning! May God grant all of us a beautiful spirit of hope and a willingness to share.

MCVICAR AND M. D. — Seabee Lieutenant Douglas McVicar, officer in charge of NAS Alameda Construction Battalion Unit, assists Rear Admiral Walter M. Morgan, NRMOC Oakland commanding officer, in officially opening an 11-unit living wing for bachelor chief petty officers at Oak Knoll. The 40-man Seabee unit supervised the renovation. They have also recently completed a chapel at the old Naval Weapons Station and a new child care center at NAS Alameda.

MOTHER'S DAY GIFTS—Minerva Mattingly, who gave birth to the first child born at Oak Knoll on Mother's Day, was the recipient of a full layette for her new baby, courtesy of the Ladies Auxiliary, Unit 10, Fleet Reserve Association. Presenting a basketful of practical and pretty items, many homemade, were Fran Barker (center), historian and chaplain for the unit, and Mary Paternoster, hospital chairperson. The first baby was a boy, weighing in at seven pounds and arriving at 3:08 a.m., May 9. The child is the second for Aviation Structural Mechanic Seaman Third Class Guy Mattingly of Moffett Field and his wife Minerva.

Criscitiello retires from Navy to begin new civilian career

Today is the last day at Naval Regional Medical Center, Oakland, for retiring Lieutenant Commander Joseph J. Criscitiello, who has served here for about nine months as Chief of Operating Management Service.

The Medical Service Corps officer, completing more than 24 years in the Navy, will continue in the medical administration field in private industry and also heads his own firm, "Cris Consultants," a management consulting business. His wife, Nurse Corps Lieutenant Commander Peggy Criscitiello, will remain on the medical center staff here where she is the director of the Intensive Care Unit.

Lieutenant Michael Lawson, who once before served in the same position, will become the acting Chief of Operating Management until a permanent replacement arrives in the fall.

LCDR Criscitiello was assigned to Naval Regional Medical Center Oakland following a position as Commanding Officer of the Third Medical Battalion, 3rd FSSG, Okinawa, Japan.

Other billets during his long service include duty with Submarine Force, U.S. Atlantic Fleet; Commanding Officer, Naval Experimental Diving Unit, and aboard the submarines USS TRUTTA (SS-421), TENCH (SS-417), COBBER (SS-344), PICUDA (SS-382) and NATHANIEL GREENE (SSBN-636).

He holds the Navy Good Conduct Award, a Meritorious Unit Commendation, the National Defense Service Medal, Sea Service Deployment Ribbon with three bronze stars, and the Expert Pistol Medal with silver "E" clasp.

In his assignment here, he directed the functions of the Fire Department,

LCDR J. J. Criscitiello

Bachelor Enlisted Quarters, correspondence management, postal, telephone, teletype, housekeeping, laundry, security and transportation.

The Criscitiellos will continue to make their home in Pittsburg.

The following new additions to the military medical/dental "family" have arrived at Naval Regional Medical Center, Oakland:

A baby boy to HM1 Kurt M. Bockoven, BuMed EOPS, and his wife Trudy, May 6.

A baby girl to LT John R. Hannig, OB/GYN Clinic staff, and his wife Nancy, May 11.

A baby boy to HN Randall E. Stovall, Pharmacy, and his wife Debra, May 18.

A baby boy to CDR Stephen J. Ancowitz, Dental Clinic, Treasure Island, and his wife Wendy, May 18.

A baby boy to LT Frank W. Hall, Pathology, and his wife Christina, May 18.

OLE'— Maria Garcia, a student aid in Transportation, is also a Mexican folk dancer. She and her partner, Arthur Sorisio, performed at a Cinco de Mayo celebration at Grant High School where she is a junior. The pretty miss has been employed part-time at Oak Knoll since March.

BEYOND THE CALL—Captain Jan Emal, Chief of Nursing Service, pitches a low ball to the batter during a May 14 softball game that matched the senior nurses against the juniors. The seniors won 20-19, but our spies tell us it was probably because the seniors instantly "commissioned" some of the best players at the medical center to join their team. It was all part of the fun celebrating the 74th Anniversary of the Navy Nurse Corps. A party followed that evening in the Oak Knoll Officers' Club.

'SLIDE!!!'—An unidentified junior nurse tries to reach base as LCDR Essie Mae Rucker, first baseman for the senior team, stretches to catch the ball.

PA lauded for supporting military basketball champs

CWO2 Richard Weaver, physician's assistant at the Mare Island Naval Support Activity Branch Clinic, has been commended for his role as team trainer for the Men's All Navy and U. S. Armed Forces Basketball teams from Jan. 18 through April 23, 1982.

In a letter to Rear Admiral Walter M. Lonergan, medical region commanding officer, Mr. W. R. Carey, head coach of both teams, said Weaver "gave unselfishly of his time and professional assistance and displayed tremendous enthusiasm and effort whenever he was asked. He was in attendance for

most of the games and always made himself available to assist in any way possible."

Carey continued, "Mr. Weaver's expertise and diplomatic, cheerful approach to sports medicine techniques were in a word, outstanding, and enhanced the image of the United States Navy and Armed Forces beyond expectations."

Mr. Carey is Director of Special Services at Mare Island. His military team went on to win the 1982 United States Amateur Basketball National Championship.

Pistol meet set at NAS Alameda

Central Pacific Regional Pistol Championships will be held at Naval Air Station Alameda on June 12 at 8 a.m. All commands in the region have been invited to participate and entries must be submitted prior to June 7.

One team may be entered from each command (four members and two alternates). The team match will consist of firing once over the National Course by each four-man team using .45 calibre pistols.

The individual match will consist of firing two times over the same course. Naval Reservists on inactive duty, Fleet Reserve and retired Naval personnel are allowed to fire in individual matches.

Call Ron Brown at Ext. 2350 for further information.

Musicians needed

If you are a musician and wish to use your talents in a fun and meaningful way—here is your chance. CDR Reed Adams, USCG, Ret., coordinator of a concert band, is looking for volunteers who can play musical instruments.

You must be able to practice on Wednesday nights in Oakland. Rides to the practice may be available, depending on where you live.

The monthly concerts are for non-profit organizations such as retirement homes. For further information call CDR Adams at 538-8787 or 462-9089.

June 5, 6

'Wild West Days' at TI

Naval Base Treasure Island will once again sponsor "Wild West Days." The fun starts Saturday, June 5, 10 a.m. to 10 p.m. and again on Sunday, June 6, 10 a.m. to 6 p.m. Treasure Island will be the place and western wear will be the dress.

Among the entertainment planned: Pony Rides, The Port City Jazz Band, Concorde Stagecoach Ride, Ashley Puppets, the Famous "Fall Guys," Universal Western Stuntmen, Barnaby (the juggler), Wackie Willie (the clown), a mechanical bull, and Yosemite Sam.

Bertie Higgins of Key Largo fame will be in concert on Saturday along with the Silver Moon Band. There will be two shows on Saturday at 6:30 and 9:30 p.m. Tickets are \$8 and are available through all Bass outlets.

The general public is invited. To take the Treasure Island exit, turn right onto the Bay Bridge. Personnel at the main gate will direct you to parking and the entertainment area.

For further information call the Special Services Department at 765-5088.

'Wet 'n Wild' tour slated

By Sally Young

On Saturday, Aug. 14, *Adventours: Wet and Wild* will take us down the American River from Chili Bar to Pt. Pleasant Beach where we'll have a picnic.

This is the ideal trip for beginners or intermediate river rafters. You have the option (at the guide's discretion) to just hang on and let the expert oarsman take you down the river, or actively participate by paddling the boat in response to the guide's commands—providing power with six other brave souls in an exhilarating slalom over rapids and through foaming channels.

When you are through with a day on the river you will have a great feeling of accomplishment and will be as refreshed as if you had been away for a week.

Before embarking on this adventure, the guides will teach you how to paddle and control your boat. Be prepared to be wet all day—if not from the spray.

Sailing event slated

Naval Station Treasure Island will host the Central Pacific Regional Sailing Championships on June 12-13, 1982 beginning at 10:30 a.m. A skipper meeting will be held at 9 a.m., June 12 at the Harbor Master's office, Naval Station, TI.

All Navy, Coast Guard, and Marine Corps personnel on active duty for more than 90 days are eligible. The boats will be Rhodes 19 Class Sloops with spinnakers and the crew will consist of a skipper and two crew members.

One entry is permitted from each base. Call Ron Brown at Ext. 2350 for further information.

and wild waves, from the water fight in between rapids.

Remember, this is not for the faint heart! It is recommended that all participants know how to swim, especially since it is not unusual for rafters to be up out of their boats, floating down the river.

Space on this trip is limited and reservations must be in by July 1. The trip price is \$72 per person. It may seem high for a day trip; however, it covers bus transportation to the river and back, instruction by expert guide (a guide will be assigned each boat), rental of rafts and personnel flotation devices (life jackets), and food and drink for the picnic that follows.

For additional information, call me at 639-2479. Join us for a day you won't forget!

Tennis finals underway here

An open tennis tournament began here Monday. The top four players in the tournament will qualify for the upcoming Central Pacific Regional Tennis Championship which will be held at NRMCO, June 7-11.

The 1982 Women's Division Central Pacific Regional Championships will follow on Oak Knoll Courts June 14-17. Also the Junior Veteran Division (age limit is 35-44) and Senior Division (age limit 45 years and over) will be held the same weekend here at NRMCO.

Interested personnel should contact Tournament Director Ron Brown at 2350.

Asian-Pacific Heritage

Philippine Consul General guest speaker on Tuesday

The Honorable Romeo A. Arguelles, Consul General of the Republic of the Philippines in San Francisco, will be the guest speaker during an Asian-Pacific Heritage Observance, Tuesday, June 15, at 2 p.m. in the medical center's Clinical Assembly.

A career foreign service officer, Mr. Arguelles served for several years as the First Secretary in the Philippine Embassy in Washington, D.C. before

his assignment to the Philippine Consulate in San Francisco. He also worked as Commercial Attache of the Philippines in Tokyo, Japan, for five years and was the Deputy Commissioner General of the Philippine participation in the World Exposition in Osaka, Japan in 1970.

He is the recipient of several honors and awards. Among them, the prestigious Cultural Heritage Award of

the Republic of the Philippines. He has attended about 15 international conferences as a member of the Philippine delegation which took him to Tokyo, Santiago, and Geneva and other foreign areas.

Mr. Arguelles is a lawyer and member of the Philippine Bar. He graduated with the degrees of bachelor of laws and bachelor of arts from the University of the Philippines, a state-owned educational institution. He undertook graduate studies in international marketing at the Harvard University Graduate School of Business Administration in Cambridge, Mass. He also completed his master's in public and international affairs at the University of Pittsburgh and took graduate courses in international relations at John Hopkins University, Washington, D.C.

He is married to the former Azucena Lagumbay, a doctor of medicine. The couple has three children.

Consul General R.A. Arguelles

Navy nurse retires today

"Today I do not wish to think about the past. It is time to close the nursing career chapter in my life," says retiring Commander Bernadine L. Shaffer, adding, "I feel like Jonathan Livingston Seagull! I don't know if the world is ready for me, but I am ready for it. I have a lot of things to do."

The Nursing Education Coordinator for Naval Regional Medical Center Oakland is being honored with a retirement ceremony in the Clinical Assembly at 11 a.m. today after more than 20 years' duty as a Navy nurse.

A graduate of Washington State University, she earned her bachelor of science in nursing from St. Luke's School of Nursing in Spokane. Her Navy billets in addition to the three years she has spent at Oakland include Naval Regional Medical Centers San Diego, Long Beach, Camp Lejeune and Philadelphia, at Corps School in Great Lakes, Ill., and at Rota, Spain.

Her future plans include returning to her home state of Washington, attend-

CDR Bernadine Shaffer

ing modeling and photography classes and eventually working toward another college degree.

A reception in her honor will be held at the Casa de la Vista on Treasure Island tonight.

M1 Whitehead selected SOM

Hospital Corpsman First Class Chris Whitehead, Physical Therapy/Occupational Therapy Technician, has been selected as Naval Regional Medical Center Oakland's Sailor of the Month for May.

Petty Officer Whitehead was cited for professional excellence and ability to assume varied roles, as well as con-

tinued outstanding performance as a technician.

He has been directly responsible for the efficient operation of a highly complex research program on knee arthroscopy, his superiors said. Whitehead was also cited for maintaining the high standards of the total joint replacement and amputee rehabilitation programs.

He also serves as preceptor for students from local colleges and universities and as instructor for the Phase II Physical Therapy Technician School.

Naval Regional Medical Center has been home for this outstanding corpsman and his wife Karen and daughter Melissa since November 1979. Whitehead has seven years of service and was formerly assigned to USS BRYCE CANYON (AD-36), homeported at Pearl Harbor, Hawaii.

Petty Officer Whitehead, originally from Fresno, Calif., has a general education associate of arts degree and is presently working on a bachelor degree in health science. As for career goals, he said, "I plan to get out of the Navy next year, get my degree in physical therapy, and then return to the Navy as a Medical Service Corps officer." Speaking of his selection as Sailor of the Month, he added, "it lets me know that my superiors appreciate my work. It makes me feel good."

In off-duty time he enjoys basketball and tennis and has played on the MSC Intramural Softball Team.

HM1 Chris Whitehead

Mardi Gras theme

Hospital Corps birthday to be celebrated June 18

"Come to the Mardi Gras" has been selected as theme of the June 18 party at the Officers' Club at Oak Knoll, where NRMCO Oakland Hospital Corpsmen and those from branch clinics will gather to celebrate the corps' 84th Birthday.

Festivities will begin at 6 p.m. with a buffet dinner with wine, which will be served until 7:45 p.m. Following ceremonies will include guest speakers and the traditional cutting of the birthday cake by the oldest and youngest corpsmen on board.

Music for dancing will be provided in the main ballroom by the Navy Band

Combo from Treasure Island, while there will be disco with Bucky Buckholtz in the Galleon Room downstairs.

Tickets are now on sale from committee members, or by contacting HM2 Cleda Houmes in Nuclear Medicine. They will sell for \$5 each until June 14; \$6.50 thereafter and at the door. Dress will be Service Dress Blue or semi-formal.

The ball promises to be a gala affair, so plan to buy tickets early and celebrate the birthday of one of the most prestigious corps in the United States Navy. "Come to Mardi Gras."

HAND-DELIVERED—Chief Hospital Corpsman Rose Percival hand-delivers an invitation to the Hospital Corps Ball to Rear Admiral Walter M. Lonergan, Commanding Officer, who early in his career, was also a corpsman. The 84th Birthday of the corps will be celebrated here June 18 with a dinner dance in the Officers' Club on base. Tickets are on sale for \$5 per person until June 14; \$6.50 thereafter and at the door.

EDITORIAL

Navy Affirmative Action Plan revised; to spur Hispanic recruitment, retention

Chief of Naval Operations Admiral Thomas B. Hayward recently announced major steps to update deficiencies in the Navy's Affirmative Action Plan. The 1982 NAAP is a set of 64 objectives, subdivided into 258 action steps designed to address conditions that impede, curtail, inhibit or preclude the achievement of equal opportunity in the Navy.

The cost of the Navy's revised plan is estimated at \$5.4 million annually and is scheduled to fulfill its objectives by Sept. 30, 1986.

According to Admiral Hayward, one of NAAP's primary efforts is to stimulate lagging recruitment and retention of Hispanic people.

"The demographic trends of the country show a growing proportion of Hispanic people," he said, "and we have to raise our composition goals accordingly."

Admiral Hayward emphasized that equal opportunity in the Navy is not merely reflective of a federal legal requirement but is predicated on the real needs of the Navy to attract capable people and to develop fully the capabilities of the service members already on board.

The revised plan also details efforts to increase the percentage of Afro-Americans and other minority people. It also provides for remedial action in the areas of recruiting, training, education and manpower management and includes new actions to improve career opportunities for women in the Navy by expanding ship-board assignments and adapting eligibility requirements for major sea commands. The changes in the plan also address areas in which the incompatibilities with the civilian Equal Employment Opportunity Program and the military Equal Opportunity Program may be changed so they are more compatible, fostering the single-team concept.

"The Navy has sponsored mandatory affirmative action programs for the past 10 years," said Admiral Hayward. "These were designed to be temporary steps on the way toward institutionalizing equal opportunity in the Navy. Many of the actions prescribed in the earlier plans have achieved their objectives and are no longer needed. Others require continued effort, while new initiatives have been introduced in the 1982 plan to further improve our equal opportunity performance."

Accordingly, Admiral Hayward said, "equal opportunity thrives when each of us demonstrates our commitment to it through personal example. Equal opportunity will prevail in the Navy not just because it is part of our military professionalism and

discipline but because it is right. A good leader acknowledges cultural differences but treats all people without discrimination because of race, color, creed, sex or national origin. Therefore, I expect each member of the Navy to work for equal opportunity, which will provide the quality of life and enhance our ability to accomplish our mission." (NES)

Our patients write...

I am writing this letter on behalf of my wife and myself to express our sincere and grateful appreciation of the care and treatment of my wife and new baby daughter during their recent stay at your hospital. The personal attention that they received was outstanding. The warm atmosphere generated by the nurses was a definite aid in my wife's recuperation.

I would like to also take this opportunity to extend our appreciation to all the surgeons and other doctors who treated my wife... We shall never forget even one's kindness.

Richard P. G.
SSGT. USMC

...

This letter is being written to express my appreciation for the outstanding medical attention received from Mr. Oliver Johnson, Hematology. It is such a human failure not to say thank-you. For about two years Mr. Oliver Johnson has taken blood samples and given me various tests while I have been a... patient at the NRMHC, Oakland.

As far as I have been concerned, Mr. Oliver Johnson has performed his duties with the utmost care. He has done an outstanding job. He has always been cheerful no matter the circumstances.

Again I wish to say thank you for the excellent personnel you have on the staff at the NRMHC.

James W. Carleson
LCDR, SC, USN (R)

...

During my recent hospitalization at NRMHC Oakland from 5 April thru 1 May 1982... I had the pleasure of being acquainted with one of the finest hospital staffs since my naval career started in 1970.

Captain R. A. Pratt of the Neurosurgery Service and his staff of 8 South Shore have been commended for their high level quality health care. Being a dental technician, I understand the importance of a good patient, doctor and staff relationship. The personal care and attention I received from Dr. Pratt and his staff is in keeping with the highest naval traditions. I am proud to say that I am part of that same Navy. I salute you.

My family and I would like to take this opportunity in thanking Dr. Pratt and his staff for a job well done. Thank you and God bless you all.

Gary Stephenson, DT1
Branch Dental Clinic, Lemoore

...

This is a letter to the fine wonderful people in E.R. and in the hospital, and to the facilities I have used.

I came in E.R... on the 29th of March... I was put on 8N for a few days and then transferred to 6W. I have never received such good care as I did while at Oak Knoll. I have been in many civilian hospitals and have six major surgeries to my name and not one doctor really found out my problem... Dr. Hyder and Dr. Dickey and Dr. Ho have been so very nice and understanding. I have to say my stay at the hospital was a very pleasing experience.

The nurses on 6W—were so very, very nice. Especially a nurse named Deborah. She worked days and the p.m. shift. Susan, who is an Ensign was very nice, also, as was Bob (whom had something done to his foot) and Mrs. Caldwell, a civilian, and of course, I shall never forget Linda—she was on graveyard when I came in.

While in the hospital, one day in the solarium, I read the paper *Oak Leaf*. It was very, very interesting, and it's really a joy to read the good news of everyone in the Navy.

My stay at Oak Knoll was good memories of everyone... especially Dr. Hyder. I still see him and having tests done and you just do not know what it means to have someone check me out thoroughly. It seems everything at Oak Knoll is so smooth and efficient.

This is just a letter from one of many hundreds that go thru Oak Knoll saying "Thanks to Everyone."

Mrs. Mary L. Jones
Concord

Flag Day June 14

Fly **your** flag proudly:

- It has given heart and hope and strength to Americans ever since this nation was born.

- It has flown in times of trouble and times of triumph as a symbol of America's unquenchable ideals, ever since those ideals were first proclaimed.

- "The flag," said Woodrow Wilson a half century ago, "is the embodiment, not of sentiment, but of a history, and no man can rightly serve under that flag who has not caught some of the meaning of that history."

- It flies today as a sign that Americans, proud of their coun-

try's stirring heritage, are determined to carry the American dream forward.

- When we fly the flag each day, we salute the blessings we enjoy in this great country.

- We affirm our belief that only as each one of us gives strength to America can America give strength to us.

- We express our support of the American credo: one nation indivisible, with liberty and justice for all.

- Let us fly this flag proudly, to show that we know what a privilege it is to be an American.

Newspaper carrier wanted

Bowman Fawcett, son of Commander and Mrs. William A. Fawcett, and carrier of *Oak Leaf* to one of the officers family quarters areas on base, will be moving soon and unable to deliver the newspaper any longer.

We thank Bowman for all of his faithful volunteer service and wish him well in his new community.

Any other civic-minded boy or girl who would like to deliver the paper once every two weeks to neighbor families in that housing area (Barcelona, etc.), is requested to contact the Oak Leaf office, third deck, Bldg. 500, or call 639-2113.

No pay is possible, but we'll give you our warm thanks and publish your photo in the paper.

Opinions contained herein are not official expressions of the Department of the Navy. THE OAK LEAF receives American Forces Press Service and Navy News material.

Contributions from both staff and patients are welcomed and should be addressed to the Editor of the OAK LEAF, Naval Regional Medical Center, Oakland, CA 94627.

To strengthen communications

Civilian Personnel Advisory Board established

A new advisory board has been established at Naval Regional Medical Center Oakland to present recommendations to the Commanding Officer in an effort to establish inter-relationships within the departments, and to establish an open line of communication between management and civilian employees.

Designated the Commanding Officer's Civilian Personnel Advisory Board, 15 to 20 representatives will meet monthly until well established, and then confer with the Commanding Officer every six to eight weeks thereafter.

A screening committee comprised of Johnnie L. Campbell, Geneva Adams, David Lankford, Carol Shore and James Crayton met in late April and nominated the following individuals to serve on the board: Doris Parrish and Deborah Elms, Food Service; Sam Barnett, Fire Department; Elias Sellars, transportation; Jeanette Morgan, Administrative Area; Robert Thompson, Supply Service; Betty Anderson, Special Chemistry; Kathleen Wade and Charlotte Simonson, Nursing Service; Quentin Moore and Paula Hammond, Housekeeping; Eunice Turner, Laundry; Arnoldo Sedayao, Public Works; Beverly Billman, Alameda Branch Clinic, and James Crayton (Food Service), Union Local 2297. Betty Anderson was appointed temporary chairman and Jeanette

Morgan acting secretary of the board pending a June 8 election.

In the first meeting of the group on May 18, it was generally agreed that there is a continuing need to maintain and improve communications between civilian employees and management officials at all levels throughout the command. The establishment of the board, members believe, will serve as a means of direct communication between the Commanding Officer and civilian personnel, intensifying awareness of employee needs and problems.

Recommendations were made to establish a large bulletin board in a centralized location of the hospital for posting all civilian employee matters of interest and concern, and that a NRMC Oakland Instruction be promulgated to formally establish the advisory board, prescribing its membership and identifying its functions.

Committee efforts will be directed toward civilian employees as a "whole," and not focused on any specific (single) case. No union-related problems will be undertaken.

(Editor's Note: Photos of most of the new advisory board members are published this issue; however, both Elias Sellars of Transportation and Quentin Moore of Housekeeping were unavailable at the time pictures were taken. Their photos will be used in a future edition.)

Captain Quinn cited for saving

John F. Beary, III, M.D., Acting Assistant Secretary of Defense for Health Affairs, has presented the 1981 Health Affairs Superior Service Award for Medical Cost Containment to Captain James J. Quinn, MC,USN, for his cost saving achievements as the commanding officer at the Naval Regional Medical Center in Jacksonville, Fla. This newly established annual award recognizes outstanding achievements in cost containment in the military health care system.

During ceremonies at the Pentagon, Dr. Beary said, "Through his dedication to improving management practices, Captain Quinn has provided for better use of the direct care health resources at the Jacksonville hospital, which has allowed a large cost avoidance in CHAMPUS payments and a considerable savings to military health care beneficiaries in the area."

As commanding officer at the Medical Center, Quinn directed his staff medical specialists to schedule regular office hours at surrounding clinics, improving the availability of health care services for beneficiaries in the area. Consequently, the number of patients forced to seek care from a private physician under the CHAMPUS program was reduced by 50 percent. This resulted in a cost avoidance savings of \$2.5 million in CHAMPUS payments, and a savings of \$276,000 to beneficiaries in CHAMPUS cost-sharing payments. In addition, Quinn conducted an aggressive campaign against waste, fraud and abuse, which resulted in a recoupment of \$125,000 in funds and property.

Quinn, a family practitioner, has served in the Navy since 1962, including a tour of duty in Vietnam as the senior medical officer aboard the battleship U. S. S. New Jersey. Before assuming command of the NRMC in Jacksonville, Quinn served as the Chief of Staff to the Navy Surgeon General at the Bureau of Medicine and Surgery in Washington, D.C.

"Captain Quinn's outstanding achievements in medical cost containment will serve as a benchmark in the continuing efforts of the Department of Defense to provide a quality health care benefit to beneficiaries at the least possible cost," Beary said.

U.S. Navy aids injured Italians

An emergency medical evacuation for two seriously injured Italian youths was recently completed by a helicopter crew attached to the destroyer tender USS PUGET SOUND (AD 38), flagship of the U. S. Sixth Fleet.

The evacuation was prompted by a call from the mayor of Gaeta, Italy, where PUGET SOUND is homeported, to the Sixth Fleet Command Center. The mayor told the duty officer that two Gaeta youths had been badly injured in a traffic accident and required immediate medical attention not available locally. He asked that Sixth Fleet Commander, VADM William Rowden, provide his helicopter, the "City of Gaeta," to transport the accident victims to Naples.

VADM Rowden quickly agreed to the request and the helicopter crew prepared for the 30 minute flight. An Italian ambulance rushed the two boys to the fleet landing, where Italian medical personnel joined them onboard the Navy SH-3 "Sea King." A U. S. Navy ambulance met the helicopter on arrival in Naples and transported the patients and medical personnel to an Italian civilian hospital, where they are being treated for serious injury.

The "City of Gaeta" is assigned to Helicopter Antisubmarine Squadron One, Detachment Three. The crew during the medevac were LCDR Felix Usis,

HM2 Victor Lopez to London, England.
HM3 Gordian Rector to NRMC Jacksonville, Fla.
BMC Michael Jackson to NRMC San Diego.
HM2 Dawn Misceovich to NAB Branch Clinic, Norfolk, VA.
HM3 Robert Beal, released from active duty.
HN Theresa D' Ambrosio to NAB Branch Clinic, Little Creek, VA.
HM3 Troy Johnston to NAS Branch Clinic, Moffett Field.
CAPT Marlin Seiders, retired.
HM3 James Colokarhis to NRMC Yokosuka, Japan.
LCDR Joseph Criscitiello, retired.
DT3 Alfredo Alvarado to USS CORAL SEA (CV-43).
DT3 Michael Mallorca to Naval Station, San Diego.
HM3 Eli Fale to Naval School of Health Sciences, San Diego.
HN Gary Donnelly to 1st FSSG, FMFPAC.
LT William Johnson, released from active duty.

LT Lisa Halton to Branch Hospital 29 Palms.
MM1 Anthony Palmeno to Naval Station, San Diego.
Lt Michael McDonald to Naval Recruiting, San Francisco.
CDR Mark Lau to Pensacola, FLA.
LCDR Lawrence Kiselica to US ENTERPRISE.
LT Jerald Ulmer to NRDC Charleston.
LT Lora Lucero to Holy Names College.
LCDR Kevin Harvey, released from active duty.
CDR William Natale, released from active duty.
LCDR James Wilson, released from active duty.
LCDR Lynn VanWagnen, released from active duty.
"Welcome aboard" to:
CDR Loren Richter, CHC, ACDUTRA
CDR Joseph Ferraro, CHC, Pastoral Care Service.
HMCM Bill Dahlke, Operating Management.
HM3 Phillip Wright, Nursing Service.
HM2 Patricia Burruss, Pharmacy.
HN Randall Flynn, Nursing Service.
HM2 Paul Mervine, Nuclear Medicine.
RP3 Davy Carey, Pastoral Care.
HA Christian Fowler, OR School.
HM2 Douglas Cassel, Alcohol Rehabilitation Service.
HM1 Paul Conlin, PMT School.
HM2 Kevin Twyman, Operating Room.
HM3 Kendon Brown, PMT School.
HM3 Lee Tandus, PMT School.
HN Janet Deruckia, Metabolic Clinic.
HMC Agustinito Cruz, PMT School Instructor.
HM2 Cheryl Miller, Laboratory.
HN Kathleen Stilwell, Eve Clinic.
LTJG Deborah Carlton, Nursing Service.
RP1 Roger Minks, Pastoral Care Service.
HM2 William O'Brien, ENT Clinic.
HM3 David Tenbensel, Outpatient Service.
HM2 Arturo Banaag, PMT School.
HM2 Scott Bowden, PMT School.
HM2 Mark Sejeck, PMT School.
HA Barbara Richardson, Nursing Service.
HM3 Alfred Barry, PMT School.
HM3 Anthony Predimone, PMT School.
HM2 Lowell Vanellen, PMT School.
HM2 Daniel Shiella, PMT School.
HM2 Joseph Sheltry, PMT School.

Get to know CHAMPUS

Your medical care partner

Your CHAMPUS claim bounced? Nearly 30 percent of all CHAMPUS claims cannot be paid promptly because the beneficiary did not fill out the top portion of the claim form properly or completely. Your Health Benefits Advisor has information on how to do it.

ADMIRAL TO ADMIRAL—Rear Admiral Donald E. Wilson (left), Commander of the Navy Resale System, paid a recent visit to Naval Regional Medical Center Oakland and conferred with Rear Admiral Walter M. Lonergan, Commanding Officer. The Supply Corps Rear Admiral also visited the small exchange in the hospital and the larger store in Bldg. 38.

MCPON finalists selected by board

Five finalists for the position of Master Chief Petty Officer of the Navy were chosen by a special selection board which met in Washington, D.C., May 17. The finalists were selected from a field of 12 applicants. An initial screening by the officers of the FY 1982 E-8/9 Selection Board chose the 12 semi-finalists from a total of 35 nominees.

The finalists, in alphabetical order, are MMCM (SS) Norman D. Garoutte, Commander Submarine Force Atlantic Staff; NCCM Courtland R. Johnson, Commander Patrol Wings Pacific

Staff; TCM (SS) Franklin A. Lister Commander in Chief U.S. Atlantic Fleet Staff; **HMC William J. O'Daniel**, Commander in Chief U.S. Pacific Fleet Staff, and AVCM Billy A. Sanders, Naval Air Facility Lajes, Azores.

The finalists and their wives will be invited to Washington for interviews in July. It is expected that the Chief of Naval Operations will announce the name of the next Master Chief Petty Officer of the Navy in mid-July 1982. The present MCPON, Thomas S. Crow, will retire Oct. 1, 1982.

Navy Campus here to help you get ahead

Is the lack of funding preventing you from taking advantage of all the educational opportunities in the San Francisco Bay Area? Do you know there are almost 100 institutions of learning in this area? Have you always wanted to have a college degree and didn't know what to do about it? The answers to these questions are available from the Navy Campus Education Specialist, Marj Stillings, who is here from Treasure Island every Tuesday and Thursday in the Staff Education and Training Service on 6 South. Why don't you stop by and find out more about the free educational services offered by Navy Campus here and at Treasure Island in Building 29B on Avenue H.

For persons who joined the Armed Forces before Dec. 31, 1976, the Veterans Administration G.I. Bill

remains available until Dec. 31, 1989. Personnel who joined the military after 1976 qualify for the Veterans Education Assistance Program (VEAP), where each dollar contributed is matched by \$2, from VA.

Tuition Assistance is still available, however, it has been decreased to 50 percent for everyone, due to lack of funds. There are other financial aids available, such as grants, scholarships, and loans. Active-duty military personnel, who are not California residents, may attend community and state colleges at resident tuition rates during their first year in California. The tuition rates for private schools and on-base programs are the same for residents and non-residents.

Many colleges have a liberal policy for awarding non-traditional credit, such as military ratings and schools, as well as college-level examinations, which are administered free at Navy Campus. Military experience has been evaluated for college credit by the American Council on Education and is contained in the *Guide to Educational Experiences in the Armed Services* ("ACE Guide"). The Hospital Corpsman rating has recently been evaluated for college credit. This credit added to the four semester hours recommended for your recruit training is a start toward a college degree. Call Chief Lang's office at Ext. 2003 for an appointment for an evaluation of your military experience. It could earn you a college degree, which can be invaluable to your military career as well as your personal life.

LECTURER—Herb Lindemann, Chief of Civilian Personnel, is conducting a series of lectures for supervisors of civilian employees at Oak Knoll. On May 25 he discussed leave administration. Other forthcoming topics will be on monitoring employee performance, filling vacancies, employee-labor relations, and the interviewing/selecting procedures.

Civilian Personnel command reorganized

The Naval Civilian Command now reports directly to the Chief of Naval Personnel, under an April 1 reorganization.

The change should facilitate communication between Navy Civilian and Uniformed Managers, thus strengthening the Navy's "Total Force" concept, officials said.

NATO reserve medical officers schedule August U. S. meeting

Reserve medical officers from a dozen NATO countries will meet in Washington, D.C. in early August for the 36th congress of the Interallied Confederation of Medical Reserve Officers.

Otherwise known as CIOMR, for its French title, Confederation Interalliee des Officiers Medicaux de Reserve, the organization represents the reserve medical officers of all NATO countries which have reserve forces.

Meeting simultaneously will be the 35th annual conference of the Interallied Confederation of Reserve Officers (CIOR), representing 360,000 NATO reserve officers.

More than 1,000 are expected for the Aug. 8-15 sessions at the Sheraton Washington Hotel. CIOR military athletic competitions will be at Fort Meade, Md., and CIOMR hospital conferences will include Walter Reed Army Medical Center, D.C.; the Uniformed Services University of the Health Sciences and the National Naval Medical Center, Bethesda, Md.; and the Air Force Aerospace Physiological Training Facility at Andrews Air Force Base, Md.

The tentative CIOR program includes presentations by Caspar W. Weinberger, Secretary of Defense; Army General Bernard W. Rogers, Supreme Allied Commander in Europe; and Navy Admiral Harry D. Train, II, Supreme Allied Commander, Atlantic.

Marine Corps Commandant General Robert H. Barrow will host the Marine Barracks Evening Parade during the conference. Guest of honor at the parade will be Army General John W. Vessey, Jr., new chairman of the Joint Chiefs of Staff.

The reserve chiefs of all NATO countries will participate in the CIOR sessions while the surgeons general of the Army, Navy and Air Force will speak to the medical officers' conference.

Events will include ceremonies at Fort Myer, Va., a wreath-laying at nearby Arlington Cemetery, and a Reserve Forces Day at Andrews Air Force Base, Md. This will feature displays and demonstrations of personnel and equipment presently assigned to U. S. reserve components.

The military competitions at Fort Meade will include marksmanship shooting of the pistol, rifle, and sub-machine gun; obstacle course and utility swimming; and a day-long land

navigation orienteering exercise against an aggressor enemy. About 200 officers are expected to participate in these competitions, both as individuals and as teams representing their parent countries.

CIOR was founded in Brussels in 1948 to promote cooperation between the NATO country reserve officer associations and to strengthen the basic solidarity of NATO. The current international president is Lieutenant Colonel Peter J. Jorgensen of Denmark. CIOR vice president for the United States is retired Army Reserve Major General Richard H. Cooper, Orlando, Fla., assisted by Army Colonel Joseph Gaston, Millersville, Md., Assistant Secretary General for the United States.

President of the medical officers' association, CIOMR, is Surgeon Commander M.J. Allwood of the United Kingdom. Chairman of the U. S. CIOMR delegation is retired Army Reserve Colonel Harry Becker, a doctor from Indianapolis, Ind.

Chairman of the congress and representing ROA as the host is retired Air Force Reserve Major General Ted W. Sorensen of LaGrange, Ill. Information on reservations for the congress is available from his CIOR/CIOMR officer at 1 Constitution Ave., N. E., Washington, D.C. 20002.

Job openings

Applications will be accepted by Civilian Personnel Service at Oak Knoll through Tuesday, June 15, for the following vacant positions:

Word Processing System Project Planner, GS-301-06/07, Word Processing Branch, Management Information Service.

Medical Technician (Chemistry), GS-645-05, Naval Drug Screening Laboratory, Laboratory Service.

Word Processing Clerk (Typing), GS-303-03, Word Processing Branch, Management Information Service.

For further information on any of the above jobs, call Maurine Tinsley at Ext. 2116.

Savings Bond campaign begins

The 1982 Savings Bonds Campaign is being conducted by all Navy activities from June 1 through July 1.

Honorary chairman of this year's drive is Washington Redskins quarterback Joe Theismann.

Head dietitian implores: 'don't send patients to galley'

LCDR Douglas Love, Jr., head of the Clinical Nutrition Branch, has issued an appeal to all members of the staff to refrain from sending patients to the dietitians' office in Food Service without first calling.

"There is no reception staff or wait-

ing area there," he explained, "and since the dietitians are frequently out of the office, it is often embarrassing and frustrating for the patients, as well as a health and safety hazard for them to be in the galley."

Patients needing diet instructions

may be referred to Central Appointments, he said. Patients needing weight reduction should make an appointment for the weight control class; all others are asked to make an appointment for the Nutrition Clinic.

If a patient must be seen

immediately, staff members may call ext. 2493 or page LCDR Love at Beeper 304, or LT Faythe Weber via the overhead pager, so that arrangements may be made to meet the patient in the nutrition office on the ninth deck.

Should divers use ANY drugs?

by J. M. Walsh, Ph.D.

Editor's Note: The following article is a reprint from *Faceplate*, the Navy's diving magazine. Dr. Walsh is an affiliate of the Naval Medical Research Institute.

Drugs come in many forms: They can be ingested, injected, inhaled and even absorbed through the skin. However, this discussion will not be restricted to street drugs or to prescribed medications because we want divers to realize that many substances affecting body chemistry such as aspirin, nasal spray, alcohol, nicotine and caffeine are not generally called drugs, but probably should be.

Currently, there are two schools of thought concerning the use of drugs while diving. The Navy provides no specific instructions concerning medication and fitness for duty; the diving supervisor makes his decision based on the recommendation of the diving medical officer (DMO). Some say there are a variety of drugs available that will counteract most minor problems, and if you are unaffected by these drugs on the surface, you will be okay in the water. But many DMOs believe that under no circumstances should a diver ever take any kind of drugs within 24 hours before diving.

Nevertheless, there are many variables that alter the effects of drugs. In reality, there is no such thing as "a drug effect" because a drug never acts the same in all individuals or even in the same person on different occasions. The action of the drug depends, mainly, on the physiological and psychological makeup of the individual at the time the drug is administered and on the environment condition.

Underwater, divers are subjected to: (1) increased hydrostatic pressure, (2) varying partial pressures of nitrogen and oxygen in compressed air and (3) the interaction of changing gas and pressure with all of the above-mentioned variables. Pressure itself can exert numerous changes in our body chemistry, and research dives have shown that metabolic, hormonal, neurological and cardiovascular changes occur at depths as shallow as 90 feet of sea water (fsw). Even under carefully controlled laboratory conditions at the Naval Medical Research Institute, we have found that the behavior effects of drugs change under pressure and that the way in which they change is not predictable from their surface characteristics.

Research in our laboratory has been concerned primarily with the behavioral aspects of drugs and how they affect neuromuscular coordination, judgment, emotional status and the auditory and visual systems. The results of these evaluations demonstrate how widely the effects of drugs vary when introduced to the body in an hyperbaric environment (* indicates human evaluations have been conducted):

• **Analgesics:** * Aspirin and Acetaminophen have been tested at

depths to 180 fsw, and even moderately high doses (three to four tablets) have not produced behavioral or physiological problems.

• **Antihistamines:** * At prescribed doses, Benadryl decreased performance, caused mental clouding and reduced fine-motor coordination.

• **Decongestants:** Behavioral effects of Sudafed under pressure is not as toxic as those decongestants that contain antihistamines, although we have seen some slowing of judgment and coordination. In addition, researchers and clinicians suggest that decongestants may predispose divers to cardiac arrhythmias.

• **Depressants:** Pentobarbital and alcohol have been evaluated, and the effects did not appear to get worse under pressure. However, alcohol intoxication, which can cause nausea or vomiting, would certainly be a problem for the diver.

• **Diuretics:** No behavioral effects have been observed at normal doses.

• **Hallucinogens:** Delta 9-tetrahydrocannabinol (THC), the active ingredient in marijuana, interferes with cognitive processing and neuromuscular control. The effects of such get worse under pressure, and these effects are magnified as the partial pressure of oxygen increases.

• **Motion sickness remedies:** Dramamine, an antihistamine-type motion-sickness preparation does not appear to produce any significant behavioral problems at depths to 180 psw.

• **Stimulants:** Dexedrine, Methedrine and the antidepressant Monoamine-oxidase-inhibitors interact with pressure conditions to interfere with judgment and muscle coordination at depths as shallow as 50 fsw. These drugs also may have undesirable cardiovascular effects.

• **Tranquilizers:** The magnitude of the effect of Chlorpromazine, Librium, and Valium was dose- and pressure-dependent. In addition, although we have no data for humans, lack of alertness or overconfidence resulting from tranquilizers would be troublesome at 100 fsw.

Although the studies were carried out under tightly controlled conditions, they were not done in the water, and the addition of that factor could alter the effect of drugs. Also, we have not completed all of the evaluations with humans. Therefore, direct inferences about humans must be made with caution. In summary, it is emphasized that:

• The use of all drugs should be avoided while diving.

• Over-the-counter preparations can be as toxic as prescription or abused drugs.

• If you must dive while taking medication, be informed. Get full information from your diving medical officer because even benign compounds may become behaviorally toxic under pressure. (NES)

MED • SCAN

A quick look _____
at recent health care _____
developments _____

Is garlic the latest anti-cancer treatment? Several cloves of garlic daily may explain the difference in gastric cancer rates in China. In Gangshan province only 3.45 people per 100,000 contract the disease. In Quixia province some 40 people per 100,000 suffer gastric cancer. The difference? **Gangshan people regularly eat 20 grams of garlic daily as reported by *Medical Tribune*.** They thus have a significantly lower level of nitrites in their gastric juices. Garlic inhibits bacterial growth in the stomach, important to the production of nitrites, which have been definitely linked with gastrointestinal cancers.

...

Alcoholic women frequently go on drinking binges before their menstrual periods, reports another article in *Medical Tribune*. The low estrogen levels at this period help to heighten effects of alcohol and give the drinker a larger reaction than usual. Alcohol, like estrogen, slows down production of the hormone MAO (monoamine oxidase) which at high levels causes depression. When a premenstrual woman drinks she apparently slows down production of MAO and alleviates depression, encouraging her to drink more.

BLOOD DRIVE GIVE BLOOD

On June 16-17 you have a chance to save a life, contribute to a vital community service, receive a mini-physical, donate to a charity without giving money, and much more. All this is done in less than an hour, right here at NRMCO, by giving to the Blood Drive.

Blood is a very important factor in medical care and during the summer time blood banks have a shortage. This is due to vacation of donors and also many people take elective surgery at this time of the year.

Naval Regional Medical Center in the past has had a very high participation rate in the Irwin Memorial Blood Drive. In fact, NRMCO Oakland has been able to maintain a credit balance with the bank. Continued support will insure ongoing favorable levels.

The procedure for giving blood is very easy; in fact some people think it's a pleasurable experience. If you've never done it, now's your chance. Almost everyone between the ages 17 and 65 years old are able to give.

For further information on the details of how and when to donate blood, see your department representative. If they are not available or more information is needed then call LTJG Deborah Prekker or a member of the Blood Bank Staff at Extension 2283 or 2329.

All urged to report unsafe conditions

All Navy military and civilian employees are encouraged to participate in the prompt identification and reporting of unsafe or unhealthful practices or conditions. They may be reported orally or in writing to immediate supervisors or by making anonymously written reports directly to the NRMCO Regional Safety Manager (using NRMCO 5101/4 (11-81). No reprisals or other punitive action will be taken against any person originating a report.

The workplace supervisor shall then initiate appropriate corrective action, including notification to the Safety Office of the original report. Follow-up inspections and investigations shall be conducted by the Safety Office to insure that corrective measures have been taken and the originator of the report shall be notified of the condition found by Safety Office personnel.

Appeals for military personnel go through the chain of command.

If the civilian originator of a report is dissatisfied, that person may confer with the Regional Safety Manager. If the originator is still dissatisfied an appeal to the Commanding Officer may be made. Second level appeals for civilians will be addressed to the Surgeon General, Bureau of Medicine and Surgery. Subsequent appeals may be submitted if the originator is not satisfied with the action taken or resulting disposition. These, in order, are: Chief of Naval Operations, the Secretary of the Navy (ASN (MRA&L), the Assistant Secretary of Defense, the Office of Federal Agency Safety Programs, and the U. S. Department of Labor, Washington, D. C.

The Safety Office at NRMCO is located in Building 63B. Deflect-O Wall holders to support forms for reporting are located throughout the hospital. For further information call Extension 2384.

CHAMPUS now able to share cost of intraocular implantation

The Food and Drug Administration's recent approval of five different models of intraocular lenses for human use enables CHAMPUS to share the cost of implantation of these lens models.

Intraocular lenses are artificial lenses surgically implanted in the eye. Cost of the implant surgery normally ranges from \$500 to \$600. The lenses have

been in use for more than 30 years, and have been used in the U. S. with increasing frequency since the late 1960s. Originally, CHAMPUS shared the cost of lens implantation with program beneficiaries. However, in 1976 it was decided that there were no data showing that the lenses were effective or safe, and FDA put intraocular lenses on their investigational list

while they examined the lenses' safety. At that time, CHAMPUS was forced to discontinue sharing the cost of lens implants.

The CHAMPUS regulation states that in order for specific benefits to be covered by the program, "any surgical implant must be approved for use in humans" by FDA. With the recent FDA

approval of lenses, beneficiaries' claims can now be processed, retroactive to the dates of approval of each of the five models of lenses.

There are FDA-imposed age restrictions on the use of all approved lens models. CHAMPUS beneficiaries should consult their physician for details.

Reserve today for farewell event

Reservations close today for a June 16 party honoring soon-to-be transferred Captains Joseph Smyth, Director of Clinical Services, Warren W. Hodge, Regional Health Care Coordinator, and Paul H. Farrier, Regional Industrial and Occupational Health Care Coordinator.

The farewell event for the prominent Navy physicians will be held in the Officers' Club at Oak Knoll, beginning at 6:30 p.m., followed by a filet mignon buffet at 8 p.m. Price is \$12 per person.

Reservations may be made by calling 639-2147.

FRA announces contest winners

Harold R. McNichol, West Coast Regional Americanism Chairman of the Fleet Reserve Association (FRA), has announced winners of the 1982 essay contest on the theme, "What My Vote Will Mean To Me."

Winners are:

Seventh Grade: Michael Bachmeier, Lemoore (first); Nina Lynn Nordstrom, Stockton (second), and Jimmy Webster, Lemoore (third).

Eighth Grade: Cristina Intintoli, Vallejo (first); Mike Londgren, Gilroy (second), and Mark Huffman, Concord (third).

Ninth Grade: Anne Mallon, Fremont (first); Emily Ofsevit, Berkeley (second), and Daryl Pontenberg, Campbell (third).

Tenth Grade: Suzanne Young, Gilroy (first); Pam Sullivan, Napa (second), and Evlin During, San Francisco (third).

Eleventh Grade: Su Sun Bai, San Jose (first); Lynn Lambrecht, San Jose (second), and Marianne Bailey, Placerville (third).

Twelfth Grade: Tracey Tokuhama, Berkeley (first); Cheri Merritt, Pollock Pines (second), and Ri Pen Chou, Sunnyvale (third).

All winners received a plaque and first place winners also received a \$75 Savings Bond from the West Coast Region of FRA. First place winners will be entered in the national contest.

The 1983 theme for the FRA Americanism Essay Contest, which is open to all students in grades 7 through 12, will be "The Bill of Rights And Me."

For further information contact Mr. McNichol, 16193 Via Del Robles, San Lorenzo, Calif., 94580; phone 415/276-6080.

A FINE TIME TO LEAVE US, LUCILLE—Ms. Lucille Barry (right), Red Cross staffer at Oak Knoll for several years, departed this command recently for a three-year tour with the Red Cross at Elmendorf Air Force Base, near Anchorage, Alaska. A farewell luncheon was held in her honor at the Officers' Club on May 26. Among those wishing her a fond farewell were Ms. Ardeth Sklinchar, Chairman of Volunteers and Mr. Paul Anderson, Field Director.

Red Cross needs freezer

The Red Cross volunteers are desperately in need of a freezer in good working condition to store cookies and bakery items for the patients at Oak Knoll.

Please contact the Red Cross lounge office at 639-2525 if you are able to help us.

Mothers to convene

The National Navy Mothers' Clubs of America will hold their 80th convention in San Jose, Aug. 8-12, it has been announced.

Meetings will be held in the Holiday Inn, Park Center Plaza.

Bay Area Navy Mothers' Clubs are regular contributors to patient recreation funds at this medical center.

Career Capsules

New horizons for Pharmacy Technicians

By CDR W.L. Patterson, MSC, USN
Navy Pharmacist

For years, Pharmacy Technicians have been performing a vital service for the beneficiaries of the Naval Medical Department, dispensing millions of prescriptions of drugs ranging from aspirin to the newest life-saving chemicals that modern technology has to offer. Navy Pharmacy Technicians work in a capacity that requires years of college education in the civilian world. How can they do this? Are we getting quality pharmacy services in the Navy? You can be sure we have the best!

First, Pharmacy Technicians are carefully selected. To be considered for this additional training, you must demonstrate a proficiency in mathematics and should have some high school background in chemistry and biology. Second, you must successfully complete six months of intensive training in one of Navy's two pharmacy schools. Third, you must be willing to participate in continuing education programs for the remainder of your career in pharmacy. Fourth, you must make a personal commitment to work in an environment where perfection is the primary criterion for measuring performance.

But what do Pharmacy Technicians do besides count pills and pour cough syrup? It depends. Most of the Naval Regional Medical Centers have comprehensive pharmacy services that prepare sterile intravenous solutions and unit dose medications for hospitalized patients. Drug information is provided for physicians, dentists, and nurses. Teaching classes for neophyte Hospital Corpsmen on various subjects related to pharmacy is a challenging part of the job. Counseling patients regarding proper use and cautions to observe while taking medications is a never-ending, fulfilling experience. Maintaining records, ordering supplies, preparing budgets, and maintaining equipment are equally important aspects of the job. This is by no means an exhaustive list of the duties of a Pharmacy Technician and these functions are normally under the supervision of a Pharmacy Officer at the Medical Center. But, what about the technicians who are on independent duty, like on a ship? The same rules apply. Strong background, good training, continuing education, and a personal commitment to perfection.

Hospital Corpsmen with the proper background, looking for a challenge, and interested in a professional career may want to investigate the possibility of becoming a Navy Pharmacy Technician. The Pharmacy Technician "C" Schools are located at Portsmouth, Virginia and San Diego, California. See your Command Career Counselor for additional details. (Reprinted with permission from *L/NK* magazine, April 1982)

MOVIES

Friday, June 11, 6:30 p.m.—LOVING COUPLES—Shirley MacLaine, James Coburn—Comedy/PG

Wednesday, June 23, 6:30 p.m.—THE SWEET CREEK COUNTY WAY, Richard Egan, Albert Salmi—Western/PG

Thursday, June 24, 6:30 p.m.—THE DEADLY SILVER NINJA—Dragon Lee, Marty Chui—Action/R

Veterans ask

Q—My father is a World War I veteran and he recently had a stroke that left him totally helpless and unable to care for himself. Will the VA put him in a nursing home and pay for it?

A—The VA cannot bear the expense of a private nursing home for veterans with nonservice-connected disabilities unless the veteran is transferred directly from a VA hospital to the nursing home. When such a transfer is made, the VA authorized care normally may not exceed six months. You should contact the nearest VA Medical Center or regional office for details, or your local county service officer.

Q—If I don't have a checking account and cash is unsafe to mail, how can I pay on my Veterans Administration education loan without going to a VA personally?

A—Go to your bank or nearest post office and purchase a cashier's check or money order. To ensure proper credit, include your claim number or social security number on your remittance.

The following new additions to the military medical "family" have arrived at Naval Regional Medical Center Oakland:

A baby girl to Hospital Corpsman Third Class Thomas Ramirez, Ophthalmology, and his wife Gladys Costillo, on May 21.

A baby girl to Hospital Corpsman Third Class Matthew J. Schubert, USN, Intensive Care Unit, and his wife Kathleen, May 21.

A baby boy to Hospital Corpsman Third Class Daniel P. Grady, USN, Branch Clinic Moffett Field, and his wife Marilou, May 28.

A baby girl to Hospital Corpsman Third Class Petra Harrington (Murdock), USN, Mare Island Branch Clinic and her husband Hospitalman Douglas Richard Murdock, USN, June 2.

Nurses top MSCs in benefit ball game

The Medical Service Corps officers of the command challenged Nurse Corps officers to a staff slowpitch softball game on May 27 to benefit the Navy Relief Society to the tune of \$203.

Behind the superb coaching of Captain Jan Emal, the nurses pounded the MSCs for three runs to take command of the lead despite MSC efforts, ending in defeat, 7-3 for the Medical Service Corps team.

"It was an injury-free game, except for a couple of confrontations with the umpires," said one nurse player.

Originally, the challenge was males against females, but the male nurses didn't like this, so came to the game dressed in "drag," (skirts, wigs, hats, etc.) so that they could play on the Nurse Corps team as "females."

FAR OUT—Ensign Kaki Douglass of Occupational Therapy pitches for the Medical Service Corps team.

Slow start for golf team

The Naval Regional Medical Center is getting off to a bad start this season in the Central Pacific Regional Golf League. NRMC lost its first three matches. . . NAS Alameda 16-11, NAS Lemoore 15-12 and Naval Supply Center 24-3.

Team members this year for NRMC are Roger McNabb, Mike McDonald, Alan Kay, Jeff Upton, Sid Gesh, John Chemycz and James Vandenbosch.

OOPS!—Nurse Corps LTJG Deb Driscoll of the Sixth Deck fails to connect. Spectators are LCDR Russ Bond of Optometry and CDR Frank Fisher, Chief of Administrative Services.

Sand sculptors invited to compete

The 16th Annual Sand Castle and Sculpture Contest will be held on Saturday, June 26 at Robert Crown Memorial State Beach in Alameda.

Last year's contest attracted some 220 sand sculptors, who created works ranging from medieval castles and mythological creatures to giant beer mugs. About 3,000 spectators lined the beach to watch the show.

The event is sponsored by the East Bay Regional Park District, in conjunction with the Alameda Recreation and Park Department and the Bay View Women's Club.

Registration is from 9 to 11 a.m., judging will begin at noon, and the trophies and ribbons will be awarded by 1 p.m. Newcomers are advised to register and start building early in the morning.

There are two divisions in the contest—castles and sculpture—with three categories in each division. The categories are family groups, which must include an adult; individuals or groups aged 13 and older; and individuals or groups 12 and under.

Sculptures and castles will be judged on design, detail, neatness and techniques. No permanent forms may be used in the structures, although contestants may use all the sand, wood, rocks, and shells they find on the beach that day.

The construction area will be along the beach in front of the large bathhouse complex, near the intersection of 8th and Westline Drive in Alameda.

Naval hospital 40 years old July 1

WOOD TO CONCRETE—Rising from a sea of long, wooden hospital wards used to treat thousands of World War II injured stands the modern medical center that still is informally known as Oak Knoll.

Dr. Sears to assume No. 2 position here

Captain H. James T. Sears reported earlier this week to assume the position of Director of Clinical Services and Deputy Commanding Officer of Naval Regional Medical Center Oakland on July 1. He is relieving Captain Joseph P. Smyth who will assume command of Naval Regional Medical Center, Okinawa, Japan on Aug. 6.

Dr. Sears comes to Oakland from Naval Regional Medical Center San Diego where he has been Chairman of the Psychiatry Department since September 1979.

Dr. Smyth, an internal medicine specialist, has been assigned to Oak Knoll since Aug. 9, 1980.

ole in three wars

Looking back on Oak Knoll's past

In the early spring of 1942, 25 barracks-type redwood buildings took shape on the site of the former Oak Knoll Golf and Country Club. They were the nucleus of the sprawling "temporary" hospital the Navy built to receive thousands of World War II casualties that were to be brought back from Pacific battle zones.

The hospital was commissioned on July 1, 1942, with six ward buildings and 204 beds ready for occupancy. Construction kept pace with developments in the Pacific, and in 1945 at the close of the war, the hospital was caring for more than 6,000 patients with a military and civilian staff of approximately 3,000. Contractors brought the total number of buildings on the 220-acre compound to 135 including a chapel, navy exchange, library, and a series of living quarters for staff.

With demobilization, both the activity and the population declined, only to rise again during the Korean conflict when the daily patient census averaged 2,500. This figure fell to a peacetime level of about 600, but with the influx of Vietnam casualties beginning in 1965, the tempo of life at Oak Knoll increased again, both in patient requirements and in morale-building activities.

On Dec. 7, 1965, ground was broken for a new sorely needed permanent hospital, and by mid-1968, the

facility was completed and receiving its first patients. Fire-resistant with a frame of reinforced concrete and walls of precast concrete panels, Building 500 is today a nine-story, attractive, modern hospital facility, well-equipped and with tasteful decor and pleasant landscaping.

Most of the temporary buildings have been demolished to make way for the multi-storied hospital, but some have been retained for use as intermediate care units and to house facilities such as the Navy Exchange store, Special Services, Red Cross Lounge, Education and Training, General Library, Laundry, Civilian Personnel Services, Security, Fire Department, maintenance and transportation shops, and other supporting operations.

On Jan. 1, 1973, Naval Hospital Oakland was consolidated into the existing Naval Regional Medical Center, Oakland, California. The regional concept provides medical service to branch clinics easily accessible to beneficiaries, yet allows centralization and consolidation of health care resources to ensure a high degree of efficiency and effectiveness.

From the beginning, the mission and tasks of the center have mandated a progressive approach to total health care. With its acquisition of the Computerized Axial Tomography (CAT)

scanner and its Scout View Packages, Naval Regional Medical Center Oakland became the proud owner of one of the most technologically advanced models of this body scanner in the nation. This amazing piece of medical equipment is capable of producing high resolution images of both head and body, thereby eliminating much of the need for exploratory surgery. (Developers of the scanner received the 1979 Nobel prize for medicine.)

Throughout recent years, other important patient care facilities have been regularly added. These include the artificial kidney, radioisotope laboratory, and cobalt therapy units. Specialized treatment programs have been developed in neuro-surgery, thoracic and cardiovascular surgery, amputations, replantation microsurgery, renal dialysis, plastic surgery, corneal transplants, oncology, neurology, aural surgery, neuropsychiatry and nuclear medicine. Automated hardware is used to support more than 3,500 hypertensive patients, while a central word processing unit provides service to both clinical and administrative functions, and the laboratory uses a modern computer-directed analyzer for multiple testing.

Facilities at Oakland serve one of the Navy's major teaching medical centers by providing residency programs in 14

New Japan duty for Dr. Smyth

When Navy Medical Corps Captain Joseph P. Smyth arrived at Oakland nearly two years ago, he came from a position as Director of Clinical Services at the U. S. Navy's medical center in Yokosuka, Japan. Now he returns to the same country, on Okinawa, to take command of the medical center there.

Born in Norwalk, Conn., and raised in Stamford, the physician has 24 years active duty and six years reserve in the Navy. He enlisted in 1953 and completed recruit training in Bainbridge, Md., and further schooling at Hospital Corps School at Portsmouth, Va., and Laboratory Technician School at St. Alban's Naval Hospital, N.Y. He attained the rank of Hospital Corpsman First Class in 1957 and served with the Marine Corps while deciding to become a Navy physician.

From 1958 to 1960 he worked as a city policeman while also studying at Fairfield University in Connecticut, where he earned a bachelor of arts. In 1960 he entered the Creighton University School of Medicine in Omaha, Neb., and later earned a medical degree from that institution. He enrolled in the Navy's Senior Medical Program and interned at Naval Regional Medical Center, Philadelphia, Pa., completing his internal medicine residency at the same hospital in 1968.

Following duty on the Philadelphia staff, Dr. Smyth served, successively,

NEW CITIZEN? — We don't know her name or her origin. She could be a native American Indian, of Hispanic heritage, or maybe even a Vietnamese refugee, but somehow this little tot holding the stars and stripes in each tiny fist seems to symbolize

what the United States and its future is all about. As we approach Independence Day it seems an appropriate photo to wish everyone a happy and meaningful Fourth of July.

(US ARMY PHOTO)

Our patients write. . .

I am writing to tell you how much I appreciated a real concern to help me by HM3 (Dean) Wiggs (Cardiology) today. There was a real mix-up concerning my consult and records from Dr. Vasquez in the Moffett Field Clinic and I am working against a time element since I will be leaving the area June 1st to join my husband in Japan.

He took the time to look into my problem and help me with a solution which no one else did. There needs to be more people like him who are willing to help a person rather than just pass the buck (so to speak).

I just wanted you to know how much I appreciated his help and concern.

Karen McElmurry

...

Thanks so much for your letter of sympathy on the death of my mother.

I would like to ask you to convey my appreciation to Dr. Sue Walker for her help and kindness and also to any other staff members on 9 South.

R. W. Funk
CDR, USN (Ret.)

...

One of your physicians, Dr. Hooper, took care of my mother Beulah Castle while she was visiting me in California. . .

She was seen on time for each of her appointments. All the tests which were ordered were done within a reasonable time and the results were promptly returned, so he could do a full diagnosis for her.

He is a very caring person and always gave her as much time as necessary to answer all her questions during these appointments.

I really feel he is outstanding in the field of cardiology and exemplifies excellence in the role of a physician.

Miss Jackson, the clinic secretary, was a great help in directing us to the various departments around the hospital and for giving us prompt appointments to see Dr. Hooper.

Dr. and Mrs. Ralph D. Felice

Navy leaders call U.S. Navy 'finest'

ADM Thomas B. Hayward, Chief of Naval Operations, and ADM James D. Watkins, who succeeds ADM Hayward as CNO on July 1, described the service as "the right kind of Navy," and "a Navy on the move" in recent remarks at Pearl Harbor, Haw. The speeches took place during a ceremony aboard the attack submarine USS NEW YORK CITY (SSN 696) in which ADM Sylvester R. Foley, Jr. relieved ADM Watkins as Commander in Chief, U. S. Pacific Fleet.

ADM Watkins told the audience, "as an island nation dependent upon the sea for defense and for unimpeded access to sea lanes—which are the arteries of our national economic life—we must have a Navy second to none. I believe such a Navy is now realistically within our grasp.

He said that, "Congress and the American public understand we can no longer be expected to do more with less. Nor should we ever again force our military people to accept the major burden of inequitable pay as the national example for austerity when most others remain unaffected in comparison. A healthy personnel environment is key to readiness, and readiness and ability to sustain in combat are the first two priority defense objectives."

ADM Watkins praised the Navy men and women he had encountered while Pacific Fleet Commander, declaring "the most valuable fleet asset... is people. I have found leadership to be alive and well in every community in the fleet, down through the crow on the sleeve of our brand new petty officers.

"From boot camp, through the ratings and ranks of this fleet and this Navy, ADM Hayward has emphasized pride and professionalism, the hinges of readiness. But while he has emphasized those qualities, it is you—the chain of command—the men and women of this fleet, who have embodied them. You are pride; you are professionalism."

The prospective CNO expressed confidence in the direction of growth in the Navy, noting "we have been given an incredible measure of salt water over which to keep the peace. The threat has grown at an alarming rate—but the alarm has been sounded. We are a Navy on the move—rebuilding our maritime strength and our leadership role to help foster stability in an increasingly unstable world."

ADM Hayward, looking to the conflict over the Falkland Islands as an example, said, "We must learn once again that warfare is a hazardous business, that the price of waging war is infinitely more costly and expensive than the price of maintaining the peace—a peace that can only be maintained through strength, not through weakness.

He described the U. S. Navy strength in terms of the battle group, saying, "we build battle groups composed of all kinds of ships, and weld them together for the purpose of sending them to sea to control the seas, to sweep the adversary from the ocean, to go where we want, when we want, at our initiative. Airpower is a critical element of the battle group. The surface combatant is able to carry out its role because it is operational within the envelope of the carrier-based airplane. The United States Navy today is building the right kind of Navy for the right reasons."

The CNO concluded, "We're not the largest Navy in the world by every measure. But we are the finest Navy in the world by every measure."

'Mighty oaks from little acorns'

Savings are the basis of any prudent financial plan. Most of us have to set something aside regularly if we're to accumulate any sizeable sum of money, the kind of money most of the big things in life require.

How better to do it than with an automatic, dependable Payroll Savings Plan for U. S. Savings Bonds? With Payroll Savings, a one-time decision to save makes you a saver payday after payday, without fail. Then, even if you spend all your take-home pay, your financial security is growing.

Lots of your shipmates or fellow workers will tell you there's no better way to save. Many of them will tell you, too, that there have been times when they've been mighty glad to have the money this kind of saving provided.

True, but is it wise these days to put money into bonds when higher interest rates are being advertised? The answer is "yes." Bonds offer the opportunity to earn a good return on small sums of money. That return helps you accumulate the larger sums that are required for the higher returns being publicized.

**Another increase
in interest rates
for U.S.
Savings Bonds.**

**Growing
Bigger...Faster**

Contributions from both staff and patients are welcomed and should be addressed to the Editor of the OAK LEAF, Naval Regional Medical Center, Oakland, CA 94627.

onymity assured

DOD to survey civilians on drug and alcohol use

The Department of Defense is sponsoring a world-wide survey of drug and alcohol use among its civilian employees which will commence in late June or early July.

The survey, similar to one administered to the DoD military population in 1980, will be conducted by an independent civilian contractor, under the auspices of the Office of the Secretary of Defense, Office of Drug and Alcohol Abuse Prevention (OPDAP). The purpose of the survey is to evaluate the extent of drug and alcohol use among the DoD civilian work force and to plan improvements in employee assistance programs and policies.

In the Department of the Navy, approximately 700 employees in the United States and overseas will be randomly selected and given questionnaires to complete regarding drug and alcohol use. The forms will be mailed to local civilian personnel offices with complete information and instructions for delivery to selected employees.

Both the Department of Defense and the contractor conducting the survey have assured complete anonymity of responses. The questionnaire must be administered on a voluntary basis, only during the employee's normal duty hours. Full cooperation is encouraged from those selected to participate.

CDR Kraft retires next week

LCDR John Kraft

On July 1, LCDR John E. Kraft, MSC, will retire from the Navy. He has been assigned as Chief of Patient Services since his arrival at Oak Knoll in August 1979.

The retirement ceremony will take place in the Clinical Assembly on June 30 at 9 a.m. All personnel are cordially invited to attend.

LCDR Kraft served for 13 years as a Hospital Corpsman prior to receiving his commission in February 1970. Since that time he has served at medical centers on the east and west coasts, in Japan, and also a three-year tour with Fleet Marine Forces of the U. S. Pacific Fleet.

At Naval Regional Medical Center, Oakland, LCDR Kraft has been responsible for various patient services functions, including managing the office of Medical Affairs for Northern California, Nevada, Colorado, and Utah, and decedent affairs functions relative to all naval service dead within the Pacific Command Area.

His hobbies include composing music and Asian history. When asked how he viewed his post-retirement life, he replied, "a piece of cake."

John, his wife DeeAnn and their four children will be making their new home in Las Vegas, Nevada.

Physical Therapy head to end 26 Navy years

Medical Service Corps Lieutenant Commander Patricia B. Hoggatt, Chief of Physical Therapy here for nearly five years, is retiring June 30 after 26 years of Navy service. She will be relieved by Lieutenant Commander Robert Hoggatt, already on the PT staff. LCDR Hoggatt entered the Navy as a cadet, attended the University of California (1956-57) and was first stationed, as a physical therapist, at Key West, Fla. In more recent years she has had two tours at Oakland, at medical centers in Bethesda, Md. (two tours), Portsmouth, Va., and Yokosuka, Japan. She holds a bachelor of science in physical therapy, a specialty certificate, and masters of arts in education from George Washington University. Her many decorations include the Meritorious Unit Citation and Navy Commendation ribbons and the National Defense ribbon.

While on the Oak Knoll staff she has recently been appointed project manager for the annual U. S. Savings Campaigns and has served on the staff of the Month selection committee.

"We've been very happy in the Navy. I'm going to miss the folks," she says. "But I fully intend to keep in touch."

Her future plans include a trip to England to visit relatives, followed

by classes in photography, and possibly, dog grooming or other hobbies involved with animals. She and her

LCDR P. B. Hoggatt

husband Gary, an electrical engineer, make their home in Newark and plan to continue to live there. Both are interested in scouting and may volunteer to assist their community in related programs.

The physical therapist's favorite sport is snow skiing, which she intends to continue in retirement.

Dr. Sears respected psychiatrist

Captain H. James T. Sears, 45, soon to head all clinical services and medical training at this hospital, was a member of the Interagency Medical Team for the American Hostages in Iran.

Professor, consultant, lecturer and author, he has gained considerable respect from Navy medical peers and has a broad background in psychiatry.

Born in Minoa, N. Y., he is a graduate of the Albany Academy, where he studied under an academy association scholarship. He received a bachelor of arts degree from Wesleyan University where he held the Russell Wells Scholarship, and a medical doctorate from Albany Medical College of Union University under an alumni scholarship. He served a rotating internship at Albany Medical Center Hospital and a psychiatric residency at National Naval Medical Center, Bethesda, Md., where he was chief resident, 1966-67.

Further education included a behavioral therapy course at the University of Pennsylvania; training at the Institute of the Philadelphia Association for Psychoanalysis; Navy course in basic management principles; executive medicine at Naval School of Health Care Administration; medical department orientation course in alcoholism; landing force medical staff planning; division and combat psychiatry course (conducted by the Army), and strategic medical readiness and contingency course at Bethesda.

He was staff psychiatrist at Philadelphia Naval Hospital; head of the Neuropsychiatry Branch aboard the USS REPOSE (AH-16) in Vietnam service; head of the Officers' and Women's Unit and, later, Assistant Chief and Director of Residency Training, Neuropsychiatry Service at Philadelphia Naval Hospital; Chairman of the Department of Psychiatry at Philadelphia; Chairman of Psychiatry at Portsmouth, Va., and in his most recent billet, Chairman of Psychiatry at San Diego.

Other professional experience has been Acting Medical Director, Salem County (N. J.) County Guidance Center; Consultant, Burlington County (N. J.) Jail; Team Member, "Operation Egress Recap," "Operation Homecoming" (Vietnam POWs); Invitee and Participant, Conference on the Education of Psychiatrists, Lake of the Ozarks, Missouri; Examiner, American Board of Psychiatry and Neurology; Consultant to the Surgeon General for Navy Psychiatry; Member, Committee on Federal Government Health Services, American Psychiatric Association, and Consultant, "Operation Deep Freeze," Antarctic Support Force.

Professorial appointments have been with the University of California, San Diego; U. S. International University, San Diego; Eastern Virginia Medical School; Hahnemann Medical College, Philadelphia, and University of Pennsylvania.

Dr. Sears is a diplomate of the National Board of Medical Examiners, is a board-certified psychiatrist and holds medical licensure in New York, New Jersey, Virginia and California (in process).

He is a member of the American Medical Association, American Psychiatric Association, Association of Military Surgeons, American Association of Directors of Psychiatric Residency Training, Delaware Valley Directors of Residency Training, Pennsylvania Psychiatric Society, Neuropsychiatric Society of Virginia, San Diego Psychiatric Society, Society of Medical Consultants to the Armed Forces, American Association for the Advancement of Science and the U. S. Naval Institute.

His community service has been directed to drug abuse, telephone counseling, and family problems. He has authored some 20 articles and professional papers, appeared on

television talk shows, reviewed books, and originated an audiotape. Awards include a fellowship, American Psychiatric Association; AMA Physicians Recognition Award (five years); Navy Commendation Medal (twice), Navy Meritorious Service Medal, and a certificate of appreciation from the U. S. Department of State.

Dr. Sears' current interests include evaluation of Navy health care delivery approaches; non-medical reasons for seeking medical care, and psychosocial factors in the etiology of cancer.

The psychiatrist is married to the former Elsa Hale Weber. They have four children: Deborah, Joyce, Tipper and Wendy.

Dr. Smyth — —

(Continued from Page 1)

at Da Nang, Vietnam, Naval Regional Medical Center, Orlando, Fla. (where he was Chief of Medicine), and at Yokosuka before duty at Oakland.

The captain holds the Navy Commendation Medal with Combat "V," Combat Action Ribbon, Navy Unit Citation, Presidential Unit Citation, Navy Good Conduct Medal, National Defense Ribbon, Vietnam Service Medal with three campaign stars, the Vietnam Meritorious Unit Citation, Vietnam Campaign Medal, and the Association of the Military Surgeons of the United States Medal.

Licensed in four states—New York, Connecticut, New Jersey and Florida—the physician holds membership in several professional societies including the American Medical Association, the Florida Medical Association, Orange County (Fla.) Medical Association, Florida Physicians Association, and the Association of Military Surgeons of the United States.

Dr. Smyth and his wife Ursula are parents of three—Donna, 18, Jennifer, 17, and Joseph, 5. Captain Smyth's mother, Mrs. Helen Smyth, also resides with the family. During his assignment here, the family lived in quarters on base.

'Father Joe'

New chaplain proven hero

In an interview for a newspaper a few years ago, Father Joseph Anthony Ferraro was quoted as saying, "I believe in what St. Augustine said, 'He who sings, prays twice.'"

And from what we hear about the new Roman Catholic chaplain commander here, he has a beautiful lyric tenor voice and obviously practices what he preaches.

The affable, outgoing "Father Joe" has a reputation for more than his singing, however. In at least three incidents in the past he has shown he is made of the same fibre as some of the bravest of heroes.

Shortly after he was first ordained as a priest he worked a year in a prison housing 500 convicted murderers and the criminally insane in New Jersey. Although there were other less serious incidents, at one time an inmate jabbed a ballpoint pen into his neck. "Father Joe," however, kept his cool and escaped unharmed.

A few years later while in the Navy stationed at Mt. Fuji, Japan, he reasoned with an irate Marine, making him surrender a live grenade that he planned to use to blow up his superior officer.

And, in early 1979 while a chaplain at the Naval Construction Battalion Center, Port Hueneme, Calif., he managed to talk a Navy wife into surrendering without a shot being fired 20 hours after she armed herself and held her sister and parents hostage inside a home. This action earned him the Navy and Marine Corps Medal for Heroism, the Medal of Merit from the Peace Officers Association of Ventura County, and the public praise of the Oxnard City Council and police officials.

Born in an Italian neighborhood of Philadelphia 40 years ago and reared in the suburban town of North Bristol, he later attended DeMatha Catholic High School in Hyattsville, Md., graduating as valedictorian of his class in 1958.

He then embarked upon a course of study for the priesthood. He was ordained in 1967 after attending St. Mary's Seminary College and University where he earned a bachelor's degree in philosophy and a master's in divinity.

Later study at Catholic University in Washington, D. C. made him eligible for a master of arts in English. Other postgraduate studies at California Lutheran College and at University of California, Berkeley, earned him another master's—in family counseling.

With 13 years of Navy service, "Father Joe" has been assigned with the Third Marine Division; Coast Guard Training Center, Petaluma, Calif.; Marine Air Station, Iwakuni, Japan; Port Hueneme, Calif., and Naval Support Activity, Naples, Italy. This is his first assignment to a hospital and he says he finds it very exciting and different from other billets he has had. He is Acting Chief of Pastoral Care Service pending the arrival of Captain L. Wayne Rushing later this summer.

In addition to the heroism medal, the Catholic chaplain holds Commendation Medals from both the Navy and Coast Guard.

While in Italy, he studied with Maestre from the Naples Conservatory of Music. His other off-duty interest is tennis, but he confesses that he isn't very good at it.

In a second confession he admitted to being a people lover. But he didn't have to tell us. It shows.—Betty Beck.

Fr. Joseph Ferraro

PMT School to graduate 26

Graduation ceremonies will be held at 9 a.m. in the Clinical Assembly on July 9 for Class No. 97 of the Preventive Medicine Technician School. The students have completed a 26-week course involving all aspects of preventive medicine.

Following is a list of the graduates and their new duty stations:

HMC Mohammad S. Al-Garni, Saudi Arabia.

HM1 James Carrawell, Guantanamo Bay.

HM2 Joey F. Casiano, Naval Environmental Health Center, Norfolk, Va.

HM3 John R. Darney, Naval Regional Medical Center, Camp Lejeune, N. C.

HM3 Owen Devine, USS MT. WHITNEY (LCC), Norfolk, Va.

HM3 Gary L. Dover, CB Gulfport, Iviss.

HM3 William C. Dwyer, Barstow, Calif. Branch Clinic.

HM1 David A. Fitch, NAVCOMSTA, Haroldholt, Australia.

HM2 Donald R. Gray, NRMOC Oakland.

HM2 David W. Hillman, Subic Bay, Philippines.

HM2 Jack H. Howell, USS PUGET SOUND, La Madelena, Italy.

HM2 Michael D. Hughes, USS DURHAM (LKA-14), San Diego, Calif.

HM3 Mitchell D. Joyce, Roosevelt Roads, Puerto Rico.

HM2 Robert A. Joyner, Kings Bay, Georgia.

HM3 Keith B. Lambert, NRMOC Okinawa.

HM1 Daniel V. Meyer, USCG, Government Island, Alameda.

HM3 Norma Kropelnicki, DVECC, Alameda.

HM2 Cynthia A. Moss, NRMOC Japan.

HM2 Leonilo B. Oribello, USS ST. LOUIS, San Diego.

HM2 Timothy S. Porter, USS ORION, La Madelena, Italy.

HM2 Christopher J. Sheridan, USS BELLEAUWOOD (LHA), San Diego.

HM2 Edward L. Shrum, MCB—3, Pt. Hueneme, Calif.

HM2 Ronald L. Spill, USS SACRAMENTO (AOE-1), Bremerton, Wash.

HM2 Albert C. Spinks, USS EL PASO, Norfolk, Va.

HM3 Kevin O. Strohschein, NRMOC Japan.

HM3 Lawrence R. West, NRMOC Guam.

Give kids safe ride

Automobile accidents are the leading killer of children between the ages of one and four in this country.

Some people think they can protect infants and young children from injury by holding them in their laps. They cannot. Starting with the very first ride home from the hospital, an infant should be secured in an approved safety seat.

Fire danger serious now and for holiday

All of us are keenly aware of the tragic fires which have in past seasons engulfed thousands of acres of beautiful countryside, killed wild and domestic animals and left numerous lovely homes in ruins.

Fire Chief Bob Bobbitt of the Oak Knoll Fire Department warns us that it is going to be a long summer here too and the danger this year is particularly high. The unusually heavy winter and spring rains, coupled with the recent warm, dry weather, have raised the fire danger in the grassy hills here to a critical level. Even the smallest spark can set off a major wild fire, and the chief reminds us that every person, adult or child—must be extremely cautious in the use of fire or sparking devices such as smoking, barbecuing, mowing lawns, etc.

"To make matters worse," he said, "The Independence Day holiday is nearly here. Everyone is reminded and cautioned that the use of fireworks is forbidden by law in Alameda County and Naval Regional Medical Center grounds. Even sparklers, which are normally considered to be reasonably safe when the use is supervised, create a very serious problem. I urge all personnel and their families, whether living on or off base, not to use even sparklers this year, but rather to enjoy the numerous professional fireworks displays offered to the public each year."

Only cremated remains accepted

The newly-appointed director of the Veterans Administration's National Cemetery Area Office here, James Rankin, Jr., emphasized today that only cremated remains will be accepted in the two national cemeteries in the Bay Area which were reopened June 1 for cremated remains only, not casketed remains.

Rankin said he wanted to clear up some confusion that evidently existed regarding the opening June 1 of the two Bay Area national cemeteries to the burial of cremated remains.

He said the VA's new program that went into effect immediately after Memorial Day, calls for the creation of garden niches to provide for the dignified use of land unsuitable for interment of casketed remains.

For example, he said, cremation will be interred in land, such as on highways or along walkways, that have heretofore, been unused in our national cemeteries.

The San Francisco National Cemetery, located in the Presidio, was opened for the cremated remains of approximately 5,000; the Golden Gate National Cemetery, located in near San Bruno, for the cremated remains of approximately 20,000.

Shark hunt nets pot

The Tiburon is a warm-water shark that gobbles down everything in sight. It is also the code name for an operation conducted by the Coast Guard Drug Enforcement Administration, Customs Service and others in a cooperative effort to clamp down on pot smuggling into the United States.

And a highly successful effort was. In the 14-month period ending December, the Coast Guard seized 11 vessels, arrested 495 crew members and confiscated more than 1.7 million pounds of marijuana.

Class of '82 graduates June 30

Graduation ceremonies will be in Clinical Assembly at 2 p.m. on Wednesday, June 30 for medical interns and dental general practice residents who have completed a year's training at this command.

Rear Admiral Walter M. Lonergan, Commanding Officer, will be the key speaker in the ceremony. Speaking for the class will be Lieutenant Susan J. Walker, Senior Medical Intern, and Lieutenant Robert S. Rolley, Senior Dental General Practice Resident. Others participating in the ceremony will be Catholic Chaplain (Commander) Joseph A. Ferraro, Medical Corps Captain Dale W. Oller and Dental Corps Captain George W. Oatis, Jr. A reception will follow in the Officers' Club.

Graduating medical interns and their new duty assignments are:

Lieutenants Michael R. Ambrose, Naval Aerospace Medical Institute, Pensacola, Fla.; Richard A. Bessette, Naval Mobile Construction Battalion 3, Port Hueneme, Calif.; Clarence H. Bradstock, USS WICHITA (AOR-1); Roger D. Dainer, USS KANSAS CITY (AOR-3); Daniel L. Dale, Naval Aerospace Medical Institute; Kathleen K. Dale, Alameda Branch Clinic; Karlotta M. Davis, Naval Regional Medical Clinic, Annapolis, Md.; Patricia A. Duprey, Branch Clinic, Marine Corps Air Station, Iwakuni, Japan; Richard P. Erwin, Third Marine Division, Okinawa; Mark W. Flick, First Field Supply and Support Group, Fleet Marine Force, Camp Pendleton, Calif.

Also, Lieutenants Randal C. Franke, USS LONG BEACH (CGN-9); Mark W. Gow, Third Marine Division, Okinawa; Frank W. Hall, Naval Undersea Medical Institute, Groton, Conn.; R. Scott Hamilton, Third Marine Division, Okinawa; John R. Hanning, Naval Regional Medical Center Oakland (Obstetrics/Gynecology Residency);

Gary S. Harris, Branch Clinic, Iwakuni; Frank M. Hartwick, Naval Aerospace Medical Institute; Rhett H. Hasell, Naval Regional Medical Center Oakland (Pediatric Residency); Konrad E. Hayashi, USS WHITE PLAINS (AFS-4); Lawrence M. Holm, Naval Regional Medical Center Oakland (Anesthesiology Residency); Edward W. Jewell, III, Naval Aerospace Medical Institute; William J. Kemerer, Jr., Naval Undersea Medical Institute; Leo Kusuda, Naval Regional Medical Center Oakland (Urology Residency); Peter B. Letarte, Naval Aerospace Medical Institute.

Also, Lieutenants Berry E. Lewis, Moffett Field Branch Clinic; Marc S. Muramatsu, USS ROANOKE (AOR-7); Steven R. Myrick, Naval Aerospace Medical Institute; Alison C. Nash, Naval Regional Medical Center Oakland (Pediatric Residency); John H. Oldershaw, Naval Aerospace Medical Institute; J. Kevin Pidkowitz, Marine Corps Air Station, Yuma, Ariz.; Marsha G. Pierdinock, USS JASON (AR-8); Mark A. Richardson, USS NIAGARA FALLS (AFS-3); Douglas C. Riehle, Naval Aerospace Medical Institute; Louis J. Saporito, Alameda Branch Clinic; Louis S. Sarbeck, Naval Mobile Construction Battalion 74, Gulfport, Miss.; William F. Siebert, Jr., Naval Mobile Construction Battalion 4, Port Hueneme; David J. Smith, Naval Undersea Medical Institute; Michael A. Turner, Naval Aerospace Medical Institute; Mark J. Wagner, USS MARS (AFS-1); Susan J. Walker, USS AJAX (AR-6); Ronald J. Williams, Naval Regional Medical Center, Camp Lejeune, N. C., and Dennis A. Wilson, USS SACRAMENTO (AOE-1).

Those completing dental residencies and their new assignments are Lieutenants Philip R. Eckman, Naval Mobile (Continued to Page 5)

Medical center contributes 5,099 to Navy Relief

Contributions totaling more than 5,000 have been collected as this Navy Relief Society drive winds up, according to a report submitted by LCDR R Kirk Ridgeway, chairman.

The contest among the keyperson collecting the most individual donations. HN Barbara Miller of the Sixth Deck was the most successful, followed in order by HMCS Eddie "B" Nichols, Clinical Investigation Center; HMCS Mary Nichols, Seventh Deck; HMCS Alad, Special Services; HMCS William Smith, Pharmacy; LT John Noble, Radiology; HM3 Charles Wilson, Ninth Deck; HM2 Donald Wilson, Radiology; LCDR Mike Wilson, Medical Service, and LT Frank Hall, Supply. Miller won a \$50 reward, Nichols a 96-hour liberty, and Nichols four liberty.

Sales conducted by Outpatient Department, Nursing Administration, Dining Room and Fifth, Seventh, and Ninth Decks raised more than \$500, while the Mexican Fiesta sponsored by Staff Education and Dining netted more than \$200.

Nearly \$400 went to the cause from softball games; more than \$200 from the Sixth Deck-Operating Management Car Wash; nearly \$400 from the raffle; more than \$700 from the flower sale; \$40 from the photo sale; more than \$250 from the Bedpan Fun Run; \$52 from an ENT-Housekeeping basketball challenge, and \$19 from an arm wrestling challenge between LCDR O.T. Watkins of Occupational Therapy and HN Mark Forrest of Psychiatry.

Special thanks go to Alameda Coast Guard Federal Credit Union who contributed \$25 towards first place keyperson prize plus special checking account services; Bob Parker for provisions of free keg of beer at MSC/Chiefs baseball game; and to all keypersons as well as HM1 Joyce Burns of Physical Therapy, CDR Stan Bagbey of Nursing Service, LTJG Bob Owen, Military Manpower; LT Faith Weber, Food Service; LT Bob Burg, Operating Management, and ENS Kaki Douglass of Physical Therapy, all who worked hard to make this drive successful.

Civilian Advisory Board elects officers

Port Thompson of Supply Service and Jeanette Morgan, secretary to the Department of Medicine, have been elected president and secretary, respectively, of the newly established Civilian Personnel Advisory Board. Beverly Billman of Alameda Branch Clinic will serve as alternate secretary in Jeanette's absence and Betty Anderson of Radiology Service will work in an advisory capacity with President Thompson.

The officers were elected for a one-year term during a June 8 meeting of the board.

The group will next meet on July 8.

One-stop plan for travel needs now being tested

In a move to cut travel costs, the Department of Defense is considering proposals from the travel industry to consolidate travel needs in central locations.

The one-stop-shopping plan, already in use by corporations, covers ticket reservations and deliveries, car rentals, hotel reservations and printed travel itineraries.

According to the Military Traffic Management Command, the government will pay lower prices to carriers, car rental agencies and motel/hotel operators. A contractor performing this service would be paid by commissions and defrayed operating costs.

Under a one-year pilot program, DoD has selected three sites for testing the plan: Travis Air Force Base, Calif.; the Marine Corps Base at Quantico, Va.; and the Army's Tank Automotive Command in Warren, Mich.

New rail gun fires 10,000 mph shot

A new launching system being developed by Westinghouse under contract to the Department is expected to fire projectiles at more than 10 times the speed of sound. The launcher uses electromagnetic force to propel the projectile between two parallel rails.

In its first full-power test, the launcher propelled a 10-ounce projectile made of copper and plastic almost 10,000 miles per hour, penetrating a one-quarter-inch thick steel plate.

Defense applications in the 1990s could include electromagnetic guns able to fire shells that pierce armor which stands up to present munitions, and launch systems for aircraft.

Other applications of pulsed electromagnetic technology include firing pellets with enough mass and velocity to create nuclear fusion energy and new metal-forming processes.

NEW PWC HEAD—CAPT Charles "Mike" Maskell assumed command of the Navy Public Works Center, San Francisco Bay, on June 11 from CAPT David E. Bottorff who was transferred to becoming Commanding Officer of the Southern Division, Naval Facilities Engineering Command, Charleston, S.C. CAPT Maskell, who holds a master's degree in civil engineering, will be responsible for managing a \$90 million-a-year Navy business. The center, located on Oakland Army Base, provides public works, housing, utilities, transportation, engineering and other support to major military activities (including Naval Regional Medical Center Oakland) and Navy ships in the Bay Area.

BOARD MEMBERS—Quentin Moore (left) of Housekeeping and Elias Sellars of Transportation are both members of the newly established Civilian Personnel Advisory Board.

A quick look _____
at recent health care _____
developments _____

The injuries suffered by amateur athletes have been charted by the sports injury clinic at Lenox Hill Hospital and they've come up with their top 10 hit list, which was published in *Therapaeia*. At the head of the list is jogging, which accounts for 35.2 percent of the injuries. Racquet sports, 12.4 percent, basketball, 10.5 percent. The rest of the top 10 in terms of causing injuries are ballet/dancing, football, snow skiing, weight lifting, baseball, martial arts and soccer. The most commonly injured areas of the body are knee (45.5 percent), ankle (9.8 percent) and shoulder (7.7 percent). Sports physicians emphasize the need for periodic stretching, especially for the aged athlete before he or she tries to swing a golf club or racquet. Physicians have also found that joggers tend to shorten their strides when they get tired, thus opening themselves to the possibility of injury.

The survival rate for the 10 most common cancers showed marked improvement from 1969 to 1979, according to an analysis of 468,288 patients by the American College of Surgeons. The changes reported in five-year survival rates for some common cancers were: Breast cancer, 73 percent survival, up from 65 percent in 1969; lung cancer, 11 percent, up from nine percent; cancer of the colon, 50 percent, from 46 percent; prostate cancer, 68 percent, from 57 percent; uterine cancer, 84 percent, from 75 percent. The five-year survival rate for patients with Hodgkin's disease rose to 72 percent from 54 percent.

Brooke Shields must have blood pressure bordering on the comatose, if a social scientist at Johns Hopkins University is to be believed. He found that "unattractive" teenage girls tend to have higher blood pressure than attractive girls. His research found that there is no such correlation between blood pressure and teenage boys' looks, or in adult men and women. According to the researcher the stress of physical appearance abates with maturity.

HEART-TO-HEART—In a symbolic transfer of responsibility, Commander Roger E. Vielbig (right), passes the model of a heart to Commander Richard P. Umfried, III, who relieved him as Chief of Cardiology here. Dr. Vielbig, released from active duty, will enter private practice in the Pacific Northwest.

Research on alcohol and stress — getting tight can tighten you up

Will a few drinks relieve that tension you built up today? Maybe it was a hard day at the motor pool or the firing range, or maybe the captain jumped all over you for that overdue report. If a few drinks will help loosen you up, will a few more be even better?

Not so, according to a Rutgers University researcher, who found that heavy drinking by a person under stress can increase, rather than lower, the tension level.

The researcher, Dr. Larissa Pohorecky, says that heavy drinking can cause the body to increase its production of fatty acids and the stress hormone corticosterone.

"When levels of these two substances are increased, so is stress,"

says Dr. Pohorecky. "We have found that a small amount of alcohol will reduce their levels; however, continued drinking will reverse this, increasing the levels of the substances and the stress load on the body."

"Exactly why this happens has yet to be learned," she continued, "but we do know that people who drink while under stress will feel better if they drink smaller amounts of alcohol and drink slowly."

The research, funded by a grant from the National Institute on Alcohol Abuse and Alcoholism, is one of only a few such studies currently examining the effects of alcohol on people under stress.

Navy helps curb drug traffic

The guided missile destroyer USS FARRAGUT (DDG 37), recently towed two vessels seized by the U. S. Coast Guard into San Juan, Puerto Rico, with their crews under guard, marking the first time that a Navy ship has taken an active role in law enforcement and interdiction of drug smuggling in the Caribbean.

The assistance was repeated June 10 when the ocean minesweeper USS FIDELITY (MSO 443) escorted the fishing vessel "YVETTE" into Key West, Fla.

FARRAGUT, commanded by CDR Stephen A. Jaracki, was on routine operations in the Caribbean when asked for assistance by Coast Guard officials. The U. S. Coast Guard Cutters BIBB (WHEC 31) and INGHAM (WHEC 35) rendezvoused with FARRAGUT June 3. Each cutter transferred a captured drug-smuggling vessel and crew to the Norfolk-based destroyer for transport to San Juan. Coast Guard personnel from each cutter also embarked in FARRAGUT to guard the prisoners and to retain custody of the seized boats and their contraband cargos. During the tow transfer and while enroute to San Juan, FARRAGUT displayed the Coast Guard ensign from a yardarm halyard.

One of the captured vessels, the merchant ship "RIO PANUCO," was seized by the cutter INGHAM based on information provided by the destroyer USS CONOLLY (DD 979). CONOLLY's Officer of the Deck identified the RIO PANUSO as a "suspect vessel" which

conformed to the Coast Guard's published profile of typical smuggling ships. CONOLLY reported the ship's position by message to the Coast Guard, which halted the craft, finding more than 50 tons of marijuana onboard. **The seizure is the second largest in the history of drug interdiction efforts.**

Coast Guard officials commended CONOLLY for the "timely and thorough report" which enabled them to mobilize and intercept the RIO PANUCO.

FIDELITY, Commanded by LCDR R. S. Rawls, was called upon to escort the YVETTE into port after the high endurance cutter DALLAS (WHEC 716) boarded and seized the craft. The fishing vessel steamed into Key West under the command of a U. S. Coast Guard officer with a Navy crew assisting. The vessel's crewmembers were held prisoner by a U. S. Coast Guard detachment aboard FIDELITY.

The expanded Navy participation in drug enforcement is a result of President Reagan's commitment to strengthen drug interdiction efforts throughout South Florida. It is expected that providing towing and prisoner transport services for U. S. Coast Guard units will enable those Coast Guard units to remain at sea, in position to intercept suspected smugglers, for longer periods of time. Navy assistance has also included patrols by E-2B and E-2C "Hawkeye" airborne early-warning aircraft to detect drug smuggling planes.

Light weight gain said OK for those who stop smoking

One thing that discourages some people from quitting smoking is fear of gaining weight. The evidence shows that some smokers will show a gain after quitting, but now medical researchers are saying that's OK—you will still come out ahead from a health and fitness standpoint.

About one third of those who quit smoking gain weight. Another third show no change, and the remaining third actually lose weight because they follow a combined exercise and diet program.

Even if you're one of those who tend to gain weight after quitting, you will show a net plus in physical condition if you're successful in kicking the habit. According to the National Center Institute, the average person would have to gain more than 70 pounds to offset the health benefits of not smoking.

Recent statistics show over 36 million Americans have stopped smoking.

It takes determination and may involve more than one attempt but it has been found that those who quit can regain lung function and, after a period of time, the risks of smoke-related diseases diminish.

Physicians urge smokers to consider these risks that go with smoking:

All smokers develop emphysema to some degree and have a significant risk of developing lung cancer, cancer of the larynx, lip, mouth, pancreas and bladder. Smokers are also three times more likely to die of a heart attack.

Women smokers not only endanger their own health but, if pregnant, put their baby's health on the line. They are twice as likely as nonsmokers to have miscarriages and they give birth to 55 percent more deformed babies. Infants whose mothers smoke are more likely to be admitted to hospital during the first year of life, usually with pneumonia or bronchitis.

Coming down hard on drugs

The Department of Defense plans to toughen its stance on drug and alcohol abuse. This was emphasized by Dr. John H. Johns, Deputy Assistant Secretary of Defense (Drug and Alcohol Abuse Prevention), in a statement before the House Appropriations Committee recently.

Dr. Johns reported that the Department of Defense has made considerable progress in reducing the abuse of most drugs. But the abuse of alcohol and cannabis (marijuana) remains about the same.

"Coping with cannabis and alcohol abuse will be difficult," he said, "because of the nature of the problem with these drugs. Abuse is largely associated with the transition from adolescence to mature adulthood. Both substances are viewed in a similar vein by young people. Our tough punitive measures must be accompanied by a long-term, systematic effort to change attitudes toward these two substances."

Dr. Johns further noted that DoD's past efforts in reducing drug abuse have been hampered by two significant obstacles.

The first was a court decision limiting the action that could be taken

based on urinalysis results. Second was the lack of reliable test equipment for detecting cannabis use through urinalysis. Both these obstacles have now been removed.

With legal authority to use urinalysis results for punitive actions and the ability to detect cannabis by urinalysis, DoD has announced policy guidance that gives commanders the tools to take a tough position on drug abuse.

Drug abuse policy to include civilian personnel

Secretary of the Navy John Lehman has issued instructions which amend established Navy Department policy on drug abuse to include civilian personnel.

ALNAV 73/82, dated June 1, 1982, describes "measures to be taken with regard to civilian employees including non-appropriated fund employees, and by contract employees, to eliminate the effects of drug offenses on the reliability and readiness of the naval personnel and naval units."

"It's not that we don't need you, Albert. . . it's just that we don't want any pot heads in this outfit!"

Alaskan visits for training

Otolaryngology Service hosted a visitor from a distant state during the week of June 7-11, in the person of Mr. Jess Gunlik, an affable, handsome, full-blooded Eskimo who came to Naval Regional Medical Center Oakland to learn more about audiometrics.

Gunlik, an employee of the Yukon-Kuskokwim Health Corporation who works as an assistant to a physician's assistant/audiologist under contract with the Indian Health Service, is from Bethel, Alaska, a fishing village of about 4,000 persons located in the southwest, approximately 400 miles from Anchorage.

He travels via small aircraft to 48 remote villages of the Bethel Service Unit Hospital from September to May, explaining that during those cold months, the school kids are not in fish camps and the men are home from the canneries. During the summer he and the other health team members work in the Bethel office, catching up on paperwork and seeing referrals of patients of all ages from health aides, public health officials, and even school teachers.

"We see quite a bit of chronic air disease in the ears of the people," he said, adding that he personally believes environmental factors or possible dietary deficiencies may be responsible.

Originally from Kipnuk, a small settlement also in Southwest Alaska, he attended public schools in Bethel and one year at a trade school in Madera, Calif. Returning to Alaska in 1969, he joined the Alaska Army National Guard and served as a corpsman after completing Clinical Specialist School at Ft. Lewis, Wash.

Gunlik is married and the father of three boys and a girl ranging in age from one to 12. "We're all Yupiks (full-blooded Eskimos)," he said proudly.

On the day that we talked to him, the temperature was about 70 degrees, but he said the heat bothered him and he was anxious to return home to do some salmon fishing and dry the meat in strips to sustain his family throughout the winter.

"People here have been so friendly... but I really don't like big cities," he confessed.

BRIEFING—Jess Gunlik of Bethel, Alaska, is briefed on the operation of medical equipment used in the Oak Knoll Otolaryngology Service by Captain C. Gordon Strom.

Reba Carruthers retires

Reba O. Carruthers

"There were more beautiful days than bad," said Reba O. Carruthers as she retired June 11 after 17 years at Oak Knoll, most of them spent as a licensed vocational nurse in the hospital nursery. Four additional years of federal employment were at the VA Hospital in Seattle.

"I've worked so long—it's time to quit," she commented, explaining that she would work longer but medical problems preclude it.

Born in Linden, Texas, and reared in Texarkana, Mrs. Carruthers took nurses's training in Seattle. She will return to that city to visit friends for four months, then return to her Oakland home and work two days a week from a nursing registry.

In her free time she will continue with her sewing and church projects.

Mrs. Carruthers has a married son who also lives in Oakland. The nurse is grandmother to four.

TESTING—The Alaskan health technician conducts a hearing test as part of the audiology training he received during his recent visit to the medical center.

Executive secretaries meet monthly for lunch

Thirty-three Oak Knoll secretaries meet informally once a month for lunch to get better acquainted.

The idea originated in April 1981 with Mary Takai, Secretary to the Director of Clinical Services, when she learned that many of the secretaries to chiefs of Service knew each other only by voices over the phone.

The group is informal, with no officers. Each month the activity is planned by two members, on a rotating basis. They usually meet in the officers' Club or Porthole. On June 8, however, they decided to have a picnic in the recreation area on base. Kay Heatley and Marcia Lucas planned

the affair and reportedly did a great job.

In addition to those mentioned, the group is comprised of Vicky Armstrong, Blanche Bingham, Maureen Cammack, Jean Chambliss, Norma Compton, Ramona Dodds, Lisa Gabut, Betty Harrison, Sue Holm, Mary Ann Hopper, Jewel Hopson, Edna Hudson, Celeste Hunter, Karis Jackson, Sara Lou Knight, Helen Koetitz, Dorothy Laurence, Marge Lesage, Jane Lippincott, Mary Lyle, Marion Mooney, Jeanette Morgan, Joan Payne, Marge Ritchie, Susan Stark, Delma Shanahan, Gertrude Silva, Alice Small and Laverne Whittington.

Corpsman aids stricken seaman

The destroyer USS PETERSON (DD-39) responded to a medical distress call May 23, providing emergency treatment to a 23-year-old American merchant seaman stricken with an acute viral infection. The seaman, a new member of the offshore supply vessel NORTHROP TIDE, was suffering from pain and severe swelling as a result of the infection.

The U.S. Coast Guard directed PETERSON to NORTHROP TIDE'S position, whereupon the destroyer's

corpsman, HM1 Jack Witzendorf, was transferred to the merchant supply ship by motor whaleboat. Witzendorf quickly stabilized the man's condition, allowing him to remain aboard NORTHROP TIDE for transportation to Martinique and further medical treatment. PETERSON then resumed its transit to Plymouth, Monserrat.

PETERSON, Commanded by CAPT G. M. Grunwald, is homeported in Norfolk, Va.

Two complete X-ray training

Certificates accrediting them as X-Ray Technicians were given June 9 to Johnette Wilson and Rick Newkirk, who completed one year of training at Naval Regional Medical Center Oakland and Merritt College.

Twenty hours a week were spent at Oak Knoll for the first half of the year with didactics being done at Merritt College. During the second half of the year the students spend 40 hours a

week at the hospital.

Hospital Corps Chief Cris R. De Rosas, the program director, said the students get a well-rounded education in Radiology because we have such a busy and varied department here. "The students get to spend time in all phases of the department from the front desk to the working of many of the different X-ray machines," he said.

STUDIES COMPLETE—Rick Newkirk and Johnette Wilson, Merritt College students, receive certificates as qualified X-ray technicians from Rear Admiral Walter M. Lonergan, NRMOC Oakland commanding officer. The students spent a year in supervised on-the-job training at the medical center in addition to classroom instruction at Merritt.

COMMISSIONED—New Medical Service Corps Ensign Mu Dow waits patiently as Captain John Lucas (left) and Commander Noel Hyde, both from Pharmacy Service, attach her first shoulder boards.

HM3 Atkinson praised

CAPT Robert B. Watts, Commanding Officer, Naval Air Station, North Island, San Diego, has written this command applauding the conduct of Petty Officer Stephanie Atkinson while she was a member of the 1982 Women's All-Navy Basketball Team. The training camp was hosted by NAS North Island.

CAPT Watts said HM3 Atkinson "was a superb representative of your command and of the Navy—both on and off of the basketball court."

Stephanie is assigned to Patient Affairs Service. She was the NRMCMC Oakland Sailor of the Month last September.

Career Capsules

Budget process delays benefits

Implementation of several new travel allowances approved by Congress last year has been delayed, because funds have not yet been made available.

The benefits affected by the delay include:

- temporary lodging expenses (TLE) four days reimbursement for living expenses incurred by Navy members and their families while on permanent change of station moves within the continental United States.
- funded emergency leave, which would provide funded commercial transportation for members and dependents stationed overseas when government transportation is not available.
- funded environmental leave, which would provide funded transportation for environmental and morale leave for members and dependents stationed at remote duty stations.
- non-temporary storage of household goods for ship or unit deployments when the member is assigned temporary duty or deployed in excess of 90 days.
- temporary storage of household goods in excess of 180 days when a member is unable to accept delivery because of deployment.

The Navy has requested supplemental funding from Congress for the TLE program and has submitted reprogramming requests to fund the remaining programs. Under the federal budget process, implementation plans and program funding must again be approved by Congress.

All armed services have been affected by this process. Navy officials emphasize that all affected benefits have been authorized and should eventually become effective. Current estimates are that implementation plans and funding will be approved late this summer. (CHINFO)

Pharmacy technician commissione

Newly-commissioned Medical Service Corps Ensign Mu Ying Dow is to be assigned as a Pharmacy Officer at Lafayette River Branch Clinic, Norfolk, Va.

The former Hospital Corpsman Second Class took the officer's oath on June 7 from Captain J. R. Lucas, Chief of Pharmacy Service at Naval Regional Medical Center Oakland where Miss Dow has been assigned for a little more than two years.

"I am grateful for my fellow workers' support which enabled me to achieve this honor," she said. "As one of four female pharmacy officers in the Navy, I hope to see the role of women expanded in this area. I feel that the

Navy offers an excellent opportunity for women to realize their career goals in a supportive atmosphere."

The daughter of Harry H. Dow and the late Louise S. Dow of Boston, Ensign Dow earned a bachelor of science in pharmacy from Northeastern University in her hometown.

Following boot camp at Orlando, Fla. and Corps School at Great Lakes, Ill., she was assigned to Oakland.

She is a member of the third place team in the Tuesday night mixed bowling league here and was voted the most improved player, 1981-82.

Her other off-duty interests are horseback riding, tennis, aerobics, dancing and reading.

Comings and Goings-----

"Fair winds and following seas" to the following personnel who have recently departed this command:

CDR Roger Vielbig, Medical Corps, released from active duty.

HN Keith D. Session, 3rd Marine Division, FMFPAC, Okinawa, Japan.

LT Mary Hartman, Medical Corps, released from active duty.

HM3 Joseph Alto, NSHS, San Diego, Calif.

HN Gregory Marlatt, 2nd Marine Division, Camp Pendleton, Calif.

HM1 Clifford Stone, Naval Food Management Team, San Diego.

CWO2 Charles Leshner, Moffett Field Branch Clinic.

MS1 Ricardo Delacruz, USS HEC-TOR (AR-7), homeported at Oakland.

HN Rex Lippold, 1st Marine Division, FMFPAC, Camp Pendleton.

LTJG Julie Ann Wierzbowski, Nurse Corps, released from active duty.

HN Randall Shovall, 1st Marine Division, Camp Pendleton.

HN Madison McGuire, 3rd FSSG, Okinawa.

HN Howard Hill, 1st FSSG, Camp Pendleton.

HN Toren Brown, 1st Marine Division, Camp Pendleton.

LCDR Arie Maman, Medical Corps, released from active duty.

HM2 Laura Christensen, released from active duty.

CAPT Paul F. Regan, Naval Regional Dental Center, Newport, R. I.

HN Daniel Daniels, 3rd Marine Division, Okinawa.

HM3 Paul Nichols, NSHS, Bethesda, Md.

HM3 Caryl Ward, NSHS, Bethesda.

LCDR Victoria Monroe, NRMCMC Camp Pendleton.

LT John Schliefer, Wright-Patterson Air Force Base, Ohio.

HN Manuel Cheo, 3rd Marine Division, Camp Lejeune, N. C.

HN Gregory Tucker, 1st Marine Division, FMFPAC, Camp Pendleton.

OM3 Steven Fiscus, USS PROTEUS (AS-19), homeported in Guam.

HN Barbara Gilhousin, released from active duty.

HM2 Richard Rudowski, released from active duty.

HM3 Jon Junker, USS DULUTH (LPD-6).

HM3 Roland Phillips, Det. B, 1st FSSG, FMFPAC, El Toro, Calif.

HN Mildred Olsen, released from active duty.

HN David Duke, 1st Marine Division, Camp Pendleton.

HN Janice Scott, OR School.

CAPT Charles Grier, Medical Service Corps, ACDUTRA.

CDR William Nevel, Medical Corps, ACDUTRA.

LCDR Carol Hinger, Nursing Service.

LT Norman Leslie, Chaplain Corps, ACDUTRA.

HMCS Ed Saxer, Supply Service.

SCHOLARSHIP WINNERS—These young men and women are being assisted in college study through scholarships awarded by the Naval Regional Medical Center Officers' Auxiliary. They are (l to r) Cynthia Mangonon, Jennifer Zanzot, Shannon Daugherty, Margaret Caldwell, Jim Flom and Suzanne Montoya.

Dancers wed

Lisa Gabut, secretary to the Chief of Preventive Medicine, became Mrs. Ray Aguilar on June 19 when the couple exchanged wedding vows in the Sacred Heart Church in Oakland.

Ray, an accountant who works in San Francisco, is a member of the same group of Polynesian dancers that Lisa has been performing with for several years.

They are honeymooning in Hawaii.

Children's classics to be offered here

On Saturday, July 10, Special Services will start screening a series of classical films for the weekly children's matinee. The series will continue for 26 weeks.

All of the films in this series will be "G" rated (general subjects) and all will be family-type movies. The first of the series will be "The Black Arrow," followed by "The Connecticut Yankee" and "Marco Polo" (animated version).

Courts uphold short cuts

Here's fair warning: don't yell at the postman for walking across the lawn you just mowed, whether it be your own lawn or one belonging to a military post, camp or station.

That's right: postmen can legally make short cuts across your lawn to reach your mailbox, and at least three federal courts have affirmed the Postal Service regulation that is designed to provide efficient mail delivery service.

Both South Bend, Ind., and Youngs-

"WOMAN OF THE YEAR"—Lesley Kopp, outgoing President of the Naval Regional Medical Center Officers' Auxiliary and wife of Lieutenant Commander James Kopp of Orthopedics, was selected as the club's "Woman of the Year" for her outstanding service.

town, Ohio have tested the regulation with local ordinances limiting where postal carriers can walk. Federal judges in both cases found that the ordinances were in conflict with federal law and unconstitutional.

In the latest test, the Ninth Circuit Court of Appeals ruled that a similar Pittsburg, Calif., ordinance had already slowed mail deliveries and, because of overtime, led to higher costs.

Pickup allowance on cars overseas

Taking your wheels with you on an overseas tour? Military members on permanent change of station orders are now eligible for a one-way, 16-cent-a-mile allowance when delivering or picking up a privately-owned vehicle from an authorized shipping port.

The allowance, authorized by a recent amendment to the Joint Travel Regulation, is payable only for the portion of travel with the vehicle to or

from the port. In other words, before you pick the vehicle up or after you drop it off, you are on your own, at your own expense.

Delivery and pickup can be accomplished by the member—either as a separate trip or concurrently with the move—or by the member's dependents or by anyone the member elects.

For further information contact your transportation office.

NEW OFFICERS—Three of the principal officers for the 1982-83 term of the medical center officers' auxiliary discuss plans for the coming year. They are (l to r): Nancy Upton, Treasurer; Beverly Roemer, President, and Deena Koenig, Vice President. Not pictured are Margie Holm, Corresponding Secretary, and Jackie Baker, Recording Secretary.

Auxiliary bids farewell to departees, presents scholarships and awards

The Naval Regional Medical Center Officers' Auxiliary held its farewell luncheon for departing members on June 9 in the Officers' Club, an occasion that also honored scholarship winners, introduced new club officers and the "Woman of the Year," and recognized four hospital staff civilians for support.

Outgoing President Lesley Kopp was selected to receive the "Woman of the Year" award for her service to the club. She received an engraved personal plaque and her name has been added to the larger one on permanent display in the medical center administrative suite.

Gifts were presented to Rita Lonergan and Ursula Smyth, outgoing Honorary Auxiliary President and Vice President, respectively, whose husbands are leaving the command.

Scholarships of \$750 each went to Jim Flom and Margaret Caldwell, while \$200 scholarships were awarded Cynthia Mangonon, Suzanne Montoya, Jennifer Zanzot and Shannon Daugherty. Jim will enter Stanford to study engineering (aerospace and aeronautics) or biomedical. Margaret will attend Stanford Law School next fall after completing pre-law studies at Berkeley. Cynthia will study computer engineering at UC Berkeley, Suzanne medicine at the same university and at University of Pacific, while Jennifer will major in education at UC Santa Barbara, and Shannon will study electrical engineering at Purdue University.

New officers and chairpersons of the club for the 1982-83 term are: Beverly Roemer, President; Deena Koenig, Vice-President; Margie Holm, Corresponding Secretary, Jackie Baker, Recording Secretary; Nancy Upton, Treasurer; Shirley Golden, Roseann Tedesco and Mrs. Kopp, Advisors; Mary Jo Mehlum and Liz Taylor, Program Chairpersons; Barbara Hamelberg, *Figleaf* Editor; Beth Hyder, *Figleaf* Circulation; Eileen Tomzak, Ways and Means; Roseanne Healy, Reservations; Becky Keck, Activities; Mrs. Kopp and Margaret Rocconi, Publicity; Nancy Hanning, Cookie Chairperson; Diane Hinman, Intern Advisor; Marty Hamilton, Dental Corps Representative; Vivian Millard, Retired Personnel Representative, and Mrs. Tedesco, Scholarship Committee Chairperson.

Certificates were awarded club members detaching from the command and houseplants were presented to Mary Takai, Kris Clemens, Nancy Campulli and Betty Beck in appreciation for their support of club activities.

Following the luncheon and presen-

tations, Ellen Silge spoke on Bay Area family outings.

VA expands mortgage guarantee

The Veterans Administration has expanded its mortgage guarantee program to include the Graduated-Payment Mortgage (GPM). The loans will be made by commercial lending institutions, after review of the applicants' credit worthiness, with repayment guaranteed by the VA.

The GPM program is an addition to the VA's traditional fixed-rate, no-down payment mortgage guarantee offered eligible veterans.

Under a GPM, monthly payments start out lower than fixed-rate mortgages. Part of the interest due on the loan is deferred each month and added to the balance of the loan. Under a fixed-rate mortgage, principal and interest payments are identical for the life of the loan.

Only those GPM programs with annual 7.5 percent payment increases on the loan anniversary over a period of five years will be guaranteed by the VA. After the fifth year, payments level off at a fixed amount. At that point the GPM becomes like a fixed-rate mortgage.

The GPM guarantee program will require a down payment, unlike the fixed-rate guarantees. This may be as low as 2.5 percent of the sale price or reasonable value of the property, whichever is lower.

More information may be obtained from the loan-guaranty division of the nearest VA Regional Office.

The following new additions to the military medical "family" have arrived at Naval Regional Medical Center Oakland:

A baby girl to Lieutenant Nelson Clark, Occupational Therapy, and his wife Kimberly, June 3.

A baby boy to Hospital Corpsman Third Class Angela M. Nelson, ENT, and her husband Michael, June 6.

A baby boy to Hospital Corpsman Third Class David R. Camlin, Mare Island Branch Clinic, and his wife Carole Lee, June 12.

THE BULL PASSES—With her recent promotion to LTJG, Deborah Prekker of Laboratory Service passes the traditional bull to Ensign Mike Curran of Patient Affairs, who now becomes the "bull ensign" of the command. (LTJG Prekker, from her expression, seems glad to see the statue change hands).

What to do

If involved in government vehicle crash

If you're driving a government vehicle and you have an accident, what should you do?

According to transportation policy officials in the Pentagon, these are the steps to take:

1. Stop immediately.
2. Summon aid as appropriate and assist the injured, but do not move them unless it is essential for their protection.
3. Warn other motorists of any existing highway hazards. During hours of darkness or poor visibility, use flares or reflectors.
4. Do not express any opinions (either orally or in writing) to anyone at the accident scene. Avoid talking to claimants or their agents concerning liability, investigation findings or the possibility of a claim approval.
5. Complete SF-91 (Operator's Report of Motor Vehicle Accident). If because of injury or death, the driver cannot complete the form, the next senior person directly responsible for motor vehicle operations will complete it.
6. Comply with state and local laws governing the reporting of vehicle accidents. Channel such reports to the appropriate claims officer so that the rights of the government will not be prejudiced by an admission of liability that might obligate the government.
7. Stay at the accident scene until released by state law or proper authority.
8. Obtain clearance from the claims officer before delivery of any accident report to a third party, including state or local officials. Official accident investigation reports are not to be made available to a claimant, or to any individual or representative of any non-DoD organization.
9. Fill out DD Form 518 (Accident Identification Card) at the scene of the accident if possible. If not, do it as soon as possible and give it to people directly concerned. The form provides people involved in the accident with the identity of whoever is authorized to act on

the matter.

10. Deliver the completed SF-91 to the motor transport officer.

The regulation pertaining to all this is DoD 4500.36-R.

Former PHS hospitals — 40-mile ruling applies

CHAMPUS users who live within 40 miles of one of the five Public Health Service (PHS) hospitals recently designated for use by military personnel and their dependents should be aware that the CHAMPUS "40-mile rule" now applies to those facilities.

The five hospitals, located in Baltimore, Md., Boston, Mass., Nassau Bay, Texas, Seattle, Wash. and Staten Island, N. Y. now serve all eligible military personnel, retirees and their dependents.

Eligible persons seeking non-emergency hospitalization (inpatient care) must first seek such care from one of these facilities if it is within 40

"Pray, Lord, how can I deliver Israel? Behold, my clan is the weakest in Manasseh, and I am the least in my family." Judges 6:15

Computers can solve problems in minutes that would take individuals days and years to resolve. They work fine with figures and testable variables. But they are unable to compute the influence of one factor which alters situations, defies mathematical and logical predictions, and brings success out of apparent failure. That factor is called faith.

What would the computer say about a situation such as this? A nation of several million people had been subdued by a hostile invader. The conquered Israelites had to hide out in caves and couldn't harvest a crop in seven years. Each planting was destroyed by the invaders and other hostile tribes surrounding them. In this desperate situation, what would the computer recommend?

Find a leader to lead a revolt? Store up a vast supply of munitions, rise up against the oppressor and defeat him

by sheer force of numbers? The last Israel was without all of these and able to launch an apparent suicidal attack against such a large enemy. Looking at the Old Testament story of Judges, of 32,000 possible recruits for an attack, 22,000 were cowardly by their own admission. And of the 10,000 remaining, 9,700 could not pass a basic test of survival. So the computer now has 300 left to work with. And now a leader...? Well, I would suggest a farmer by the name of Gideon, a man of many doubts and qualms (see my opening scripture again), and a man of towering inferiority.

To these unpromising potentials, these statements of God: "So I will send you?" and "I will be with you." What would the computer say to this? Judges 6:11 through 7:23 tells the total story. Gideon and his small number of 300 men, plus trust and faith in God, routed the enemy.

That unknown factor, faith in God when applied to our many problems and the "invasions of our lives," prove all human calculations wrong. We can find and experience that person or a small number, plus faith equals a majority of enough strength and help for any situation in life.

Free counsel for widows

The loss of a husband can be devastating, and for some women the feeling of being unable to cope lasts many months or even years. The Psychotherapy Center at UC-San Francisco's Langley Porter Psychiatric Institute offers treatment for widows to help them work out their grief and adapt to a new life.

A 12-week session of individual treatment or participation in a mutual help group is offered to women who have been widowed for a period of four months to three years. The program is part of a three-year study of different methods for helping widows to cope with bereavement. The research psychiatrist Charles Marmar, MD, a research specialist Nancy Wilner now in its final stages, so this is the last opportunity for widows to participate.

There is no charge for the treatment. In addition to attending therapy group sessions, the women will be asked to participate in evaluation interviews before and after the series of sessions. Confidentiality will be respected.

For further information, contact G. Krasner at 681-8080 extension 5135, 510, Monday through Friday, 8 a.m. to 5 p.m.

ID renewal takes time for special dependents such as parents, adult children

Getting an ID card for the spouse or children is, in most cases, relatively simple and takes little time. Due to Public Law, however, there's a little more to getting ID cards for parents, parents-in-law and unmarried children over 21 who are mentally or physically incapacitated or who are full-time students.

Basically, parents and parents-in-law must be dependent on the sponsor

for over 50 percent of support and reside in a residence the sponsor provides or maintains.

For a child over 21 to be entitled to an ID card, the sponsor must be providing over 50 percent support and the child must be:

- incapable of self-support due to a condition which occurred or existed prior to the 21st birthday, or
- not past his or her 23rd birthday

and enrolled in a full-time course of study in an approved institution of higher learning.

For parents, parents-in-law and children over 21 to receive ID cards, a dependency determination must be accomplished on initial card issue and for each reissue. A dependency determination requires the sponsor to give detailed financial support information, student status information and, for an

incapacitated child over 21, a current doctor's statement.

Since eligibility verification involving dependency determination requires more time, it is a good idea to contact your local personnel office at least three months before you need the card or before the old one expires.

Green, green grass of home may be setting for tragedy

Boy, can you fly through that lawn you've got the old power mower mowing away! Besides, you've got to be in time for the ballgame, picnic or whatever the family has planned. Or, maybe your youngster is mowing the lawn now. It's good training in getting their share, and it's good exer-

Everybody has catalogued what was in the minds of the 70,000 adults and children injured last year by power mowers, but the emergency room records where they were treated contain a grisly list of serious, sometimes permanently maiming wounds.

Among the most common incidents: (1) Cutting someone's lawn mowing machine—or somebody's day who was riding past an operating mower—(2) Hands coming into contact with a rotating blade, (3) Getting hit by mowers propelled by the mower, (4) Turning mowers (especially the riding kind) and (5) Getting run over by a riding mower.

Here are some common sense rules for operating power mowers from the U.S. Consumer Products Safety Commission:

- Never allow young children to operate power lawn mowers, and keep them away from the area when you are mowing.
- Wear sturdy, rough-soled work shoes and close-fitting slacks and pants. Never operate the mower in bare sandals or sneakers.

- Rake away wires, cans, rocks and twigs before you start mowing.

- Never mow a wet lawn, because you could slip and come in contact with the rotating blade. Also, the wet grass could clog the blades and tempt you to try to clear the machine without first turning it off.

- Always turn off the mower and wait for the mowing parts to stop before you leave it.

- Always turn off the machine and disconnect the spark plug wire or the electric plug when you need to unclog or adjust the machine. If you don't, a slight touch of the blade could trigger it to complete a full rotation, with deadly effect.

- Mow across the slope when using a hand (walk-behind) mower. With a riding mower, however, drive up and down the slope for stability.

- Never go into reverse without looking behind you—some of the most serious mower accidents involve backing into children.

- When using an electric mower, be careful not to run over the cord or entangle it in the blades. Start mowing the grass nearest to the electrical outlet and gradually move out.

- Wait for at least one-half minute after shutting off the engine to be certain the blades have stopped.

- Push—don't pull—a hand mower.

- Never remove the safety shield or any other safety devices on a lawn mower.

- Never refuel a mower while it is running nor while the engine is hot.

- Never refuel a mower indoors; unseen vapors may be ignited by a spark.

- Start the mower outdoors, not in a garage or basement where carbon monoxide gas can collect.

- Don't smoke around the mower or gasoline storage can; gasoline fumes can easily ignite.

- Keep children away from the machines and the gasoline.

- Read the owner's manual and pay attention to its recommendations before each use of the mower.

Aging problem? Call for help

At first thought, the problem of aging does not seem to pertain to the military family, since military people usually retire from active duty at relatively young ages. Aging problems do arise occasionally, however, in regard to elderly dependents of servicemembers.

A question commonly raised is what services are available for elderly people in specific areas of the country.

Answers to this and other questions about aging or the aged may be obtained by writing to: The Social Gerontology Resource Center, P.O. Box 231, Silver Spring, MD 20907.

The center operates a toll free number between the hours of 8:30 and 5 p.m., Eastern time. It is (800) 638-2051.

Residents of Alaska and Hawaii and non-local callers in Maryland may call collect, (301) 565-4269.

Red Cross helps the Armed Forces

For the year ending June 30, 1981, the American Red Cross provided 3,487,057 services to the Armed Forces and veterans at an expenditure of \$58,801,000.

The services include assistance with

GO BUGGY—NRMCA Oakland Blood Bank Supervisor Norman Woehrman (striped shirt) poses with Billy DesChamps of Lakeport in front of DesChamps' winged sprint car which is driven in Northern California races by Fred Grant of Santa Rosa.

(Photo by Harold Allbritton)

Blood Bank super is weekend pit boss

If we told you one of our staff members works as a pit boss on weekends during the summer, you'd most likely associate him with one of those green eyeshaded characters at the Tahoe and Reno gambling casinos, wouldn't you? In the case of Blood Bank supervisor Norman Woehrman, you'd be wrong.

For the past three years, from April through mid-October, Norm spends his weekends as pit manager for all the winged sprint cars entered in the racing circuit that covers Petaluma, Dixon,

Calistoga, Fremont and Chico. One of his prime responsibilities is lining up the cars for the program in the estimated 42 races each season.

When he took up this hobby shortly after retiring from active duty in the Navy, he worked in the pits as "Head Wrench" (top mechanic).

"I'm just a frustrated race driver at heart," he explained, adding that he doesn't quite have enough nerve to drive, so joins in on the excitement through officiating.

Karate lessons available in gym

Karate classes, beginner to expert, are being conducted Monday, Wednesday and Thursday afternoons in the Oak Knoll gym under the instruction of third degree black belt Sensei Carl Hultin. Students, who may begin the training at any time, practice one and a half hours daily in the Japanese style of karate called Shinto ryu.

Karate is an ancient oriental art of self defense which employs only hands, feet and other parts of the body—hence the name, which in Japanese means "empty hands."

It is a martial art that can be practiced by everyone—men, women and children. Karate training is a tremendous way to get and stay in physical shape and at the same time learn a highly effective means of self defense. It also develops character and builds coordination and speed.

The karate practitioner must develop mental and physical strength and discipline. The training stresses a systematic exercise program, fighting and defense techniques and stylized forms (kata). The different colors of belts one sees in a dojo (school) indicate different levels of advancement. As students become more proficient in the art, they advance from the beginner's level (white belt) to the expert (black belt).

Hultin is an experienced student of many of the martial arts, including Shotokau, Tai Kwon Do and Judo. He has a third degree black belt in Shito ryu and second degree black belt in Kobudo (Okinawan weapons), and has competed nationally, as well as internationally in Japan. The Japan Karate Organization of which Hultin is the chief instructor, is headquartered in Dublin.

If you are interested in learning this art, call Ron Brown in Special Services at Ext. 2350.

LTJG Shepardson

MI Branch Clinic officer is national chess champ

LTJG John Shepardson, Industrial Hygiene Officer at the Mare Island Naval Shipyard Branch Clinic, took first place in the reserve division of the recent 1982 United States Amateur Chess Tournament. The Medical Service Corps officer won his first five games and drew his sixth for a score of 5-1/2 to beat out 98 other entrants in the class and win the trophy.

The tournament, which was held May 29-31 at San Mateo's Dunfey Inn, was the first United States Amateur to be held on the West Coast. Each game ran from five to eight hours. Shepardson hopes to qualify to represent the Navy in the next Armed Forces Chess Championship, a five-man team event that pits the best of the military chess players.

A day you won't forget!

By Sally Young

The American River is the most popular river west of the Mississippi for those who come to ride its white water rapids. It is fast becoming a national attraction. Peak run-off time in the spring is not good for paddleboats, but from mid-June on, conditions are best to experience the river in this manner. During the summer months the water is controlled by a dam above the "put-in" point. Water rises rapidly during the morning and by 10 a.m. the "pussycat" has turned into a bucking bronco! Once you have run this river in summer (with expert instruction from guides) you will be considered qualified

for even more dangerous white water such as the Upper Klamath, the Merced, or, ultimately, the Tuolumne River. If you sign up for the Aug. 14 Oak Knoll special river raft trip, a bus will transport you to the "put-in" place at Chili Bar on the American and you can begin a day you will never forget... a day that will certainly give your adrenalin a workout as you paddle for dear life... a day of fun, waterfights, swimming and thrills followed by a super picnic at the end of the river run. Come join us. You'll see! Call me in Special Services, 639-2479, for additional information.

Deadlines must be met for discount trips, tickets

Most of the trips and a lot of the tickets to events and concerts are at a special group rate through the Special Services office on base. Group rates are based on the number of participants and on advance orders. This means that if we have a sufficient number of persons signed up for an event, trip or concert—and signed up by an early specified date—we can get the special rate. Beyond the deadline, Special Services must give up its options and release commitments to vendors if there isn't sufficient response. Therefore, if you are interested in an event, don't wait until the deadline has past to express that interest! Signing up will not cost anything until the deadline is met, except a refundable deposit, if you wish to be certain of your reservation. All deposits paid are totally returnable up to the specified deadline. Beyond that date, funds have been paid to vendors and are no longer refundable unless a substitute buyer can be found.

Discount books for sale on base

Special San Francisco Bay Area Military/DoD Civilian Employee discount coupon books are now on sale at the Special Services Ticket Office. The books sell for \$3.50 each and can save you many times that amount. This discount program has been

especially designed to suit the needs of Navy personnel. Coupons, good until March 31, 1983, are for such places as Taco Bell, Sizzler, Denny's, Burger King—even the Blue and White Fleet's Bay Cruise.

Command execs began as Hospital Corpsmen

The top three executives of Naval Regional Medical Center Oakland, all in the process of detaching from this command, are breaking up a tripartite probably unique throughout the Medical Department, and possibly the Navy. They all began their military careers in enlisted status.

Rear Admiral Walter M. Lonergan, upon to relinquish command and officially retire, served at the same hospital nearly 40 years ago as a pharmacist's mate in World War II. He was selected for medical school at the University of Buffalo School of Medicine and received his degree of Doctor of Medicine in 1948. He subsequently interned at the E.J. Meyer Memorial Hospital, and was trained in obstetrics and gynecology at the Sisters of Charity Hospital and Meyer Memorial, both also in Buffalo. He was commissioned in 1951 in the U.S. Navy Medical Corps and subsequently advanced through the ranks to Rear Admiral in early 1975. He has commanded NRMC Oakland since July 1977 where retirement ceremonies will be held in his honor on July 30, 1982. Medical Service Corps Captain Joseph P. Smyth, who has served as Director of Clinical Services at the Oakland Center for the past two years, will assume command of the U.S. Naval

Regional Medical Center, Okinawa, Japan, in early August. Dr. Smyth enlisted in 1953 and advanced to the rate of Hospital Corpsman First Class in 1957. He next attended Fairfield University and later earned a medical degree from Creighton University School of Medicine. The former petty officer then enrolled in the Navy's Senior Medical Program and interned at Naval Regional Medical Center, Philadelphia, completing his internal medicine residency at the same hospital in 1968.

Commander Frank D. Fisher, Director of Administrative Services here since August 1979, was recruited into the Navy in August 1952 and served through the Hospital Corps rates all the way to Chief Hospital Corpsman. He was commissioned an ensign on Nov. 1, 1964, and later earned a bachelor of science degree in business administration with George Washington University. The Medical Service Corps officer also is a graduate of several Navy schools, including the Naval School of Health Care Administration, Naval Justice School and Field Medical Service School. He also will leave Oakland in August to assume a new billet as Executive Officer of the Naval School of Health Sciences in San Diego, Calif.

Aloha party to honor CO

An aloha party in honor of our retiring commanding officer, Rear Admiral Walter M. Lonergan, and his wife Rita, will be held in the Oak Knoll Officers' Club on Thursday night, July 29. The occasion will also welcome the new

DETACHING—Captain Warren W. Hodge, Regional Health Care Coordinator here for the past three years, will depart the command next week for a new billet at the naval medical center in Pensacola, Fla., where he will become Director of Clinical Services, a position he also held at the Naval Hospital, MCAS Cherry Point, N.C. before his transfer to Oakland. The Medical Corps officer is a flight surgeon who has served in the Navy more than 24 years. Dr. Hodge's position at NRMC Oakland will be filled by Captain James Black.

skipper and his family.

Tickets at \$20 per person are now available from Chiefs of Service at Naval Regional Medical Center Oakland and from Officers in Charge of the regional clinics. **Tickets must be purchased no later than July 20.**

The event is open to all officers and their guests and to civilian staff members of equivalent grade. Dress is informal civilian attire, preferably Hawaiian style (muumuu's for ladies; aloha shirts or jackets, etc. for gents).

The party will begin at 6 p.m. with a social hour, followed by dinner at 7 p.m., a program, Polynesian entertainment, and dancing to music furnished by Navy Band San Francisco. Captain William Clayton will serve as master of ceremonies.

A luau buffet will feature pineapple and banana rumaki, pork won ton with sweet and sour dip, teriyaki strips, oriental salad, polynesian chicken, whole poached salmon, pansit (oriental noodles with ham and green onions), fresh skewered fruit, whole roast pork, mango and banana date breads and a ceremonial white cake with lemon custard filling, topped with whipped cream and sprinkled with coconut. A no-host bar will be open all evening.

Retirement and change of command ceremonies are scheduled for 9:30 a.m. the following day, July 30, by the flagpole at the main entrance to the hospital. All enlisted staff members and civilian employees are invited to attend a reception in the main dining room immediately following the formal military ceremony. A second reception for officers and special guests will follow at the Officers' Club on base.

MEMORIES—Three former Navy Hospital Corpsmen, high-ranking officers today, recall their early military careers in enlisted status. They are (left to right), Medical Service Corps Commander Frank D. Fisher, Medical Corps Rear Admiral Walter M. Lonergan, and Medical Corps Captain Joseph P. Smyth, who holds the Hospital Corps Insignia.

HM2 Knopp earns wings

Hospital Corpsman Second Class Barry D. Knapp, Aerospace Medical Technician at NAS Fallon Branch Clinic and this region's Sailor of the Month for January, has now earned his wings as an inflight medical specialist in the UH-1N SAR helicopter.

Knapp was officially designated an air crewmember by recent letter order from the commanding officer of the Navy air station which stated, in part, "The designation of SAR Inflight Medical Specialist is issued only to those individuals who have continually demonstrated the maturity as well as the technical ability required to complete the assigned duties. As Medical Specialist you will be assigned to duties

including but not limited to Search and Rescue and Medical Evacuations. Your responsibilities include the welfare of passengers and the care of the aircraft and the medical equipment. You are specifically directed to maintain your equipment at maximum readiness and efficiency and keep yourself in top physical condition."

The petty officer underwent rigorous training for the certification, including the practice of repelling from hangar rafters, swimming and survival training at NAS Lemoore.

As a member of the SAR crew he is on call for emergencies at all hours of the day and night, as well as occasional watches at the clinic.

OFFICIAL AIR CREWMAN—HM2 Barry D. Knapp has earned the right to wear wings as an official air crew member of the Search and Rescue team headquartered at Naval Air Station, Fallon, Nev. Pinning on the insignia is Medical Corps Lieutenant Terry Keller, also of the Fallon Branch Clinic.

'No better Navy'

Farewell message from retiring CNO

As I take in the lines for the last time, I want to express to all Navy men and women, civilian and uniformed alike, that my pride in you and all that you are accomplishing for this wonderful land of ours knows no bounds. You are the finest professionals ever assembled. Your jobs may be tough and demanding, but you have met every challenge and exceeded every expectation.

Over the weekend, I read a story filed by one of the wire services which erroneously reported that I said in retiring I am leaving behind a Navy inferior to the Soviets. I want all of you to be aware that I have never said that, nor do I believe it.

Although the U. S. Navy does not possess the clear, comfortable margin of superiority which we are committed to have over the Soviets, that does not mean

that the U. S. Navy is inferior. I want all Naval personnel to know that I do not us as second best to any Navy.

As I end a most rewarding four years as your Chief of Naval Operations, knowing that there is no better Navy than the United States Navy, nor will ever be. My every thought will be with you as you grow in experience, strength and professionalism. Godspeed.

Admiral Tom Hayward

(Editor's note: Admiral Thomas B. Hayward retired on June 30 in ceremonies at the U. S. Naval Academy, Annapolis, Md. Admiral James D. Watkins, former Commander in Chief, U. S. Pacific Fleet, is now Chief of Naval Operations.)

Answer is simple

Why a strong defense?

Why do we need a modern, well equipped Army, Navy, Air Force and Marine Corps?

The answer is simple enough when you look at the history of the world.

During the last 3,400 years, the world has known only 268 years without wars, according to the late Will and Ariel Durant in their book, "The Lessons of History." This works out to

only a little more than one day of peace for every two weeks of recorded history.

Opponents of a strong military would do well to remember the words of the philosopher George Santayana who said, "Those who cannot remember the past are condemned to repeat it."

Space age education

Too much too soon?

I watched a TV special the other night that featured little kids using computers as a matter of routine in their classroom work.

Many of these little Jacks and Janes, no more than seven or eight years old, were nonchalantly viewing a wealth of electronically printed information lighted up on the screens, while others tapped into these complicated-appearing machines with fingers no longer than kitchen matches.

The facial expressions showed confidence and interest, but certainly no awe of the teachers bragged about how much the computers have improved their students' academic grades and how, in the higher grades, this method of instruction slashed the rate of school drop-outs.

She added that within 10 years anyone who doesn't use word-processor or related advanced technology would indeed be considered "illiterate."

Now that's a pretty shocking statement to us oldsters who learned reading, writing and arithmetic the old-fashioned way, some of us literally to the "tune of a high school stick" as well. It's more than shocking—it's frightening—and I suppose we'd better think about taking some lessons in this new way to communicate, just as we learned rock 'n roll and disco when the foxtrot became passe.

Somehow, there is a certain bittersweetness about the entire technological revolution in this country. "They" say life will become so streamlined soon that it won't even be necessary for us to leave our home to work, or to do our banking or shopping. The days of poking around the rosebush to find out where the kid took the morning newspaper will be history. We'll get the news instantaneously, flashed right up there on the screen. There'll be no need for bookcases to house our favorite literary classics; neither will we have to store boxes of yellowed newspaper clippings of favorite recipes. Just punch a few buttons and retrieve the directions on our computer. Could be some day soon when one of the accessories to this electronic revolution will zoom right into the kitchen and cook our meals for us.

Somehow, we lost one of the pleasures of family life when cake mixes were developed commercially several years ago. Remember how much better the desserts were when they were "mixed from scratch" with farm fresh ingredients and loving hands?

Not that I'm putting down all this convenience brought to us by modern scientific advancement. I just think we have to guard against becoming a colony of robots no longer look our fellow humans in the eye.

Let's hope those bright kiddies in the computerized classroom continue to pick up all that knowledge. I'd feel more comfortable about it, however, if I knew that hopscotch would become as equally popular as "Star Wars" in future generations.

Betty Beck

RETREAT

A Special Time To Show Respect For Flag And Country

A day to recognize POW/MIA's

Congress has, by joint resolution, designated July 9, 1982 as "National P. O. W. —M. I. A. Recognition Day." A presidential proclamation for the occasion has been issued and is quoted in its entirety for your information and guidance:

"Since the Revolutionary War, when General George Washington complained of the treatment accorded to captured soldiers of the Continental Army, the United States has recognized the uncommon hardships experienced by our soldiers held prisoners during times of war. Called upon to defend American ideals while undergoing extreme adversity in violation of fundamental moral standards and the international codes and customs for the treatment of prisoners of war, our soldiers have fulfilled their duty to their services and country.

"Similarly, our country has recognized the acute suffering experienced by the families of our soldiers held captive or missing in action. The uncertainty these service families live with day-to-day surely touches the heart of every American.

"The Congress has by joint resolution designated July 9, 1982 as National P. O. W. —M. I. A. Recognition Day and on this day we should recognize the special debt owed to our fellow citizens who gave up their freedom and their families in the service of our country. We must also remember our still-missing servicemen, for whose families, relatives and friends the anguish and bitterness of war are enduring aspects.

"Our nation must not forget and will continue to seek answers to their fates.

"Now, therefore, I, Ronald Reagan, President of the United States of America, do hereby designate July 9, 1982 as National P. O. W. —M. I. A. Recognition Day, a day dedicated to all former American prisoners of war, to those still missing and to their families. I call on all Americans to join in honoring those who made the uncommon sacrifice of being held captive in war, and their loved ones. I call upon state and local officials and private organizations to observe this day with appropriate ceremonies and activities."

NAVAL REGIONAL MEDICAL CENTER OAKLAND, CALIFORNIA

ADM W M. Loneragan, MC USN
Commanding Officer

CAPT H. James T. Sears, MC, USN, Director of
Clinical Services

CDR Frank D. Fisher, MSC USN, Director of
Administrative Services

Editor: Betty Beck

Editorial Clerk: Pat Heaphy

Photography: HM1 Garry Silk
HM2 Larry Marchionda

THE OAK LEAF is published biweekly on Friday, produced commercially with appropriated funds in compliance with WWPB P-35, Rev. Jan. 1974. Deadline for copy is Wednesday noon, the week prior to publication.

Opinions contained herein are not official expressions of the Department of the Navy. The OAK LEAF receives American Forces Press Service and Navy News material.

Contributions from both staff and patients are welcomed and should be addressed to the Editor of the OAK LEAF, Naval Regional Medical Center, Oakland, CA 94627.

NEW TO STAFF—Lieutenant Commander Roy L. Berkley is the new Patient Affairs Officer at Naval Regional Medical Center, Oakland, replacing recently retired Lieutenant Commander John Kraft. LCDR Berkley has 27 years' service and is last assigned with the Bureau of Medicine and Surgery in Washington. The Medical Service Corps officer considers Detroit, Mich. his hometown.

Senior Navy civilian drug briefings set

A series of briefings will be held in major cities to guide senior Navy civilian managers in the implementation of Navy civilian drug abuse policy, recently addressed by Secretary of the Navy John Lehman in ALNAV 73/82. The workshops, approximately five hours long, will be conducted by all and personnel staff members of Civilian Personnel Policy Division (C-14). They are intended for commanding officers, executive officers and other senior managers, as well as those responsible for preparing employee adverse action forms or presenting management to third parties.

Briefings are scheduled for Washington, D. C.; Boston, Mass.; Philadelphia, Pa.; Corpus Christi, Tex.; New Orleans, La.; Jacksonville, Fla.; Charleston, S. C.; Norfolk, Va.; Bremerhaven, Wash.; San Francisco / Oakland, and San Diego, Calif. The Bay Area workshop is slated for July 28.

Oppell departs

Lieutenant Commander Gordon H. Oppell, formerly on the Oak Knoll staff as Environmental Health Officer, is recently detached for his new assignment at the U. S. Navy Regional Medical Center, Guam, where he will be Chief of Preventive Medicine Service. The Medical Service Corps officer has been assigned to Oakland for more than 10 years.

A. degree possible in classes at Oak Knoll

A bachelor's degree in Health Care Services may be earned here through a nationally accredited and recognized program offered by Southern Illinois University. Classes will be conveniently held at Oak Knoll every-other-weekend throughout the year.

Currently, applications for enrollment in the Data Interpretation course, beginning July 24, are now being taken. For further information about the course and/or the degree program call Shelly Sauza at 562-8767.

26 weeks training

OR students end studies

Ceremonies are being held at the medical center this morning for 13 students of Operating Room Technician Class No. 82002. Nine of these graduates have completed six weeks of didactic instruction on aseptic technique and 20 weeks of clinical experience. The remainder are specialty students who completed the first phase of training with the class.

Those completing the full course and their new duty stations are:

HA Juan F. Calonje, NRMCO Oakland; HM3 Paul A. Cassell, NRMCO Yokosuka, Japan; HN Matthew P. Coburn, NNMCO,

Bethesda, Md.; HN Lisa M. Gayes, NRMCO Oakland; HM3 Michael E. Paulin, NRMCO Guam; HM3 Charles C. Risley, 3rd FSSG, Okinawa; HM3 Robert B. Sinclair, NRMCO Orlando, Fla.; HM3 Sonja L. Stevenson, NNMCO Bethesda, and HM2 Catherine M. Wilson, NRMCO Yokosuka.

Specialty students were Sp5 Richard L. d'Armand, Letterman Army Medical Center; HN Dion J. Duncan, Orthopedic Service, NRMCO; HM3 Eli Fale, Ophthalmology Service, NRMCO, and HM3 Donna L. Schwarzkopf, Urology Service, NRMCO.

New enlisted performance evaluation methods OK'd

A redesigned Enlisted Performance Evaluation Report, which will replace the three enlisted report forms now in use, has been approved by the Chief of Naval Operations. Use of the new forms may be required as early as Oct. 31 of this year.

The redesigned forms will use the "traditional" 4.0 scale and will evaluate the performance of Naval enlisted personnel in five general areas. The areas are professional factors, personal traits, self expression, leadership and management. Each major area will contain subcategories that will be graded.

Major changes include separate blocks for advancement recommendation, use of concurrent reports to document TAD periods, and a grading summary which will be required for E-4 and above. Another new feature is that "frocked" petty officers will be evaluated and compared separately in the frocked paygrade.

The Naval Military Personnel Command reviewed many alternatives before recommending the redesigned form to the Chief of Naval Personnel and the Chief of Naval Operations. The Fleet Master Chiefs' Advisory Panel participated in the redesign process with many of their suggestions being incorporated in the new evaluation form. NAVMILPERSCOM Instruction 1616.1A, not yet distributed, will provide

detailed instructions for the new forms.

Base cleanup slated July 28

An all-hands base cleanup will be conducted on Wednesday, July 28, in preparation for the change of command ceremonies the following Friday.

All departments have been requested to provide manpower in support of "Operation Base Cleanup."

Designated personnel will muster at the picnic grounds at 1 p.m. Food and refreshments will be served at the same location for all participants after completion of the cleanup.

For further information, call LTJG Joel Libby at Ext. 2197.

Supervisory nurse position open here

Applications are now being accepted for Supervisory Clinical Nurse of the Labor and Delivery Ward, GS-10.

The position requires a full professional knowledge in the field of nursing. Applicants must have an active and current registration as a professional nurse and evaluation of the applicant will be based on experience, training, supervisory appraisals, and awards received.

The duties of the job include directing the work of all military and civilian personnel assigned to the Ward; interpreting doctor's orders and assigning staff accordingly, also evaluating and ensuring staff proficiency, quality of patient care, consumer health education, environmental safety and comprehensive documentation. Conducting orientation of new staff, maintaining adequate stock levels of drugs, supplies and equipment are also part of the duties.

More detailed information about the job may be obtained by calling Christine Lessler, at 639-2116.

More job openings

Computer Operator (GS-5) and Clerk-Typist (GS-4) job openings have been announced by Civilian Personnel Service.

There are three positions open for the computer operator in Management Information Service. All are on the graveyard shift. The typist position is with the Social Services Branch of Psychiatry Service.

Closing date for applications for all four jobs is July 19.

Call Maurine Tinsley, Ext. 2116, for more information.

NEW CHIEF OF SERVICE—Lieutenant Kay L. Schneider, following seven months of rotation at this hospital, is now Chief of Outpatient Administration Service. Before duty at Oak Knoll she served as Administrative Officer of the Barbers Point Branch Clinic of NRMCO Hawaii. The Medical Service Corps officer holds a bachelor of science (epidemiology and biological health) from Penn State and a master's in health administration from George Washington University. LT Schneider has been in the Navy five years and enjoys off-duty hobbies of sailing, painting, hiking and photography.

CO recognized

Rear Admiral Walter M. Lonergan, Commanding Officer of Naval Regional Medical Center Oakland for the past five years, was formally recognized recently by the Oakland Chamber of Commerce for contributions to the community during his tenure.

Mr. Bill Downing, Chamber President, presented a letter of appreciation during a June 17 Oak Knoll meeting of the chamber's Military Affairs Committee.

Columbia announces fall sessions at TI

Columbia College has announced that it will offer five courses on Treasure Island during the fall session, Aug. 9 to Oct. 2. All classes meet from 6:30 to 11:30 p.m. and each course carries three semester hours of college credit.

Offered on Mondays are Criminology and English Composition I; Tuesday, Accounting II (Managerial); Wednesday, College Algebra, and Thursday, Organizational Behavior.

According to college officials, beginning students are eligible to take the English and algebra courses, which have no prerequisites. Students enrolling in Criminology should have taken Introduction to Sociology or should have some experience in the Criminal Justice field. Those enrolling in Accounting II should have taken Financial Accounting, either at Columbia or at another institution. The prerequisite for Organizational Behavior is Principles of Management. Students who have had some leadership training would also be eligible to take the course.

Columbia is a fully accredited college offering two and four-year degrees. Classes are open to active duty, their dependents, and Defense Department civilian employees. Because of its close relationship to the Armed Forces, Columbia has a policy of assessing military schools and experience for academic credit.

Those interested should contact Larry Blades or Jeannie Hopper at 397-5613 for additional information.

Cultural Exchange

Youngsters from Alameda entertained medical center personnel in the Asian/American/Pacific Island Heritage Day program held in the Clinical Assembly on June 15.

Two young ladies showed perfect poise and balance as they danced carrying water-filled glasses in their hands and atop their heads.

Never missing a beat, the children step lively between bamboo poles in a traditional dance of the Philippines. The dance troupe is called "Magkakapit Bahay," as the youngsters are all neighbors and practice their dance routines in each other's yards.

Uniforms may be mail-ordered

Four mail-order facilities provide Navy uniform items to active duty people, reservists and NROTC midshipmen. These facilities supplement uniform center operations at smaller Navy exchanges, where only the most essential items are stocked because of space limitations.

Prices and ordering instructions for enlisted uniforms are in the current "Navy Clothing Price List for Men and Women" (NAVRESSO Publication 90). Ordering information and prices for officer and chief petty officer uniforms are listed in "NAVRESSO Uniform Price List" (NAVRESSO Publication 69).

Each mail-order facility provides uniforms for a specific category of Navy people. The facilities and the uniforms they provide are:

Enlisted Men's Uniform Items
Supply Department, Mail Out Center
Building 1312 NTC
Naval Administrative Command
Great Lakes, Ill. 60088

Enlisted Women's Uniform Items
Clothing Officer
NTC 45
Naval Administrative Command
Orlando, Fla. 32813

Officers and Chief Petty Officer Uniform Items (Male and Female)
Norfolk Uniform Mail Order Center
P. O. Box 15065
Norfolk, Va. 23511

Made-to-Measure Uniforms (Officers and CPOs)
Naval Uniform Shop
Fort Wadsworth
Staten Island, N. Y. 10305

Navy exchanges have order forms and publications 69 and 90 available. Copies also are available at Navy supply offices. If the publications or ordering forms are not locally available, obtain a copy of the appropriate publication and order form by writing: Naval Uniform Division, Naval Resale and Services Supply Office, Fort Wadsworth, Staten Island, N. Y. 10305.

Changes announced to SRB program

The Chief of Naval Operations announced in NAVOP 063/82 of June 16, termination of the FY 1982 Selective Reenlistment Bonus (SRB) program, except for those who would lose SRB eligibility. This action was necessary due to the rapid depletion of this year's SRB budget resulting from high retention rates and delays in congressional action on a supplemental budget request.

Changes of the FY 1982 Program include authorization of SRB payments only for those who currently have message approval for reenlistment from Commander Naval Military Personnel Command, or who will permanently lose SRB eligibility in Zones A, B or C by passing through the 6, 10 or 14 years-of-service cut-off window between now and Oct. 1. The remaining personnel with end of active obligated service (EAOS) dates in FY 1982, who would have otherwise been eligible for SRB reenlistments, are encouraged to extend until Nov. 1, with

the opportunity to reenlist for SRB in FY 1983. It is intended that these personnel will be offered reenlistment bonuses for at least the same amount as they would have received in this fiscal year, according to the NAVOP, taking any constraints from the FY 1983 congressional process.

It is expected that almost 5,000 potential reenlistments will be extended into the next fiscal year under the extension option contained in NAVOP. Approximately 670 sailors will fall into the exemption category due to potential permanent loss of SRB eligibility. The early termination of the SRB program occurred three months after early reenlistment eligibility was shortened to slow SRB spending rate. However, SRB enlistments continue to grow at accelerated rates in all zones of eligibility.

The NAVOP emphasizes that the changes will not affect non-SRB reenlistments or the payments of regularly scheduled anniversary SRB payments.

New law allows training payment

Legislation signed by the President last month includes a provision which allows the Veterans Administration to reimburse Vietnam-era veterans and eligible dependents for correspondence training begun after Sept. 30, 1981.

The law ends a moratorium on payments for new enrollments in such training which had been imposed for fiscal year 1982.

Individuals may now receive reimbursement for 55 percent of the total cost of correspondence lessons completed and submitted to the school.

Unaffected are Vietnam-era veterans and dependents who have

been continuously enrolled in correspondence training since Sept. 30. Post-Vietnam-era veterans enrolled in correspondence training under the contributory veterans education program continue to receive full reimbursement.

Eligible veterans or dependents who have started correspondence courses since September, or plan to, should contact the nearest VA regional, a local County Service Officer or a veterans service organization representative.

The San Francisco regional office is located at 211 Main Street (corner Main & Howard).

NARF assists SF's cable car program thru use of Navy's 'vapor degreasing' system

The Naval Air Rework Facility (NARF) at Alameda, which works daily with intricate engines and the most modern jet aircraft, is helping the City of San Francisco solve problems with an older form of transportation, the cable car.

Until recently, the city needed to replace the entire cable system every nine months, because of the wear caused as the crimping device of a cable car grips the surface of a moving cable. The researchers at San Francisco State University have been

studying the problem, experimenting with different combinations of cable material, crimp material and lubricants to reduce wear. They hoped to develop a method that would reduce cable wear and require only the grips to be replaced.

After each new combination was tried, materials had to be thoroughly cleaned and a microscopic study made of how the surface had worn. The study team had tried several methods of cleaning the cables, but none had

proven effective.

Doug Mercer, a mechanical engineering student at the university and a participant in the NARF cooperative education program, suggested trying "vapor degreasing," which is used to clean aircraft parts at the rework facility. CAPT L. H. Fisler, NARF Commanding Officer, agreed that the method might work and authorized the use of Navy equipment to clean the cables after each test. The vapor

degreasing was successful and tests will be completed by the end of June.

When the renovation of the San Francisco cable car system takes place, the new cable system will be installed, hopefully saving the city a large part of the \$500,000 it currently spends each year to maintain the cables. The Naval Air Rework Facility will have had an important role in ensuring that the famed cable cars will continue to climb San Francisco's hills in the future.

BOATSWAIN'S BANJO—Entertaining at the Hospital Corps Birthday Ball was retired Chief Boatswain's Mate Ben Blakeman, a former shipmate of Command Master Chief Charles Dackerman.

NRMC Oakland

celebrates

CELEBRATION TIME—Balloons descend from the ceiling toward party-goers in this scene from the Hospital Corps Birthday Ball, held in the Officers' Club on base June 17.

Comings and Goings

"Fair winds and following seas" to the following personnel who have recently departed this command:

HN Francis Rockefeller, 1st Marine Division, Camp Pendleton, Calif.

CDR Bernadine Shaffer, Nurse Corps, released from active duty.

MMC Richard Spencer, Naval Air Station, Moffett Field, Calif.

HM2 Charles Harman, released from active duty.

HM3 David Taylor, released from active duty.

HM2 Pierre Alfred, released from active duty.

HM3 Donald E. Boat, released from active duty.

HM2 Alvin Drakeford, released from active duty.

HN Geano Chambers, 1st Marine Division, Camp Pendleton, Calif.

LCDR Michael S. Wilson, NMRC Long Beach, Calif.

HM3 Scott Gaustad, 3rd Marine Air Wing, Yuma, El Centro, Calif.

HM3 Carl Kjonas, released from active duty.

HMCS James Stroehlein, retired, transferred to fleet reserve.

HM3 Michael Boitel, student, Armed Forces Institute of Pathology, Bethesda, Md.

HM1 James C. Donadio, NSHS, San Diego, Calif.

CDR William Fawcett, released from active duty.

LCDR John Bright, transferred to NMRC Branch Clinic Alameda.

LCDR Paula Torres—Stein, released from active duty.

HM1 Joyce Burch, Lafayette River Branch Clinic.

HM1 Frank Kooser, NSHS Bethesda, Md.

HA Michael D. Jacques, 3rd FSSG, FMFPAC.

LT Philip Randall Eckmar, Naval Construction Battalion, Dental Dept., Gulfport, Miss.

HM3 Judy Collins, NSHS Bethesda, Md.

HM2 Loreto Torres, USS MARS (ARS-1).

HM3 Richard S. Justice, NRMC Okinawa.

LT Frank W. Hall, Groton, Conn.

LT Michael J. Kawuch, to Operation Deep Freeze, Port Hueneme.

LT William J. Kimerer, Groton, Conn.

LT Patricia A. Duprez, Iwakumi, Japan.

LT Randal Franke, USS LONG BEACH.

LT Stephen Louis Sarbeck, Gulfport, Miss.

HM2 Lonnie C. Alford, Yokosuka, Japan.

LT Catherine F. Wampler, released from active duty.

LT Mark W. Flick, Camp Pendleton.

ENS Mu Dow, Lafayette River Branch Clinic, Va.

LT Shirley A. Nylund, Yokosuka, Japan.

HM3 Kenneth Jackson, released from active duty.

LT Robert S. Rolley, USS SHREVEPORT, Norfolk, Va.

CDR John Compagno, released from active duty.

LT Susan J. Walker, USS AJAX (AR-6).

LT Timothy Bischoff to NNMC Bethesda.

CDR Mark Jacobs, Medical Department, FPO San Francisco.

LT Marsha G. Piendinock, USS JASON.

TRADITIONAL CUT—Rear Admiral Walter M. Lonergan, flanked by the eldest and youngest corpsmen of his command, makes the traditional first cut of a birthday cake commemorating the Hospital Corps birthday. He is assisted by Chief Hospital Corpsman Dominador Datu and Hospitalman Roosevelt Wardell.

DANCERS—Among those enjoying themselves on the dance floor is Chief Hospital Corpsman Rose Percival (in uniform) who served as the dinner dance committee chairperson.

LT Michael Abel, USS ENTERPRISE.

HA Kerry Lee Sterienr, released from active duty.

LCDR Stephen Baez, NRMC San Diego.

LCDR Alvaro Traquina, USS CORAL SEA.

LCDR Ralph M. Reavis, USS CARL VINSON.

HM3 Gary D. Gilson, released from active duty.

HM3 Suzanne Lavrich, released from active duty.

LT Heather L. Myers, NRMC Camp Pendleton.

LCDR John Mateczun, Third Marine Division.

LT Dennis A. Wilson, USS SACRAMENTO.

LCDR Patricia Hoggatt, retired.

LCDR John Kraft, retired.

LT Konrad E. Hayaski, USS WHITE PLAINS.

LT John Wyman, Naval Medical Research Institute, Dayton, Ohio.

LT David Smith, New London, Conn.

LT Clarence Braddock, USS WICHITA.

HA Marcelo M. Lopez, USS KISKA.

ACHIEVER—HM2 Ralph D. Gordon, Operating Room Technician at the Fallon Branch Clinic, receives the Navy Achievement Medal presented by LCDR G. V. Meskill, officer in charge of the Nevada clinic. Gordon earned the medal for superior performance aboard USS HOLLAND (AS 32), homeported at Holy Loch, Scotland, from February 1980 to December 1981. Vice Admiral S. A. White, Commander, Submarine Force, U. S. Atlantic Fleet cited the petty officer for personal drive, dedication to duty and unselfish application of time and talent in the ship's medical department.

Party honors chiefs

A "Hail and Farewell" party was held in the Porthole on June 29, honoring six Navy chiefs.

Special guests were **Chief Dental Technician Donald E. Hritz**, detaching for a new billet at Bethesda, Md.; **Master Chief Hospital Corpsman William J. Dahlke**, new to Operating Management Service; **Senior Chief Hospital Corpsman Edward L. Saxer** and **Chief Dental Technician Don R. Adams**, new to Supply and Dental Service, respectively, and **Chief Hospital Corpsmen Augustinito Cruz** and **Steven Putter**, both recently assigned to Preventive Medicine Technician School as instructors.

Beck, Macabugao end X-ray studies

Basic X-Ray School Class 82-004 graduated two students last Friday. The students were HN Harry J. Beck, who had honors with a final grade of 93.4 and will be stationed on the USS ARCADIA (AD-42), homeported at San Diego, Calif., and HM3 Teddy B. Macabugao who will be stationed on the USS ARKANSAS (CGN-41), home-

Dr. Pearson to DCS billet at Long Beach

In mid-June Captain Arthur A. Pearson relieved Captain Richard R. Rahe as Director of Clinical Services at Naval Regional Medical Center, Long Beach, Calif.

Dr. Pearson was on the Oak Knoll staff from Aug. 31, 1973 to June 22, 1979 as a pediatrician.

Dr. Rahe has assumed command of the U. S. Naval Regional Medical Center on Guam.

ported at Norfolk, Va.

The 12 week course in basic X-ray technique consists of five weeks didactic and seven weeks of practical experience in the Radiology Department. HN Beck did his practical training at NRMCO Oakland while HM3 Macabugao did his at Moffett Field Branch Clinic.

Oberst to school

Among those recently departing this command for new duty was Medical Service Corps Lieutenant Commander Richard B. Oberst, who served as a microbiologist for the pathology department of Laboratory Services for nearly four years.

LCDR Oberst will attend the University of North Carolina, under the Navy's outservice education program, to obtain a doctoral degree in his specialty.

"I have enjoyed working at NRMCO very much," he said. "I am looking forward to going back to school and am very grateful to the U. S. Navy for this opportunity."

He holds a bachelor of science from the University of Wyoming and a master's in public health from the University of Pittsburgh. In seven years of Navy duty other assignments have been with NRMCO Portsmouth, Va., and EPMU-6 Detachment in Okinawa, Japan.

While serving at Oak Knoll, LCDR Oberst played softball with the Lab team for the past three seasons.

WEDDING—HA John Payne places a ring on the finger of his bride, the former Lori Eubanks, while attendants HA Todd Cosgrove and HN Mary O. Granstedt look on. Officiating is Navy Chaplain, Lieutenant Jay Hoppus.

Corpsmen wed in hospital chapel

HA John Payne and HA Lori Eubanks, both of the 6th Deck staff, exchanged marriage vows in a traditional ceremony June 23 in the Chapel of Hope. LT Jay Hoppus, Chaplain, officiated at the wedding. Lori, whose home is in Arkansas, and John, who hails from Nebraska, have been planning the wedding for some time. Attendants were HN Mary O. Granstedt from 6 North and HA Todd Cosgrove from 7 North. At the end of the ceremony Lori's bouquet was caught by HA Sharon Hine. A reception, not so traditional,

followed at the picnic grounds at Lake Merritt. Champagne and cake were served. After the reception the couple planned a trip to the Oakland Coliseum where the A's were supposed to be playing the Royals. The plans went awry when they realized the A's played the evening before. John and Lori didn't seem too upset since the Kansas City Royals, their favorite team, shut out the A's, 1-0.

From what we hear the couple does plan a trip back to their respective hometowns soon.

Outdoor art soon at Shoreline park

A sculpture tracing the sun's path through the sky and another described as a 21 ft. square cement quilt will be among the works on display this summer at the Arrowhead Marsh picnic area of San Leandro Bay Regional Shoreline in Oakland.

Five to seven large sculptures, each designed to harmonize with the specific site where it is placed, will be on view at the picnic area or nearby from July 21 to Oct. 31.

The works are part of *Project Nature*, a three-site art exhibition organized by art critic Joanne Dickson. Other works will be on display at the Remont Resort Hotel in Berkeley and Oakland Airport.

Among the works scheduled for display at Arrowhead Marsh thus far is Peter Berry's "Duplex Cone." The sculpture's two 10 ft. high steel semi-circles are aligned to mark the sun's winter and summer solstices.

Joan Zalenski will erect her work from Sea to Shining Sea. Remnants of a Past Civilization." It resembles fragments of highway, consisting of concrete pillow shapes arrayed in a 21 square quilt.

"Silent Scream," one in the artist's Asia series, will be installed by Dan Dannenfelser at a nearby sandy area.

Brian Rush will create a work consisting of three intersecting ramps, with metal ends which the artist will set with fire at scheduled times.

Artist Jerry Walberg will install a sculpture entitled "Shankrikar" at the same site. (East Bay Log)

BAWOC to observe WAVES anniversary

The Bay Area Women Officers' Association has scheduled a luncheon on Thursday, July 29 at Treasure Island to commemorate the 40th anniversary of the WAVES.

The event, open to all active duty, reserve and retired sea service personnel in the San Francisco Bay Area, is scheduled to begin at 11:15 a.m. in the Fleet Admiral Nimitz Club.

Captain Grace Murray Hopper, Special Advisor to Commander, Naval Data Automation Command, Washington, D.C., will be the featured speaker.

Cost per person is \$7.50, payable in advance to the association. Reservations are requested by close of business, July 19, and payment by July 26. RSVPs and payments may be addressed to Lieutenant (junior grade) Janet Dawson, CAAC, Bldg. 116, NAS Alameda, Calif. 94501, telephone AV 686-3113, commercial 869-3113, or Lieutenant (junior grade) Edie Williams, NARDAC, SF, Bldg. 8-2, NAS Alameda, AV 686-2484, commercial 869-2484.

GEN Vessey sworn as JCS Chairman

Army General John W. Vessey Jr., was sworn in as Chairman of the Joint Chiefs of Staff June 21, replacing Air Force General David C. Jones.

President Ronald Reagan presided over White House Ceremonies in which General Vessey was administered his oath by Defense Secretary Caspar Weinberger.

President Reagan told the 10th JCS Chairman to "keep us strong, keep us ready so we may keep the peace."

NEWLYWEDS—Commander Richard L. Newell, optometrist at this command, claimed the former Theresa Kelly as his bride in a Hawaiian wedding on the romantic isle of Maui on June 23.

Navy Lodge list available

A listing of all Navy Lodges worldwide, listing locations, daily rates and guest services for each lodge, has been published by the Navy Resale and Service Support Office (NAVRESSO).

Navy Lodges offers clean, comfortable accommodations for Navy families. Priority consideration is given to families making permanent change of station (PCS) moves. Other authorized personnel may be accommodated on a

space-available basis. Daily rates in the 31 U. S. and six overseas lodges range from \$12 to \$36 per family.

The directory is available at any Navy Lodge. Copies may also be obtained by sending a stamped, self-addressed, legal-sized envelope to: NAVRESSO, Code SOD 3, Building 210, Fort Wadsworth, Staten Island, N. Y. 10305.

Complaints received via toll free number

The Navy Resale and Services Support Office (NAVRESSO), headquarters for Navy Exchanges and Commissary Stores, has set up a toll-free telephone comment/complaint line to better serve its customers. The number, commercial (800) 221-6155, is available in all states, except New York. It may also be used from Puerto Rico. New York customers may contact NAVRESSO at commercial (212) 390-3869, Monday through Friday from 8 a.m. to 4 p.m. Personnel overseas should use pre-addressed customer comment/complaint cards that are available at all Navy Exchanges and Commissary Stores.

The line records customer comments, complaints, suggestions or other items and is available 24 hours a day. Specialists at NAVRESSO's customer relations center will respond to each call and if customers leave their name and address, they will receive a personal reply.

Navy Resale System customer relations officials stress that customers should go to local store managers to attempt to resolve problems before using the new phone system. CAPT

Carl Vogel, NAVRESSO Vice Commander, explained that "in many instances, the manager at the exchange or commissary store can take faster action than NAVRESSO to address customer's concerns. NAVRESSO will take action if the problem cannot be resolved at the store level."

No ammo moved in household goods

A change to the Joint Travel Regulations, effective Oct. 1, 1982, prohibits military personnel from shipping privately-owned live ammunition as part of their household goods or accompanied baggage.

Live ammunition, as defined in the rule, includes the explosive components of ammunition, such as primer or propellant powder. It does not include empty brass casings, shells or souvenirs used for decorative purposes.

The Oct. 1 date was set to allow personnel expecting a move sufficient time to prevent financial loss.

Auto self-service not mandatory

Is the modern practice of pumping gas for your own car a perplexing problem for you? If so, be advised that attendants at the Oak Knoll Automotive Center will gladly serve you if you toot your horn and be a bit patient until they can break away from other duties.

According to Tom Miller, Exchange Manager, although it is preferred that customers practice self-service, the employees are pleased to assist those who are handicapped or otherwise reluctant to fill their own gas tanks.

Back door open at Main Exchange

Customers of the Main Navy Exchange in Bldg. 38 are advised that the rear entrance to the store has been reopened to foot traffic during business hours, 9 a.m. to 5 p.m., Monday through Friday, 9 a.m. to 4 p.m. on Saturdays.

The reopening provides convenient access to the store from a customers' parking lot in the rear of the building.

Our patients write. . .

I am writing to express my appreciation for the surgery performed on me. . . by LCDR James M. Hicks, MC, USNR, of your ENT Clinic.

. . . The surgery performed by Doctor Hicks was almost without pain and the resultant physical improvement is significant. At all times, Doctor Hicks was helpful and courteous in explaining the procedures he was performing. Unlike other doctors I have known in my 18 years naval service, Doctor Hicks seems truly interested in his patients and his techniques and skill are outstanding. . .

S.B. Montgomery
LNCS, USN
San Francisco

...

For the past nine months, our four year old daughter Madeline has been attending regular sessions in speech therapy with an outstanding member of your staff, Mrs. Dorothea Porter. My husband and I have been impressed with Mrs. Porter's abilities and thought her success deserved to be brought to your attention.

. . . In less than a year, Madeline has developed into a reasonably verbal, confident and optimistic little girl, thanks to Mrs. Porter's skilled guidance. Mrs. Porter has given our daughter the gift of effective speech—it is a most precious gift and we are infinitely grateful for her presence on your staff.

LT and Mrs. John Wyman
San Francisco

...

On May 19, 1982, I was transported by ambulance from NAS Moffett Field Dispensary to your hospital.

I have had numerous experiences with hospitals and found most of them to be very cold and impersonal. To my surprise, this was not the case with your outstanding staff.

Your emergency room staff were kind, understanding, and informative. They calmed me down when I was told I needed emergency surgery.

Your operating team was great! They took the time to explain exactly what had to be done and I felt confident of their abilities.

Your nursing staff, medics, and orderlies were most supportive. They understood the emotional impact of my surgery as well as the physical side.

I commend all those who had any contact with me during my recent hospital stay. I'm sorry that I can't remember everyone's name, but these are some of your outstanding staff members:

Emergency Room: Dr. Lindstadt, Evans and Clift.

My doctors: Dr. Krahle and Dr. Moon.

Nursing staff: LTJG Linhart.

My best to you and your staff for making a valiant effort to see that I was well taken care of. Their personal concern meant the world to me. Thank you all.

Patricia P. Barrett

...

It is with a deep sense of loss that I learned Dr. Dohrmann is leaving the Navy. In my opinion she has shown a high degree of dedication and professionalism. She will be missed by myself and her other patients who hold her in high esteem. She doesn't make you feel like just another Navy dependent.

Please see that this letter is made part of her file.

Catherine M. Henry
Hayward

...

I would like to express my sincere appreciation to your entire staff for the treatment I received during the 11 days I was a patient in your hospital. The doctors, nurses, corpsmen, and other personnel were uniformly desirous of making my stay a very pleasant experience.

My special thanks go to Doctor Ben Ho, Doctor James Davis, and the anesthetist, whose name escapes me for the moment; also LCDR George, the chief nurse, as the team performing the difficult operation. . .

My appreciation, too, to the "extra curricular" efforts of Doctor Ho's assistant—"Kim" Ross, the ophthalmology department photographer. She was on duty at Oak Knoll Hospital when I had my first. . . operation nearly seven years ago.

W. H. Morgan
(Ret) USA

...

Due to a severe injury, I had to be hospitalized over 40 days in the past three months. Thanks to the help and dedication from Dr. O'Neal, Dr. Imes and the staff in the eye clinic, I am well on the road to recovery.

My most special thanks to the whole staff on ward 8 South. Their professional care, kindness and friendship made my lengthy stay in the hospital a memorable experience. I thank them all.

Brunhilde K. Cooper
San Jose

...

Thank you and your staff, especially Captain P. Regan, D. C., USN, for your courteous and efficient dental services.

Charles P. Woodson
CAPT, USN (Ret.)

Keep these kid killers away from small hands

You say you couldn't get along without your favorite roach killer, pain remedy, detergent? How about that laxative that works so faithfully when you need it, or the deodorant that you can always depend on?

In the right hands at the right time, these and many other household products can make your life easier, cleaner and maybe even happier. But in the hands of a toddler or an inquisitive 5-year-old they can kill or cause lifelong damage.

Medical doctors urge parents to be aware of the potential danger of having certain substances where children can get their hands on them. Here are some of the common substances that can be harmful to children and should be properly stored:

- Aspirin
- Bleach
- Pesticides
- Lead-containing substances
- Sedatives and stimulants
- Corrosives, such as lye and oven cleaning powders
- Dishwashing powders
- Laxatives
- Deodorants
- Furniture polish
- Detergents

The use of childproof caps on containers is one of the most effective control measures. Holding down the quantity of medicines kept in the home is another safeguard. And, obviously, consistent use of secure storage containers for all such materials is recommended.

Should you know or suspect that a child has consumed a dangerous substance, seek immediate medical help.

Poison control centers are available throughout the United States and are available to you for advice in an emergency.

Locate your nearest center in your telephone book and post the number in a convenient place.

Drug use impairs driving ability

According to a publication of the National Institute on Drug Abuse (NIDA), use of any drug, including many over-the-counter medications, has the potential to seriously affect driving ability. The practice of taking more than one drug, or mixing drugs and alcohol, can be especially dangerous.

The institute warns that driving skills of different individuals can be affected in varying degrees by the same drug. As with alcohol, the driver's weight and emotional state, the amount of the drug and when it was taken all influence the driver's ability to size up an emergency situation or to judge relative speed.

The depressant effects of tranquilizers and barbiturates are increased by mixing them with alcohol. Reaction time is slowed, as are eye-hand coordination and the speed with which the brain processes sensory information of all types. The institute terms this practice "especially dangerous, on or off the road."

The use of stimulants, including amphetamines, cocaine and caffeine, may cause persons to over-estimate their performance and take more risks than usual. Actual driving records indicate that people who take amphetamines are slightly more accident prone, probably for these reasons. One accident study found that heavy users of amphetamines are four times more likely to be involved in a car crash than the normal driver.

Hallucinogens and PCP distort judgement and reality, cause confusion and panic and can produce psychotic-like reactions. There are reports of drivers under the influence of these drugs swerving their automobiles off the road to avoid imagined obstacles.

The NIDA report concludes, "the circumstances under which people take drugs are different. So are the effects of drug taking. But safe driving always requires the same thing: An observant eye, a steady hand, and a clear mind. Drugs and driving—why take the risk?"

Get out! Enjoy!

CHAMPUS amends reg to share electric cart cost

CHAMPUS will now share the cost of electric-powered cart-type vehicles for CHAMPUS beneficiaries. Previously, CHAMPUS would only pay for electric wheelchairs that were not cart-type.

Coverage of these vehicles has been authorized going back to Oct. 1, 1980.

The new policy became official when CHAMPUS amended its regulation to include electric-powered cart-type vehicles within the definition of "durable medical equipment." To qualify as durable medical equipment, the electric-powered cart-type vehicle must provide basic mobility that will slow down or halt the further deterioration of a beneficiary's physical condition.

A vehicle that is used primarily for convenience and transportation doesn't qualify for CHAMPUS coverage.

CHAMPUS won't share the cost of both an electric wheelchair and an electric-powered cart-type vehicle for one beneficiary.

An electric-powered cart-type vehicle can be cost-shared only when the patient's physician decides that:

- * A standard, non-electric wheelchair will not meet the beneficiary's medical needs;

- * An electric-powered cart-type vehicle best meets the patient's medical needs;

- * The beneficiary can operate the vehicle safely.

Formerly, the prevailing medical position was that the electric-powered cart-type vehicles were used primarily for convenience and transportation, and therefore were not covered by CHAMPUS.

With the new policy, CHAMPUS is one of the three government health care programs authorizing payment for power-operated vehicles. Recently, Medicare was authorized by Congress to pay for the power-operated vehicles. The Veterans Administration also tested the vehicles and found them to perform satisfactorily.

Don't let insects bug you

By HMCM Kennedy

Who, among campers and picnickers, has not tossed away the joys of the day by ducking under cover or fanning away those blood-thirsty mosquitoes that like to "hum" around human ears? Deet, listed on the labels of popular insect repellents as N, or N-diethyl-m-tolu-amide, is the best repellent for protecting most people from insect bites.

Although the effectiveness of any repellent varies from person to person, the Agricultural Research Service reports that Deet repels more kinds of biting insects, ticks and mites than any other repellent.

When buying a repellent, check the label for its use against specific insects and carefully heed application instructions and precautions. Here are some general guidelines to follow:

- When using insect repellents, shake or spray a small amount from the bottle or pressure can onto your palms and then apply it thoroughly to wrists, neck, ears, face and other exposed skin as if you were washing yourself. Do not apply it close to the eyes or lips.

- Use enough repellent to make an even film over the skin, since insects quickly find and bite untreated spots.

- Reapply repellents as you perspire because most repellents lose their effectiveness when the skin surface becomes wet.

Other measures that can also help to protect against insects include the following:

- Wear pants tucked into the tops of socks, or boots, in tick-infested areas.

- Keep your campsite or picnic area clean and free of food litter.

- Clear the area of dead leaves, twigs and loose stones before pitching a tent.

- Take a hot, soapy bath as soon as possible after you have been in an area infested with chiggers (mites). If you do this within an hour, you can kill most of the chiggers before they can attach themselves to your skin.

Some people are so highly allergic to venom from certain insect bites that they are taking a risk each time they step outside in the summer. But they can now take heart, since the Food and Drug Administration has approved several serums which help counter the reaction to insect bites. If you are allergic to insect venom, check with your doctor for a prescribed injection or other medication. Proper precautions against insect bites can ensure that a long-awaited outdoor excursion or vacation is not spoiled.

MED • SCAN

A quick look
at recent health care
developments

The first nationwide electronic medical-health information system will be in operation sometime this summer, under a long-term agreement between the AMA and General Telephone and Electronics (GTE). The AMA will provide the basic medical information and GTE will operate and market the data-base retrieval system. GTE has already begun market-testing to learn what information is needed by physicians. The only equipment a physician will need is a basic computer terminal connected to an existing telephone line. The physician will simply dial a local telephone number to link his or her terminal to the system. This is but one more answer to a problem which has concerned medical educators for sometime now: How can the busy practicing physician keep abreast of the constantly expanding fund of medical knowledge? Experts, for example, say that medical research since World War II has been so prolix that the information base of medicine is renewed every five years.

Great Britain's National Health Service is frequently held up as the model system for socialized medicine. But growing numbers of Britons, 3.5 million, or 6.4 percent of the population so far, are deciding they don't want to wait in line for their operations. The threadbare NHS has about 650,000 people on waiting lists; some people must wait as long as two years for hip replacements, and an estimated 50,000 on the list have conditions which are rated "urgent". People who use private physicians decide when they want to undergo elective surgery, an important consideration for self-employed people who can't afford the time for NHS scheduling and re-scheduling. There's also the comfort factor. Most private hospitals feature private rooms with their own bathrooms, TVs, telephones, liberal visiting hours, and less harried nurses. Premiums for the private insurance policies are modest by American standards, about \$600 a year for a top-of-the-line policy for a family. Surprisingly, the purchasers of health insurance policies are not only the bowler-hatted, but include the Kent police and the 40,000 members of the Electrical, Electronic, Telecommunications and Plumbing Union. The policies generally exclude such NHS specialties as abortions and dental, obstetric, emergency and psychiatric care. Private hospital construction has been spurred; there are some 50 currently in the planning stages. Most of the doctors providing private care have part-time contracts with NHS. A sore point for advocates of the state system is that these professionals have been trained at the public's expense and yet are not serving full-time in the hard-pressed NHS.

Coronary bypass patients outlive people in the same age-group from the general population. Reporting on a study of 25,000 patients who have had bypass operations at the Texas Heart Institute, *Medical Tribune* said that the five-year survival rate of the operation that bypasses obstructed arteries to the heart is 97 percent. Any lingering doubts about the ability of the transplanted veins to do the work of the bypassed arteries has been dispelled by analysis of five-year follow-up studies. The veins widen slowly and behave in time like arteries.

Screw-in dental bridges can now be anchored permanently to the jawbone, *Acta Orthopaedica Scandinavica*, the Swedish journal, reports. Titanium screws have been implanted successfully in 400 patients, using delicate surgical techniques. The bridges, attached to the screws, have shown a five-year survival rate of nearly 100 percent in the lower jaw and 95 percent in the upper. These figures compare with 91 and 92 percent, respectively, for the more conventional bridges. The interesting thing about titanium is that the metal, without using a glue, becomes bonded to the bone permanently; electromicroscopic examinations of removed screws suggest that an actual chemical bonding between the bone and the metal takes place. Furthermore, the soft tissues of the gums also adhered closely to the metal eliminating the formation of germ-harboring pockets.

"Where did you get your medical training?"

ALCOHOL IS NOT FOR UNBORN BABIES

Having a baby is a time to take special care of yourself. When you're pregnant, everything you eat and drink affects the child you are carrying.

Drinking beer, wine or liquor may hurt your baby. Heavy drinking can result in serious permanent mental and physical birth defects.

Alcohol is not something to be taken lightly during pregnancy. For baby's sake... and yours... the safest choice is not to drink during pregnancy.

For more information, write the National Clearinghouse for Alcohol Information, Box 2345, Rockville, MD 20852.

Wet'n wild deadline nears

The deadline of July 16 is rapidly approaching for the Aug. 14 *Wet and Wild* trip to American River country and all those who are interested in attending what may prove to be the fun event of the year should make reservations with Special Services now!

This package covers bus transportation to the river and back, rafting under

instruction by expert guides, raft rental, flotation devices, and a super picnic on the river beach after you've paddled the boat over foaming channels and rapids.

The all-inclusive price is \$72 per person, but, according to Sally Young, if enough medical center personnel sign up, a discount may be possible.

'Up With People' soon at Sea World

Military and civilian Department of Defense employees have a special treat in store during Sea World's Military Summer Special, Aug. 1 through Sept. 6. The world famous musical group, "Up With People," will be entertaining park guests during a special summer engagement. This, plus Sea World's new Shamu show and five other exciting shows will be offered to military

families at a 30 percent discount through Labor Day.

To take advantage of the discount, personnel should pick up coupons from the base recreation services office. Upon presenting the discount coupon at the main gate, adults will be admitted to Sea World for \$6.95, with children (three through 11) admitted for just \$4.85.

Rape: It happens every six minutes

Rape was the fastest-growing violent crime in the United States in the past decade. According to FBI "Crime Clock" for 1980, one forcible rape occurred every six minutes.

It's a terrifying thought, so lots of women don't want to think about it. But there are some things worth bearing in mind:

—Women of all ages, from all walks of life, are victims of rape.

—It's planned! Rapes usually aren't the result of "Uncontrolled passion."

—Often the rapist isn't after sex. Many rapists have sexual relations available to them. Instead, the rapist frequently uses sex as a violent way to express his anger.

—The rapist is not always a stranger. In over a third of the reported cases, the rapist is an acquaintance, neighbor, friend or relative.

The Department of Justice suggests these precautionary measures to reduce the likelihood of becoming a rape victim:

—Many people think rapes occur only in dark, out-of-the-way places... but in truth about one-third actually occur in the victim's own home. So, practice good home security. And don't

let a stranger or repairman into your home without making sure that he is who he says he is.

—When you're outside, avoid going alone into poorly lit streets, doorways, places where someone might hide. If at all possible, go with a friend.

—Some people forget that crime can happen in their cars, too. That's where lots of rapes are committed. Check your car before you get in, and lock the doors when you drive. Most important—don't pick up strangers or get into a stranger's car yourself.

If you are a victim of rape:

—Get help—call the police immediately. Call a friend. Call the local Rape Center.

—Don't destroy possible evidence—don't bathe, douche, or wash your clothes.

—Go to the hospital as soon as possible—they'll treat your injuries and provide preventive measures for pregnancy and venereal disease.

—Call your local rape crisis center—they'll give you important information and emotional support. You can find their number in the telephone directory—or you can obtain it from the information operator.

Drug conviction for Navy officer

A general court-martial, completed June 15, 1982 at Naval Base Charleston, S.C., found a naval officer guilty of drug-related offenses.

The officer was sentenced to 18 months confinement, forfeiture of a total of \$19,800, loss of 500 lineal numbers, and a letter of reprimand.

Invitation extended for Salinas Rodeo

All military patients and staff of NRMCC Oakland are invited as special guests on Veterans' Day at the annual California Rodeo in Salinas on July 11.

The invitation includes a luncheon at the Elks Lodge followed by a trip to the rodeo grounds for the afternoon performance. After the show, all will be taken to the American Legion Post No. 31 in Salinas for dinner.

All who have attended this outing in past years have reported a wonderful time. Last year when they went to depart the Legion Post, each person was presented with a whole home-baked cake to take with them.

Reservations for staff members and their patients may be made by calling Sally at Special Services, Ext. 2479.

Vet population to fall

The number of living American veterans will decrease by about 40 percent during the next 50 years according to projected data released by the Veterans Administration.

The total veteran population, assuming no future U.S. involvement in armed conflict, will fall from the current level of 30 million to about 18 million by the year 2030.

Further, the aged veteran population will grow dramatically during the next 20 years. Veterans 65 and older will increase from about 3.2 million to nearly 9.2 million before the turn of the century.

California is expected to maintain its position as the state with the largest number of living veterans, though its veteran population total will fall from current 3.3 million to an estimated 1.1 million by the year 2030.

The average age of veterans living in California in 2030 is expected to be 55.6, compared to a current 48.3.

WH-E-E!—Just in case the cool weather we're having as this is being written has warmed to its usual July pattern, you might want to take the family to Marriott's Great America in Santa Clara soon to enjoy this cool splashy water flume ride as well as the other attractions. See Special Services first to save nearly \$3 on each admission.

POA sponsors girls' team in Union City softball league

The Chief Petty Officers Association (CPOA) of the Naval Regional Medical Center (NRMC) Oakland has been sponsoring a young women's softball team (ages 18) in the Union City area. Managed by Cecil Sharpe, the team won championships in eight of the nine years. This year the team won and lost three which has put them in a disputed championship game to be played in the near future. The dispute is over a pitching rule instituted by umpires and contested by the CPOA.

The league's "most valuable player," Cathy Kristein, is a member of the CPO Team. Her father, Roland Kristein (former HM2), is one of the team coaches, along with Rich Price. A new coach this year is Margie Garcia, who played on the team in past seasons.

The team is reported as being very impressive this year. Players such as Karen Sharpe, Eleanor Homes, Nicki Trejo, and Stacey Ore have several seasons of experience. As of now the team will be losing only one of the players, so next year may be as bright as this one.

CPOA TEAM—Softball players and officials are, front row (l to r): Ruth Castro (team mother), Donna Castro, Nicki Trejo, Cathy Kirstein, Lisa Torres, Andrea Hernandez, Tish Price, Jackie Perez, Marge Garcia and Cecil Sharpe. Back row: Yolanda Young, Lisa Manning, Karen Sharpe, Jackie Reliford, Stacey Ore, Lisa Inoncencio, Eleanor Holmes and Andrea Lara. Coaches Rich Price and Roland Kirstein stand in the rear.

tennis tourney

Oakland, Lemoore tie in team championships

NRMC Oakland will share identical team championship trophies with NAS Lemoore since both scored eight points in the 1982 Central Pacific Regional Tennis Championships.

Dr. Jack Avalos from Radiology Services captured the 1982 Junior Vets Singles Championship. Avalos and [unclear] will advance to the 1982

Interservice Championships being held in Fort Gordon, Ga. on July 26-21.

CAPT C. Scott won the 1982 Senior Division Championship as he defeated the defending champion CAPT B. Deignan of Treasure Island.

Last but not least, in the Women's Division LT Debbie Driscoll placed third.

'Presidio 10' run set for Aug. 29

The second annual "Presidio 10" will be run in San Francisco on Aug. 29, beginning at 9 a.m. The 10-mile military championship race is sponsored by the Guardsmen, an organization that has benefited underprivileged youths of the Bay Area since 1947.

Many claim this annual event is the best race in the Bay Area. The course runs through the Army's Presidio, the bay front and across the Golden Gate Bridge. It is mostly a flat, scenic course.

Henry Bonsow, race manager, esti-

mated that more than 4,000 persons will make this run this year. He said the \$5 donation for the race will provide T-shirts for participants, with the rest of the money going towards the Guardsmen's summer youth camp.

The race will begin in front of the Sixth Army Headquarters on the Presidio of San Francisco's main parade grounds.

For more information, call the Guardsmen at 781-6785.

Questions and answers on Veterans' Administration policy

Q—When are dividends paid on participating National Service Life Insurance policies?

A—Dividends are normally paid on the anniversary date of the insurance policy. No application is necessary.

Q—I was injured while on active duty in World War II, but have never filed a claim for compensation with the Veterans Administration. Is it too late to do so now?

A—No. There is no time limit for filing a claim for compensation. Contact the nearest VA office for assistance.

Q—I am a former Prisoner of War of World War II and was confined for 28 days. Am I entitled to dental care through the VA medical system?

A—No. With few exceptions, dental benefits are available to veterans with service-connected dental conditions only.

Q—My brother died a few days ago. When his VA pension check comes on the first of the month, can I cash it to help pay for the funeral bill?

A—No, you must return the check to the VA. If you authorize the services, you may apply for reimbursement of your expenses when you have received your final bill.

Q—I am moving to England soon. Can I use my VA home loan benefits to purchase property there?

A—No, real property must be located in the United States, its territories or possessions to qualify for the VA home loan.

Q—How does the Veterans Administration define a "helpless child?"

A—A helpless child is a child who becomes permanently incapable of self-support due to a mental or physical disability before reaching age 18.

Q—Can a veteran receive GI Bill educational assistance for attending college and for on-the-job training at the same time?

A—No, educational assistance may be paid for only one type of training at a time.

Q—I have a Veterans Administration guaranteed home loan which I wish to pay off in advance. Can I do this?

A—Yes, you may pre-pay a VA loan without penalty at any time.

Q—My husband died while he was a patient in a Veterans Administration Medical Center. Will the VA help with the expense of bringing him home for burial?

A—Yes. If a veteran dies while a patient in a VA Medical Center, transportation expenses to the place of burial may be allowed.

Q—How long after a veteran is discharged from active duty may he file a claim for compensation and pension?

A—There is no time limit for a veteran to file for a compensation and pension after discharge from military service.

Q—Is there an expiration date on VA home loan benefits?

A—No, loan entitlement is not subject to an expiration date.

Q—I receive compensation from the VA for a 10% service-connected disability and have just been informed that I am now eligible for a nonservice-connected disability pension. Will I receive two checks?

A—No, a veteran cannot receive both compensation and pension benefits based on his own service. The VA will pay you the greater benefit unless you elect in writing to receive the lesser benefit.

SHIPMATES—Hospital Corpsman First Class Jim Donadio was recently transferred to Independent Duty School in San Diego. Bidding him a fond farewell during a Porthole party in his honor were Hospital Corpsman Third Class Kelly McDonald (left) and Hospitalman Jenise Richards. All three were assigned together in Military Manpower Service.

KARATE LESSONS—Sensei (Instructor) Carl Hultin (left) leads students through karate steps. Learning the martial art are (l to r) Ali Vogel, Shirley a Amy Gibbons, and Eric Bolon. Karate lessons are given at the Oak Knoll g every Monday, Wednesday and Thursday afternoon.

IN COMBAT—Student Larry McCray assumes a defensive posture as Instructor Hultin gives a high kick. Karate training is said to develop mental and physical strength and discipline.

Center staff best sailors

Under the capable leadership of "Skipper" Randy Eckman of Dental Service, the NRM C Sailing Team won the 1982 Central Pacific Regional Sailing Championship held in San Francisco June 12-13. This was the second year in a row that NRM C Oak Knoll cap-

tured the crown. NRM C Oakland won all the races in a field of 50 military teams. Members of the crew were LT Randy Eckman, LT Randy Franke and HM1 Brian Bush.

Oak Knoll hosts women's softball

Oak Knoll is hosting the 1982 Central Pacific Regional Women's Slow Pitch Softball Championships here, beginning today and continuing throughout Sunday. All personnel are invited to come on down to the ball

field and see women's softball played at its best. All games are day games. Call Special Services, Ext. 2350, for starting times

"Goodness . . . I struck my finger."

THE OAK LEAF

Naval Regional Medical Center, Oakland

Vol. 44 No. 14

Friday, July 23, 1982

Farewell message from CO

In my waning hours as Commanding Officer of this Medical Center I would be totally remiss if I did not express my thanks to all of you for your support. Those of you, both civilian and military, officer and enlisted, who have extended (and many times over-extended) yourselves to help us accomplish our mission have my deepest appreciation.

It is in dealing on a day-to-day basis with professionals like you that has made command of this center exciting and rewarding. The many letters of appreciation that have been received here are a reflection of the outstanding service, care and empathy you have made available.

I have always been aware of your worth and I sincerely thank you for your loyal support. Please continue this same support to my successor, RADM Robert C. Elliott. It is a wonderful Navy and an outstanding Command, and we shall always remember the Lonergans' tour of duty here.

God bless you all.

W. M. LONERGAN

Rear Admiral, Medical Corps, U. S. Navy

Change of command ceremony set July 30

Command of a medical region encompassing the main hospital at Oakland, a satellite hospital at Lemoore, and 13 branch clinics, will pass from Rear Admiral Walter M. Lonergan to Rear Admiral Robert C. Elliott on Friday, July 30.

For RADM Lonergan who has commanded the region for five years, it will also be a retirement, marking nearly 38 years of active duty.

The change of command program will begin promptly at 9:30 a.m. at the entrance to the hospital on Oak Knoll grounds. It will include arrival honors, parade of colors, singing of the national anthem, invocation, remarks, reading of orders and benediction. Guest speaker will be Rear Admiral Eustine P. Rucci, Commanding Officer, Naval Regional Medical Center, San Diego. Remarks will also be heard from Rear Admirals Lonergan and Elliott. Other participants will include Catholic Chaplain (Commander) Joseph Ferraro; the

Navy Band, San Francisco; Marine Color Guard, 12th Marine Corps District, Treasure Island, and senior staff officers and chief petty officers, plus 100 enlisted personnel of the command.

Uniforms for participants will be: Female and male officers, full dress white, without gloves (or swords); male chief petty officers and enlisted (E1-E6), summer white; female chief petty officers, summer blue "A." and female enlisted (E1-E6), summer white "A." Military spectators and guests will wear the Uniform of the Day.

All NRMC Oakland personnel who may leave their work sites for a few minutes without interference to patient care are invited to witness the ceremony, expected to last no more than 30 minutes. All staff members desiring to view the activities must assemble outdoors; looking out windows of the hospital building will not be permitted, officials said.

All staff members are also invited to a reception in the main dining room immediately following the military ceremony to bid farewell to RADM Lonergan and welcome RADM Elliott. A second VIP reception will follow in the

Officers' Club.

An aloha party for RADM and Mrs. Lonergan is planned for the night of July 29, also in the Officers' Club on base.

NRMC Oakland will be new CO's second command

On Sept. 30, 1981, about a month after he was appointed the Navy's Medical Inspector General, Rear Admiral Robert C. Elliott was promoted to flag rank.

His selection as NRMC Oakland's next Commanding Officer makes this his second time to head a medical region, as he commanded NRMC Bremerton, Wash., for three years before appointment as Chief of Staff to the Navy's Surgeon General. Between that assignment and the IG billet, he was Executive Officer of the Naval Health Sciences Education and Training Command, Bethesda, Md., where he was selected to flag rank in February 1981.

Earlier positions in his 25 years of military service include residencies in Internal Medicine and Pulmonary Diseases, Naval Hospital, St. Albans, N.Y.; staff internist and pulmonologist, Naval Hospital, Portsmouth, Va.; Head, Tuberculosis Section and Director, Pulmonary Diseases, Naval Hospital, St. Albans, and Head, Pulmonary Diseases Branch, National Naval Medical Center, Bethesda.

In 1967 Dr. Elliott returned to Naval Hospital, St. Albans, as Assistant Chief of Medicine and Director of the Residency Program in Pulmonary Diseases. At that time he also served as the Navy representative on the Veterans Administration Armed Forces Pulmonary Research Board. In 1970 he returned to the National Naval Medical Center, Bethesda, to serve as Director, Pulmonary Disease Section. In 1975 he assumed duties as Deputy Commanding Officer and Director of Clinical Services at the Naval Regional Medical Center, Great Lakes, Ill., followed by the Bremerton command.

Born July 20, 1931 in Glen Ridge, N.J., Rear Admiral Elliott graduated from New York University in 1953, earning an M.D. four years later from that university's College of Medicine. He was commissioned in the Navy Medical Corps in 1957 and served his internship at Bethesda.

Rear Admiral Elliott is a Diplomate of the National Board of Medical Examiners and is an active member of the American Thoracic Society and the American Academy of Medical Directors. He has served as Assistant Professor of Clinical Medicine at Georgetown University School of Medicine, Associate Professor of Medicine at George Washington University School of Medicine, consultant in Pulmonary Diseases to the National Institute of Health, Bethesda,

RADM R.C. Elliott

and consultant in bronchoesophagology to the American College of Chest Physicians. He has authored numerous articles and publications in the field of pulmonary diseases.

Rear Admiral Elliott is married to the former Constance Mezzasalma of Brooklyn, N.Y. The Elliotts have three children: Mrs. Julie Curtis (who lives in Seattle), Robert C. Jr. (a Duke University student), and Ross W., a high school junior.

The Elliotts are expected to make their new home on medical center grounds.

Base cleanup set Wednesday

All personnel are reminded that a base cleanup is scheduled for Wednesday afternoon, July 28.

The working parties will muster at the picnic grounds at 1 p.m. Food and refreshments will be served all volunteers at completion of the project the same afternoon.

A steady, warm hand at the helm

Several hundred young persons, some of them no doubt serving in uniform today, were safely assisted to this world by the kindly Navy physician who has been our skipper over the past five years.

For those of us who have worked closely with him during this period, his departure brings a bit of sadness, as we will sincerely miss his understanding, wisdom, sense of fairness, perspicacity and quick wit. Despite our regrets, however, we're pleased that he'll have a little more time for himself and his family after nearly 40 years of service to his country and humanity in general.

Born 60 years ago in Boston, Mass., the son of a big league professional baseball player, Walter Mansfield Lonergan attended college in his home state for three years, then enlisted in the Hospital Corps of the United States Navy. One of his early assignments as a pharmacist's mate was at Oak Knoll during World War II, and because of this, despite his flag rank today, he has had no difficulty in identifying with the goals and problems of his junior enlisted staff.

Following his initial hitch, he returned to college and earned a degree of doctor of medicine, then completed an internship and residency in obstetrics and gynecology. Commissioned in the Navy Medical Corps in 1952, he served at naval hospitals on the East and West Coasts, at Naples, Italy, and at the headquarters of the Bureau of Medicine and Surgery in Washington, D.C. After commanding the Naval Regional Medical Center at Charleston, S.C., he served as Inspector General, Medical, for two years just prior to assuming command here in July 1977. He has been a Rear Admiral since February 1975.

He has taught in his medical specialty at two universities and earned numerous medals and awards throughout his long military career. While assigned in Washington from 1966 to 1970, he was also OB/GYN consultant to the Navy Surgeon General. This billet brought him some famous patients, including a few in the White House, and it was Dr. Lonergan who personally delivered two of the late President Lyndon B. Johnson's grandchildren.

Rear Admiral Lonergan took the Oakland helm during some particularly heavy seas. There have subsequently been smooth sailing days and at times, foul weather that sent the decks both pitching and rolling. Like all able and qualified skippers, however, he has kept our ship on a steady course... instilling pride and professionalism throughout the crew in the most genuine meaning of the phrase.

Our retiring commanding officer and his warm, gracious lady will remain in the East Bay community, at least for the present. He has not officially announced any future plans, but it could very well be that his cruise may just have begun.

We wish him Godspeed.

--Betty Beck

Editorial---

Our patients write...

I want to send you this note of appreciation following my stay at NRMCC Oak Knoll. I recently had an operation and a 10-day stay at the hospital, and was very impressed with the wonderful professionalism and caring of the staff on the Orthopedics ward. While on 7 North, I was treated with nothing less than superb politeness and concern, and couldn't have been more confident I was in the best of hands.

I have six years of service as an Air Force pilot, and I have to say I have seldom been more impressed with an organization in that time. Thanks to you and the Navy for your help during stressful times. . . everyone was so nice, I would like to just list their names in appreciation:

LTJG Wotowic, ENS Hunter, LT Newsome, LT Myers, LT Owens, LTJG Cagle and ENS Smith.

Corpsmen: HN Rockefeller, HM3 Kooser, HA Comins, HA Roszko, HA Cook, HA Cosgrove, HN Walker, HM3 Neal, and HA Tingen.

Also: Dr. Daniel*, Dr. King, and Dr. Kopp.

Martin L. Read
Captain, USAF

Please accept my apologies if I left out any names.
* Special thanks to Dr. Daniel, primary attending physician.

...

It seems a sad commentary on society that people are so often cold and distant to one another—so quick to criticize. Then in haste and selfishness we neglect to say "thank you" when the opportunity arises. The Naval Regional Medical Center Oakland was recently the site of one of the most emotionally trying times of my life and I feel compelled to share my experience with you. I hope you will have the time to read this letter and perhaps in some manner pass it along to the appropriate individuals.

My husband, Hugh E. Hope, was admitted to NRMCC in March for tests. . . initially suspected to be related to his diabetes. He was subsequently diagnosed. . . a diagnosis he had already determined himself based on his 20 years experience as a Navy Hospital Corpsman. . . a team of five of your doctors performed by-pass surgery on April 2. Although we had all hoped he would live another five months, he was able to return home for about two weeks, then had to be readmitted on May 4 and passed away quietly on the evening of May 17.

It is hard for me to express the gratitude I feel for the treatment extended to my husband and myself. Hugh had always wanted to be a doctor and, of course, had a considerable amount of medical knowledge. Right to the last, he had the utmost confidence in and respect for those who tried so hard to help him. Everyone with whom I came in contact was most kind and went out of their way to provide me both physical and emotional support. This includes doctors, nurses, corpsmen, chaplains, even the cafeteria employees. You have a fine staff who not only display technical and professional expertise—but also the all too rare ability to relate to others as fellow human beings.

I would like to thank in particular the Blue Surgical Team headed by Dr. Abel, Dr. Walker, Dr. Haller, Dr. Scott and Dr. Oller.

Dr. Susan Walker was especially informative and kind to my daughter from Ohio in taking the time to discuss with her both physical and emotional aspects of her father's case. I also wish to thank all the personnel assigned to 6th Floor North, and the ICU staff. I commend you for your fine leadership in running such an enormous, successful and humanitarian organization.

Velma Hope
Tracy

...

I have been attending the Weight Reduction Clinic for some time and have really benefited from Mr. Love's special way of helping and encouraging us even when we goof up at times. He is super. . . just wanted to express my thanks and appreciation for this program.

Helen Roselius

...

I take great pleasure in taking this time to do a task I normally avoid when possible (letter writing); however, this is a special occasion. I am taking this opportunity to express my appreciation for the professionalism and compassion demonstrated by your staff on my two recent requirements to use the NRMCC.

I was an inpatient (Surgery Ward, Dec. 81), and an outpatient (Surgery Clinic, Mar. 82). Both incidents required extensive follow-up. At all times I was treated with courtesy, concern and professional approach. So, a special thank you to your fine staff. To name a few: Dr. Oller, Dr. Dickey, Dr. Haller, Dr. Holm, and Ms. Sandel, also the other staff members, their names regretfully (I) do not recall. I am sure you will make them aware of this communication.

Walter W. Willis
MSGT, USAF (Ret.)

Chaplain's Corner

The Joy of Christ

By LT M. Kathy Brown
Chaplain Corps, U. S. Navy

"Weeping may endure for the night, but joy comes with the morning." Psa. 30:5

There are many kinds of joy. Sometimes it comes silently, opening all closed doors and making a home in the hollow heart. Joy brings its own greeting and salutation, and has no forerunner.

The composition of joy consists of many elements—a little sadness, a sharp pain, a glimpse of dismay, a murmur of silence, the clasp of a held hand, a fleeting moment of goodness, and the joys one receives over and over again—joy is often much of this.

This is found in Psa. 30:5, in the joy of Christ. Joy cannot be earned but can only be given through God's unmerited favor. The Joy of Christ is a precious ingredient in the existence of a fulfilled life.

When you receive this gift of joy, it allows you to go out and stir up the joy in others—it brings gladness to sorrowful hearts and spreads sweet music all around without the words or tunes. To be touched by this joy is to be truly blessed by God.

- Count your blessings instead of your woes,
- Count your friends instead of your foes,
- Count your gains instead of your losses,
- Count your health instead of your wealth,
- Count your joys instead of your sorrows,
- Most of all, count on God instead of yourself.

CHAMPUS- If They Can't Sign, You Can

If a dependent spouse is able to write at all . . . he or she must sign their own CHAMPUS form! Only in special cases can the military member sign for an eligible dependent.

That's the truth. Your Health Benefits Advisor has all the information and can provide detailed instructions.

THE OAK LEAF is published biweekly on Friday, produced commercially with appropriated funds in compliance with NNPR P-35, Rev. Jan. 1974. Deadline for copy is Wednesday noon of the week prior to publication.

Opinions contained herein are not official expressions of the Department of the Navy. THE OAK LEAF receives American Forces Press Service and Navy News material.

Contributions from both staff and patients are welcomed and should be addressed to the Editor of the OAK LEAF, Naval Regional Medical Center, Oakland, CA 94627.

Another executive position

Director to detach soon for new San Diego billet

Departing this command within the next 10 days will be Commander Frank Fisher who has been Director of Administrative Services for Naval Regional Medical Center Oakland for the past three years.

His new duty station will be San Diego where he will be assigned as Executive Officer, Naval School of Health Sciences. Commander Fisher will be relieved on the Oakland executive staff by Commander Charles R. Loar (see separate story, this issue), who has already reported aboard.

Commander Fisher will soon mark 30 years in the Navy. The Talladega, Ala. native was recruited into the Navy on Aug. 13, 1952 and served through the Hospital Corps rates all the way to Chief Hospital Corpsman. He was commissioned an ensign in the Medical Service Corps on Nov. 1, 1964 while serving at the Navy Nuclear Power Unit, Ft. Belvoir, Va.

He reported to Oakland in July 1979 following duty as Director of Administrative Services at Naval Hospital, Key West, Fla. Other recent duty was Naval Regional Medical Center, Charleston, S.C., where he was Chief of Patient Affairs; National Naval Medical Center, Bethesda, where he was Assistant Chief of Patient Affairs, and Battalion S-4 Company Executive and Administrative Officer with the 1st Marine Division, serving in the Republic of Vietnam.

CDR Frank Fisher

His decorations include the Navy Commendation Medal with Combat V; the Combat Action Ribbon; Presidential Unit Citation; Navy Unit Citation; Vietnamese Presidential Unit Citation with Palm; Vietnam Service, National Defense and Good Conduct awards.

Brief electrical outage tomorrow

Public Works Service has announced that there will be an electrical outage tomorrow in Bldg 500 (the main hospital) for two short periods of time.

Circuits involved include all emergency power and lighting (red outlets and switches) on the fifth through ninth decks. All power will be out on these circuits from about 8 to 8:30 p.m. A second outage will be required in

the afternoon for the same amount of time.

Elevators 1 through 6 will also be secured 10 minutes before the electrical outages and will remain out of service for approximately 40 minutes.

According to Mr. Ben Nelson of Public Works, the brief outage is necessary to replace an automatic transfer switch with the "newest state of the art equipment."

Where the profits go

Navy Exchanges worldwide generated \$39,812,000 to support Navy recreation services during the past year. Local commands received \$2,022,000 for morale, welfare and recreation programs, and the Navy Central Recreation Fund received \$3,610,000 to support recreation programs throughout the Navy.

Navy Exchanges worldwide recorded sales of \$1.5 billion. Price comparison surveys show that NEX customers saved 19 percent compared to average commercial prices for the items of merchandise.

The gasoline/fuel departments had the largest dollar sales totaling more

than \$159 million worldwide, followed by tobacco and smoking accessories with more than \$106 million in sales worldwide. Food service sales came in third, with a reported \$104 million sold worldwide.

During the same reporting period, Navy Lodges reported a 90 percent occupancy rate and had sales of \$8,107,000. The lodges' figures are not included in the total NEX figures.

Job openings

Applications will be accepted through July 26 by Civilian Personnel Service at Oak Knoll for the following positions in the medical region:

Health Technician (Optometry), GS-4/5, Occupational Branch Clinic, Mare Island Naval Shipyard.

Food Service Worker, WG-04, Food Management Service, NRMC Oakland.

Medical Clerk (Typing), GS-3, Branch Clinic, NAS Moffett Field.

Medical Clerk, GS-4, Occupational Branch Clinic, Mare Island Naval Shipyard.

Supply Clerk (Typing), GS-5, Stock Control Branch, Supply Service, NRMC Oakland.

For detailed information on the Food Service Worker job call Jennie Thompson; for all other positions, Maurine Tinsley. Both may be reached at 639-2116.

Commander Charles R. Loar

New DAS comes from similar Orlando billet

Commander Charles R. Loar, who will soon assume duties as Director of Administrative Services for Naval Regional Medical Center, Oakland, has considerable experience in the civilian health care professional field.

First enlisting in the Navy as a Seaman Recruit on Jan. 12, 1953, he advanced through the rates to Yeoman First Class, then worked in the civilian community while maintaining an active Naval Reserve affiliation. His positions as a civilian hospital administrator included the Kings Daughter's Hospital in Ashland, Ky. where he was Comptroller; University of Florida Hospital and Clinics, Gainesville, Fla. where he was Assistant Director, and Baptist Medical Center Princeton, Birmingham, Ala. where he held the position of Executive Vice President and Chief Executive Officer.

The Medical Service Corps officer was commissioned an ensign on Aug. 23, 1965, and was the first officer in that corps to attain the rank of Fellow in the American College of Hospital Administrators (ACHA). For the past six years he has been the Navy Representative for the Regent-at-Large for that organization.

Commander Loar is an approved preceptor for graduate programs in health care administration at the U. S. Army-Baylor University, the George Washington University, Brigham-Young University, Washington University, and the University of Alabama. His academic appointments have included associate professorships at the Universities of Alabama and Florida, and as an instructor at the Jefferson State Junior College.

The commander received his bachelor of science degree from Marshall University, West Virginia, and a master of business administration from the University of Florida. He also completed postgraduate work at George Washington University.

He comes to Oakland from Naval Regional Medical Center, Orlando, Fla., where he was also Director of Administrative Services. Other recent Navy assignments include duty at National Naval Medical Center, Bethesda, Md., as Assistant to the Executive Officer, Fleet Medical Liaison Officer and Regional Health Care Coordinator; Bureau of Medicine and Surgery, Washington, D.C., as Director, Health Care Administration Division, Director, Quality Assurance Division, and special assistant to the Surgeon General for Health Care Administration.

Commander Loar's military awards include the Meritorious Service Medal, the Navy Commendation Medal, Navy Achievement Medal and the Armed

CDR Charles Loar

Forces Reserve Medal.

In addition to his active participation in ACHA, he is a member of the Inter-Agency Institute for Federal Health Care Executives and the Association of Military Surgeons of the United States. He has served on numerous committees of ACHA, the Florida Hospital Association and the Alabama Hospital Association.

He is a native of Ashland, Ky., and the son of Mr. and Mrs. Lige Loar. The commander is married to the former Janelle Mayo of Water Valley, Miss. They have four children. David, the oldest boy, is presently serving on board the USS PROTEUS (AS-19), homeported in Guam. Son Mark is a junior at the University of Mississippi, while daughters Karen and Paula are juniors in high school.

IG visit announced

Rear Admiral Roger F. Milnes, Inspector General (Medical), and his team are expected to arrive in the area in mid-August to conduct a routine, periodic inspection of this medical region.

Tentative plans call for the team to report on Aug. 17, spend the first two weeks inspecting the branch clinics and Naval Hospital Lemoore, then begin inspection of the main hospital at Oak Knoll on Aug. 30. They plan to end their visit Sept. 11.

RADM Milnes will be accompanied by Nurse Corps Captain Bernadette McKay; Medical Service Corps officers Captain Loyd Nichols, Commander Paul Johnson and Lieutenant Commander Wayne Glover; and Master Chief Hospital Corpsman J.J. Jackson.

Others on the team will include representatives of the Health Sciences and Educational Training Command and the Bureau of Medicine and Surgery's Equal Employment Opportunity Office. They will receive local support and augmentation from Chaplain Corps, Supply Corps, and other specialized areas as necessary.

QA team to visit

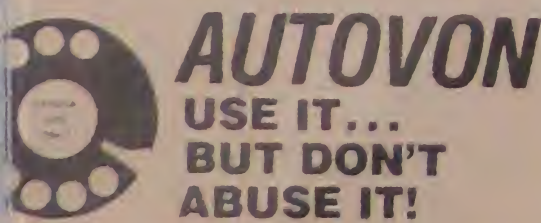

Nurse Corps Captain Theresa Proto and Medical Service Corps Commander P.E. Daniel are expected to visit Naval Regional Medical Center, Oakland, Aug. 4 through 6.

The Quality Assurance assistance team is from the QA Division of the Navy Bureau of Medicine and Surgery, Washington, D.C.

Utilities out

The utility blue (dark blue pullover) form is no longer authorized, officials report.

Acceptable uniforms for working conditions or situations where the uniform becomes unduly soiled are agreed. The change became effective July 1.

MACS Sharp best leader

MACS Edward P. Sharp

Senior Chief Master at Arms Phillip Sharp, NRMCOakland's Security Officer, has earned the Semi-Annual Leadership Award, a special recognition presented twice a year by the command for senior non-commissioned officers who have made outstanding contributions.

Senior Chief Sharp is said to be intensely loyal to the Navy and very interested in the efficiency of his department. He puts in many extra hours of work to complete projects or resolve problems, officials report, adding that he is extremely motivated and works well on his own. "He has a

'can do' attitude about his job and is an excellent example of a chief petty officer," one said. The senior chief has also gained a reputation of always having time to listen and counsel younger Navy men and women with their problems.

In commenting on his selection, he said: "The trust and faith the command placed in me by assigning me to my present position was more than enough recognition for my capabilities and performance... the receipt of this award makes me more in debt and proud to say that I have served with and for the best chiefs and officers in the Navy... I only regret that I shall not have time to repay the command or its personnel before I will have to depart... I will take with me new knowledge gained here and hope I have left instilled in some a small token of my appreciation... I have so many people to thank, especially the security patrolmen who deserve my sincere thanks for a job well done."

Senior Chief Sharp will leave in January for sea duty. He has been assigned to NRMCOakland since April, 1980 and has nearly 20 years naval service to his credit. Prior billets have been at Key West, Fla., San Diego, Calif., Treasure Island, Pt. Mugu, Guantanamo Bay, and aboard the USS BRISTER (DER 327), USS R.K. HUNTINGTON (DD 781), USS W.L. LIND (DD 703), USS J.R. PERRY (DE 1036) and the USS ELLIOT (DD 967).

His military training has included Sonarman (Surface) Class "A" and "B" School; U.S. Air Force Military Police; U.S. Navy Master at Arms; U.S. Army Physical Security; Ventura County Sheriff's Academy, and the California Reserve Police Officers' School in Pittsburg, Calif.

The security officer holds four Good Conduct awards, the U.S. Navy Expedition Medal, National Defense, Armed Forces Expedition Medal (two awards), Vietnam Service (four campaigns), Sea Service Ribbon (two awards), Battle Efficiency "E" Ribbon, Vietnam Campaign and the Expert Pistol Medal.

Senior Chief Sharp and his wife Linda are parents of a son and live on Treasure Island. Originally from Sheffield, Ala., the senior chief likes to bowl, play softball and restore autos.

Register early

The NRMCOakland legal office points out that military personnel who must register before receiving their ballots from home should submit registration applications as soon as state laws permit so that their votes will be counted.

For more information, call Ext. 2482.

CPO course planned

NAVOP 066/82 announced the new Chief Petty Officer indoctrination course. This 19-hour training package is tailored specifically for newly appointed CPO's. The purpose of the indoctrination course is to generate confidence on the part of the new E-7 by providing knowledge and skills which will facilitate the transition to Chief Petty Officer. This course will commence immediately and is required for newly appointed Chief Petty Officers selected as of August 1982. It is not a prerequisite for advancement; however, CPO selectees may not be frocked until this requirement has been met.

This course was developed by the Chief of Naval Education and Training and addresses 12 major areas: introduction, authority and responsibilities, leadership and management, communication skills, Navy programs, uniform regulations, watches, CPO messing and billeting, CPO career incentives, military and social etiquette, CPO image and fraternal relationships, and course critique.

The instructor guide, NAVEDTRA 10822, was distributed to every ship and command in the Navy June 26.

SECNAV praises civilian workers

Secretary of the Navy John Lehman lauded the nine Navy civilians who operate the Dare County, N.C., bombing range June 28, calling them "unsung professionals," and presenting them with an award of merit for keeping the range open at all times.

Secretary Lehman, a Naval Reserve Commander who was undergoing two weeks active duty for training as a bombardier-navigator, then returned to NAS Oceana, Va., boarded an A-6 "Intruder" attack aircraft, and bombed the range. The range, located near Kitty Hawk, NC. is the major tactical air bombing range on the east coast.

During the award ceremony, Secretary Lehman praised the men for their ingenuity and efficiency in solving problems. As an example, the men bought 13 goats to keep grass low, rather than ask the Navy for mowers. "I'll put the efficiency of this place up against any of the Fortune 500 companies anytime," the Secretary said.

Harry C. Mann is supervisor of the range. Other workers are Hurbert Basnight, Roger Hemilright, Dean Lewis, William Creef, Claud Hurt, Jr., Iris Ralph, Gaither Gray and Walter Lewey.

Helen Koetitz leaves federal service

Helen Koetitz

Helen Koetitz, former secretary to Captain William J. Storz, Chief of Surgery, left the medical center on July 9 on medical retirement after more than 10 years' federal service.

Painful osteoarthritis of the finger joints forced her to leave a position that requires much typing. "I literally type my fingers to the bone," she quipped, adding that she fully intends to keep busy in retirement, perhaps find some type of volunteer work that doesn't require as much dexterity. "I do intend to return to school and take some fun things," she told us.

The popular Mrs. Koetitz worked in the private sector for some time before entering government service. She was secretary to the president of an insurance company for nine years and during World War II served as secretary to the personnel manager of an ordnance manufacturing firm. Following the war, she stayed home to rear her family, then returned to the work force in a job at Naval Supply Center, Oakland. Helen's first job at Oak Knoll in February 1974 was with Legal Service. She transferred to the Chief of Surgery's office in February 1981.

Helen is married to Kenneth Koetitz, a retired research chemist of an oil company, who has been working on his second career in the Special Chemistry Lab here for the past two years. He will remain on the Oak Knoll staff.

The family home is in Pleasant Hill.

Disciplinary Actions

CO's NJP, June 10		
RATE	VIOLATION	AWARD
DT3	30 minutes unauthorized absence (Article 86, UCMJ) Disrespect toward superior officer (Article 89) Use of obscene language around patients (Article 134)	Forfeiture of \$50 pay for one month; extra duties for five days
HN	Two hours unauthorized absence (Article 86) Incapacitated for performance of duties (Article 134)	Forfeiture of \$100 pay for one month; extra duties for seven days
CO's NJP, June 17		
HM3	Violation of binnacle list (Article 92) Wrongful disposition of government property (Article 108) Racial slurs (Article 134)	Forfeiture of \$75 pay for two months; reduced in rate to E-3 (reduction suspended for 120 days)
FTMSA	5 days unauthorized absence (Article 86)	Forfeiture of \$100 pay for one month; extra duties for 10 days
HR	30 days unauthorized absence (Article 86)	Special Court martial.
CO's NJP, June 24		
HM3	Unauthorized absence for two hours (Article 86) Incapacitated for performance of duties (Article 134)	Forfeiture of \$100 for one month.
HM2	Disrespect to a petty officer (Article 91) Failure to obey lawful order (Article 92) Provoking speeches (Article 117) Assault (Article 128)	Forfeiture of \$100 for two months; reduction in rate to E-4 (reduction suspended for 120 days)
AA	Possession and use of marijuana (Article 92)	Reduction in rate to E-1 (reduction suspended for 120 days); forfeiture of \$100 for two months.
CO's NJP, July 1		
HM3	Disobedience to a petty officer (Article 91) Failure to obey lawful regulation (Article 92)	Forfeiture of \$75 for two months.
CO's NJP, July 8		
HM3	Possession of marijuana and paraphernalia (Article 92)	Summary Court Martial.
HM3	Unauthorized absence for 18 hours (Article 86)	Forfeiture of \$100 for two months.
HN	Unauthorized absence for six days (Article 86)	14 days extra duties; reduction in rate to E-2 (reduction suspended for 120 days).

HM2 Danny P. Crisman named SOQ at TI clinic

Hospital Corpsman Second Class Danny P. Crisman, Pharmacy Technician at NRMCOakland's Branch Clinic on Treasure Island, has been selected as that activity's current "Sailor of the Quarter."

He has been cited for consistently performing demanding duties in an exemplary and highly professional manner so as to contribute immensely to improved operation of the pharmacy. Officials wrote, "Your perseverance and conscientious effort in helping rearrange the distribution process and safety procedures of the Correctional Center Dispensary Medication system have been instrumental in upgrading that facility's health care service. Furthermore, through your exceptional administrative skills, you developed a highly organized medication stocking and filing system which provides better accessibility to those in need."

Petty Officer Crisman was also

HM2 Danny P. Crisman

commended for military behavior, impeccable behavior, pleasing personality, willingness to help others, untiring efforts, and total support of regional policies.

Kudos

NAVY ACHIEVEMENT MEDAL
Ensign Phillip Fordice, Medical Service Corps

LETTER OF APPRECIATION
Hospital Corpsman First Class Gerald Jackson, from Commanding Officer, NRMCOakland.

RESIDENCY CERTIFICATES
Lieutenant Commander John Kirby, Medical Corps, Radiology.

Lieutenant Commander Albert Saleker, Medical Service Corps, Podiatry.

Lieutenant Commander Dennis Amundson, Medical Corps, Internal Medicine.

Lieutenant Commander Stephanie Brodine, Medical Corps, Internal Medicine.

Lieutenant Victor Sharpe, Medical Corps, Internal Medicine.

Lieutenant Commander James Tagle, Medical Corps, Radiology.

GOOD CONDUCT AWARDS
Hospital Corpsman Third Class Daniel Dees.

Hospitalman Timothy Sherman.

HM2 Rodriguez selected SOM

HM2 Rodriguez

Hospital Corpsman Second Class Margarita Rodriguez, Leading Petty Officer in Nursing Service's detailing office, was selected as NRMCOakland's Sailor of the Month for June, and cited for "innovative contributions... exceptional professionalism, initiative and dedication to duty."

Petty Officer Rodriguez, whose ambition is to be a Drug and Alcohol Abuse Counselor, has been assigned to Oak Knoll for four years. She has nine years of military service—three years in the Army as a Specialist Fifth Class and six years in the sea service. Navy duty assignments have included Eleuthera, Bahamas; Roosevelt Roads, Puerto Rico; Great Lakes, Ill., and Oakland.

She was Sailor of the Quarter in 1978 at her duty station in the Bahamas, and also holds the National Defense and Good Conduct awards.

Speaking of her selection as NRMCOakland's best for June, HM2 Rodriguez said, "I am very honored to receive this award. Thanks to all who made it possible."

The daughter of Mrs. Confesora Forte of Camden, N.J. became a licensed practical nurse through specialized training in her home state. In the service she has completed instruction as a postal clerk and as a Hospital Corpsman. She is also certified as an Emergency Medical Technician.

Both in 1980 and 1981 Margarita was a member of the NRMCOakland Women's Varsity Softball Team. She also plays racquetball for her own enjoyment. Other hobbies include reading, crafts and bicycling.

Comings and Goings

"Fair winds and following seas" the following personnel who have recently departed this command:

LT Michael A. Turner, NAS Pensacola, Fla.

LT Edward W. Jewell, NAS Pensacola, Fla.

LT Sue E. Carner, released from active duty.

LT Gary S. Harris, Iwakuni, Japan.

LT John F. Wyman, to Dayton, Ohio.

LT Berry E. Lewis, Branch Clinic, Moffett Field.

LT William T. Merritt, released from active duty.

HN Frank J. Bowen, USS CONTELLATION.

DTC Donald E. Hritz, NNMCO Bethesda, Md.

LT William Siebert, Port Hueneme, Calif.

LCDR Lolita Chiong, Branch Clinic,ameda.

HN John C. Ticer, Camp Pendleton, Calif.

LT Mark Wagner, Camp Lejeune, C.

HM2 Mitchell Hirsch, released from active duty.

LT Mark Richardson, USS NIAGARA FALLS.

LT Suzanne Belmore, released from active duty.

HM3 Shannon Daugherty, Purdue University-ROTC.

LCDR William Cagle, NNMCO Bethesda, Md.

ENS Phillip Fordice, Camp Pendleton, Calif.

HM3 Theodoros McSpadden, CAS, Yuma, Ariz.

CDR Eduardo Fajardo, Tripler Army Hospital, Hi.

LT Mark W. Gow, 3rd Marine Division, Okinawa.

LT Robert S. Hamilton, Okinawa, Japan.

HR Brian T. Kelley, released from active duty.

LT Bryan O. Barnett, Naval Hospital Moore.

HM2 Francis P. Girotti, released from active duty.

HA Daniel E. Hancock, Pensacola, Fla.

ETC David P. Yocom, released from active duty.

HM3 Owen Devine, USS EMORY (AS-38).

HM3 John R. Darney, NRMCO Camp Lejeune.

HM2 Gary Dover, CBC Gulfport Branch Clinic.

HM3 Edward Shrum, MCB 3 Port Hueneme, Calif.

HM3 Mitchell P. Joyce, Roosevelt Roads, P.R.

HM3 Michael E. Paulin, NRMCO Guam.

HM2 Jack H. Howell, USS PUGET SOUND.

HM3 Paul A. Cassell, NRMCO Yokosuka, Japan.

HM2 David W. Hillman, NRMCO Subic Bay.

HM3 Norma Kropelnicki, NAS Alameda.

HM3 Lawrence West, NRMCO Guam.

HM2 Donald Gray, NAS Chase Field, Tex.

HM2 Albert Spinks, USS EL PASO.

HM2 Timothy Porter, USS ORION.

HM2 Christopher Sheridan, USS BELLEAU WOOD.

HM2 Ronald Spell, USS SACRAMENTO.

HM2 Michael Hughes, USS DURHAM.

HM1 David Fitch, NAVCOMSTA, H. E. Holt, Australia.

HM2 Robert Joyner, NAVSUBSPT Base, Kings Bay, Ga.

HM1 James Carrawell, Naval Hospital Guantanamo Bay.

HM2 Leonilo Oribello, USS ST. LOUIS.

HM2 Marcus Sapp, USS CONTELLATION.

HM2 Catherine Wilson, NRMCO Yokosuka.

HM3 Charles Risley, 3rd FSSG, Okinawa.

HM2 William C. Dwyer, Barstow Branch Clinic.

HM3 Douglas Spehr, NRMCO San Diego, Calif.

LT Richard Erwin, NRMCO Okinawa.

HM2 Joey Casiano, Norfolk, Va.

HM1 Kurt M. Bockoven, NSHS San Diego, Calif.

HM1 James A. Carter, released from active duty.

CDR James R. Schneider, NRMCO San Diego, Calif.

LT Douglas W. Marx, USS NEW ORLEANS.

HA Vernon P. Flick, Naval Aerospace Medical Institute, Pensacola, Fla.

LCDR Dale W. Gunn, NRMCO Bremerton, Wash.

HR Tiana Wyrick, Nursing Service.

LCDR Parr board-certified

MEMORY AID—LCDR Larry Parr uses a computer to store and retrieve the vast quantity of information needed in his job as Radiation Safety Officer.

Medical Service Corps Lieutenant Commander Larry Parr has recently been board-certified in radiological physics, with a specialty in nuclear medicine. Reportedly, he joins only two others in the Navy medical system who have earned this certification.

The qualifying test includes, among other things, knowledge of radiation exposure monitoring, federal radiation standards and laws, trouble-shooting, instrumentation, and computer data storage of nuclear information.

As the region's Radiation Safety Officer, some of CDR Parr's responsibilities include ensuring that X-ray machines and other medical equipment are functioning properly to prevent contamination of patients and staff members.

PCP. . . a living nightmare!

Snorted, swallowed or injected, angel dust can kill.

By J03 Joy Hill-Payne

Crystal, goon, busy bee, hog, elephant tranquilizer and superjoint are slang names for PCP—most commonly known as angel dust. By any name, phencyclidine is one of the most dangerous drugs to hit the streets since LSD became widely available more than a decade ago.

Developed in the 1950s as an anesthetic, PCP was banned for human use after tests showed erratic side effects and is now legal only as a tranquilizer for apes. It can be snorted as a powder, injected as a fluid or swallowed as a pill. But usually the drug is dusted or sprayed over parsley, mint leaves or marijuana and smoked.

Angel dust has been linked to hundreds of murders, suicides and accidental deaths—and its use is on the rise.

The drug is dangerous in that it is an hallucinogen with erratic and unpredictable effects. One trip may produce a feeling of euphoria or mild drunkenness, and another could be disastrous. There may be exhilaration and withdrawal from reality, or panic and suicidal feelings. Irrational or violent action is typical of chronic users, but even dabblers are not immune to sudden rages. There are several documented cases of people drowning after PCP use. Victims lose their sense of direction and space and cannot swim to safety.

In one case, a man in California walked into a house that he had picked at random, killed a baby and stabbed a pregnant woman in the stomach. Another man tore out both his eyes with his bare hands.

One of the biggest reasons for the rapid spread of PCP is that the drug is cheap and available. But whatever the reason, angel dust is... a living nightmare.

MED • SCAN

A quick look
at recent health care
developments

Antibiotics, the big guns in every physician's arsenal, are in danger of losing their effectiveness. This is a threat that has evolved through overuse of the drug and the consequent development of resistant organisms, according to *Lancet* statement issued by 148 scientists from 26 nations warned that "unless steps taken to curtail the present situation we may find a time when such antimicrobial agents are no longer useful to combat disease... due in large part to indiscriminate use of antibiotics." The scientists cited five abuses: (1) dispensing them without prescriptions, (2) using them as growth promoters in animal feeds, (3) using them for ailments for which they are ineffective, (4) misleading consumers by advertising them as "wonder drugs," (5) different labeling and advertising for the same product in different countries.

...

New evidence supports the theory that alcoholism may in many cases be an inherited disease. One study reviewed in the *British Medical Journal* found that men having an alcoholic parent, but adopted early in life, were nearly four times more likely to be alcoholic themselves than the adopted sons of non-alcoholic parents. And similar results were obtained in a large-scale adoption study conducted in Sweden. Analyses of the Swedish study found substantial evidence that alcoholism has, at least in part, a genetic basis. It has also been found that there are two distinct patterns of inherited alcohol abuse. The most common type affects both men and women and shows only a weak link to inheritance. This type of alcoholism is most frequently affected by environmental factors. The second type of alcoholism identified in the Swedish study is seen only in men and has a high degree of inheritance. This type is more severe and is often associated with criminal behavior. Whether a man is adopted or not has little effect on the course of this type of alcoholism.

...

The dream of physicians has always been to find the "magic bullet," the drug that would seek out, attack and destroy specific bacteria, viruses or malignant cells of a disease. Modern research seems to be closing in on that dream. **Substances (antibodies) have been discovered which are attracted to the specific molecules (antigens) found only on cancer cells.** Each type of cancer has its own unique antigen. The problem has been that antibodies are in short supply. In 1975, however, researchers announced that they had worked out techniques to combine the organisms that produce antibodies with malignant cells and then encourage their proliferation. Called hybridomas, they can be screened to find the specific hybridoma that produces the antibody that the researcher desires. The next step is to attach to the hybridoma an anti-cancer toxin. Research is now underway to evaluate this new approach to cancer chemotherapy. The potential of this technique was pointed out by Armand Hammer, M. D., the oilman and industrialist, chairman of the three-member advisory panel to the National Cancer Program, to suggest that the fight against cancer should focus primarily on hybridomas—a view held by many researchers to be premature.

Alcohol and crime — a dangerous mixture

By J03 Joy Hill-Payne

An alarming number of people are becoming involved in alcohol-related crimes each year. The ingestion of alcohol increasingly appears to be a direct cause of violent crimes. The term "pathological intoxication" describes the state of violent reaction discussed in this article. There are several factors to be considered when studying the effects of violence due to drinking. Among them are age, gender, race and social environment.

In a study conducted for the National Criminal Justice Information and Statistics Service (1979), it was found that women generally have lower alcohol consumption and problem drinking rates than men. Therefore, women are less likely to commit an aggressive crime while drinking. The report also said that whites tend to commit more violent crimes when drinking than blacks and other minorities. According to the report, a major problem is that more people are beginning to mix drinking with other drugs. This factor only compounds an already serious problem because most drinkers don't realize that during a violent rage they may not only endanger their lives but the lives of others as well.

Drinking that leads to violence does not just happen. There is usually a definite pattern.

How it happens

In modern society, drinking is not only accepted, but sometimes seems to be essential to success. The three martini lunch—with or without food—is believed by some business people to be a great way of helping clients to relax and relieve tension. Others feel

that a drink at lunch time helps to keep them functioning the rest of the day. Many of these people become compulsive or excessive drinkers and, for various reasons, use heavy alcohol consumption as a crutch for business and personal problems.

Once an individual becomes dependent on alcohol, it is hard for him/her to control emotions that are easy to handle for most people. It is under these circumstances that criminal behavior occurs.

According to the Bureau of Justice Statistics, data from a survey of more than 10,000 inmates in state correctional institutions conducted by the U.S. Bureau of the Census for BJS show substantial percentages of individuals serving sentences for crimes they committed while drinking. Another study of 310 imprisoned felons reported that 35 percent were drinking when they committed crimes and 55 percent of these offenders are heavy drinkers.

In general, research has shown that a large number of crimes, both petty and violent, occurred during excessive drinking periods. Most of the young men interviewed for violent crimes while under the influences of alcohol said they did not mean to hurt anyone and many could not remember what really happened.

Many judges and law enforcement officials are getting tougher with people who drink, commit crimes and then use their drinking problem as an excuse.

If you or a shipmate have a drinking problem, don't wait until it's too late. Get help now! (NES)

Drowning is forever

Summer always brings bright, fun-filled days of relaxation for all of us. Trips to the beach, lakes and rivers, and boating and fishing activities wherever there is enough water to swim or float a boat can highlight summer fun. But for many, there will be tragic consequences, and headlines will detail the statistics of drowning victims.

Since 1975, nearly 250 Navy men and women have lost their lives in drowning accidents while on authorized leave. About half of the victims drowned while purposefully engaged in swimming, diving and surfing activities; just as many others drowned as a result of falling unexpectedly into the water. This is a rather surprising figure, since most people associate drowning accidents with intentional swimming activities. Few of us realize the unintentional exposure to water can be just as deadly. Such exposure typically occurs as a result of boating accidents and falls from piers, sea walls and cliffside heights. Many in this late category involve consumption of alcoholic beverages.

Accident investigation reports reveal a common thread running through most drowning mishaps. This common element is the failure to recognize the hazard and act accordingly. The following two examples illustrate the point:

—A group of sailors who have spent the afternoon tubing on a river and drinking beer decided, despite warnings from a local police officer, to ride their inner tubes through the fast running water farther down-stream. The first two men made it, but the third did not. His inner tube flipped him into the water and he disappeared from sight.

—A young recruit joined his friends for an afternoon of fishing from some rocks which jutted into the ocean surf. After a short period of fishing, the young man was struck by a wave and washed off the rock into the surf. He drowned before his friends could reach him.

In each of these cases, the hazard was clearly recognizable. Exercising sound judgement could have easily prevented the tragedies that followed.

Investigations of drowning accidents reveal another important finding—many victims were poor swimmers, at best, while others were non-swimmers. Enrollment in local Red Cross swimming and water safety courses can teach and improve the basic skills necessary for survival in emergency situations. This action alone could eliminate many senseless tragedies. Do yourself and your family a favor—learn to swim! (NES)

FAMILY TEAM—New arrivals at NRMCO Oakland are Lieutenant Eileen Greb, a wife on 7 North, and her husband Leland W., a Red Cross volunteer case aide who donates 10 hours a week to this hospital. LT Greb was formerly stationed at NRMCO Corpus Christi, Tex., and has also donated time to the Red Cross, teaching multi-media and CPR classes for the past 10 years. The couple met sometime ago at a Navy hospital in the Philippines when Leland was an Avionics Electronics Technician patient and Eileen was his nurse.

Pets may unravel with travel

"Fido" Johnson or "Pussy" Katz may be a beloved part of your family, but taking your family pet along on duty station can create problems for both you and the animals.

A car-sick, unhappy animal can make a trip miserable for everyone. Many pets are prone to jump out of the car at gas stations. Some ill or physically impaired dogs and cats cannot withstand the rigors of travel. For these or other reasons, you may decide your pet is better off at home while someone to look after it, or at a well-run boarding kennel.

On the event you want to (or have to) take your pet along—on a trip, change of duty station—here are some guidelines provided by the American Veterinary Medical Association to minimize the chances of an unpleasant experience.

General
Be sure your pet wears a collar with complete identification and a license.

Have a rabies vaccination certificate if you will be crossing state or national borders.
Be prepared to present a health certificate, especially if you travel to Canada or Mexico.

Before undertaking a long trip, it will be advisable to have your pet examined by a veterinarian.

Travel By Car
If your pet is not accustomed to the car, take it for a few short rides before the trip. Your cat might ride better in a

carrying cage.

-Give the main meal at the end of the day or when you reach your destination. Dry food is more convenient on trips, if the pet is used to it.

-Take along water and a container from which the pet can drink.

-A pet should not be allowed to ride with its head outside a car window. Particles of dirt can penetrate the eyes, ears, and nose, causing injury or infections. Excessive amounts of cold air taken into lungs can also cause illness.

-A pet should never be left locked in a parked car. This can be lethal. Even in mild weather (50-60 degrees, Fahrenheit) the temperature in a closed car on a clear day can rise quickly to well over 100 degrees.

Travel By Air

-Federal regulations state that dogs and cats must be at least eight weeks old and weaned at least five days before flying. Current health and rabies vaccination certificates will be required.

-Contact the airline well in advance to check regulations and services, and to make reservations.

-Try to book a direct, mid-week flight or one with a minimum of stops.

-Be at the airport early, exercise your pet, place it in the cage yourself and pick up the animal promptly upon arrival.

-Don't take leashed animals on escalators; use stairs or an elevator.

Servicemembers must arrange for private or commercial transportation of pets at their own expense when duty requires a move or travel. Your installation's veterinarian will advise you of immunization requirements in effect at your new duty station. And at many installations, the veterinarian can provide immunizations at a nominal cost.

Veterans Ask

Q—Will my wife's income help me qualify for a GI home loan through the VA?

A—Yes. The VA has been giving full recognition to income of both veterans and spouses in determining ability to repay GI bill loans.

Staff member suffers injury

At this paper's deadline, Hospital Corpsman Third Class Robert Lewis Michalek of Patient Affairs is reported in stable condition but still in intensive care in Washington Hospital, Fremont.

Petty Officer Michalek is said to have been seriously injured in a motorcycle accident in that area on July 9.

NSC offers tips for smooth moves

In the San Francisco Bay Area, Naval Supply Center Oakland (NSCO) has responsibility for handling all personal property shipments for DoD military and civilian personnel.

Members shipping out of this area are asked to contact that office (466-5461 or 5462) as soon as possible upon receipt of permanent change of station orders. The Outbound Section is receiving an average of 97 applications daily. A minimum of 10 working days is required before established pickup date; therefore, members are encouraged to make the necessary shipping arrangements as far in advance as possible.

Servicemembers are urged to select their pack and pickup dates carefully. During the peak summer shipping season all carriers/agents' schedules are heavy with capacity bookings and date changes can cause delays and severe financial problems which impact on the servicemember and his/her family. In addition to walk-in applications, an appointment system is available for the convenience of customers from 8 a.m. to 2 p.m., Monday through Thursday.

New arrivals in the area should report to the Personal Property Office, NSCO, immediately upon arrival to provide any available contact telephone number or address. The normal time allowed for delivery of household goods and unaccompanied baggage shipments from storage-in-transit is at least five working days. As the summer progresses, the daily carrier schedules will increase and delivery dates will likewise be extended. Therefore, it is of the utmost importance to provide a delivery address as soon as residence is obtained. This will prevent unnecessary storage and provide direct delivery service. NSCO Inbound Customer Service telephone numbers are keyed to the first letter of a member's last name, as indicated: A to K... (415) 466-6223/4/5; L to Z... (415) 466-6463/4/5; Supervisor (415) 466-5880.

Collect calls (official business) are accepted for delivery coordination. Attempted deliveries can be very costly to members, so be sure that someone is available on the scheduled date to receive the property. Written authorization or Power of Attorney is required if someone other than consignee is going to release and/or receive shipment.

NEW CARRIER—Danny Bliss, 8, son of Medical Corps Commander and Mrs. Donald L. Bliss, has volunteered to be the new Oak Leaf carrier for officers' family quarters in the Barcelona area. Danny attends Assumption School where he will enter the fourth grade in the fall.

NRS aid possible in car breakdown

Today the majority of Navy personnel find it necessary to purchase motor vehicles because public transportation is not conveniently available at most bases. In recognition of this fact, several years ago the Navy Relief Society expanded its financial assistance policy to include the unexpected expense of motor vehicle repairs.

The Society does not finance vehicle purchases, registration fees, or insurance costs. Neither will it lend money to pay for regular upkeep, such as oil changes, other scheduled maintenance services, or body work. Keeping a motor vehicle in safe operating condition is a responsibility of vehicle ownership.

However, interest-free loans are available to help when your "wheels" give out between pay days, or when you are traveling and thus away from access to your savings account. Navy Relief expects you to provide a written estimate of necessary repairs. It further expects that the cost of repairs not be excessive, and that the member be able to repay the Society within a reasonable period of time.

To apply for motor vehicle repair assistance, contact the East San Francisco Bay Auxiliary located in Building 135, NAS Alameda, between the hours of 9 a.m. and 3:30 p.m. If your vehicle breaks down when you are traveling and you are not near a Navy Relief office, Society assistance may be obtained through any of the 3,000 American Red Cross Chapters nationwide.

As with all of its financial assistance, Navy Relief tries to provide help with the unexpected emergencies that appear in the lives of naval service personnel.

Time limited to ship, store

The entitlement to ship or store personal property for members separating from service has been changed to 180 days from date of release, instead of the former one-year period. Members retiring, however, have one year entitlement except in cases where the member is hospitalized or undergoing medical treatment. In those instances, the time limit for shipment of household goods is extended until one year after termination of active duty, plus a period equal to the period of hospitalization/treatment.

When a retiring member is in an educational or training program to qualify for civilian employment, the time limit for shipment of household goods is extended until one year after termination of studies. If more time is required, you should request a further extension before the time limit expires.

All questions concerning entitlement should be directed to the counselor in the Personal Property Office at Naval Supply Center, Oakland.

The following new additions to the military medical "family" have arrived at Naval Regional Medical Center Oakland:

Baby boy to Lieutenant Arthur W. Operating Management and his wife Soo Kyong, June 30.

Baby girl to Lieutenant Lawrence M. Anesthesiology, and his wife a former staff member, July 9.

RESIDENT RUNNER—LCDR Michael Cassaday of NRMCOakland's Medical Service staff trailed winner Domingo Tibaduiza by only a little more than three minutes in the 1982 San Francisco Marathon run July 11. Placing eighth in a marathon that drew over 7,800 entrants, the Navy physician's time was 2:18:04 in the 26-mile, 365 yard run from Golden Gate Park to the finish line at the Civic Center.

(Editor's Note: Photo above was taken in an earlier race by Kenneth Green, the late Oakland Tribune/Eastbay TODAY staff photographer recently killed after being struck by a freight train while on assignment.)

Chess tourney set for Mare Island

Central Pacific Regional Chess Championships will be held at the NSA Mare Island Library Aug. 7-8, starting at 9 a.m. both days. All active duty Navy, Marine Corps and Coast Guard members are eligible to participate in this tournament.

The tournament will be conducted under the Swiss System and U.S. Chess Federation rules will govern. Each contestant is requested to bring his/her own chess set and clock.

Awards will be provided by NMPC Recreational Service and the top finishers will be nominated for the Sea Services Chess Tournament to be held in Washington, D.C. at the end of August. For further information call Ron Brown at Ext. 2350.

Concert band members needed

If you are a musician and wish to use your talents in a fun and meaningful way—here is your chance. CDR Reed Adams, USCG, Ret., coordinator of a concert band, is looking for volunteers who can play musical instruments.

You must be able to practice on Wednesday nights in Oakland. Rides to the practice may be available, depending on where you live.

Discount tickets available here

Tickets are on sale at Special Services for the A's vs. Boston games on Aug. 20, 21, 22 Regular adult tickets are \$8.25 each; military, retired and children, \$4.25.

The Carriage Trade Diner Club Card can still be purchased for only \$13.95. This card entitles you to more than 55 free dinners. Order forms are available at Special Services ticket office. The offer is valid until Dec. 31, 1982.

San Francisco Bay Area Discount Coupon book sells for \$3.50. It includes coupons for Burger King, Dandy Dog, Denny's, Shakey's Pizza, Taco Bell, Golf Land Mini Golf, Winchester Mystery House and many others. Coupons are good till March 1983.

MSC anniversary to be observed here

The 35th Anniversary of the Naval Medical Service Corps will be celebrated with a dinner dance at the Naval Regional Medical Center on Aug. 1 at the Officers' Club.

Theme for the party this year is "Star Is Born," to focus on the announcement of Commodore-Selector Lou Angelo as the first one-star Medical officer.

No-host cocktails start at 7 p.m. with a buffet at 8 p.m. and musical entertainment and dancing to follow.

Price is \$17.50 per person. Reservations may be made with LT Susan C. Ligan of Psychiatry Service.

NAS Lemoore first in women's tourney

Naval Regional Medical Center Oakland hosted the 1982 Women's Softball Pitch Softball Tournament, July 9-10.

The "Patriots" of NRMCOakland finished fourth out of eight teams with the "Ten" from NAS Lemoore winning the tournament. Runner-up team was Mare Island, with Alameda finishing third.

Entry forms here for 'Presidio 10'

A limited number of entry forms are available beneath the bulletin board in front of the Oak Leaf office for the "Presidio 10" race on Aug. 29. Fee for those registering before Aug. 20 is \$7.50 thereafter.

Sponsored by The Guardsmen, the 1982 Road Runners and U.S. Military 10-Mile Championships cover a beautiful certified course, starting at the Centennial Tree in the main parking lot of the San Francisco Presidio and ending at the parade grounds.

Fast pitcher needed

Can anyone "fast pitch softball"? So, let Special Services know.

NRMCOakland will be hosting the 1982 "Fast Pitch Softball" Tournament Aug. 19-22. If Special Services can find someone to pitch, then a team from NRMCOakland will be entered.

Call Ext. 2350 if you are qualified.

SUMMER SPECIAL—Military and civilian Department of Defense personnel and their families may view a special musical presentation by Up With Peaches at Sea World this summer while enjoying a discount on admission to the park. During Military Summer Special, discount coupons will entitle military personnel to a 30 percent discount on park entrance. Coupons are valid Aug. 1 through Sept. 6 and are available only at base recreation services offices.

Rear Admiral Robert C. Elliott (left) returns the salute of retiring RADM Walter M. Lonergan as command of the Naval Regional Medical Center, Oakland, is passed to RADM Elliott.

Rear Admiral Walter M. Lonergan is "piped" over in traditional Navy style as he is followed by several other officers in uniform.

DoD, VA to share health resources and facilities under new public law

The Department of Defense and the Veterans Administration will share medical resources under a new law (PL 97-174), signed by President Reagan on August 4, 1982. The law is designed to permit such sharing without compromising the mission of either agency. Under the terms of the new legislation, a VA patient who requires special equipment or medical resources not available at the VA hospital, could obtain them from a nearby DoD facility, vice versa. The same would hold true for active duty and retired military personnel.

Dependents of active duty and retired personnel are not eligible for benefits provided under this law.

PL 97-174 expands the relationship between DoD and VA facilities established by an earlier law—PL 97-72, which identified the VA hospital system as the principal back-up for DoD medical facilities in the event of a national emergency. The earlier law also authorizes minimum VA hospital bed levels as a safeguard against the denial of care to veterans should an emergency occur. (AFPS)

New CO's message to staff and patients

Since 1942, Naval Regional Medical Center Oakland has deservedly earned the reputation of being an outstanding medical facility—noted for its highly successful programs in medical education and the superb quality of health care delivered at the core hospital and all of the regional medical treatment facilities.

Great strides have been made over the last five years, many of which have been the direct result of the leadership and planning of Rear Admiral Walter M. Lonergan, MC, USN. I join the entire staff in congratulating and thanking him for the masterful manner in which he served. His dedication to the Navy and his contribution to the Naval Regional Medical Center, its staff and its patients, will continue to have a positive impact on all of us for many years to come. I wish him good health, unending happiness, and continued success in his retirement.

To the staff and patients of Naval Regional Medical Center Oakland, I pledge my full support and total dedication to the mission of the Navy Medical Department. It is my intention that NRMCOakland will continue to provide the best possible medical care in a responsive and dedicated manner, and that our medical education programs will continue to be the best that the Navy has.

Over the coming weeks I will be meeting with ALL of the staff to personally reinforce these concepts and to elicit your professional opinion and support as we prepare for the challenges that lie ahead.

R.C. ELLIOTT
RADM, MC, USN
Commanding Officer

First change in five years

Oakland Medical Center under new command

Command of a Navy medical region offering health care to 200,000 eligible beneficiaries changed hands here last Friday when Rear Admiral Robert C. Elliott relieved retiring Rear Admiral Walter M. Lonergan in formal ceremonies at the entrance to the main hospital building.

As Navy men and women attached to the command stood at attention and civic leaders in the audience listened, guest speaker Rear Admiral Eustine P. Rucci, Commanding Officer, Naval Regional Medical Center, San Diego, presented the Navy Legion of Merit to RADM Lonergan in behalf of the President of the United States for outstanding service as the region's commanding officer over the last five years. An accompanying citation lauded the retiring admiral for his role in "establishing state of the art graduate medical education... and (creating) a model for teaching facilities for all federal medical facilities to follow."

RADM Lonergan completed 38 years of naval service at the same hospital where he was first assigned in 1944 as an enlisted pharmacist's mate. A Navy doctor since 1952, he is a specialist in obstetrics and gynecology.

His successor, RADM Elliott, 51, comes to the west coast from a Washington, D.C. assignment as Inspector General for the Navy's medical department. Also a Navy physician, he has 25 years of military service and is a specialist in pulmonary diseases.

In addition to medical center staff, participants in the change of command ceremonies were members of the Navy Band, San Francisco, and a color guard from the 12th Marine Corps District, Treasure Island.

Two receptions followed the military function, with numerous civic and military dignitaries in attendance.

Rear Admiral Robert C. Elliott addresses several hundred guests who witnessed the change of command.

DEFENSE
HOTLINE

FOR FRAUD, WASTE,
ABUSE REPORTING

800/424-9098-toll free

223-5080-Autovon

693-5080-FTS

693-5080 Washington, D.C. Metro area.

OR WRITE:
DEFENSE HOTLINE
THE PENTAGON
WASHINGTON, D.C.
20301
IDENTITIES OF WRITERS & CALLERS
FULLY PROTECTED

Use hotline to stop waste —not to report grievance

The DoD Hotline is a means for reporting crimes against the Department of Defense and the military services involving fraud, waste and the abuse of authority for personal gain.

- The Hotline is NOT to be used for reporting:
- people who are mean
 - people who are overweight
 - a supervisor who gave you an unfair evaluation
 - poor plumbing in the barracks
 - rubbery eggs in the messhall

Those who have legitimate complaints about sexual harassment, discrimination or other wrongful practices not related to fraud or waste should report them through appropriate command channels.

Using the right channel for reporting grievances is more likely to result in faster corrective action or investigation of the complaint.

If you do become aware of a crime involving fraud or waste of DoD property or resources, report it promptly to the DoD Hotline, even if it hasn't happened yet. The faster such abuses are reported, the faster the proper authorities can act. If you have reason to believe a crime of this sort is about to take place, your DoD Hotline report may help to prevent it or to nab the perpetrators in the act.

DoD Hotline numbers are:

- 800-424-9098 (TOLL FREE)
- 693-5080 (Washington Area)
- 223-5080 (Autovon)

(AFP)

Our patients write...

I wish to express my gratitude for the excellent care I received while a patient June 25 through June 29.

My surgeon, Dr. John Haller, won my confidence during the first examination and had my admiration for his kindness and gentle touch. All members of the Blue Surgical Team were professional and very caring, and all personnel on Sixth Floor North were super people.

John T. Wright

From the period of May 3, 1982 thru May 17, 1982 I was a patient of ward Seven North. . . During that time the treatment I received from the nursing staff and corpsmen of that ward was superb. The pride and professionalism displayed was far beyond that of the Navy's expectation. At no time did I even have to wait for scheduled medication, or help in any way. As a patient and second class petty officer, I feel that a great deal of credit and praise should be given to the following people so they can be recognized for a job extremely well done.

LT Newsom, LT Owens, LT Myers, LTJG Muessig, LTJG Cagle, LTJG Wotowic, ENS Smith, ENS Hunter, HM3 Kooser, HM3 Neal, HN Rockefeller, HN Walker, HN Roszko, HN Cook, HA Cosgrove, HA Comins, and HA Tingen.

Gary D. Buda
IS2 USN

My wife and I have recently had surgery through the ENT Clinic.

We have been most impressed with all of the doctors who have treated us and specifically wish to commend Drs. Taylor, Hicks, Ellison, Mendez and Graselle. They have been most courteous and have given us both excellent initial treatment as well as follow up consultations.

We found all the ward personnel to be most helpful and willing to do anything to make us comfortable and to make us feel that they really cared for us. We especially would like to mention LT Newsom in Ward 7N.

We appreciate all that has been done for us and thank you for having instilled in the above personnel a desire to make your hospital the best we have ever been in contact with.

Thank you.

Millard F. Hauser
LT COL USAF (RET)

We had such beautiful help all during my dear husband's long illness—doctors, nurses and just everyone. Dr. Crucitt was there every time we needed him.

What beautiful, caring people all thru the organization. Joe spoke so often of so many special people.

Again I say thank you and God Bless the Navy and its people.

K.M. Fox

I wish to express my sincere appreciation for the care I recently received from the Cardiac Care Unit and the medical personnel of Ward Nine South.

My heartfelt thanks goes to all those who showed me such care and consideration.

LCDR Idus L. Robertson, USN (RET)

A message to all the staff

I'm writing what I hope will become an open letter to the staff through the "Oak Leaf."

First, I would like to thank those who contributed to the healthy turnout at my retirement ceremony. It was a joy to see so many in the audience.

My shipmates at Oak Knoll will occupy a special spot in my heart forever. In an area populated by the "me first" generation they remained open, caring, and involved with helping others. In a hectic, highly-charged environment, they kept smiling. In a time when many people are turning inward, in selfish search, they continued to reach outward in selfless service.

For a period of three years they extended many courtesies, much assistance and unending friendship. In a time when gold, precious jewels and even soybeans are being traded for high prices, their human qualities are priceless.

To you and the Oak Knoll staff go my continued prayers for health and happiness.

John E. Kraft
LCDR, MSC, USN, RET

(Editor's Note: Lieutenant Commander Kraft, our former Patient Affairs Officer, recently retired and is now living in Las Vegas, Nev.)

August marks Human Goals Anniversary

"People are our most important asset," Secretary of Defense Melvin R. Laird declared when he endorsed the first Human Goals Charter on Aug. 18, 1969.

He stressed the need to attract able people to a career in the Department of Defense and added, "We must give new emphasis to the importance of the individual."

The first Charter was signed by the Secretary of Defense, the Deputy Secretary of Defense, the secretaries of the Military Departments and the members of the Joint Chiefs of Staff.

Each Secretary of Defense since Melvin Laird, along with successors of the other signers, has reaffirmed DoD's commitment to human goals by signing and reissuing the Charter. The current edition was signed by Secretary Caspar W. Weinberger on May 18, 1981.

THE OAK LEAF is published biweekly on Friday, produced commercially with appropriated funds in compliance with NNPR P-35. Rev. Jan. 1974. Deadline for copy is Wednesday noon of the week prior to publication.

Opinions contained herein are not official expressions of the Department of the Navy. THE OAK LEAF receives American Forces Press Service and Navy News material.

Contributions from both staff and patients are welcomed and should be addressed to the Editor of the OAK LEAF, Naval Regional Medical Center, Oakland, CA 94627.

SJA departs soon for Japan billet

Lieutenant Commander Mark R. Dawson, Staff Judge Advocate, will be leaving this command on Aug. 30 for a new billet on the staff of the Naval Legal Service Office at Yokosuka, Japan.

LCDR Dawson, who has nine years active duty, recently received the Navy Achievement Medal for outstanding performance here. He also holds the Rifle Sharpshooter Ribbon, the Expert Pistol Medal, and the National Defense Service Medal. Previous billets have included duty as a trial attorney at San Diego, Assistant Staff Judge Advocate for the Commander, Antisubmarine Warfare Wing, Pacific, and the Military Justice Division of the Office of the Judge Advocate General in Washington, D.C. He has been at Oak Knoll two years.

The legal officer earned a bachelor of arts at the University of California Berkeley, a juris doctor degree from Hastings College of Law, and a master of laws from George Washington University.

He recently married the former

LCDR Mark Dawson

Suzanne Hinckley, who will accompany him on his new assignment.

LCDR Dawson's replacement on the Oak Knoll staff will be LCDR William H. Archambault.

Word Processing establishes Dictator of Month' award

By Betty Raab

The first "Dictator of the Month" award will be presented by the Word Processing Branch in September. Any member of the staff who dictates is eligible to receive this award—all you have to do is satisfy the 22-member Word Processing staff that you are the best dictator in the center.

Dictation is a way of life to most of our staff—and it's clearly a management tool where practice makes perfect. So don't be of faint heart—if you "m and Ah" your way through dictation today, by meeting the criteria below, you can be an expert in a few short months.

Dictators will be judged on the following:

—Following dictating formats where applicable.

—Relaxed normal conversational rate—not too fast, especially on material that is familiar.

—Avoidance of mumbling, smoking, yawning, eating while dictating.

—Clarity in speech.

—Appropriate inflections and pauses.

—Complete sentences.

—Punctuation and paragraphs.

—No abbreviations.

—Numbers—enunciate clearly—do not run them together.

—Spelling of unusual names, new drugs, homonyms, foreign words.

—Brevity—concise, well-organized dictation.

—Proper use of equipment—avoid cutting off beginning or ending of words, no extended pauses.

—Clear instructions—your name, telephone or beeper number, correspondence symbols, file numbers, delivery point.

—Elimination of background noise, loud talking, laughing, radio playing.

Attention to detail will ensure that you get dictation back the way you *think* you dictated it. When you dictate "This is a 30 year old caucasian male with a 4-6 month history of left inguinal bulge which increases on Valsalva maneuver," it will not sound to the transcriber as "This 13 year old asian male with a 46 month history of left inguinal bulge which creases on valley maneuvers."

Pregnancy separation policy modified

Effective immediately, the Navy will no longer automatically approve separation requests from women who are pregnant. In view of increasing number of women in the Navy and the current increase in their service and responsibilities, this policy will help to ensure that the Navy retains men in whom it has a substantial investment or who possess skills required by the Navy. Separation requests will still normally be approved, except for women who:

—Receive fully funded education or education for which they incur obligated service, e.g., Naval Academy, ROTC, medical scholarships and education, post-graduate education, service college, Enlisted Commissioning Program (ECP), or Enlisted Education Advancement Program (EEAP).

—Receive extensive training for which they incur obligated service, e.g., training, medical residency or one-year and six year obligors.

—Receive special compensation, aviation bonus, SRB or Enlistment Bonus (EB).

—Are in a rating, skill area, NEC or specialty which justifies retention.

—Execute orders, reenlist or enter a program requiring obligated service while pregnant.

A separation request by a woman in one of the above categories may be approved, however, if she demonstrates overriding and compelling factors of personal need which warrant her separation.

Women officers will continue to submit resignation requests according to present procedures. Requests for separation from enlisted women may still be approved by their commanding officer, unless they are in one of the categories cited above. Those cases and ones in which their commanding officer recommends disapproval will be forwarded to Commander, Naval Military Personnel Command for final determination.

Women are still required to submit their request for separation at least four months in advance of when they desire to get out of the Navy. This is necessary to provide the command with a reasonable period of time to begin arranging for a relief. A separation date about one month prior to the expected delivery date is encouraged,

Rotation pattern modified for enlisted women

As of July 15, the rotation pattern for some enlisted women was modified and the assignment policy for women in the nuclear power field was defined.

Because current law precludes women from being assigned to combatant ships, the rotation pattern for enlisted women will continue to be CONUS/OUTUS vice the sea/shore rotation followed by men. However, under the revision, women's rotation will now fall into one of three categories: alternating CONUS/OUTUS tours; back-to-back OUTUS tours followed by one CONUS tour; and back-to-back CONUS tours followed by one OUTUS tour. This last category is a new rotation pattern, established to ease detailing of women in ratings with a limited number of OUTUS billets.

The length of the CONUS tours for women will be the same as for men in the same rate/rating, and the length of OUTUS tours will be the prescribed area tour for overseas duty and 36 months for shipboard duty. For women in the OUTUS/OUTUS/CONUS pattern, a one year extension at the current OUTUS location may satisfy the second OUTUS requirement.

For women in the nuclear power field, their assignment policy now includes detailed information on their rotation pattern. Generally, they will rotate between duty at nuclear radiological control facilities and Navy nuclear power training units.

Also effective July 15, women who become pregnant at overseas locations where adequate housing and medical facilities are not available will be deferred from completing their overseas tours during the pregnancy and for six months following delivery. During the deferral they will be transferred to the nearest CONUS location with valid billets available. Afterwards, they normally will be reassigned to the OUTUS activity to complete rotation requirements. They may however, volunteer to return to normal rotation sooner than the six months. Pregnant women assigned to overseas activities where housing and medical facilities are adequate will complete their tours at these duty stations.

These modifications to enlisted women's assignment policy will be published in the next change to the enlisted transfer manual.

Rear Admiral Eustine P. Rucci, Commanding Officer, Naval Regional Medical Center, San Diego, was guest speaker during Naval Regional Medical Center Oakland's change of command ceremony on July 30. Acting in behalf of the Navy Surgeon General, RADM Rucci also presented retiring RADM Walter M. Lonergan with the Legion of Merit for his five years' service as Oakland's commanding officer.

Command Master Chief Charles Dackerman presents Rear Admiral Lonergan's flag to him as the former commanding officer's ensign is hauled down and Rear Admiral Robert C. Elliott's hoisted at the entrance to the hospital.

RADM Dunn to head reserves

RADM Robert F. Dunn will become Chief of Naval Reserve this fall, relieving RADM Frederick Palmer.

RADM Dunn currently is Commander, Naval Military Personnel Command.

Commodore L. W. Angelo relieves Captain Nelson

Captain Paul D. Nelson, former Chief of the Navy's Medical Service Corps, retired in Washington, D.C. on July 30.

His successor, Commodore-selectee Lewis E. Angelo, was frocked and appointed during the same ceremony held in the Admiral Leutze Park of the Washington Navy Yard.

Love addresses NMA assembly

Lieutenant Commander Douglas Love, Jr., head dietician and Assistant Chief of Food Service here, was a speaker at the 87th Annual Convention and Scientific Assembly of the National Medical Association held July 25-29 at the San Francisco Hilton.

The Navy Medical Service Corps officer spoke July 26, addressing the assemblage on "Use of Enteral Nutritional Formulas in General Medicine."

MANY YEARS BEHIND THE WHEEL—David A. Williams has been driving an assortment of vehicles for the Navy during the past 20 years. For the previous 20 he served in the Navy as an aircraft mechanic.

Supervisor says Williams will be difficult to replace

David A. Williams, who plans to retire next January after 40 years' service to the federal government, laughed and said, "I never could hold down a steady job for very long!"

Mr. Williams transferred to the NRMCO Oakland Transportation Office from the Treasure Island Branch Clinic a little more than four years ago. He is employed here as a Heavy Duty Driver, WG-7.

In 1963 Williams was hired at 50 Fell Street, San Francisco, the site of the now defunct naval dispensary, which was moved to Treasure Island when the clinics and dispensaries were consolidated by region under the command of the Oakland hospital. While employed at the old Navy dispensary in downtown San Francisco, Williams drove an ambulance and became involved in numerous humanitarian emergencies.

Before his civil service, Williams spent 20 years in the U. S. Navy as an aircraft mechanic, with most of his duty in the South Pacific. He advanced through the rates to become a Chief Petty Officer after five years of service, and retired in 1961 as an E7.

The veteran employee hopes to do a lot of traveling with his wife and fishing with friends upon retirement. A neighbor, however, is coaxing him to join in a small cement contracting business.

Williams says he has enjoyed working for the government, "even for the time I was sent to Texas. It's all in your attitude as to how you feel about a job."

Adds his boss, John McCole, "The Navy will have to hire 10 men to do the work Williams does when he retires."

SBP open season ends soon

The clock is steadily ticking away the time remaining for retirees to apply for new or increased participation in the Survivor Benefit Plan (SBP).

The 12-month open enrollment period enacted by Congress last summer began on Oct. 1, 1981 and ends at midnight on Sept. 30.

Any military member who retired before Aug. 13, 1981 may, during the open enrollment period, make an initial election, increase an existing one, or

add spouse protection to a "children only" election. This applies to those retirees who did not make any election under SBP, as well as to those who elected less than maximum coverage or elected "children only" coverage but not spouse coverage.

If you have mislaid the election form mailed to you earlier, another one may be obtained by contacting the local retired activities branch of your service.

New reserve enlistments available

New enlistment options for persons interested in entering the selected reserve have been announced by the Chief of Naval Reserve, RADM Frederick Palmer.

Under the new guidelines, which became effective June 28, Navy veterans who have completed their service obligations and have been out of uniform less than four years may join the selected reserve for two, three, four, five or six years. The same options are available to veterans who have been out of uniform more than

four years, but working in a civilian job related to their rating. Veterans out of uniform more than four years with jobs unrelated to their rating, and personnel in senior grades, do not have the choice of a two-year enlistment but are eligible for all other enlistment options. Veterans of other services are normally enlisted under the same terms as Navy veterans.

Naval Reserve activities can provide additional details to interested personnel.

State Attorney General rules military exempt from jury duty

In Opinion No. 81-1114 on July 2, 1982, the Attorney General of the State of California ruled that servicemembers who receive jury duty notice in this state are exempt from serving.

Pertinent language is excerpted:

"The question presented for resolution is whether personnel on active duty with the Armed Forces of the United States are exempt from jury duty in the state courts of California... the issue to be addressed is that of exemption solely by virtue of military status... (a former statute) provided a general exemption from jury service for numerous occupations and professions including a naval or military officer of the United States, or of this state, or a member of the Armed Forces of the United States, while on active duty... These exemptions were based on a recognized state interest in shielding certain professional occupations from the interference that would result from jury service... Section 200 now provides: 'The court shall excuse a person from jury service upon finding that the jury service would entail undue hardship on the person or the public served by the person.' This section constitutes neither a general exemption nor a disqualification from jury service, but simply prescribes the standard upon which a court shall excuse a certain potential juror... thus, the military status of an individual per se, renders him neither incompetent under Sections 198 and 199, nor excusable under Section 200..."

"While the Congress of the United States has provided an exemption for members in active service in the Armed Forces from jury duty in the federal courts, it has made no such provision with respect to state courts. Since such service is precluded, neither by state nor federal statute, we turn to the principles of constitutional federalism. Article VI, Clause 2, of the United States Constitution provides: 'This Constitution, and the laws of the United States which shall be made in pursuance thereof... shall be the supreme law of the land; and the judges in every state shall be bound thereby, anything in the Constitution or laws of any state to the contrary notwithstanding.' The power to provide for and to regulate the national Armed Forces... is exclusively federal... It is axiomatic that a state statute may not impair the performance by the United States of its proper functions... the California Supreme Court has also observed the principle, both 'familiar and unimpeachable,' that... 'a state cannot be permitted to assert jurisdiction over one acting under the authority of the United States for acts by him done in furtherance of the duty he owes to the federal government.'"

"In its discussion of the exemption of military personnel from federal jury service a (federal) court alluded to the fundamental conflict between military duty and competing concerns: 'The relevant language... merely tracks the language of its predecessor section, 28 U. S. C. Section 1862 (1966)... the underlying rationale of the section was that members of such classes as military personnel were better left undisturbed at their usual occupations. Justice Holmes stated the appropriate standard... certain occupations may be categorically excluded from jury duty on the 'bona fide ground that it (is) for the good of the community that their regular work should not be interrupted...'... because it is the 'primary business of Armies and Navies to fight or be ready to fight wars should the occasion arise...' the exclusion of military personnel from jury duty is reasonable and for the good of the

community... Such military duty and availability are, of course, similar to that of a civilian, and are not inconsistent with state statutory jury duty. In view of the foregoing, a servicemember on active duty with the Armed Forces and subject to the exclusive jurisdiction of the federal government is 'exempt' from jury duty in the state courts of California... used in common parlance and in the inquiry presented, the term 'exempt' connotes that an individual, or a group or class of individuals, is not subject to specified statutory duty... as in the case of designated peace officers, judges, and members of the active militia, persons on active duty with the federal Armed Forces should not be included on the qualified jury list in the absence of a general waiver by law of federal authority." (All citations and footnotes are omitted.)

The above opinion may be used as a basis for requesting excusal if called for jury duty in California state courts.

Job openings here and at branch clinic

Applications will be accepted through Jan. 19, 1983 by Civilian Personnel Service at Oak Knoll for Medical Clerk (Typing) or Medical Clerk, with future vacancies anticipated here and at the Alameda, Concord, Vallejo, and Moffett Field branch clinics.

The GS-4 positions involve a considerable amount of patient contact, scheduling appointments and instruction on preparation for examination involving studies and tests. One year of general and one year of specialized experience are required.

Applicants should specify the geographic area of their interest.

...

Qualified personnel are invited to apply for the position of Therapeutic Radiologic Technologist, GS-7, located in Radiology Service of Naval Regional Medical Center Oakland. Closing date for this announcement is Monday, Aug. 9.

This job requires one year of general experience and at least four years of operating therapeutic radiology equipment under the direction of radiotherapists or other medical officers.

For more information, see or call (Ext. 2116) Maurine Tinsley.

Applications will be accepted through close of business today for Secretary (Typing), GS-5 at the Naval Supply Center Oakland Branch Clinic, and through Monday, Aug. 9, for a Medical Technologist, GS-9 at Oak Knoll and Lead Medical Clerk (Typing), GS-5 at Mare Island Naval Shipyard Branch Clinic.

Ms. Tinsley is also point of contact for these positions.

Families sized up

Among married enlisteds, the Air Force and Army have the largest families, according to a report titled "A Description of Officers and Enlisted Personnel in the U. S. Armed Forces" published by the Rand Corporation.

About 59 percent of Air Force and 55 percent of Army members reported one or more dependents besides their spouses, compared with 45 percent for the Navy and about 40 percent for the Marine Corps.

About 65 percent of married officers reported one or more dependents besides their spouses.

Comings and Goings -----

"Fair winds and following seas" to the following personnel who have recently departed this command.

Rear Admiral Walter M. Lonergan, retired

Commander Frank Fisher to San Diego

Captain Warren Hodge to NARMC Pensacola, Fla

Commander James Schneider to San Diego

Commander Alfred Mateczun to NRMCM Bremerton, Wash

Lieutenant Commander Dale Gunn to NRMCM Bremerton

Lieutenant Graceann Shartner to Guam

Commander David Figgins to NRMCM San Diego

Lieutenant Jeffrey Kezlarian to NNMCM Bethesda, Md

Commander Prudencio Mendez to NRMCM Charleston, S C

Lieutenant Commander Thomas Allred to NARMCM Pensacola

Lieutenant Commander Christopher Harris to NRMCM Long Beach, Calif

Lieutenant Betsy McKinnon, released from active duty

Commander Ivan Choi from Alameda Branch Clinic to USS CON- STELLATION

Commander Moussa Menasha to Camp Lejeune, N. C.

Lieutenant Commander Marcia Wright to NRMCM San Diego

Hospital Apprentice Michael A. Riley to 1st Mar. Div. FMFPAC, Camp Pendleton, Calif.

Hospitalman Renato Flores to AHS, Ft. Sam Houston, Tex.

Hospital Apprentice Veronica P. Mejia to NAS Kingsville Branch Clinic, Tex.

Hospitalman Chris Kateley to FMFPAC, Okinawa, Japan

Chief Mess Management Specialist Rolan Fontillas to Quarters Management Improvement Project, Washington, D. C.

Hospital Apprentice Bryan Brock to 1st Mar. Div., FMFPAC.

Lieutenant Louis S. Sarbeck to NRMCM Long Beach.

Hospital Corpsman Third Class Lonja L. Stevenson to NNMCM Bethesda, Md.

Hospital Corpsman Third Class Robert B. Sinclair to NRMCM Orlando, Fla.

Hospital Corpsman Third Class Cynthia Moss to NRMCM Yokosuka, Japan.

Hospital Corpsman Third Class Lilith Aemon, released from active duty.

Lieutenant Victor V. Sharpe to NRMCM Naples, Italy.

Hospital Corpsman Second Class Terry L. Cummings, Aerospace Medical Institute, Pensacola, Fla.

Hospital Corpsman Third Class Tony Carroll, released from active duty.

Lieutenant Commander Mary L. Schramm, released from active duty.

Lieutenant Doug M. Kelling to NAS Fallon, Nev.

Hospital Corpsman Third Class Robert L. Preston, released from active duty.

Hospital Corpsman Third Class Joel Welter, Aerospace Medical Institute, Pensacola

Gunner's Mate First Class Reginald Day to Long Beach, Calif.

Hospital Corpsman Third Class Kenneth W. Ward, released from active duty.

Ensign Terry J. Buccambuso to Fallon, Nev.

Ensign John Wall to Washington, D. C.

Lieutenant Commander John M. Mateczun to 3rd Mar. Div., Okinawa.

Ensign Brian April to USUHS, Bethesda, Md.

Lieutenant Commander Benjamin A. Grey to NRMCM Guam.

Lieutenant Commander Essie Rucker to Holy Names College.

Lieutenant Commander Kathleen Bonnet-Langston to Holy Names College.

"Welcome aboard" to newly arrived

Rear Admiral Robert C. Elliott, Commanding Officer

Lieutenant Commander Elizabeth Donegan, MC, Pathology

Lieutenant Commander Michael Little, MC, Psychiatry

Lieutenant Owen Aurelio, MSC, ACDUTRA

Ensign Stanley Henjum, Clinical Clerk

Ensign Gail Sorokowski, Clinical Clerk

Commander Gary Shimer, MC, Pathology

Lieutenant Commander Walter Cygan, MSC, Optometry.

Lieutenant Kevin Shannon, MC, pediatrician, Treasure Island Branch Clinic.

Lieutenant Commander Kathleen Healy, MC, ENT resident.

Lieutenant Shayla Frisby, MC, ENT resident

Ensign Michael Leoni, Clinical Clerk.

Lieutenant Commander Kristine Batten, MC, Cardiology

Lieutenant Commander Vernon Goldsworthy, MC, Anesthesiology.

Hospitalman Germaine William, Nursing Service.

Ensign Nina Premo, Nursing Service

Hospital Apprentice Gladys Areizagal, Nursing Service.

Hospital Michael McConnell, Nursing Service.

Hospital Apprentice Terry M. Moore, Nursing Service.

Hospitalman Donald K. Rose, X-Ray

Hospital Corpsman Second Class Marsha Saylor, PMT School.

Hospital Corpsman First Class Rudy N. Delumpa, Operating Management

Hospital Apprentice William M. Hoffman, Operating Room.

Hospitalman Mark A. Schultz, Nursing Service.

Ship's Serviceman Second Class Kathryn A. Bradford, Special Services.

Hospital Corpsman First Class William E. Bradford, Operating Management.

Hospitalman Jan R. Trempler, Psychiatry

Hospitalman Corpsman Second Class Terrie A. Kane, Cardiology.

Lieutenant Commander Patricia James, Nursing Service.

Ensign Susan L. Martin, Nursing Service.

Hospital Corpsman Third Class David R. Daniel, Laboratory Service.

Lieutenant Melanie K. Kaubisch, Nursing Service.

Lieutenant Charles Wagner, Pediatrics.

Lieutenant Bruce A. Winter, Anesthesiology.

Hospital Corpsman Second Class Marcus A. Rodin, PMT School.

Hospital Apprentice Juan F. Calonge, Operating Room.

Commander Robert C. Krasner, Internal Medicine.

Lieutenant Commander W. H. Archambault, Staff Judge Advocate Office.

Lieutenant Nicamor Rodriguez, Internal Medicine

Hospital Corpsman Second Class Uranus-Sal Lizaro, PMT School.

Hospital Corpsman Third Class Charles Timpany, OR School.

Lieutenant Edward R. Zech, Surgery.

Hospital Corpsman Second Class Margie E. Gotts, PMT School.

Hospital Recruit Cullen Wagoner, Nursing Service.

Hospital Corpsman First Class Linda Chamberlain, Physical Therapy

Hospital Corpsman Second Class Gregory R. Jenks, PMT School.

(Continued to Page 7)

Gladys Mitchell retires today

Gladys Mitchell retires today after 25 years of government service. More than 17 of those years have been spent here at Oak Knoll, and almost all of it in Central Appointments. She has also been the NRMCM Oakland representative for the Naval Employees Association during recent years.

Gladys, who is a Korean War widow, said "the people here at NRMCM are my family," adding that "I love my office and fellow workers and have second thoughts about leaving." After 25 years, however, she explained that she feels it is about time to make room for new people coming along. Plus she misses her daughter, a school teacher in Las Vegas, and will spend a lot of time visiting Nevada.

Gladys apparently doesn't plan to just sit around when she retires. Already she plans to travel, play bridge with friends and work for her church. There is also a good chance of volunteering here at the hospital in the OB/GYN clinic. "Of course," Gladys said, "I'll still be reading my Harlequin romance books."

Gladys Mitchell

Kudos

Navy Achievement Award
LCDR Mark Dawson, Staff Judge Advocate.

Civilian Special Achievement Awards
Ben Nelson, Public Works.
Wendy Gross, Legal Office.

Antarctic Service Medal
HM2 Perry Wein, Laboratory Service.

Letters of Commendation
CAPT Warren Hodge, MC
CDR James Schneider, MC.
PR3 Davy Carey, from CO, USS PELEIU (LHA-5).
CDR David Figgins, NC.

Kathleen M. McVicker, Clinical Investigation Center.
Diane C. Smith, Nursing Service.

Good Conduct Award
HM3 Daniel Dees, Laboratory Service.

Expression of Appreciation
LT Betsy McKinnon, NC.

NEW NEA REP—Anita Smith, receptionist in the Surgery Clinic and an employee at Oak Knoll for more than three years, has been appointed as the medical center's liaison representative for the Navy Employees' Association headquartered at NAS Alameda. Anita replaces Gladys Mitchell, who is retiring. Although the annual membership drive has ended, NRMCM civilian employees may still join the association. For further information, call the new NEA representative at Ext. 2105.

TESTING—HM2 Tom Bowman of the Primary Care Clinic takes a tuberculosis skin test from HN Patrick Kearney of 8 West. The tuberculosis screening, mandatory for all military staff, was conducted July 19-21.

MED • SCAN

A quick look _____
at recent health care _____
developments _____

Allergic reactions to penicillin tend to fade over a period of time—or may have been mistakenly diagnosed to begin with and the individual never did have an allergic reaction. In a major study at the Mayo Clinic and reported in *Medical World News* most patients who had been reported to be allergic to penicillin in the past currently had negative skin reactions and were able to take the drug with no adverse reactions. The journal also reports that a new semi-synthetic penicillin which was approved by the Food and Drug Administration only recently is a real "pip," piperacillin, that is. Marketed under the trade name of Pipracil, the new drug has been described as the "broadest spectrum (range of anti-bacterial action) penicillin drug that's ever been released in this country."

...

Toxic shock syndrome is not an illness confined solely to menstruating women but is, says a report in the *Journal of the American Medical Association (JAMA)*, a new disease associated with wound infections. The Center for Disease Control studied the case reports of toxic shock syndrome from 45 states from Jan. 1, 1980 through July 31, 1981. They found 13 instances of the syndrome due to wound infections from a variety of common surgical procedures. In all but one case *staphylococcus aureus*, the same bacteria associated with toxic shock syndrome in menstruating women, was recovered from the surgical wounds. The patients exhibited the same symptoms as menstruating women: Fever, diarrhea and vomiting. The report makes the point that it is not known whether *staphylococcus aureus* was present in the patients before their operations or acquired after the surgery.

...

The exact cause of sudden infant death syndrome (SIDS) is not known. But clues are appearing. A study carried in the *Journal of the American Medical Association (JAMA)*, confirms earlier suspicions that the risk of SIDS and the age of the mother are related. The study examined 431 cases of sudden infant death and found that the younger the mother the more the risk of SIDS. The preliminary conclusion would seem to point to nutrition as one possible cause of the problem. Nutritional requirements for growth during adolescence are great. But when these increased nutritional requirements are coupled with the additional nutritional demands of pregnancy, the possibilities of problems for the newborn are very real. Interestingly, the study also confirmed that the first-born of a woman has less risk of SIDS than his or her siblings.

Destroyer completes emergency MEDEVAC

A sailor with possible appendicitis was evacuated from the frigate USS BOWEN (FF 1079) and transferred to a Medical Center for prompt treatment recently, thanks to the combined efforts of USS JOHN RODGERS (DD 983) and Helicopter Antisubmarine Squadron 36, Detachment Six.

While transiting the Central Mediterranean the evening of July 12, RODGERS' Commanding Officer received a request from BOWEN to provide assistance for the ill crewman. RODGERS embarked the LAMPS helicopter detachment from USS JOHN HANCOCK (DD 981) shortly after midnight and closed BOWEN's reported position at high speed. Early the next morning, when the ships had

closed to 20 miles, the SH-2 "Sea Sprite" flew to BOWEN, embarking the patient and an emergency leave passenger.

After retrieving the helicopter, RODGERS sped toward Sigonella, Sicily, where the crewman would be transported to Naples' U.S. Naval Regional Medical Center. The LAMPS was launched well off the Italian coast, and pilots LCDR James Radney and LTJG Jeff Greer flew more than 70 miles to the Naval Air Station at Sigonella.

JOHN RODGERS is returning from its third overseas deployment. The destroyer is commanded by CAPT G.F.A. Wagner and homeported in Charleston, S.C.

For some conditions

CHAMPUS may share plasmapheresis expense

CHAMPUS will now share the cost of "Plasmapheresis"—or, the removal, processing and return of blood to the body in certain life-threatening situations.

To qualify as a CHAMPUS benefit, the blood processing should be used only after conventional forms of treatment have been tried and proven ineffective when the patient's life is endangered by certain specific medical conditions. The conditions include: a progressive weakening and paralysis of the muscles (especially facial muscles) called myasthenia gravis; thickening of the blood associated with the growth of certain tumors; and certain kidney inflammations.

Plasmapheresis has been under investigation regarding its effectiveness in treating various diseases, and therefore hasn't up to now been included in CHAMPUS benefits. Results of the studies have been encouraging, and its usefulness in treating some ailments has been documented. However, its effectiveness still remains to be proven for other diseases; until more conclusive information is gathered CHAMPUS can only share the procedure's cost as a last resort treatment of certain conditions.

CHAMPUS may cost-share on those blood-processing procedures which were performed on or after Aug. 1, 1981, for specified medical conditions.

New studies underway on pulmonary hypertension

The University of California, San Francisco is one of 35 medical centers participating in a new nationwide study directed at finding clues to the cause and possible treatment of primary pulmonary hypertension—a rare disease that kills 70 percent of its victims within two years of diagnosis.

Although primary pulmonary hypertension strikes people of all ages, the majority of victims are young women between the ages of 20 and 30, according to Bruce H. Brundage, UCSF professor of medicine and radiology.

As part of the study, the National Heart, Lung and Blood Institute has established a patient registry to obtain and evaluate data on the disease. UCSF and other participating medical centers hope to enroll a minimum of 150 patients a year for the three-year research period.

In addition to UCSF, institutions in the Western U. S. taking part include UC-San Diego, Cedars-Sinai Medical Center, Los Angeles, and the Universities of Oregon and Washington.

Primary pulmonary hypertension results when the arteries within the lungs become closed or obstructed. Unlike other hypertension disorders, the disease's cause, natural course and most effective treatment remain unknown.

Because the condition is relatively rare, clinicians have been unable to accumulate data on a significant number of patients and very few of the disease's distinguishing characteristics have been clarified, said Brundage, who directs the UCSF Adult Cardiac Catheterization Laboratories and is an investigator in the Cardiovascular Research Institute.

The purpose of the patient registry is to obtain and analyze data on the etiology, natural history, pathogenesis, diagnosis and treatment of the disease, with the hope of developing new and

effective strategies for early diagnosis and treatment, said Brundage, who is the principal investigator in UCSF effort.

Physicians in the area are being asked to refer patients with the disease to UCSF or one of the other participating institutions. Information will be recorded on a standardized patient reporting form and forwarded to a data and coordinating center. Eligible patients include children older than one year and adults who have pulmonary hypertension of unknown etiology.

Although it is known that primary pulmonary hypertension results from closure or blockage of arteries within the lungs, the factor or factors responsible have not been described.

Normally, the blood that has coursed through the body returns to the right side of the heart. The right ventricle then pumps the "used" blood through the lungs where carbon dioxide is given off and oxygen is absorbed. The blood is then routed to the left side of the heart, from which it is again circulated.

When the arteries in the lungs become occluded, however, the circulation from the right ventricle becomes impaired. The increased resistance within the arteries requires high pressure in the right ventricle and the pulmonary arterial system to maintain blood flow; thus the name pulmonary hypertension. Some lung conditions, such as emphysema or fibrosis, can cause such circulatory resistance. However, when no such conditions or heart disorders exist, the pulmonary hypertension is the primary or only disease.

For additional information or for patient referral, physicians may contact: Bruce H. Brundage, M. D., University of California, San Francisco, 118 Moffitt Hospital, San Francisco, CA 94143. Phone: (415) 666-1326.

Cocaine imitations 'deadly'

The Food and Drug Administration (FDA) said July 8 that "novelty cocaine substitutes" sold under various names "can be as deadly as the high-priced original," and cited several deaths reported from injecting or sniffing the substances.

The substitutes, many of which are sold as a white powder, "can collapse blood vessels, depress heart muscle strength and cause low blood pressure," according to the FDA. The warning was contained in a request to

manufacturers of the ingredients to tighten distribution standards or face "further regulatory control."

Many of the imitations contain local anesthetics, such as lidocaine, procaine and tetracaine. FDA Commissioner Arthur Hull Hayes Jr. said his agency "asking all manufacturers and distributors to help stop this diversion of these relatives of cocaine." He termed the misuse of the substitutes "a new emerging public health problem with deadly consequences."

SGLI premiums reduced

More than three million persons will share a \$42 million reduction in premium costs of Servicemen's Group Life Insurance (SGLI), according to a June 30 announcement by administrator of Veterans Affairs Robert P. Nimmo. The reductions become effective July 1.

The new monthly premium for maximum coverage of \$35,000 is \$4.06, compared to the previous rate of \$5.25. The decrease will result in over-savings exceeding \$30 million per year for active duty military personnel and approximately \$12 million per year for ready reservists with full-time coverage.

SGLI began in 1965 with coverage limited to \$10,000. Maximum coverage was subsequently increased by Congress on three occasions, most recently on Dec. 1, 1981, to its current limit.

The program is funded by servicemembers' premium payments. The premium reduction is the result of the program's increased investment income and continuing favorable mortality experience. There is no change in the premium rate for retired reservists and ready reservists with part-time coverage.

Reduced rates possible for tours, cruises, airfare

Special reduced rate tours, cruises and airfares are being offered to military and DoD civilian employee community to such far-off places as the Caribbean, Europe, the Far East and Hawaii.

A new program featuring the Hawaiian Hilton Village is being offered for a seven-night stay. The price is \$25 per person double occupancy and it includes such extras as a flower lei, tours, baggage handling and breakfast briefings.

Four packages of 7, 9, 13 nights or

longer operate all year long to the Hale Koa Hotel, the military hotel on Waikiki. Reservations for holiday seasons and winter time should be made well in advance.

Armed Services Tour and Travel Services of Honolulu may be reached by writing or calling 1860 Ala Moana Blvd., Suite 405, Honolulu, Hawaii 96815—Tel. (808) 946-4802 or the firm's other office in Arlington, Va., by calling (703) 525-9898, or writing P. O. Box 1326, Arlington 22210.

Time for fun trip to Elizabethan era

Once again, beginning tomorrow, for six weekends and Labor Day, the Renaissance Pleasure Faire will be held at the Blackpoint Forest near Novato in Marin County (across the Golden Gate Bridge). To get there, take Highway 101 to Highway 37 and off at the Blackpoint Exit.

The theme of this colorful event is the recreation of the Elizabethan Era, during jousting tournaments, games,

crafts and wares of the age, and periodic appearances by "Queen Elizabeth" and all the members of her court. Renaissance music is played and foods and drinks of the period are for sale, as are products of many fine artisans.

The best way to enjoy this faire is to come in costume and participate actively in the games, festivities and feasting. Turn yourself into a Robin Hood or one of his Merry Men. Be a friar or a lady-in-waiting, or come as a jestor or wench.

Price for the tickets, which are obtainable at the Faire, are \$9.50 for adults and \$3.75 for children, 2-12 years old.

The following new additions to the military medical "family" have arrived at Naval Regional Medical Center Oakland:

—A baby boy to Lieutenant John G. Mer, Medical Service, and his wife Barbara, July 15.

—A baby girl to Hospital Corpsman and Class David L. Frink, NAS Moffett Field Branch Clinic and his wife Candace, July 17.

—A baby boy to Hospital Corpsman and Class Patricia Anne (Hughes), NAS Branch Clinic Mare Island, Surgery Service, and her husband Harold, July 17.

—A baby boy to Lieutenant Commander Basil L. Pugh, Surgery Service, and his wife Kimberly, July 18.

—A baby girl to Lieutenant Michael Mer Ambrose, Intern, and his wife Anne, July 20.

—A baby boy to Hospital Corpsman and Class Debra Lin Blampye, Hyperion Clinic, and her husband, July 22.

Births and Deaths—

(Continued from Page 5)

—NRMCO Oakland also extends a warmly welcome to:

—Captain John Hansen, Staff Medical Officer, Military Sealift Command, NAS Alameda, and

—Commander Stanley Husted, Medical Service Corps, OIC, Disease Prevention and Ecology Control Center, NAS Alameda.

Military discount offered by Amtrak

Military personnel presenting valid active duty (green) cards at any of the Amtrak ticket offices, or at one of their appointed travel agencies, receive 25 percent off the price of regular coach fare. If their families accompany them, there is a special plan offered.

When leave time rolls around and a visit home or a weekend "getaway" is top priority, you might want to try this type of transportation. Train travel has many advantages over driving. You can relax in a reclining chair and enjoy the scenery. Without stopping, you can take a walk, have something to eat or drink, socialize with other passengers, or just read a good book.

Amtrak trains travel into the heart of the cities, convenient to cabs or other transportation. From Oakland there is connecting service to San Francisco,

San Jose, Los Angeles, San Diego, across the nation, even Montreal.

'Big Top' headed Oakland way

Ringling Brothers Circus is coming to the Oakland Coliseum for a seven-day run beginning Aug. 24.

Special Services will have special discount seats for most performances. Seats normally costing \$8 will be discounted to \$6.50.

Days and performances covered for NRMCO Oakland are: Aug. 24, 7:30 p.m.; Aug. 25-26, 8 p.m.; Aug. 27, 2:30 p.m.; Aug. 28, 11 a.m. and 3:30 p.m., and Aug. 30-31, 8 p.m.

If interested, see Sally in Special Services.

Changes in CREO announced

WASHINGTON (NES)...As the Navy grows, people must be channeled into the ratings that need them the most. This requires close management of the two methods of striker designation and training—the "A" school plan and on-the-job training.

The Navy's Career Re-enlistment Objectives program—CREO—is described in OPNAVINST 1133.3B; this new instruction lists some major changes in administering OJT programs for strikers.

40 percent of all E-3s achieve striker designation via OJT

Of the 99,000 E-3s in the Navy, 39,000 will be eligible for striker designation this year using the OJT route. Ensuring that these candidates enter the best rating—both for them and the Navy—is the combined responsibility of the individual, the Professional Development/Striker Board, the commanding officer and, in some cases, Naval Military Personnel Command. NMPC's involvement is determined by rating entry requirements; whether it is an *open*, *closed* or *controlled* rating.

An *open* rating is available for all E-1 to E-3 people via OJT. Commanding officers may approve designation to these ratings through participation in the Navywide exam.

A *closed* rating means entry is not available for E-1s to E-3s using OJT because of an overmanning in that rating. Striker designation is only accomplished by attending "A" school.

A *controlled* rating means rating entry for E-1s to E-3s must be approved by NMPC and the applicant must participate in the Navywide exam.

New CREO assignments mean fewer open, more controlled ratings

The new CREO instruction increases the number of *controlled* ratings. The goal is to solve both short-term and long-term manning or skill imbalance in the force. The following is a summary of the rating categories affected:

	Men		Women	
	Old	New	Old	New
Open ratings	58	23	20	24
Closed ratings	4	2	21	13
Controlled ratings	6	32	22	24
"A" school	27	27	22	22

For men, the major changes have been a decrease in *open* ratings and an increase in *controlled* ratings. For women, there are fewer *closed* ratings and more *open*. There has been no change to ratings with "A" school only entry.

The major change: more quota controlled ratings.

Open ratings are designed to attract a large number of strikers by making entry as simple as possible. Commanding officers screen candidates and authorize striker designation. *Closed* ratings cannot be entered, and requests for entry should not be submitted.

For *controlled* ratings, quotas have been established to ensure balanced manning in those ratings. Commanding officers screen candidates and submit a quota request via Enlisted Personnel Action Request (NAVPERS 1306/7) to NMPC-483. A selection board then considers all requests and approves those who best qualify.

Deadlines for submission of quota requests are Jan. 15 for the March exam cycle and July 15 for the September exam cycle. Navy people are encouraged to get requests in early to permit possible alternate rating selection if a quota is not granted. The NMPC selection board considers the commanding officer's endorsement to the NAVPERS 1306/7, the Navy's overall manning requirements and specific manning shortages within the member's unit in making quota decisions.

Contact command or unit career counselors for further details on how these new regulations affect you.

Veterans council guests

Oak Knoll patients, staff treated royally at Salinas

By Sally Young

Fifty-seven NRMOC Oakland active duty military patients and staff attended the recent annual Salinas Rodeo as guests of the Associated Veterans Council of Salinas, Calif.

The invitation included a delicious chicken luncheon at the Salinas Elks Lodge followed by an exciting rodeo and then an excellent ham steak dinner at American Legion Post No. 31. As if that wasn't enough, when NRMOC people boarded the bus and vans for the return trip, home-baked pies and cakes were under each seat.

HM3 Shawn Mason of Pharmacy reported, "The food was excellent... chicken and all kinds of salads and ice cream for lunch; ham steaks and vegetables and deserts for dinner. It was my first time to go on this outing and it was really worthwhile. If they have it again, I plan to try to make it

each year as long as I am at NRMOC."

Other comments were:

HM1 Chuck Pearce: "The hospitality of the Elks Lodge was fantastic. The rodeo was enjoyable. The people made us welcome."

HA Michael Peters: "Elks Club was great in their hospitality."

Others said, "Had an excellent time." "It was quite a ride!" "Food was good for sure;" "The people were very cordial;" "The American Legion Post dinner was just great." Participants' feelings were well summed up by Lt. Galer of Pharmacy. "The townspeople were very friendly and shook our hands. They made us proud once again to be men in uniform."

Thank you, citizens of Salinas, and especially Mr. Thomas E. Pickinpaugh, President of the Associated Veteran's Council, for thinking of us.

MAKING IT OFFICIAL—Rear Admiral Walter M. Lonergan (center) "referee" as a reluctant Commander Frank Fisher, representing the Medical Service Corps, hands the perpetual trophy to Command Master Chief Charles Dack, a man following the chief petty officers' victory in the standing softball rivalry between the MSCs and the CPOs. This is the first time in eight years that the chiefs have won.

Admiral's Cup

CPOs dunk MSCs after years of defeat

The CPO team has recaptured the Admiral's Cup after eight years of MSC victories in slowpitch softball.

In the three-game series the chiefs were skinned by their opponents 9-8. Then in the first game of the July 23 double-header, Coach Bob Owens' MSC team won 4 to 1 behind the superb pitching of Dick Newell and the

booming bats of Pat Shannon and Barney Rabold. The deciding third game was won by the CPOs 9-7 and Mike Larkin displayed his awesome power by crushing a home run deep into right centerfield.

The game also highlighted some outstanding fielding and base running by Hal White and Andy Latigue.

'Tramps' tromp champs in playoff

Although the Special Services team finished in sixth place with an 8-4 record in regular season softball play, Coach Reggie Day led the same team to win 12-8 over the league champion Anesthesiology team in a playoff on July 26.

The playoffs were kind of a disaster for Anesthesiology, who, although ending the season in first place with a 10-1 record, were defeated by MSC 27-3 as well as Special Services, giving the champs an overall position of second place for 1982.

Coach Day attributes the success of the Special Services "Tramps" to the following players: Mark Ford, Elwood Denicola (who homered in the championship game), Eason Anderson, C. J. Anderson, Phil Herman, Jim Nadeau, Thaddeus Johnson, David Dominique, Thomas Ramirez, Mike Maloney, Bruce

Burch, Chris Enriquez, Gus Bohorquez and Jake Wiggs.

Complete playoff results:

Anesthesiology 14—Med Repair Pharmacy 12; MSC-13—Lab 4; Special Services 20—PMT School 17; General Medicine 10—Ortho 5; MSC 27—Anesthesiology 3; Special Services 10—General Medicine 9; Special Services 6—MSC 5; Special Services 12—Anesthesiology 8.

Brazil hosts Judo 'military olympics'

The World Military Judo Championships of Conseil International du Sport Militaire (CISM), will be held in Sao Paulo, Brazil, Aug. 21-30. The U.S. Military team will be a composite of top Army, Navy, Air Force and Marine Corps Judo competitors selected during a two-week training camp hosted by the U.S. Navy at Port Hueneme, Calif., Aug. 8-20.

CISM games are held annually with different competitions featured at various times of the year and hosted by different member nations. CISM events include all the sports found in the Olympic Games, plus those more directly associated with the military such as orienteering, sharpshooting and the combat arts, including judo.

The aim of CISM is to encourage participation in military sports and to develop friendly relations between the armed forces of the participating nations.

Classifieds

FOR SALE

Queen-size mattress and box springs, \$175; 8 ft. wicker couch, glass top coffee table and end table, \$285 for set; Dinette, 4 chairs, \$90. Call LCDR Kelly, Ext. 2075, or CDR Imes, Ext. 2065.

Bathtub Regatta slated Aug. 21

A fiberglass flotilla will brave the waves on Saturday, Aug. 21, at San Leandro Bay Regional Shoreline in Oakland for the 9th Annual Bathtub Regatta, sponsored by San Francisco radio station KNBR.

Save dollars on visit to 'Great America'

Naval Regional Medical Center Oakland personnel can now purchase three Great America Good Any Day tickets and receive one free. This exceptional offer is valid through Sept. 6. With the purchase of three tickets for only \$11 each at Special Services, purchasers will receive a coupon that will admit a fourth person free when accompanied by three paid ticket holders.

As admission price at the Santa Clara park is normally \$13.95 each, this purchase through Special Services would save a party of four nearly \$23.

New shows for '82 include the "Evolution of Rock," spanning three decades of rock-and-roll, "It's A Magic World," featuring displays of illusion and prestidigitation, and "Hail Columbia!", a salute to the Columbia space shuttle. And—kids are kings in the all new Kid Kingdom, a theme park within a theme park.

'Red eye' to Tahoe planned Aug. 14

A "red eye" special to South Lake Tahoe in mid-August is being sponsored by the Chief Petty Officers/Enlisted club on base.

All active duty, retired, dependents and civilian employees are invited to join in on a first-come, first-served basis. "This is open to the first 43 people with money in hand," said Jim Rosen, club manager, who also added that cancellations will not be refunded.

An air-conditioned chartered bus will leave at 9 a.m. on Aug. 14 from the parking lot across from the Porthole near the Mountain Boulevard gate, and return on Aug. 15 about 12:30 a.m. Tour cost is \$15, all of which will be refunded in cash, food and drink at the casino upon arrival. (The bus will stop at both Harrah's and Harvey's.)

This will be a party bus and reportedly carry a nice mix of people.

For more information see Jim at the club and, good luck!

Opening ceremonies will be at noon, and the competition will last until about 5 p.m. Races will be run in the Airport Channel section of San Leandro Bay. A reviewing stand will be located in the picnic area off Doolittle Drive north of Swan Way, also the best vantage point for the public.

Tubs are entered in two categories for the event: funny tub and regulation tub. Specifications are strict for the regulation tub, and anything goes for the funny tub. However all entries must incorporate a porcelain, fiberglass or metal bathtub in the design. Entries closed Aug. 2.

Proceeds from sale of food and drink at the regatta will benefit Children's Hospital Medical Center of Northern California.

San Leandro Bay Regional Shoreline can be reached from Highway 17 by driving west on Hegenberger Road, then north on Doolittle Drive toward Alameda.

AC Transit will offer shuttle bus service to the event from the Oakland Coliseum BART Station. Vehicle parking will be available at an Oakland Airport lot across Doolittle Drive from the Regional Shoreline.

(The East Bay Log, August 1982).

Entries invited for photo contest

The Navy Photography Contest will be held at NAS Alameda, Calif., Nov. 8-12. This contest is a prelude to the 19th Interservice Photography Contest slated for Scott Air Force Base, Illinois during the week of Dec. 13-17.

The Interservice Photography Contest has a perpetual trophy which is awarded to the service receiving the highest number of points for winning photographs.

First place winner, in all categories, will be given a U.S. Savings Bond in the amount of \$100, and \$75 and \$25 bonds will go to second and third places, respectively.

All personnel submitting entries to the Navy Competition must have entry form (DD 1533) and a model release, if applicable. All entries submitted for final competition are to be received by NAS Alameda before Nov. 5. Send all entries to the Recreation Service, Naval Air Station, Alameda, Calif., 94501.

For further information, call the local Special Services office at Ext. 2479.

THE OAK LEAF

44, No. 16

Naval Regional Medical Center, Oakland, California

Friday, August 20, 1982

our at Oak Knoll

Leoni family well-represented in Navy medicine

THERS LEONI—(Left to right) Peter, James, Patrick and Michael—all on their way to becoming full-fledged Navy physicians, and all presently assigned to Naval Regional Medical Center Oakland.

Through simple coincidence and individual Navy orders, four brothers recently found each other simultaneously assigned to Naval Regional Medical Center, Oakland, Calif.

Navy physician Lieutenant Patrick Leoni, 34, who began a surgical internship on July 1, was soon joined by Ensigns Michael, 32, James, 27, and Peter, 26, all serving clinical clerkships as part of the Navy physician scholarship program.

Michael (who will choose a specialty of medicine or surgery), James (interested in obstetrics and gynecology) and Peter (to specialize in internal medicine) will resume studies at Creighton University School of Medicine, Omaha, Neb., in the fall, while Patrick completes his internship at the Oakland hospital.

The brothers, sons of Dr. Angelo Joseph Leoni and his wife Tressa Patricia, are only four of a family of 10 children. Two of the Navy medics' sisters—Angela, 29, and Mary Patricia, 24, are both civilian nurses—Angela employed at the University of California, San Francisco Moffitt Hospital, and Mary at Marin General Hospital. Two other siblings are attorneys, while the remaining two still live at home.

Dr. Angelo Leoni, a native of the East San Francisco Bay community of San Pablo, maintains a general civilian practice in the northern California town of Petaluma. He served as an Army physician from 1943 to 1948.

When his sons were asked why they selected the Navy over the Army, they unanimously agreed with Michael who said, "it's a romance with the sea."

Bethesda command to be reorganized

The Navy's Bureau of Medicine and Surgery has announced plans to revise the command structure of National Naval Medical Center, Bethesda, Md., effective Sept. 1.

The purpose of the reorganization is to separate the command and management functions of the naval hospital at Bethesda from the broader responsibilities of the commander of the National Naval Medical Center. The National Naval Medical Center, Bethesda will continue to have a commander of flag rank who will be supported by a chief of staff and directors of logistics, resource management, operational planning, and consolidated civilian personnel.

Command and management at the hospital at Bethesda will be the responsibility of its commanding

officer. He will be supported by an executive officer, an administrative officer, and management leaders of five major departments—hospital administration, nursing, medical specialties, surgical specialties, and ancillary services. The Commanding Officer, Naval Hospital, Bethesda will report to the Commander of the National Naval Medical Center, as will the commanding officers of the other components of the region: Naval Hospital, Patuxent River; Naval Regional Medical Clinic, Annapolis; Naval Regional Medical Clinic, Quantico. Thirteen tenant commands at Bethesda will receive host support from the Center's commander.

The reorganization will provide the management structure to ensure that regional problems and tasks such as

resource planning and utilization, records, and documentation are pursued in a timely manner, and will allow hospital operations to be focused fully on patient care.

The plan creates clear lines of authority and accountability that will improve quality assurance, organizational efficiency, and overall responsiveness to the needs of both the patient population and the Navy/Marine Corps command structure.

QA in spotlight at this hospital

Clinical and administrative services involved in patient care here have been directed by the command to be thoroughly familiar with standards (particularly those on quality assurance) contained in the Joint Commission on Accreditation of Hospitals Manual, in preparation for an anticipated early December survey.

According to Captain H. James T. Director of Clinical Services, a permanent Quality Assurance (QA) office will be immediately established at North with Captain William serving as QA Coordinator. Personnel involved include Commander Dault, Commander Joan Tulich, Lieutenant Larry Kilgore, Ensign Mark and the Audit and Utilization Managers, Lily Thompson and Terry.

A Coordinator will be assigned in clinical service, a training program

initiated, and committees brought on line. A fully-organized QA plan for the hospital will be in effect almost at once, Captain Sears said.

Captain Theresa Proto of the Standards Development Branch, and Commander Paul Daniel, Director of the QA Division, both of the Navy Bureau of Medicine and Surgery, visited Oakland Aug. 4-6 to critique existing documentation and offer guidance on standards.

JCAH is the official accrediting body for some 5,000 civilian and military hospitals throughout the United States.

'Command Line'

New communications feature in Oak Leaf

A new column, "Command Line," will become a regular feature of *Oak Leaf* as soon as questions, problems or suggestions to improve our operations have been submitted by military and/or civilian personnel of this command.

As the days go by, I hope to meet everyone. In the meantime, please use this new feature to voice any concerns you may have and to improve communication among all of the staff.

Depending upon the number of questions or complaints received, we may want to refine the method of submission to include a special hot line where your input may be recorded. In the interim, I have directed my Public Affairs Officer to receive your written concerns in any legible form (with the sender's name and work area identified, or anonymously, if preferred). All inquiries will be personally reviewed by me or my executive staff and investigative action initiated without delay where indicated. As appropriate, "Command Line" questions and answers will be published in *Oak Leaf*; in other instances, the writer will receive a reply directly from me. Truly "crank" calls or notes, of course, will go unanswered.

I am particularly soliciting questions on matters impacting upon medical center operations as a whole, recommendations, reports of incidents of abuse or fraud, or items of concern to large numbers of the civilian or military staff. Please also report positive information of interest to all of us.

Let me hear from you soon.

R. C. Elliott
Rear Admiral, Medical Corps, U. S. Navy
Commanding Officer

In The Political Process

Where Your Rights Begin and End

As a patriotic American who wants to keep the country strong and help the economy improve, you have some firm ideas of the people you would like to see elected in November, right?

Before you leap into battle in support of your favorite candidate, political party or partisan issue, be sure you're familiar with what the law permits you—as a military person or an employee of the federal government—to do and what it prohibits you from doing in the political process.

Because you're a servicemember or federal employee, a series of U.S. laws and regulations puts limits on your participation in party politics. In addition to the restrictions on partisan political activity in the Hatch Act and similar federal laws, active duty servicemembers are subject to Department of Defense Directive 1344.10, while civilian employees are subject to regulations of the Office of Personnel Management.

None of these keep you from exercising your right to register and to vote. In fact, servicemembers and federal employees are encouraged to register and vote in every election.

Still, there are limits. Here are the Do's and Don'ts for military and civilian personnel.

Military

A servicemember may:

- Express a personal opinion on political candidates and issues but not as a representative of the military.
- Promote and encourage military people to vote.
- Join a political club and attend meetings when not in uniform.
- Sign a petition as long as he or she signs as a private citizen, not as a representative of the armed forces.

- Serve as an election official as long as such service is not as a representative of a particular political party, does not interfere with military duties, is not done in uniform and has the approval of the service secretary concerned or his designee.
- Contribute to a political party or political committee, subject to the limits imposed by federal law.
- Display a political sticker on a private car. (Large signs, banners or posters on the top or side of a car are prohibited.)

A servicemember may not:

- Use official authority or influence to interfere with or affect an election, seek votes for a particular candidate or issue, or require or seek political contributions from others.
- Participate in partisan political management, campaigns, conventions or make public speeches in support of a partisan political campaign or issue.
- Make a campaign contribution to another member of the armed forces or to an employee of the federal government for the purpose of promoting any political objective or cause.
- Be a partisan candidate for civil office (except as specifically provided for in Section IV, DoD Directive 1344.10), or engage in public or organized solicitation of others to become partisan candidates for public office.
- Solicit or otherwise engage in fund raising activities in federal offices or facilities including military reservations, or sell tickets for or actively promote political dinners and other fund raising events for a partisan political cause or candidate.
- Take an active part in managing a partisan political campaign of a candidate for public office;

attend, as an official representative of the armed forces, partisan political events even though he or she does not actively participate; or serve as an officer of a political party.

- Drive voters to the polls on behalf of a political party or candidate in a political election.
- Wear a uniform when campaigning or use any government property in a campaign.

The preceding rules apply to active duty servicemembers whether on duty or on leave.

But these rules do not apply to members of the National Guard and Reserves on active duty for training who are serving for a period less than 30 days. While on such duty, however, members of the National Guard and Reserves are expected to:

- Give full time and attention to the performance of military duties during the prescribed duty hours.
- Avoid any outside activities that would be prejudicial to the performance of military duties or inconsistent with the accepted traditions of the armed forces.
- Refrain from participating in any political activity while in military uniform, or using government facilities in furtherance of political activities.

Guardsmen and reservists not on active duty for training—and who are not federal employees in civilian life—are not subject to the above restrictions, except during drill periods.

Civilian

A federal employee may:

- Display political stickers on his or her car.
- Make voluntary campaign contributions to a political party or organization but not to an individual partisan candidate, i.e., contributions may be made to an individual's election committee but not to the individual directly.

• Express an opinion as an individual, privately and publicly, on political candidates or issues—so long as he or she doesn't take an active part in partisan politics.

- Serve as an election clerk or judge, or in a similar position and perform non-partisan duties prescribed by state or local law.
- Be a member of a political party or other political organization, attend meetings and vote on issues.
- Take part actively as a candidate or in support of a candidate in a non-partisan political election.
- Sign a petition as an individual.
- Attend a political convention, rally, fund raising function or other political gathering.
- Be politically active in connection with an issue not specifically identified with a political party such as a constitutional amendment, referendum or approval of a municipal ordinance.
- Participate in the non-partisan activities of a civic, community, social, labor, professional or similar organization.

A federal employee may not:

- Serve as a political party officer, member of a national, state or local political committee, an officer or member of a committee of a partisan political organization, or be a candidate for any of these positions.
- Organize or reorganize a political party, organization or club.
- Directly or indirectly seek, receive, collect, handle, disburse or account for assessments, contributions or other funds for partisan political use.
- Ask for political contributions from other government employees or request or receive political contributions in buildings where federal employees work.
- Sell tickets or actively promote activities such as

political dinners of a candidate in a partisan election or of a political party or political club.

- Work at the polls for a partisan candidate or political party.
- Help manage the campaign of a candidate in a partisan election for public office or political party office.
- Be a delegate, alternate or proxy to a political party convention.
- Address a convention, rally, caucus or similar political party meeting in support of or opposed to a candidate for public office or political party office, or on a partisan political question.
- Drive voters to the polls for a political party or for a candidate in a partisan election.
- Start or circulate party nominating petitions.
- Endorse or oppose a candidate in a partisan election through a political advertisement, broadcast campaign literature or similar material; become a candidate for or campaign for an elective public office in a partisan election except as specifically provided for in the code of federal regulations.

Although the laws, DoD directive and federal regulations seem strict, they are not meant to take away your right to get involved in politics. They are meant to protect military personnel and federal employees from political pressures and to do away with partisan politics at the workplace.

If you have any doubts as to what's allowed and what isn't, check with your commander, personnel officer or legal officer before getting involved.

A violation of the Hatch Act, DoD Directive 1344.10 or related federal regulations can lead to a fine, imprisonment and discharge from the service or the federal government.

Search on for NRMCO slogan

An all-hands search is now underway for an original slogan to best identify the mission of Naval Regional Medical Center, Oakland. All personnel, military and civilian—are encouraged to submit suggestions without delay.

Since one of this medical region's primary concerns these days is service to the operational Navy, the slogan might reflect this thought. Examples could be:

"Keeping The Crew Well And Able."
"Serving The Fleet With Wellness."

"Our Best Rx Is A Healthy Navy."
"We Care For Those Who Care For The Nation."

Entries should be submitted in writing (legibly handwritten or typed) to the Public Affairs/Oak Leaf Office not later than Sept. 30. Include your name, service, and an extension where you may be reached.

A selection committee will meet soon thereafter and the winning slogan announced in early October.

Special orientation slated for new command spouses

A special orientation for wives of new command spouses of other new command spouses to the command will be held at the main hospital building on Oak Knoll at 9:30 a.m. on Wednesday, Aug. 25.

Visitors are requested to assemble in the Clinical Assembly on the third floor of the hospital at 9:30 a.m. to hear opening remarks from Rear Admiral Robert C. Elliott, NRMCO Oakland Commanding Officer, and view a slide presentation explaining the mission and

facilities of the medical region.

A short, guided walking tour of the hospital will follow, then visitors will be transported by Special Services van from the front of the hospital to the Quarters E residence of Captain and Mrs. H. James T. Sears, where a reception will be held.

Those newcomers planning to attend the orientation program are requested to call Mrs. Deena Koenig, 531-5540, by Monday, Aug. 23.

services

Worldwide survey due on drug, alcohol abuse

The Department of Defense announced on July 30 that it will conduct a worldwide survey of drug and alcohol abuse to be administered to approximately 26,000 military members at 60 locations. The survey is scheduled to be conducted from September through November of this year. The objective of the survey, according to Dr. John H. Johns, Deputy Assistant Secretary of Defense for Drug and Alcohol Abuse Prevention, is to determine the extent of alcohol and drug use in the military services. In addition, the survey is expected to depict the mental effect of drug and alcohol abuse on physical and social well-being, as well as in the work environ-

ment. "This survey is one of our ways of ensuring that we define the true nature of the problem," Johns said.

Individual responses to the survey will be anonymous. The survey will be administered to randomly selected officer and enlisted members of each of the military services across four geographic regions—United States, Pacific, Europe and "other". The final structure of the survey and the data collection schedule are being developed. The announced survey will be similar to the one administered in 1980 which found that overall drug use had decreased since an earlier world-wide drug abuse survey conducted in 1974.

Captain Farrier to DC billet

Captain Paul H. Farrier will detach from this command on Aug. 31 to join staff at the Bureau of Medicine and Surgery. Dr. Farrier who held the position of Occupational Health Service Director here, has served more than 20 years in the service and holds the Navy Commendation Medal.

CAPT Farrier's prior assignments have been with the Bureau of Medicine and Surgery in Washington, D. C.; as Squadron Medical Officer for Submarine Squadron 14, Holy Loch, Scotland; with the Naval School of Diving Salvaging in Washington, D. C.; aboard the USS DANIEL BOONE (AN 629).

Capt. Farrier earned his M. D. from the University of Virginia and a master's in public health from University of Pittsburgh. He completed Navy Submarine Diving School and took his residency at Pittsburgh and NASA. He also served at the Industrial College of the Armed Forces.

CAPT Paul Farrier

CAPT Farrier will be replaced here at NRMCO Oakland by CAPT S. A. Powers, who has not yet reported.

Pay policy revised

A change in policy has been propagated to improve the accuracy of delivery and to improve the consistency of the Navy pay system. Beginning Sept. 1, Navy people will be paid the specific amount of pay based on their Leave and Earning Statements (LES), except in limited circumstances where local disbursing offices are authorized to override that rule.

Many improvements in military pay elements have been made over the two years to restore adequate pay reimbursements for travel. The one of these changes, the complex element criteria involved, and associated major increases in field load in implementing these entitlements have temporarily saturated the Pay System.

The new policy is effective for all documents submitted after Sept. 1 and will not affect LES "overrides"

Lemoore Hospital telephone changes

This headquarters has been notified of a recent change in telephone numbers for the Commanding Officer's Office at Naval Hospital, Lemoore.

New numbers are:
During Working Hours—Autovon 949-4201; Commercial (209) 998-4201

After Duty Hours—Autovon 949-4256; Commercial (209) 998-4256.

made prior to that date. Commanding Officers may waive the policy for certain categories of pay changes and to avoid financially burdening members with extreme personal hardships. Additional details may be found in NAVOP 080/82.

Janet Wilson new station director

Janet L. Wilson has arrived at Oak Knoll to become Station Director of the American Red Cross at Naval Regional Medical Center Oakland. Although Paul Anderson, ARC director at NAS Alameda, has been serving in the same capacity part-time at Oak Knoll since the transfer of Vivian Ollila, this will be the first time in nearly a year and a half that NRMCO has had a full-time director.

Ms. Wilson, who has been with the Red Cross more than 12 years, comes to Oakland from a position as the organization's Wrangler Division Representative in Great Falls, Mont. Her other assignments have been as a recreation specialist in Vietnam (1970-71), therapeutic occupational specialist at Valley Forge Army Hospital (1972-73), Naval Regional Medical Center, Portsmouth, Va. (1973-75), Tripler Army Medical Center, Hawaii (1975-79), and as Station Director for Silas B. Hayes Army Hospital at Ft. Ord, Calif.

"I've worked with various branches of the service in Vietnam; different military hospitals in CONUS and overseas, as well as with the civilian community," she said. "This wide range of experience will be most beneficial to me in my new assignment as Station Director. I'm committed to providing assistance to the patients and staff at NRMCO Oakland—to insure proper patient care and further the quality-of-life program for our men and women in

Janet L. Wilson

the Armed Forces. I'm looking forward to being part of the hospital team."

The daughter of Mr. and Mrs. H. M. Wilson of Riverside holds a bachelor of arts degree in social science and recreation from California State University, Long Beach.

She now makes her home in San Leandro and enjoys outside interests of camping and hiking, jogging, music and reading.

MC detailer to visit

Medical Corps Commander W. J. Matz, Jr., of Navy Military Personnel Command, will visit NRMCO Oakland Aug. 23-24.

The detailer will meet with all interns, senior medicine and pediatric residents and, time permitting, general medical officers, staff internists and pediatricians regarding future assignments.

A group meeting for interns and residents will be held at 8:30, Aug. 23, in Clinical Assembly. Individual appointments may be conducted thereafter. Scheduling should be done through Kris Clemens of Graduate Training, Ext. 2359/60.

Jumpers back Oct. 1

According to the Navy Uniform Board, the jumper-style uniform will be a bit earlier than originally scheduled. On Oct. 1, 1982, seven months ahead of the May 1, 1983 date currently listed, male E-5s and below must begin wearing the jumper-style uniform.

The date change was announced in NAVOP 57/82. The NAVOP also listed summer blue, winter blue, summer white and dungaree uniforms, as well as one blue and one white jumper-style uniform, as uniforms required in the seabags of E-5s and below.

The white hat is required with the jumper-style uniform and dungarees. The white hat or combination cap may be worn optionally with all other uniforms.

The jumper-style uniform remains optional for E-6 men but should become the mandatory uniform by Oct. 1, 1983.

Support for the jumper-style uniform in the monthly clothing monetary allowance began May 1, 1980. The allowance, currently paid to E-1 through E-5 men, pays the cost of the uniform in equal monthly amounts over a three-year period.

The changes announced by the NAVOP will be incorporated in the next regular change to U. S. Navy Uniform Regulations (NAVPERS 15665D).

Job openings

The Drug Screening Branch of Laboratory Service has an opening for a civilian Chemist, GS-9/11, to assist the present staff in performing lab testing in support of the Department of Defense Drug Abuse Prevention Program.

Applications will be accepted through Monday, Aug. 23, for this position. Call Christine Lessler, Civilian Personnel Service, for information on qualifications, etc.

A Clerk Typist, GS-4, is also needed by the Drug Screening Branch, and a Secretary (Typing), GS-5 by Civilian Personnel Service. Applications for both of these clerical positions will be accepted through Aug. 26. Call Maurine Tinsley, Ext. 2116, for details.

GUEST SPEAKER—Sergeant Fred G. Bowe, Public Affairs Coordinator, Golden Gate Division, California Highway Patrol, will address the Chief Petty Officers Association in a luncheon meeting at the Porthole on Sept. 2. Sgt. Bowe has been with the Highway Patrol for 11 years, working as a road patrol officer, passenger vehicle inspection officer, recruitment officer, and in his present position in the Bay Area administrative division. If his face looks familiar, you may have seen him on numerous occasions being interviewed as a CHP spokesman on television newscasts.

NEW SJA—Lieutenant Commander William H. Archambault has assumed the duties of Staff Judge Advocate for Naval Regional Medical Center, Oakland. He comes to his new billet from Naval Support Activity, Mare Island. An additional assignment in his five-year Navy service has been in Roosevelt Roads, Puerto Rico. LCDR Archambault earned a BA from Duquesne University in Pittsburgh, Pa., and a JD from Western New England School of Law, Springfield, Mass. His hometown is Bethesda, Md. and he is the son of Mr. and Mrs. George F. Archambault of that city. The new SJA, his wife Nora and two children live on Treasure Island.

Herpes subject of TV program

Medical Corps Lieutenant Commander Danny J. Lancaster of Internal Medicine appeared on KDOL-TV, Channel 13, on Aug. 10 in a discussion on herpes, a disease which is reputedly becoming epidemic in the United States.

Also participating in the program was Doug Miller, a national spokesman for the Institute of Information Center on Herpes Diseases.

Dr. Lancaster, in addition to his Medical Service duties, has also been serving part-time as an epidemiologist for Preventive Medicine Service at NRMCO Oakland.

IG schedule changed

Because of conflicting commitments elsewhere, the previously scheduled visit of the Inspector General (Medical) team to this medical region has been subject to change.

One team member, Medical Corps Captain Lee Taylor, arrived at Oakland on Monday and spent four days at this hospital reviewing graduate training programs. Other members are expected to arrive individually through the rest of this month and conduct the routine inspection until approximately mid-September.

Military health care system gets check-up, evaluation

A program to monitor the quality and direction of the military health care system has been established in the Office of the Assistant Secretary of Defense for Health Affairs.

The new Pentagon office will review DoD health care policies and study the performance of its health care programs.

Heading up the new Health Program Evaluation unit is Diane Bolay, formerly the assistant director at the Center for Health Policy Studies at the Georgetown University School of Medicine. Bolay has been engaged in the study and evaluation of health care programs and policies—both public and private—for the past 12 years and has experience in reviewing inpatient and

outpatient systems.

She has been employed by the Public Health Service, the Social Security Administration, the Health Care Financing Administration (Medicare and Medicaid oversight), Johns Hopkins Medical Institutions and the Columbia Medical Plan, a private health care corporation.

Her main job, as she sees it, will be to "Help the Assistant Secretary in assuring that high quality health care is provided to all our beneficiaries."

Director Bolay assumed her new duties on June 1 and plans to visit various military medical outlets in the near future to familiarize herself with the current status of military and dependent health care.

'Twilight Tours' modified

Eligibility requirements for "twilight tours," which enable personnel completing 30 years service to request a specific area of their choice for their last tour, have been modified by a recent change to the transfer manual.

Twilight tours are available to all regular Navy enlisted personnel who are eligible for voluntary, non-disability retirement. Eligible members may request shore duty in a Continental U. S. (CONUS) location of their choice for the last two years of active service prior to retirement. They may then be reassigned to an activity within the geographic area of their choice, assuming that a billet exists in their rate. Detailers are allowed a difference of two paygrades between the applicant's paygrade and the billet requirement in making such an assignment.

Assignments to any overseas area may also be requested. However, for this type of assignment members will be required to serve the entire "accompanied" or "all others" tour length and must be able to complete the full tour

by the end of 30 years active service. Retention beyond that point will be considered on a case by case basis.

Twilight tour requests should be submitted at least 28 months, but no more than 32 months, in advance of the requested effective date of retirement for assignment within CONUS. Overseas assignment requests should be submitted at least 40 months but no more than 44 months ahead.

Detailed information on twilight tours is available in Chapter 13 of the transfer manual and from local personnel/pass offices.

Spot drunk drivers

If you see a motorist at night turning wide or straddling a lane marker, there is a 65 percent chance that the driver is drunk.

This word of warning comes from people who should know—the National Highway Traffic Safety Administration (NHTSA).

Fall classes at NRMCO

Medical Terminology I & II—Sept. 9—Jan. 27. Thurs. only. 2:30-5:30 p.m. Bldg. 75B.

Beginning & Intermediate Class combined. This class will cover the basic roots, suffixes, and prefixes of medical terms and develop into advanced medical terminology.

Pre-Retirement Seminar—Sept. 21, 22, 28, 29, 8 a.m. to noon, all four days. Bldg. 75B.

Planning a healthy retirement, discovering the what, why, when and how. Topics include: Myths and Realities of Aging, Positive Approach to Financial Planning, Living Arrangements, nutrition, goal setting, fitness, community resources and more. Spouses are encouraged to sign up also.

Interviewing Techniques—Oct. 21, 28, 8:30 a.m. to 4:30 p.m., both days. Bldg. 75B.

Target Audience: Managers and supervisors, civilian and military responsible for interviewing and selecting new employees.

This class designed to improve interviewing skills and technique. How to guide the interview to obtain the data you need; how to avoid common interviewing errors; how to ask questions that will encourage the applicant to talk; how to evaluate all the data so as to select an above-average performer.

Assertiveness Training—Nov. 2, 4, 16, 18, 8 a.m. to noon, all four days. Bldg. 75B.

This class will cover: Introduction to tools and concepts of assertiveness training for use in personal and professional life; learn to recognize the difference between Assertive Aggressiveness and Passive Ways of acting; learn to communicate clearly, directly and effectively. Techniques for giving and receiving positive strokes and handling criticism and stress.

Effective Writing Techniques—Dec. 7-8, 8:30 a.m. to 4:30 p.m. Bldg. 75B.

This course emphasizes three aspects of writing that are vital to written communication: Clarity, Conciseness, Precision. The emphasis is on getting desired results through clear, complete written communications. Highly effective in developing and improving usable writing skills.

Nomination forms will be forwarded to all services approximately one month in advance of scheduled class, or nominations may be made in writing (by memorandum or letter) signed by the immediate supervisor and forwarded to Civilian Personnel Service, Bldg. 73B. The memorandum or letter must contain the nominee(s) full name, grade/rank, social security number and duty telephone number.

For additional information contact Civilian Personnel Service, Extension 2116.

NEA welcomes membership

The Naval Employees' Association (headquartered at Alameda Naval Air Station) is a public relations/chamber of commerce type organization dedicated to work on behalf of all federal employees. NEA is not a union; neither does it infringe on union prerogatives. Its aim is to fight legislation that may erode present benefits, to publicize the dedication of federal employees, to keep current physical facilities intact, and to keep all levels of government aware that Bay Area installations are sorely needed in the overall national defense effort.

How does NEA work?

- NEA maintains contact with city, county, state and federal leaders to promote good will for all federal establishments, and through the use of favorable publicity, makes the facility's role in the field of national defense known and accepted.

- NEA maintains constant contact with congressional leaders to support favorable legislation, or to oppose unfavorable legislation that may affect you or your facility.

- NEA is affiliated with the National Council of Naval Air Stations and sends delegates to the national convention in Washington, D. C., to represent members' interests.

- NEA supports and participates in six local chambers of commerce (Alameda, Berkeley, Fremont, Hayward, Oakland and San Leandro).

- NEA representatives work in many endeavors in the various areas in which they live to achieve better and lasting public relations.

- NEA spearheaded the formation of the Northern Civilian Employees Council, encompassing most of the naval employees in the East Bay, and is active in that council.

- NEA provides members with low rates on life insurance, dental insurance and numerous discount programs.

Annual membership fee is presently \$6. Those NRMCO Oakland civilian employees who may be interested in

joining should contact Anita Smith, a local NEA representative, who is employed in the Surgery Clinic.

Blind employee processes x-rays at medical center

Mr. Sam Stallworth has been named the Navy's nominee for "Outstanding Handicapped Federal Employee of the Year" for 1982. Mr. Stallworth, a ray film processor of the Radiology Service at the Naval Aerospace Regional Medical Center in Pensacola, has been blind since the age of 19, the result of glaucoma.

Stallworth has developed a delicate sensitive touch and acute hearing which have enabled him to compensate for his loss of sight. His unique working style allows him to excel in a work environment which demands adjustment by sighted technicians as well.

Since joining the laboratory in 1967, he has become a legend among superiors and co-workers for his outstanding work, his devotion to duty and his unfailing good humor. The quality and quantity of his work is unequalled. When Stallworth is absent, two technicians must be assigned to replace him in the Lab. He can process up to 900 x-rays daily, 300 to 450 x-rays more than most other Lab technicians, and his supervisors claim he hasn't made an error in more than two years.

A supervisor at the medical center describes Stallworth in this way, "A beloved employee who has, through innate ability and sheer tenacity, proved that one of the greatest of all physical handicaps can be overcome. His outstanding performance has opened closed minds and demonstrated that the blind can perform in many fields once considered impossible."

Kudos.....

ONEY-SAVER—Wendy Gross of the Legal Office recently earned a Civilian Special Achievement Award for saving the command nearly \$3,000 through diligence in duties concerned with the Medical Care Recovery Act.

Navy Commendation Medal
RMCs Winson R. Perkins, for duty with Naval Security Group Activity, Alaska.

Letters of Commendation
CAPT Lowell Kallen, MC.
LCDR Kathleen Bonnet-Langston,

Comings and Goings-----

"Fair winds and following seas" to the following personnel who have recently departed this command:

HM3 Peter Taffe to NSHS San Diego.

CDR Marcia Wright to NRMCC San Diego.

HN Richard L. Kline to 1st Mar. Div. FPAC, Camp Pendleton, Calif.

HM3 John E. McCord to 1st FSSG, FPAC, Camp Pendleton, Calif.

HN Guillermo Palacio to 1st Mar. Div. FPAC, Camp Pendleton, Calif.

HM2 Darryl D. Spurgeon, released from active duty.

HM3 Peter Neubauer to 1st Mar. Div. FPAC, Camp Pendleton, Calif.

HN Enrique Enriques to NSHS San Diego, Calif.

CDR Stephanie K. Brodine, Naval Hospital Okinawa.

LT2 Gary P. Wheaton to USS HARD B. RUSSELL (SSN 687)

HN Louis M. Tingen to Academy of Health Sciences, Fort Sam Houston,

CDR Guadelia Ebalo-Reyes to Branch Clinic Pearl Harbor, Hi.

HN Louis J. Welch to USS INCHON.

CDR John G. Bendele Jr. to USS ENTERPRISE (CVN 65)

LT Johny Czarnecki-Johnson, released from active duty.

HM2 Ronald Abad to USS DENVER.

HN Charles B. Gordon to USS NEW ZEALAND

HN Maurice Fletcher, released from active duty.

HM3 Digna R. Riturban to Naval School of Health Sciences, Fort Sam Houston, Tex.

HM3 Jeffrey Smith, released from active duty.

HM1 Nelson Jenkins to Headquarters USMC, Washington, D. C.

APT Lowell Kallen to NRMCC San Diego.

Rachel Sakalay, retired from civilian life.

...

Welcome aboard to newly assigned:

HN Doreen K. Holcomb, OR School.

HM2 Edward Wicker, Eye Clinic.

MC Howard E. Moore, Operating Management.

David J. Doucette, OB/Gyn.

MS Jean M. Hanley, Operating Management.

HN Lisa Gayes, Surgery.

HN Thomas Wright, Nursing Service.

HM3 Patricia Couch, PMT School.

HM3 Charles McNally II, Medical Service.

LCDR John Bendele, NC.

Letter of Appreciation

LCDR Essie Rucker, NC

Promotion

LTJG Sue Martin, NC.

Ensign Anthony Quinn, Clinical Clerk.

Ensign Anthony Riley, Clinical Clerk.

MM1 Tibayan selected SOM

Machinist's Mate First Class Odelon M. Tibayan, Security Chief/Chief Master-At-Arms, has been selected as Sailor of the Month (for July) at Naval Regional Medical Center, Oakland.

Officials report that his every action in his assignment here for a year and a half, has been portrayed as reflecting a sincere willingness to assist, as well as enforce. "... liaison services with the federal court system and normal division functions have resulted in a marked increase of professionalism, devotion to duty, and positive attitudes by division personnel," read a citation.

Petty Officer Tibayan has nearly 18 years of service in the U. S. Navy, more than 14 of those years sea duty. He has served aboard a minesweeper and three aircraft carriers, including the USS TICONDEROGA (CVS-14), a carrier involved in the manned spacecraft recovery mission of Apollo 17. Shore billets have been in San Diego and at NAS Moffett Field, as well as NRMCC Oakland. His awards include four Good Conducts, the National Defense Service Medal, Meritorious Unit Commendation, Vietnam Service, and Republic of Vietnam Medal.

A widower, Petty Officer Tibayan is the son of Silvestre and Margarita Tibayan of Amadeo, Cavite, Philippines. After completion of public

MM1 Odelon Tibayan

schools, he entered the Navy, and during his service career has received advanced training in career counseling, 20mm gun maintenance and operation, and duties of boiler technician and machinist's mate.

"It's a great feeling—I'm proud to be a Sailor of the Month at NRMCCO," said the personable petty officer.

Pickel, Mayberry complete studies

Two students of Basic X-Ray School Class 82-005 graduated this morning in the Commanding Officer's office, with Rear Admiral Robert C. Elliott presenting certificates to Hospitalman Carl C. Mayberry and Hospital Corpsman Third Class Lawrence L. Pickel.

Pickel, the class honorman, will next be assigned to NRMCC Jacksonville, Fla., while Mayberry joins the crew of the USS ARKANSAS (CGN-41), homeported at Norfolk, Va.

The new technicians spent five weeks of didactic and seven weeks of practical rotation in Radiology Service under close instruction of Hospital Corpsmen First Class Perry L. Lane and John R. Towle.

Medical Service Corps Lieutenant Commander M. A. Taylor is the school's director and Chief Hospital Corpsman A. A. Esporo, Jr., the senior instructor.

WITH APPRECIATION—Commander Frank Fisher, former Director of Administrative Services, received a Navy Commendation Medal for his service to this command shortly before transfer to Naval School of Health Sciences in San Diego. Making the presentation was Rear Admiral Walter M. Lonergan, now retired.

Saenz lauded

Hospital Corpsman Second Class Joel J. Saenz, assigned to the Urgent Care Clinic and Military Sick Call at Moffett Field Branch Clinic, was selected as that activity's Sailor of the Month (for June).

He was cited for dedication to duty, concern for shipmates, and provision of the highest quality of patient care to the ready forces.

Compton for Tansey

Captain William H. Compton relieved Captain Eugene A. Tansey as Commander, Navy Recruiting Area Eight in an Aug. 13 ceremony.

The headquarters, located on Treasure Island, encompasses recruiting responsibilities for 10 western states, Guam and the Philippines. It is geographically the largest recruiting area in the U. S. Navy.

Last Phases In CONUS Under Way

DEERS Sign-Ups Continue

What's happening in the Defense Enrollment Eligibility Reporting System (DEERS)?

The last two phases of enrollment in the Continental United States (CONUS) are under way:

Phase XI—Washington, Idaho, Montana, North Dakota, South Dakota, Nebraska and Kansas— began in June and continues through August 1982.

Phase XII— Pennsylvania, New York (parts not covered in Phase IX), New Jersey, Delaware, West Virginia, Maryland, Washington, D.C., and northern Virginia (parts not covered in Phases I or IX)—began in May and continues through August 1982.

DEERS enrollment is scheduled for completion in CONUS by the end of September 1982. DoD is currently studying overseas requirements.

DEERS is a new automated system that was congressionally mandated and developed to improve medical care benefits for the approximately 9 million people within the military health care system. The system provides a rapid and reliable means of verifying eligibility for health care at military medical treatment facil-

ities and through CHAMPUS.

The purpose of DEERS is not only to curb fraud and abuse of medical care, but to provide a means to protect and improve the planning and management of military health care benefits. Eventually, DEERS can be extended to the management of commissaries, exchanges, housing and food services.

DEERS enrollment began in the fall of 1979 and since that time more than 4.7 million sponsors and 3.8 million dependents have been enrolled.

Enrollment involves the collection of data on all eligible beneficiaries. Active duty military personnel and retirees entitled to retirement pay are automatically enrolled from existing personnel and finance records. Survivors, Medal of Honor Winners, 100 percent disabled veter-

ans, foreign military sponsors, eligible civilians and former members (a Navy category), must enroll themselves in DEERS. Dependents must be enrolled by their sponsor or a survivor.

Once DEERS enrollment is completed at a military installation, hospitals, medical clinics, pharmacies and dental clinics begin DEERS eligibility checking by means of a computer terminal or telephone hook-up with the main DEERS data base.

If you are eligible for medical care and are found not to be enrolled, the medical facilities will not deny you treatment, but will assist you in becoming enrolled.

For further information or assistance regarding DEERS enrollment, contact a military installation personnel office.

DEERS IMPLEMENTATION SCHEDULE

NOVEMBER 1979 - MAY 1980
JUNE 1980 - DECEMBER 1980
OCTOBER 80 - JANUARY 1981
JANUARY 1981 - MAY 1981
JUNE 1981 - SEPTEMBER 81
SEPTEMBER 81 - DECEMBER 81
OCTOBER 81 - JANUARY 1982
JANUARY 1982 - APRIL 1982
FEBRUARY 1982 - MAY 1982
JUNE 1982 - SEPTEMBER 82
MAY 1982 - SEPTEMBER 82

PHASE I
PHASES II & III

PHASES IV & V
PHASE VI
PHASE VII
PHASE VIII
PHASE IX
PHASE X
PHASE XI
PHASE XII

I WANT YOU TO ENROLL

FOR YOUR FAMILY'S PROTECTION

DEERS: Looking For 'Missing' Beneficiaries

Since the Defense Enrollment Eligibility Reporting System (DEERS) is just about through enrolling eligible beneficiaries in the Continental United States, DoD is looking for those who may have been missed. These people are eligible for certain benefits and privileges, but for some reason their records are neither complete nor up-to-date.

Typical among "missing" beneficiaries are the following:

—Surviving widows and widowers and children under 21 years of age of a member of the Uniformed Services who died while on active duty or who was eligible for retired pay at time of death.

—Retirees who have waived pay and their dependents.

—Honorably discharged veterans who have been certified by the Veterans Administration as being 100 percent disabled for Service-connected reasons, and their dependents

If, for any reason, you are eligible to be enrolled in DEERS and are not, or you know someone who isn't, you, or they, can obtain further information on enrollment, and the documents needed, from the nearest military installation personnel office.

Minimum eligibility checking standards set

Current *minimum* eligibility checking requirements under the DEERS program at all Navy Bureau of Medicine and Surgery facilities are:

- Twenty-five percent of all outpatient visits.
- One hundred percent of all admissions.
- Twenty-five percent of all dental visits.
- Ten percent of all pharmacy outpatients (to include all patients with civilian prescriptions).

Our patients write...

I recently needed assistance with a problem and went to the CHAMPUS Office at the Naval Regional Medical Center where I was most impressed with the very courteous and efficient staff, including Mrs. Grace Mitchell, Mrs. Millie Lumley and Mr. Robert Valentine.

While I observed the quiet, sincere efficiency of the entire staff, my business consisted of several interviews with Mr. Robert Valentine, and I cannot express my appreciation enough for the painstaking and very helpful advice offered by this efficient gentleman. He went out of his way to be helpful, and because he obviously is a very well informed member of the CHAMPUS Staff, I left feeling I had received the best advice and assistance that could be offered.

(Mrs.) Kathleen W. Stevens

...

The purpose of this letter is to express my appreciation for the medical care that I received while I was hospitalized June 16-19.

The professionalism and surgical skill exhibited by, and the treatment I received from Dr. Hyder, assisted by Dr. Pierdinock and other doctors working under Dr. Reilly on his surgical Gold Team, were commendable. Also, the care I received on Surgery Ward 6 West and in the operating room by the nurses and other staff was of the highest order.

Please express my appreciation to the personnel concerned.

Norton J. Arst
CAPT USN
(RET)

...

I want to take this opportunity to thank the team of doctors and nurses of the Cancer Care Unit, especially Drs. Gulickson and Flick. Their kind treatment of mother Annie R. Stamm, and the skilled medical care she received was unsurpassed. I could not have asked for more.

Betty Stamm White

...

I would like to express my appreciation to Dr. Kukulka, the black corpsman, and the nurse who took care of me on July 11 in the E.R.

Romeio A. Esparrago
PNC, USN (RET)

Additional medical facilities opened to CHAMPUS users

Military members, their families, and retirees in 10 cities no longer must use CHAMPUS for non-emergency inpatient medical health care. Ten former U.S. Public Health Service hospitals or clinics have been designated as reformed services medical facilities.

Department of Defense Health officials explained that use of the facilities is the same as using Army, Navy or Air Force hospitals or clinics. Under this direct-care system the only cost to the user would be \$6.30 per day for inpatient care. There is no charge for outpatient care. The remainder of the cost will be paid by the military services.

The former U.S. Public Health Service hospitals or clinics are located in areas with a concentration of military active-duty members, dependents and retirees. DoD health officials said beneficiaries must normally use one of the facilities if they live within a 40-mile radius of that facility.

The hospitals and locations are:
—Wyman Park Health System, Baltimore.
—Brighton Marine Public Health Center, Boston.
—Hospital of St. John, Nassau Bay, Tex.
—Seattle Public Health Hospital.
—Bayley Seton Hospital, Staten Island, N. Y.
Outpatient Clinics are:
—Lutheran Medical Center, Cleveland.
—St. Mary's Hospital, Galveston, Tex.
—St. Joseph Ambulatory Care Center, Houston.
—Family Practice Center of Port Arthur, Tex.
—Coastal Health Services, Portland, Maine.
For additional information, contact the health benefits advisor at one of these facilities.

'Look-alike' drug abuse spreading

The use of counterfeit or "look-alike" drugs is a peculiar form of drug abuse which is sweeping the country, according to the U.S. Department of Justice's Drug Enforcement Administration.

Look-alikes are carefully designed to resemble prescription drugs, such as amphetamines, barbiturates, tranquilizers and narcotic pain killers which are sold, in many cases, illegally on the street. They are known by the same names as their dangerous counterparts: Black Beauties, Dexies, Yellows, Christmas Trees and Rainbows. But look-alikes contain only substances such as caffeine, ephedrine, phenylpropanolamine, acetaminophen and other over-the-counter non-prescription drugs.

The public health dangers of look-alikes have become apparent. The user who thinks he has been purchasing "speed" (an amphetamine, such as amphetamine) or "ludes" (methaqualone) and has become used to taking several look-alike capsules or tablets at a time

in order to "get the full effect" runs the risk of serious overdoses or death if one day he ingests the same number of the "real thing."

Also, the look-alikes themselves can have serious effects. The number of emergency room incidents attributable to these drugs has risen dramatically in the past year and more than a dozen deaths caused by look-alikes have been reported.

These drugs not only cause problems for those who take them, they are causing serious problems for state and federal officials and medical personnel. Since the pushers are not selling a controlled substance, legal authorities are almost powerless. Also, overdoses of look-alikes are difficult to treat since the actual substance ingested may not be known.

If it is suspected that such a substance (look-alike or other unknown drug) has been taken, contact a physician immediately and try to obtain a capsule (or tablet) of the drug so that it can be identified.

GIFT OF LIFE—NRMOC Oakland staff members roll up their sleeves and donate blood during a recent drive. The next collection by Irwin Memorial Blood Bank is scheduled for Sept. 8. Blood donations from both military and civilian donors will be taken from 7 a.m. to 3 p.m. on 5 East. Each department or service at Oak Knoll has designated a keyperson who will contact prospective donors and make appointments. Any questions on the drive should be directed to LTJG Debbie Prekker, or a member of the Blood Bank staff, at Ext. 2329.

High incidence of measles in California's lower half

According to a recent report published by the U.S. Department of Health and Human Services, a total of 895 measles cases were reported in the U.S. during the first 28 weeks of 1982, a record low for the first six months of any year and a decrease of 60.6 percent from the 2,270 cases reported during the same period last year.

The news is not all good for this area, however. California (central and

southern) is one of the few states which continue to have a high incidence of measles, and some have been reported locally in Alameda County.

Captain Harold Koenig, Chief of Pediatric Service, highly recommends that children 15 months of age or older receive immunization against this disease.

Parents may make appointments for their children's immunization by calling the Pediatric Clinic, 639-2374.

'Leaflets three... let it be!'

The best way to avoid the irritation and pain of poison ivy is not to touch it, breathe it, or, for some extremely sensitive persons, to get within a mile of it.

Learning to identify the three-pronged leaf of the poison ivy plant is the best advice for anyone who might be in an area where it's growing.

But if prevention through detection fails and "it" gets on your skin, hair and clothes, the answer is: scrub it off—fast.

The National Institute of Health advises you to change your clothes and wash thoroughly as soon as possible. That way you can get rid of the sap that causes the reaction before it comes in contact with your skin or has time to spread.

Four to 48 hours after you've been in contact with one of these plants, you could see some symptoms. At first, the area which has touched the plant becomes red, and then bumps and

blisters appear with itching and possible swelling. After reaching its peak in several days, the oozing area begins to crust over and disappear. Extremely sensitive persons exposed to poison ivy over large areas of the body can become seriously ill.

To treat the inflammation while it is oozing, apply cold compresses of water, boric acid, or liquid aluminum acetate. Calamine lotion is a good drying agent and helps relieve itching.

For severe cases consult a physician who may prescribe drugs to reduce itching and inflammation.

When getting rid of poison ivy plants, don't burn them. Smoke can spread the sap, causing severe reactions. Also, wash clothing that has touched poison ivy. Poisoning may occur if contaminated clothing is worn a year after contact with the plant.

New CNO reaffirms anti-drug program

Admiral James D. Watkins, Chief of Naval Operations, stated recently that the continuation of the Navy's "War on Drugs" was one of his top priorities. The CNO emphasized the potential threat posed by drug abuse to Navy manpower readiness, calling it a paramount concern to all hands.

The Navy's program to counter drug abuse combines strengthened actions in the areas of preventive education and training, aggressive detection and deterrence, expanded assessment and evaluation and improved treatment and rehabilitation for those with potential for continued useful service.

ADM Watkins acknowledged that leadership and peer pressure were key to success of the Navy program, saying, "We'll get to the point where peer pressure is going to be on the other side, saying, 'hey, buddy, get off those drugs. You're hurting my command and my ship and I don't like it.'"

The CNO applauded the enthusiastic support already given the program, and stressed the requirement for full support by the chain of command.

CAREER COUNSELOR MOVES— HMC Gary L. Soileau, Command Career Counselor, moves his reference materials from a former office on the third deck of the hospital to new quarters in Bldg. 105 with the Personnel Support Detachment. His new telephone numbers are 2027/2394.

'Free' trip con artists at work

Have you been offered a free vacation lately? If so, the chances are you have come in contact with a new scheme for separating people from their earnings.

A common offer involves a "free" weekend in Las Vegas complete with hotel room, meals, entertainment, and even gambling specials. Sound too good to be true? It probably is.

Check it out first—Where is the hotel? Will it really exchange a room for the certificate you have been offered? Where and when can you eat your "free meals"?

What's the catch?—Often it's having to first sit through a high pressure sales presentation for real estate or some product or service you probably don't need.

If you get a phone call or letter offering one of these "great deals," be suspicious. Ask specific questions. Request a brochure about the hotel and references on the company making the offer.

Above all, don't sign or agree to anything—especially when it involves your money—until you have all the facts.

The following new additions to the Navy medical "family" have arrived at Naval Regional Medical Center, Oakland:

A baby boy to Hospitalman Christine A. Cuniffe, Operating Management, and her husband Michael, Aug. 3.

A baby girl to Hospital Corpsman Third Class Ronald J. Mays, X-Ray, and his wife Mayumi, Aug. 3.

Correction

In the Aug. 6 issue of *Oak Leaf*, Lieutenant Michael Ambrose was erroneously identified as an intern. He is, instead, on the medical staff assigned to the Emergency Room. We regret the error and once again offer congratulations to Dr. Ambrose and his wife Rosanne on the birth of their daughter July 20.

AVCM Sanders

New MCPON selected

Master Chief Avionics Technician Billy C. Sanders, Naval Education and Training Program Development Center, Pensacola, Fla., was chosen as the next Master Chief Petty Officer of the Navy, replacing MCPON Thomas S. Crow, who will retire Nov. 1.

In making the announcement, ADM James D. Watkins, Chief of Naval Operations, described all candidates as "the best the Navy has to offer," and told the audience that his decision "was a very difficult one."

Citing the newly instituted Chief Petty Officer indoctrination course, the CPO Academy and the new Third Class Petty Officer indoctrination as examples, ADM Watkins spoke of the increasingly responsible position of Senior Petty Officers in the Navy. "We are seeing the final moves toward cementing the Chief's hat to its rightful place in the Navy leadership pedestal," he said.

Master Chief Sanders was chosen from a group of four finalists for the position, which, in addition to himself, included MMCM (SS) Norman D. Garoutte, Commander Submarine Force U. S. Atlantic Fleet staff; NCCM Courtland R. Johnson, Commander Patrol Wings Pacific staff; and HMCM William J. O'Daniel, Commander in Chief U. S. Pacific Fleet staff. The finalists and their wives were invited to Washington for interviews with the CNO prior to the selection announcement.

The MCPON is the principal enlisted assistant to the Chief of Naval Personnel and the Senior Enlisted Advisor to the Chief of Naval Operations. The job includes accompanying the CNO on visits to naval installations; assisting commands, bureaus and other offices of the Navy Department in matters pertaining to enlisted personnel; representing the Chief of Naval Personnel on various boards and at symposia concerned with career motivation; participating as a guest and speaker at various civic and Navy affiliated functions; and acting as a focal point for a wide range of correspondence concerning enlisted personnel matters.

AVCM Sanders is a 24-year veteran of naval service. He initially began his military career in the U. S. Air Force in February 1954. Upon his discharge from active duty, he joined the Air Force Reserve in October 1957, transferring to Alabama Air National Guard in February 1958. Master Chief Sanders enlisted in the U. S. Navy May 9, 1958 and reported to Naval Air Technical Training Center, Norman, Okla., for naval indoctrination.

AVCM Sanders has received numerous awards during his military service, including the Air Medal, Naval Achievement Medal, Combat Action Medal, Air Force Good Conduct Medal and Navy Good Conduct Medal (Fifth Award).

Past commands have included Heavy Attack Squadron 13, NAS Whidbey Island, Wash.; Naval Air Maintenance Training Detachment (NAMTD) 1099, NAS Key West, Fla.; Reconnaissance and Maintenance Squadron One, NAS Atsugi, Japan; NAMTD 1002, NAS Key West, Fla.; Fighter Squadron 151, Yokosuka, Japan; NAS Pensacola, Fla.; and NAF Lajes Field, Azores.

New uniform patches approved

Airman

Fireman

Seaman

Three new uniform patches have been approved for E-1s through E-3s who are apprentice training graduates. Graduates who do not go on to an "A" school have the option to wear either the seaman, fireman or airman insignia, whichever is appropriate.

The patches should be worn centered, immediately above grade designation on the left sleeve of service dress blue uniform, blue and white jumpers. E-1s wear the patches, even though no grade designation is worn. The patches should be removed when an individual becomes a designated striker or when promoted to class petty officer.

According to the Navy Uniform Board, the patches may be worn as of January 1983. The patches are available now at Navy Exchange Uniform Centers. (NE)

Female military on the rise

The number of female veterans has increased significantly during the past 11 years according to a report prepared by the Veterans Administration. The male veteran population is declining.

The report is the first in a new series of brief studies being prepared by the VA's Office of Reports and Statistics in Washington.

Veterans Administration Chief Robert P. Nimmo said these studies are essential in order for the agency to address the needs of all veterans.

"Effective management of the wide range of VA programs is greatly enhanced when a detailed profile of the veteran population is available," Nimmo said.

According to the study, the number of women on active military duty is also on the rise, indicating a continued increase in the number of female veterans in the coming years.

Women veterans totaled 742,000 on Sept. 30, 1981, or 2.5 percent of all living veterans. In the past five years the number of female veterans has increased by 26 percent. This large increase, since the mid-1970s, becomes even more apparent when comparisons are made with the number of male veterans. The ratio of male veterans to female veterans stood at just over 50 to 1 during the first half of the 1970s, but dropped to 39.5 to 1 by the end of September 1981.

Other findings:

AGE—The median age of female veterans exceeded that of their male counterparts each year until 1979, after which their relative age pattern has been reversed. The age structures of these two groups is expected to become more and more divergent during the next few years. As of September

1981, the median age for female veterans was 46.2 years compared to 50.3 years for male veterans.

PERIOD OF MILITARY SERVICE—The distribution of female veterans' period of military service was found to be similar to that of males at the end of 1981. The major difference, and one which largely explains the variances in the overall age structure of these two subgroups, is that a greater proportion of women, 17 percent, than of men, 4 percent, served in the armed forces during the post-Vietnam era only.

EXPECTATIONS FOR THE FUTURE—The number of women in the armed forces will most likely continue to grow by significant numbers while the female veteran population is expected to maintain a course of steady growth in future years.

The study points out that as the number of female veterans grows, the increasingly vital aspect of the VA's mission will be the special consideration given to the problems of female veterans with respect to the administration of various types of veterans' programs such as medical care, counseling, loan guaranty and education.

Copies of "The Female Veteran Population: An Overview of Its Growth in the Last Decade" are available free upon request and while the supplies last, from the Office of Reports and Statistics (711), Veterans Administration, Central Office, 810 Vermont Avenue, N.W., Washington, D.C. 20420.

For additional information concerning the study contact: Mark Russell (202) 389-2625 at the VA's Central Office.

Sky no limit for space command

With an eye on the 21st century, the Air Force has announced the formation of the Space Command, to become active Sept. 1.

Making the announcement at a news conference recently, General Lew Allen, Air Force Chief of Staff, said, "Creation of Space Command will further consolidate USAF operational space activities (and) provide a link between the space related research and development process and operational users." Space activities referred to by Gen. Allen include "... surveillance, early warning, communications and meteorological functions." Participation in space shuttle operations also was indicated.

General Allen said he believed the Space Command would develop into a unified command, depending on the needs and interests of the other services, "... within a year or thereabouts."

The first commander of the Space Command will be General Jim Har-

tinger, Commander in Chief, North American Aerospace Defense Command and Commander in Chief, Aerospace Defense Command.

Headquarters of the new command will be in Colorado Springs and initially will be built around the existing Aerospace Defense Center staff there.

Alameda-based ship aids injured crewman

The combat stores ship USS NIAGARA FALLS (AFS 3) responded to a distress signal from the supertanker "BRITISH PRIDE" in the Arabian Sea July 23, successfully air-lifting an injured crewman from the vessel to Masirah Island, Oman.

The MEDEVAC was made by a CH-46 SEA KNIGHT from Helicopter Combat Support Squadron Three, Detachment 106, with NIAGARA FALLS medical personnel onboard.

'Surf's Up!'

Enjoy surfing? There may be surfable waves nearer this duty station than you thought. According to *Off Duty* magazine, many servicemembers stationed in California have excellent surfing at their front door—good places abound.

Especially recommended, however, are areas around: Santa Cruz, the Monterey Peninsula, Cuyucos, Santa Barbara (Rincon Point), throughout the L. A. area (especially Malibu) and all the way south to San Diego.

It's not too late for 'Presidio 10'

Late entrants will still be accepted by The Guardsmen for the second annual Presidio 10 race, a run around the Presidio of San Francisco, the bay front and across the Golden Gate Bridge on Aug. 29, beginning at 9 a.m.

This race has been selected by the Road Runners Club of America as the California State and Western U. S. Regional 10 Mile Championship. In addition, it is a military championship.

The scenic course is said to be a runner's dream.

Late entry fee is \$7.50 and a limited number of entry forms are still available beneath the bulletin board at the entrance to the Oak Leaf office.

The race, managed by the Guardsmen, is a fundraiser to send Bay Area underprivileged kids to summer camp.

Benefit party slated

The Third Annual Benefit Wine Tasting Party for Community Resources for Independent Living (CRIL) will be held Saturday, Aug. 28, 4-7 p.m. at the Campus Ministry Center, 25580 Campus Drive, Hayward.

The \$7.50 ticket donation is to benefit programs for the disabled. A special added attraction will be a photographic art display at Charlotte Cordes-Hayashi.

For more information call 881-5743, a number also equipped for use by the deaf.

'Long' ball hitters

In May 1982, two 82nd Airborne Division teams played softball continuously for 100 hours and 5 minutes (four and a sixth days), shattering an existing world record of 91 hours and 3 minutes.

What do you know about Medicare?

Medicare is a federal health insurance program available to

- anyone 65 or over who is eligible for social security benefits, even if the person is still working;
- a person 65 or over who does not have enough social security credits, but is willing to pay for the insurance; or
- anyone at the any age who has been on social security disability payments for 24 months or who needs kidney dialysis or a kidney transplant.

Medicare has two parts: hospital insurance and medical insurance. The Social Security Administration publishes a pamphlet that describes both parts of the program, available benefits, what is *not* covered, and the requirements for participation in the program.

For a free copy of "A Brief Explanation of Medicare," send a postcard with your name and address to the Consumer Information Center, Dept. 539, Pueblo, Colo. 81009.

Standards tightened for HH goods moves

Carriers of household and personal goods belonging to military members must now "measure up" to standards of loss and damage, and on-time pickup and delivery.

The standards are part of a carrier evaluation and reporting system begun May 1 and administered by the Military Traffic Management Command. MTMC annually monitors more than 200,000 domestic shipments transported by 1,500 Department of Defense approved carriers.

MTMC officials say the former three-tier rating levels of "superior," "excellent," and "standard," are no longer being used. Scoring of the carriers under the new system is based on the three elements considered most important by service members. Those are on-time pickup, on-time delivery and incidence of loss or damage.

A perfect score is 33.33 points of each of the three elements. A score of 85 or higher, based on a 100 point scale, must be maintained if carriers wish to remain eligible to carry DoD

shipments. Carriers failing to meet or exceed the minimum score of 85 will be denied DoD traffic for 60 days beginning the next rating cycle. Installation transportation officers score the carriers.

This is the first time the DoD has had specific performance standards to measure both on-time pickup and delivery and loss or damage. The cost of personal stateside property shipments for FY 1981 was \$218 million.

The new system is more streamlined and reduces the administrative workload for transportation officers, according to MTMC, and provides a meaningful evaluation of carrier performance.

According to MGEN John D. Bruen, Commander Military Traffic Management Command, "by comparing the levels of service on a regional, state or national level, we are in the best position to evaluate each carrier's overall performance and help them improve the quality of service."

Computer interpretations

Telephone lines to transmit electrocardiograms under CAPOC system installed here this month

By LT Alan Kay
Management Information Service

The Computer Assisted Practice of Cardiology (CAPOC), a Tri-Service Medical Information System (TRIMIS), scheduled for installation this month at Naval Regional Medical Center, Oakland.

This system will permit transmission of electrocardiograms (ECGs) over standard telephone lines to allow staff members at remote facilities rapid consultation with cardiologists at the core hospital. CAPOC will also assist heart specialists and other medical personnel in providing computer interpretations of ECGs.

ECG carts capable of computer transmissions from Naval Hospital Alameda and the medical region's branch clinics at Moffet, Concord, Mare Island, Treasure Island, Alameda, Naval Supply Center and Fallon will all be linked into a minicomputer in the RMC Oakland Cardiology Branch through the Regional Computer Center for the CAPOC system at Letterman Army Medical Center in San Francisco.

In previous practice, ECGs were sent to NRMC Oakland via couriers and airmail. Under the new system they will be telecommunicated within minutes to the specialized minicomputer printer in Cardiology. This equipment will reproduce the exact ECG

tracing along with the selected patient information and provide a preliminary computer interpretation of the electrocardiogram.

Computer printers at remote sites originating the transmission will also receive the preliminary computer interpretation within minutes—usually before the outpatient leaves the clinic. (As a diagnostic tool for reading normal ECG tracings, computer interpretations have been found to be extremely accurate.)

In case of abnormal ECGs, the rapid computer interpretation is also helpful, but the real payoff for a remote medical treatment facility is the reproduction of the abnormal ECG on the minicomputer printer at Oak Knoll. When necessary, a cardiologist here can provide a "stat" interpretation and consultation within minutes after the ECG is taken, rather than hours or days later. This capability results not only in a savings of expensive local consultations for interpretation, but also a possibly critical improvement in the speed and course of treatment provided the patient.

Other benefits of the CAPOC System will include increased availability of previous ECGs for comparison with those just taken, improved

technical quality of tracings, increased legibility and consistency of reports, fewer lost tracings, and a management information and research data base on ECG interpretations.

TRIPHARM operational in Oct.

The Pharmacy Service at Naval Regional Medical Center Oakland and branch clinics located at Alameda, Mare Island, Moffett Field and Treasure Island, will begin using computerized management in October.

Known as TRIPHARM, it is one of several Tri-Service Medical Information Systems.

A Pharmacy officer said the new system "will allow us to more efficiently fill prescriptions and enhance our ability to monitor drug therapy for possible drug interactions, reactions and overlaps."

In order to fill prescriptions under this new method, he explained, the Pharmacy must first have sponsors and their eligible family members registered into a data base. Pre-registration is urged to prevent undue delay in filling prescriptions when they are needed.

Health care beneficiaries need to fill out a Pharmacy Registration Form (illustrated with this article) only one time for the information to be available at any of the pharmacies listed above. All information on the form is protected under the Privacy Act of 1974.

Forms and further information may be obtained at the Pharmacy window on the first deck of the main hospital.

PPY DAYS—Edzel Bunag, 10, and Christopher Bonnevie, 6, long time patients of the Pediatrics Clinic, were guests of honor at a surprise party given by the clinic staff on Aug. 19. Edzel, a Navy dependent, and Christopher, an Army member's son, are both in remission from leukemia. They come to the medical center monthly so that their progress may be monitored and have reportedly become fast friends. The idea for the celebration party was conceived by Mrs. Lenore Brady, the clinic's charge nurse.

PHARMACY REGISTRATION FORM

The Pharmacy Service at NAMC Oakland will be using a computer system to assist in filling all prescriptions. To permit us to prepare for this system, it is necessary to register persons who use the system by collecting the following information. Pre-registration of you and your dependents is mandatory and will help make this transition as smooth as possible as well as prevent future delays. Please take a few minutes to complete this form and return it to the Pharmacy. The data collected will be protected according to the Privacy Act of 1974.

Management Analysis Branch shares Red Cross building

The Management Analysis Branch of Management Information Service moved Aug. 20 to new quarters in Red Cross Bldg 71. The five civilian employees of the branch may now be reached by telephone on Ext. 2525.

The move was made to relinquish space to an expanding Drug Screening Laboratory.

Editorial---

Labor Day
Sept. 6

Summer's last long weekend

If you haven't already fudged a little and taken annual leave or liberty to stretch this holiday weekend more than the normal three days, we'd like a word with you. . .

Our patients write. . .

On Thursday, July 22, our daughter, Norma M. Healy, had surgery. . .
We want to thank you and your very competent staff for the kind, courteous and professional way she and we, her parents, were received.
We are proud Nora chose the Navy and want to share our good feelings regarding the staff at Oak Knoll.
Please inform the director of your nursing staff that her professionals and their assistance showed not only their best professionally, but in a very warm way received us in each area of the hospital.
GO NAVY! (That's pretty good for a former Army Nurse.)

Jim and Jeanne Healy
San Francisco

Recently I was admitted to Ward 8S. . . I was very impressed with the attitude and efficiency of all personnel there.
I am retired from the United States Air Force and normally utilize medical facilities at Castle AFB and Travis AFB. . .
Your personnel from doctors on down show genuine concern for the patients. This puts one at ease and helps considerably during trying times.
I would like to thank most sincerely the following: Dr. Clayton, Dr. Harris and Dr. Adams; the nurses and other personnel of Ward 8S. These personnel showed by their attitude and actions, true professionalism. . .

Ken S. Coe, Jr.
MSGT, USAF Ret.
Atwater

The soul of "Inward Self" of man is paramount, closely followed only by a sound healthy body which nurtures and conveys that precious entity through life.
My wife and I graciously thank you, through your staff, for preserving my life and refreshing my "spirit." This feat was accomplished by your staff, who possess the very highest degree of dedication, professionalism, humanism, and positiveness.
During the five memorable days at your medical facility residing in Emergency, ICU and Ward 9S, there is nothing but praise for each and every individual encountered (O-6 through E1 and civilians).
I desire to specifically acknowledge and highly commend the following personnel for outstanding performance (above and beyond the call of duty) in all aspects of my care:
LT Joanne Landacre—Physician, Emergency; LCDR Robert Caldwell—Physician; LT Thomas Reilly—Attending Physician; LT Kathy Kobbs—Nurse, ICU; HN Allen Marshall—Corpsman, ICU; HN Randy Flynn—Corpsman, ICU; HN Joseph Flores—Corpsman, ICU; LTJG Louise Therriault—Nurse, Ward 9S; R. N. Jeanne McGinnis—Nurse, Ward 9S.
The "Refreshing of my Soul" was ably accomplished by a loving, humanistic priest, CDR "Father Joe" Ferraro, whose positiveness and communication with the Almighty brought me through the rough psychological traumas of my confinement.
The Oak Knoll Naval Hospital is an ultimate asset to the Bay Area, particularly the Naval community.

Raymond O. Berry
PNC, USN, Ret.
Alameda

Message for Johngy's friends

My dear friends of Oak Knoll:
Contemplating the contents of this letter has taken time and many tears. Leaving the Navy was one of the toughest decisions I have had to make. I left with very ambivalent feelings. However, life goes on and no matter how far one moves, true friendship will last forever.
I wish to take this opportunity to thank all those very special people at Oak Knoll and throughout the military system who have helped me grow and realize the importance of true professionalism. Through the teaching, leading and counseling, I feel more secure in my nursing capabilities.
May God bless you every one.

Johngy M. Czarnecki

Like any concerned shipmate, we have your welfare at heart and we always wish you the best, both on the job and in your personal life. Most of you work pretty hard around the clock here looking after your patients. You develop a certain kinship with those who are seriously ill or injured and become inpatients over long periods of time. You've seen little children fighting for their lives from severe internal injuries. . . and you've attended active duty personnel whose otherwise strong young bodies are immobilized in casts and harnesses, waiting for shattered bones to heal. You've also seen your share of untimely deaths. . .

Many patients have told you the cause of their injuries, while others are so seriously ill you have to hear the stories from worried family members. Some are catapulted into this state of discomfort and frustration through no fault of their own—victims of speeders, drunk drivers or dope addicts behind the wheel of one of the most deadly weapons known to man. Others, well meaning but careless, bring on their own pain, or demise, by such a simple thoughtless act as standing up in a canoe or failing to put on a motorcycle helmet.

We're not going to lecture you about what you *should* or *should not* do. You've heard it all many times before—and you've seen the results to those who didn't listen. We're just going to ask you to take a little more than ordinary caution over this last long, busy weekend of summer, both for yourself and for the other potential accident victims out there.

Stay safe, friends.

UNFORTUNATELY
THE BEST EXCUSES FOR NOT WEARING SEATBELTS ARE ALWAYS
GETTING BURIED

Sailor enjoys news from 'home'

You may remember me, as it was only July of last year when I left NRMC Oakland. I am now on the USS HECTOR (AR-7) and we have recently returned from a long West-Pac deployment.
Being far from home and in strange countries, it was a welcome sight in the mail to see the *Oak Leaf*. It has been wonderful reading about some of my old friends there at the hospital. Having the chance to read the paper made me feel a little closer to home.

FRANK GILLETTE, HM1, USN
Medical Department, USS HECTOR

(EDITOR'S NOTE: How could we NOT remember YOU, Frank? You left a big imprint here as one of our Sailors of the Year, plus other achievements. We're happy some of our former shipmates now in foreign waters receive our little paper and enjoy it. To all of you out there, at sea or in new shore duty—feel free to write Oak Leaf any time and tell us of experiences you'd like to share with your old friends.)

Gladys Mitchell sends her appreciation

My heart is so filled with love and gratitude for the kindness shown to me at the beautiful retirement luncheon held in my honor on Aug. 5.
I wish to thank each of you who came and all who contributed for the beautiful gifts and my Harlequin Romances.
I am grateful to my supervisor Lillian Winfield along with Mary Phipps, Mildred Lumley and Frances Sheykhzadeh who gave of their time to make this a wonderful day for me, and to Robert Valentine with his camera.
My cup runneth over remembering my well-wishers who were there with me and my daughter Charlotte in the Admiral's office as I received my 25 year pin and retirement letter.
I wish to thank the Personnel Office for help so generously and graciously given as I prepared for this phase of my life.
May God bless all of you.

Opinions contained herein are not official expressions of the Department of the Navy. THE OAK LEAF receives American Forces Press Service and Navy News material.

Contributions from both staff and patients are welcomed and should be addressed to the Editor of the OAK LEAF, Naval Regional Medical Center, Oakland, CA 94627.

Command Line

(This column permits direct access to command executives by either military or civilian staff members of any grade, rate or rank. Questions on matters impacting the medical center operations as a whole, reports of incidents of abuse or fraud, or items of concern to large numbers of the staff are invited. Please also submit recommendations and report positive information of interest to all of us. Submit comments in any legible written form to the Public Affairs Office for routing. You may remain unidentified if you so wish.)

Inequity in watch schedules

COMMENT: Several NECs were removed from the command watches—X-ray techs in January 1981 and Lab in March 1982—with no apparent explanation. Concurrently, other E-6s are standing both command and specialty watches. Please explain.

REPLY: Because of a shortage of technicians in both Radiology and Laboratory, those specific NECs were temporarily removed from the Chief of the Day and the UEPH/MAA watch list. Both departments are now being reevaluated for the return of personnel to the command watch list.

The radiology watch list is rather confusing. There are seven E-6s assigned. One first class works 43.5 to 47 hours per week. His duties consist of "late stay" to ensure that the department has adequate help. He is the senior technician and his duties are stood Monday through Thursday, standing the watch once a week (normally not later than 8 p.m. of the day of duty). Three other first class corpsmen work out 46.5 hours per week. The section watchstander stands duty 8 a.m. to noon Monday through Thursday once a week. The fifth and sixth first class techs work 40 hours per week but stand port and starboard duty for the CAT scanner angiograms, while the remaining petty officer works 38.5 hours per week and is on permanent duty weekends (Saturday and Sunday, 7:45 to 11 p.m., and Monday, 3 to 11 p.m.). There is a four section watch list, a weekend watch list, a night watch list, and a special (angiogram) watch list.

Laboratory Service has five E-6s. Those assigned to Blood Bank, Hemo, Histo and Microbiology each work 44 hours per week, while the fifth is on nights, 11 p.m. to 30 a.m., six on and two off (47 hours per week). The reason the lab technicians were removed from the command watch list was the emphasis on the Drug Screening Laboratory. They were supposed to pick-up some of the workload of others transferred to that function.

As far as other E-6s who stand the command watch, some have no duties within their departments. One stands no duty other than the command watch; however others stand duties within their areas. A corpsman in Urology stands duty every five days in his clinic and every 13 days on the command watch bill—a total of approximately 52.5 hours per week. Two in Nuclear Medicine stand a five section in their clinic and every 13 days on the command watch (because this is an on-call watch it is difficult to compute how many hours they work each week). The man in Pharmacy stands no duty in his department; the first class in Medical Photography stands no department watch but is subject to call for special incidents requiring his services over normal duty hours.

With the exception of personnel that are standing night duty in departments, or personnel that stand special study watches, all first class petty officers will be returned to the command watch bill. The watch is expected to be an 18-section watch.

CARL VINSON, 'SEA', TEXAS

Ships swap homeports

The nuclear-powered aircraft carrier USS CARL VINSON (CVN 70), the aircraft carrier USS CORAL SEA (CVN 65) and the nuclear-powered guided missile cruiser USS TEXAS (CGN 39) will begin around-the-world trips in the spring of 1983 to change fleets and homeports, the Navy announced Aug. 25. CARL VINSON will report to its new homeport of Alameda, Calif.; CORAL SEA will be homeported in Norfolk, Va.; and TEXAS will be based in San Diego, Calif.

CARL VINSON's transfer to the West Coast will provide the Atlantic and Pacific Fleets with an equal number of nuclear-powered carriers, giving them each the advantage of "state of the art" aircraft carrier operations. The TEXAS move provides a Navywide balance of cruiser assets with the nuclear-powered aircraft carriers.

CORAL SEA and TEXAS will leave Norfolk and begin a 22,000 mile trip to California via the Atlantic, Indian and Pacific Oceans, with brief operations in the Caribbean and Mediterranean Seas. Within weeks of the East Coast departure, CORAL SEA, now homeported at Alameda, will deploy westward with an ultimate homeport destination of Norfolk.

To accomplish the homeport changes, a team of Navy Atlantic and Pacific Coast representatives has been working on transfer details, including engineering and aviation support, personnel assignments, transfers and training, housing availability, logistics and scheduling of the ships. Where possible, aircraft carrier personnel will

be "cross-decked," allowing them to retain their present homeports. This is more easily accomplished for junior enlisted than for more senior or technical personnel, or Engineering Department members. Families of personnel ordered to the three ships may proceed directly to the new homeports, minimizing the number of relocations and the impact on families following the swap.

It's a 'no-no'

The Office of Personnel Management (OPM) periodically cautions federal agencies to ensure against the improper use of postage paid agency (franked) envelopes to file job applications for competitive examinations and agency merit staffing applications, or to appeal ratings received under these programs.

OPM considers the filing of job applications and rating appeals to be personal matters, not official government business. Such personal mail is therefore subject to payment of postage by the employee, and use of postage paid official envelopes for these purposes is a violation of both OPM and postal regulations. The use of official prepaid mailing envelopes, labels, etc., for private use is subject to a fine of up to \$300.

BEQ policies

COMMENT: What are policies of the BEQ pertaining to room assignments?

REPLY: A Side: Male Staff; B-1&2: Students; B-3: Female Staff; TADs: Anywhere there is room; E1-E4: Three to a room; E5-E6: Two to a room; Staff E5-E6: To Bldg. 69 when space is available.

COMMENT: Why are staff personnel being moved to accommodate school students?

REPLY: They aren't. The manager is trying to comply with OPNAVINSTs pertaining to BEQ management.

COMMENT: Why are school students getting first floor rooms?

REPLY: The B-1 deck is designated for students because of short stays and because it is near a study room.

COMMENT: Why are personnel being moved from A Wing to B Wing?

REPLY: Only 18 personnel have been affected by moves in the UEPH. Such moves are made only when one's status changes from staff to student, or vice versa.

COMMENT: Why are UEPH committee meetings being held at times when it is impossible for most personnel to attend?

REPLY: The committee informs the manager when the meetings are held. The manager does not set the time or date. If this question is in reference to the BEQ meetings, there was one set for 5 p.m. on Aug. 19 for Bldg. 501 and one more for Bldg. 69 at 5 p.m. on Aug. 23. The manager's meetings are separate from those of the Advisory Board.

Uniforms at Navy Exchange

COMMENT: Why can't corps personnel get uniforms in the exchange?

REPLY: A review of uniform items stocked at our Navy Exchange is presently underway. Because of the space allocated for uniforms, we have to be reasonable on the number of items stocked. Those articles that are not carried will be readily available by placing a special order at the Customer Service Desk or with the salesclerk in the area. Call Mary at Ext. 2184 for any assistance in ordering uniform items.

Uniform fabric to be standardized

To further standardize the appearance of Navy uniforms, "Gabadreme" (a fabric of 100 percent texturized polyester) will become the only authorized fabric for use in service dress white, summer white and summer khaki uniforms for officers and chief petty officers. Gabadreme uniforms will become available in Navy Exchanges during April 1983 and the mandatory wear date will be April 1, 1985.

During the two-year phase-in/out period, uniforms listed above may be worn in existing fabrics as well as

Gabadreme. Female summer white (B) and working khaki will continue to be made of the present polyester/cotton material.

Battle formations

In preparation for battle, the wooden ships of the U. S. Navy's first fleet were positioned in a line of confrontation to the enemy. Hence, the officers of the early Navy became known as "officers of the line."

Today, officers are called line officers.

WELCOME TO THE TEAM—Rear Admiral Robert C. Elliott welcomes spouses of new members to the command during an orientation tour of the hospital by the wives on Aug. 25. The Commanding Officer told the visitors that they are very important members of the medical center's health care team. Education and Training presented a slide briefing and Nursing Service arranged a walking tour of the hospital. Support was also provided by Special Services, Photo Lab and the Public Affairs Office.

PWC Autovon Prefix changed

The Autovon prefix for Public Works Center San Francisco Headquarters Staff Officer in Charge of Construction/Resident Officer in Charge of Construction San Francisco Bay Area has been changed from 864-XXXX to 859-XXXX.

PWC organizational elements affected, located in the Oakland Army Base Bldg. 796, are Command and Special Staff Offices, Production Officer, Activity Civil Engineer, Management Officer, Comptroller, Administrative Services, Utilities Department Staff, Facilities Planning Department, Housing Department, the Contracts Branch of the Maintenance Engineering Department, and OICC/ROICC SFB area.

Plante for Craft

Captain Rene Edmond Plante has relieved Captain Thomas Gwyn Craft as Commanding Officer of Naval Supply Center, Oakland. The turnover ceremony was held Aug. 20 at NSC Oakland.

Captain Craft has been transferred to become Inspector General of the Naval Supply Systems Command in Washington, D. C.

KXY TO SAFETY - YOU

Xvxn though my typxwritxr is an old modxl, it works quitx wlll xxxcpt for onx of thx kxys.

I havx wishxd many timxs that it workxd prxfctly.

Thrx arx 43 kxys that function wlll xnough, but just onx kxy not working makxs thx diffxrxncx.

Somxtimxs it sxxms to mx that a safxty program is somx-thing likx my typxwritxr - not all thx kxy pxoplx arx working proprly.

You may say to yoursxlf, "I am only onx pxrson. I won't makx or brxak a safxty program"

THE NEW BULL—Ensign Ronald Logan of Pharmacy Service is now the proud possessor of the symbolic bull, signifying the Medical Service Corps' "Bull Ensign of the Command." The honor passed to Ensign Logan upon the recent promotion of Michael J. Curran, its former holder, to the rank of Lieutenant (junior grade).

Career Capsules

Naval Academy opportunities

The Secretary of the Navy may appoint up to 85 enlisted personnel from the Regular Navy to the United States Naval Academy (USNA) at Annapolis each year.

USNA offers an outstanding opportunity for qualified people to embark on careers as officers in the U. S. Navy. Students at USNA are appointed as midshipmen, U. S. Navy, and receive pay of approximately \$420 per month, plus tuition, room and board. Upon graduating, they are awarded a bachelor of science degree and a commission as Ensign in the Regular Navy. Graduates are obligated to serve at least five years on active duty after graduation.

Qualifications for USNA are:

- SAT scores of at least 800 (verbal English and Math) or ACT score of at least 34.
- Age—at least 17 and not have passed 22nd birthday on July 1 of year entering USNA.
- Unmarried and no children.
- U.S. Citizen.
- Good academic scholastic record.
- Excellent physical condition.
- Member of naval service since July 1 of preceding year.

Navy physicians, dentists

Medical Center streets named for WWII heroes

Many of Oak Knoll's staff members are not aware that streets on the compound are named for Navy physicians and dentists who lost their lives in World War II.

Gendreau Circle, the parking lot area in front of Preventive Medicine Service, for example, honors the memory of Captain Elphege A. M. Gendreau, MC, USN, who was killed in combat in the South Pacific on July 21, 1943 while on duty as fleet surgeon for the Pacific Fleet.

Blackwood Street, which begins at the main gate and runs to the north boundary, is named for Commander James D Blackwood, MC, USN, senior medical officer of the USS VINCENNES when she was lost the night of Aug. 8, 1942.

Johnson, Alexander and Crowley Streets are named for three officers killed in action at Pearl Harbor on Dec. 7, 1941. They are Commander Samuel E. Johnson, MC, USN; Lieutenant Commander Hugh R. Alexander, MC, USN, and Lieutenant Commander Edward E. Crowley, DC, USN.

Evans Street honors Lieutenant Commander Edward E. Evans, MC, USN, who was killed during action in the Solomons on Dec. 12, 1942.

Trojakowski, a short road near the main gate that terminates on Blackwood, is named for Commander W.C. Trojakowski, DC, USN, killed in action in the South Pacific on June 12, 1942.

Ringness Street honors Lieutenant Henry R. Ringness, MC, USN, who was awarded the Navy Cross posthumously for extraordinary heroism while under fire on Guadalcanal.

Another short street, **Miles**, is named for Lieutenant (junior grade) Samuel S. Miles, MC, USNR, who was killed in the battle of the Solomon Islands while serving with the 1st Marine Division.

Rall Street honors Lieutenant Richard R. Rall, MC, USN, who was also killed at Pearl Harbor.

New BAQ policy change

Servicemembers living in "inadequate" family housing will be charged "fair market rental value" not to exceed 75 percent of their basic allowance for quarters (BAQ) as of Oct. 1.

The change will mean an increase in the paychecks of some personnel. Occupants of inadequate housing who currently forfeit their entire allowance should receive at least 25 percent of their BAQ when the legislation becomes effective.

Fair market value is defined as the amount for which the house or apartment would be rented, including utilities, in the civilian economy. The policy change was directed by the Military Construction Codification Act of July 12.

Commands with family housing units that have been designated inadequate have been instructed to determine fair market value for each unit.

Nurse job openings

Civilian Personnel Service has announced that it will accept applications throughout 1982 from all appointable federal employees and reinstatement eligibles for the positions of Clinical Nurse, GS-5, 7, or 9.

Anticipated vacancies may be at Oak Knoll or the medical regional branch clinics. Positions are subject to rotating shifts.

Detailed information may be obtained by calling 639-2116.

Civilians surveyed on drug, alcohol use

When was the last time you were unable to remember some of the things you did while drinking the day before?

Have you ever had a "Miss Emma" (an opiate)?

These are among 89 questions you may be asked this summer if you are a civilian working for the Department of Defense.

The Office of Drug and Alcohol Abuse Prevention of the Department of Defense is conducting a study of drinking and drug use practices of its civilian employees and military personnel. A questionnaire similar to the one being used in the July and August survey of civilians was recently completed by over 19,000 military personnel.

The results of both of these studies will be used by DoD policymakers to evaluate the extent of alcohol and drug use among its employees and to plan improvements in employee assistance policies and programs.

The questionnaire was sent to persons whose names were selected at random in a representative sampling of all DoD civilian employees. Participation in the survey is voluntary and no penalty can be imposed for not responding.

Persons receiving the questionnaire are requested to answer all questions but not to place their names or social security numbers on the form. After filling it out they are to mail the form to an independent research firm conducting the project. This procedure assures that no link can be made to the person filling out the questionnaire.

Asiatic origin for 'chit'

The word "chit," meaning a receipt or voucher, came into use on the Navy's Asiatic Station before World War II.

It is derived from the Hindu word "citthi," and today is the name of the form used when asking for leave or any special requests.

Jacobsen to relieve Linehan as Chief, Education & Training

Commander Jayne W. M. Jacobsen will become Chief, Staff Education and Training at the end of next week when Commander Patricia A. Linehan departs for a new assignment with Naval Regional Medical Center, Jacksonville, Fla.

Commander Jacobsen reported earlier this summer from NRMCM Long Beach where she was assigned about six years. Other duty in her 12 years of Navy service have been with NRMCM San Diego and Naval Hospital, Yokosuka, Japan.

The Navy nurse holds a bachelor of science in nursing from West Chester (Pa.) State College, a master's in education from Pepperdine University in Malibu, Calif., and the Humanitarian Service Medal and National Defense ribbon.

She said she hopes to continue to develop and coordinate effective staff development programs for all the health care members and is "delighted to be here at NRMCM Oakland," looking forward to a challenging and rewarding assignment.

The daughter of Dr. and Mrs. Jay Rice Moody of Newport, R.I., has a brother, Commander William B. B. Moody, in the line Navy. He is presently stationed in Munich, Germany.

CDR Jayne Jacobsen

Commander Jacobsen is married to retired Marine Corps Lieutenant Colonel Donald Eric Jacobsen. They make their home in Livermore.

The new education officer enjoys skiing, golf, tennis and horseback riding.

NIS 'bust' leads to conviction

On July 28, 1982, a General Court Martial found a junior officer guilty of all charges and specifications involving the sale, use, possession and transfer of marijuana. He was sentenced to five years confinement at hard labor, forfeiture of all pay and allowances, and dismissal from the service. (For an officer, dismissal from the service is equivalent to a dishonorable discharge.)

The court martial grew out of a Naval Investigative Service investigation into drug trafficking earlier this year which resulted in the apprehension of a group of individuals on March 1.

The individual began serving his sentence at a Navy brig but will be transferred to the federal facility at Leavenworth, Kans., for the balance of the sentence.

Applications sought for clerical positions

Applications will be accepted by Oak Knoll's Civilian Personnel Service over the next four months for anticipated Medical Clerk and Clerk Typist vacancies at Naval Regional Medical Center Oakland and its branch clinics at Alameda, Concord, Vallejo, Moffett Field, Treasure Island, and Naval Supply Center, Oakland.

Clerk-Typist and Medical Clerk (Typing) GS-3 jobs, described in Vacancy Announcement No. 105182), are open until Dec. 30, while applications for Medical Clerk and Medical Clerk (Typing) GS-4 positions, described in Announcement No. 97182), will be accepted through Jan. 19, 1983.

Only those qualified personnel who are appointable federal employees, reinstatement eligibles, Veterans Readjustment Appointment eligibles, or within reach on an appropriate OPM

register may be considered. Call Civilian Personnel Service, 639-2116, for further information.

Navy civilian wins national award

A Navy employee has saved the service about \$738,000 and won a national award by helping handicapped people make the best use of their skills.

Frank G. Cherry coordinates handicapped affairs at the Naval Air Rework Facility, Pensacola, Fla., and heads the "Special Emphasis Work Program" for disabled employees at the facility.

He received the annual John E. Fogarty Public Personnel Award from the President's Committee of the Handicapped in June for "his outstanding contribution in providing job opportunities and developing and instituting programs for disabled people in a public agency," the committee said.

One of Cherry's innovations is a reclamation workshop staffed by eight to 10 handicapped people who screen hardware removed from aircraft, or during reassembly, for reuse. Records show the shop has saved the Navy about \$738,000 in a little over two years, not including salaries.

Garden open house

An open house and exhibit of the art of Penny Edwards will be held from 2 to 4 p.m. Sunday, Sept. 19 at the Botanic Garden Visitor Center in Tilden Regional Park, Berkeley.

Edwards is well-known for her watercolor paintings with wildlife and conservation themes.

DD launches war on drunk driving

Currently, there is a groundswell of American public opinion demanding tougher action against intoxicated drivers. Citizens groups such as Mothers Against Drunk Drivers (MADD) and Remove Intoxicated Drivers in Missouri (RID-MO) are demanding action from local officials. States are beginning to toughen both their laws and their enforcement of those laws. The U. S. Senate has passed a bill calling for tough and effective action against drunk driving and members of the House of Representatives introduced similar legislation. President Reagan has appointed a 30-member Presidential Commission of Drunk Driving to combat what he called "the epidemic of drunk driving on the nation's roads."

About 500 servicemembers in the Department of Defense were killed last year as a result of intoxicated driving. Injury and property damage costs to DoD were estimated at about \$100-\$150 million. During the 10 years of the Vietnam conflict, the United States lost six times as many persons to drunk drivers as we lost to the enemy.

Early June of this year, the Office of the Secretary of Defense hosted an action planning conference to develop DoD goals and objectives for an expanded program to combat driving while intoxicated. This program is scheduled to get underway in the fall and build toward the Christmas-New Year's holiday season.

VISITORS—LCDR Ronald Straub (center foreground) explains the operation of the Tri-Laboratory system here to five visiting Army officers from the William Beaumont Army Medical Center in El Paso. The Texas hospital's Chief of Laboratory Service, Head of Chemistry, Chief and Assistant Chief of Data Processing, and Comptroller paid a site visit to Oak Knoll to look at our system as a possible alternative to their own.

New CHAMPUS processor for western states' claims

Military families in Arizona, California, Nevada and New Mexico will have the CHAMPUS claims processed by Blue Cross of Washington-Alaska starting Jan. 1, 1983.

Families covered by CHAMPUS in the four states should continue to send claims to Blue Shield of California through Dec. 31, 1982. Families will be informed about the address and phone changes for the new claims processor in the coming weeks.

The Civilian Health and Medical Program of the Uniformed Services (CHAMPUS) is the Defense Department's health benefit plan for military families who must get medical care from civilian hospitals and doctors.

Docent training to start at Sunol

A Docent Training Field Studies session will be conducted from 9:30 a.m. to 12:30 p.m. Tuesdays and Thursdays, Sept. 30 through Dec. 9 at Sunol Regional Wilderness in southern Alameda County.

Participants will learn about the history and ecology of Sunol, and can obtain two units of credit through the master's degree in education program at California State University, Hayward.

Docents are volunteers with talent for working with children, who assist park naturalists in helping youngsters gain an appreciation of natural history.

To remain a docent after program completion, the volunteer must conduct a minimum of two programs per month throughout the school year, remain active for a year, and attend mandatory meetings.

More information and an application may be obtained by sending a self-addressed stamped envelope to Sunol Regional Wilderness, P.O. Box 82, Sunol, Calif. 94586. Indicate if you wish to take the training for credit.

This year is the 10th anniversary of the docent program at Sunol. Anyone interested in a Saturday docent class at Sunol may contact Carleen Bruins, wilderness volunteers coordinator, at the park, telephone 862-2244.

(East Bay Log)

CHAMPUS director Theodore D. Wood announced on Aug. 9 that a \$7 million contract was awarded to Blue Cross of Washington-Alaska to process all claims for the southwest region of the U.S. Starting Jan. 1, 1983, CHAMPUS claims for care received in the four states will no longer be processed by Blue Shield of California. The new contract runs for one year, with options for a second and third year.

The new contract is the first time that the claims processor for these four states will be under an incentive-type contract. That means Blue Cross of Washington-Alaska will be subject to bonuses or penalties for speed and quality in paying claims.

The next collection here by Irwin Memorial Blood Bank is scheduled from 7 a.m. to 3 p.m., Sept. 8, on 5 East. You may make appointments to donate through your department keyperson. Any questions should be referred to the Blood Bank staff at Ext. 2329 or 2283. Please give so that others may live.

Special Peds service for routine physicals

A special Pediatrics Clinic to provide routine physical examinations for healthy children between the ages of 3 to 13 years of age is held every Tuesday morning from 9 to 11 a.m. in the Adolescent Clinic, Bldg. 62B. Appointments should be made with the Central Appointment Desk, 639-2501.

Three pediatricians staff the weekly clinic, which has been set up for the physicals required by schools, camps, sports activities and general health maintenance. Special, handicapped, or

ill children are excluded from this clinic as are adolescents who should still make their appointments for physical examinations through the Adolescent Clinic.

The State of California requires health examinations of all students within an 18-month period before entering first grade in the public school system. Children new to the state are given a grace period of three months in which to obtain the exam.

PHS Surgeon General warns about marijuana

The Surgeon General of the Public Health Service has issued the following warning on marijuana:

Marijuana use is a major public health problem in the United States. In the past 20 years, its use has increased 30-fold; it is estimated that more than a quarter of the American population has used it. The age at which persons first use marijuana has decreased gradually to the junior high school years. Until recently, nearly 11 percent of high school seniors used it, and although that figure has declined to 7 percent, its daily use still exceeds that of alcohol; more high school seniors use marijuana than smoke cigarettes. In a recent study, 32 percent of those surveyed had used marijuana during the previous 30 days, while 25 percent had smoked tobacco.

On March 24, 1982, the Department of Health and Human Services submitted to Congress a report reviewing the consequences of marijuana use. *Marijuana and Health, 1982*, ninth in a series, is primarily based on two recently conducted comprehensive, scientific reviews by the Institute of Medicine and the National Academy of Sciences, the Canadian Addiction Research Foundation, and the World Health Organization (WHO). Both independent reviews corroborate the Public Health Service's findings of health hazards associated with marijuana use: Acute intoxication with marijuana interferes with many aspects of mental functioning and has serious, acute effects on perception and skilled performance, such as driving and other complex tasks involving judgement or fine motor skills.

Among the known suspected chronic effects of marijuana are:

—Short-term memory impairment

and slowness of learning.

—Impaired lung function similar to that found in cigarette smokers. Indications are that more serious effects, such as cancer and other lung disease, follow extended use.

—Decreased sperm count and sperm mobility.

—Interference with ovulation and prenatal development.

—Impaired immune response.

—Possible adverse effects on heart function.

—By-products of marijuana remaining in body fat for several weeks, with unknown consequences. The storage of these by-products increases the possibilities for chronic, as well as residual, effects on performance, even after the acute reaction to the drug has worn off.

Of special concern are the long-term developmental effects in children and adolescents, who are particularly vulnerable to the drug's behavioral and psychological effects. The "amotivational syndrome," characterized by a pattern of energy loss, diminished school performance, harmed parental relationships, and other behavioral disruptions, has been associated with prolonged marijuana use by young persons. Although more research is required, recent national surveys report that 40 percent of heavy users experience some or all of those symptoms.

The Public Health Service concludes that marijuana has a broad range of psychological and biological effects, many of which are dangerous and harmful to health, and it supports the major conclusion of the National Academy of Sciences' Institute of Medicine.

Things that go "bump in the night" may be no more frightening than one of your children sleepwalking. But if that's all it is, say investigators from the Pennsylvania State University College of Medicine, Hershey, don't wake him or her—just lead the sleeper gently back to bed. Rude awakening leads to confusion and fright. Sufferers of "night terrors," the article in the *Archives of General Psychiatry* reports, should be treated in the same gentle way. Forcibly interrupting a night terror episode may result in more terror and confusion and aggravate the patient's violent behavior. Sleepwalking and night terrors occur most often in childhood. In adults it sometimes indicates an underlying emotional problem that may require treatment. Fortunately for the weary parents of sleepwalkers the condition is usually outgrown.

...

An historical review of 218 reports dating from 1795 to 1981 and covering 220,037 women has confirmed that modern girls begin their menstrual function (menarche) at an earlier age than they did in Jane Austen's day. In fact, according to the report contained in *The New England Journal of Medicine*, the age of menarche has historically begun two months earlier, on the average, every decade. Thus in 1877 the average age was 14.75 years, about 14 years at the turn of the 19th century and 12.8 years in 1947. This downward trend apparently leveled off in 1947. The findings in Europe and the United States confirm the fact that undernutrition and strenuous physical exercise will delay menarche. In poor girls in developing countries the age of menarche is 15 years.

Chaplain's Corner

A new look at Psalm 23

By Fr. S.D. Tambourin
LCDR, CHC, USN

Psalm 23. "The Lord is my shepherd. . . ." is a favorite, oft-quoted psalm from the Bible. It has the power to say many things for us, according to our mood, and even according to the culture from which we come. The following free translation from the Japanese opens its meaning in a new and fresh way:

The Lord is my Pace-setter,
I shall not rush;
He makes me stop and rest
for quiet intervals.
He provides me with images of stillness
which restore my serenity;
He leads me in the ways of efficiency
through calmness of mind
and His guidance is peace.
Even though I have a great many things
to accomplish each day,
I will not fret, for

His presence is here.
His timelessness, His all-importance
will keep me in balance;
He prepares refreshment and renewal
in the midst of my activity
by anointing my mind with
His oils of tranquility.
My cup of joyous energy overflows,
Surely harmony and effectiveness
shall be the fruits of my hours,
For I shall walk in the pace of my Lord,
and dwell in His house ever.

ARMED FORCES VOTERS WEEK

SEPTEMBER 6—13

Reservations close today for 'welcome' luncheon

The Naval Regional Medical Center Officers Auxiliary will hold a "welcome aboard" luncheon honoring all new wives to the command on Sept. 8 in the Officers' Club on base.

A get-acquainted period will begin around a fruit punch bowl in the courtyard of the club at 10:30 a.m., followed by a luncheon in the ballroom at 11:30 a.m. Lunch, costing \$6.25 each, will feature chilled curried pea soup, oriental chicken salad, pineapple muffins, chocaholic cheesecake and coffee or tea.

Rear Admiral Robert C. Elliott, NRMC Oakland Commanding Officer, will address attendees. Board members and area welcoming representatives will be introduced.

The reservation deadline is TODAY. If you have not made yours yet, telephone it in to Roseann Healy at 562-1975 *immediately*.

More commissaries to carry generics

In a continuing effort to improve customer service, the number of Navy commissary stores carrying generic (other than brand-name) products will increase in response to continuing patron demand. The generic items, black and white labeled products, are priced substantially lower than comparable brand-name products.

Navy commissary stores initially tested the sale of generic items in the Norfolk, Va. area in March 1981. Enthusiastic patron response led to addition of generic sales to 35 CONUS and five overseas stores by May 1982. Current plans call for their expansion to all CONUS commissary stores and most major overseas stores by the end of this year. The overseas stores will eventually carry approximately 40 of these items while commissary stores in

the U. S. are stocking 40-60 items.

The generic section consists of a variety of quality goods in a broad range of household and grocery products. Commissary store officials state that items selected are based on customer demand and results of price comparisons between generic and brand name products. Only those items offering significant savings are considered for stockage. Furthermore, to ensure quality, only those generic items listed on the Defense Personnel Support Center supply bulletins are considered for sale in Navy commissary stores.

Quality generic items offered a low-priced alternative to brand name products and generate additional savings to customers.

Public ceremony at Crown Beach

A public celebration evoking Alameda's good old days is planned for Thursday, Sept. 16, to mark completion of the restoration project at Robert W. Crown Memorial State Beach.

Ceremonies will begin at 11:30 a.m. at the beach, whose entrance is located at Westline and Otis drives in Alameda.

Bus companies offer military reduced fares

In a trial program which began July 10, 64 bus companies introduced discount leave fares for active duty military people and their families who are traveling at their own expense between the 48 contiguous states.

The discounts range from 25 to 40 percent and are available only for interstate travel—travel between states, not within a state. The following discounts are in effect:

—Twenty-five percent discount when standard interstate fare is between \$40 and \$60.

—The discount fare is a flat \$45 when the standard interstate fare is between \$60 and \$75.

—Forty percent discount when standard interstate fare is more than \$75.

Where applicable, discount fares will be rounded to the next highest \$5 increment.

In addition to active duty military people, service academy cadets and uniformed Coast Guard people and their family members are eligible for the reduced fares.

Active duty service members are not required to wear their uniforms to take advantage of the fare discount, but service members and their families should be prepared to furnish military identification. Family members must travel with their sponsor to receive the discounts. Family members five years old or younger may travel free of charge.

The trial discount program will remain in effect through November 1982 and may be discontinued after that date if the level of use does not justify continuance. (NES)

The public is invited to attend, bring picnic lunches, and enjoy the shoreline, newly replenished with beach sand.

Keynote speaker will be Huey Johnson, Secretary of Resources, State of California. Other public officials invited to attend are U. S. Rep. Fortney (Pete) Stark, D-Oakland; State Sen. Nicholas Petris, D-Oakland; State Assemblyman Elihu Harris, D-Oakland, and Marty Mercado, Director, State Department of Boating and Waterways.

Petris and Harris were instrumental in obtaining state funds to help with the beach restoration.

In the heyday of beach resorts and amusement parks, Alameda was considered the "Coney Island of the West." In recent years, however, a persistent erosion process nibbled away at the shoreline. Alameda Beach Restoration Project was the solution.

The project has involved dredging more than 200,000 cubic yards of sand from the bottom of San Francisco Bay and pumping it onto the beach. Cost of the sand dredging phase was \$2.1 million, of which the state furnished \$1.3 million from the Energy Resources Fund. Alameda and East Bay Regional Park District each contributed \$300,000, and accrued interest provided the rest.

Phase II of the project, involving landscaping, bicycle paths and construction of erosion-impeding breakwaters, will be accomplished with \$585,000 in state money.

(East Bay Log)

The following addition to the medical center "family" has arrived at Oak Knoll:

A baby boy to Hospital Corpsman Caroline S. Lynch, 5 West, and her husband Jeffrey, Aug. 10.

Bowling league now forming

A mixed bowling league, to play Tuesday nights, is now forming here at Oak Knoll. League play starts at 6:30 p.m. on Sept. 14 and will continue thru April.

All interested Officers and Enlisted may get more information by calling Jack Hellyer at 2511 or Ken Crawford at 2467.

Branch clinic officers in All-Navy events

Three officers from the region's branch clinics have been selected to tryout for Navy teams in interservice sports championships.

Medical Corps Commander Leslie I. Sechler of the Moffett Field Branch Clinic was selected to participate in the 1982 Navy Men's and Women's Golf Trial and Training Event, Sept. 1-11 at NAS Pensacola, Fla.

Medical Corps Lieutenant Commander Walter H. Wood of Treasure Island clinic and Lieutenant (junior grade) John D. Shepardson, Medical Service Corps, Mare Island industrial clinic, are participating in the 1982 Sea Services Chess Championship now underway at Ft. Meade, Md.

Discount for military

Dwight and Pearl Tucker offer a discount to military personnel of NRMC Oakland at their Gourmet House of International Coffee, 4166 MacArthur Blvd., Oakland.

Their cafe features imported teas, cappuccino, espresso, soups, croissants and other pastries, sandwiches, candies, ice cream, etc.

It is open from 9 a.m. to 7 p.m., Monday through Saturday.

State Fair is on

One of the largest fairs in the nation, the California State Fair, opened Aug. 24 at its permanent exhibition grounds in Sacramento and will run through Sept. 6.

Admission is \$5 per person weekdays; \$7 weekends; children under 4 years of age, free.

The fair, which annually draws nearly a million visitors, features exhibits from all California counties, plus industrial and cultural displays, horse racing, top name entertainment, rides, carnivals, agricultural and stock judging, etc.

A fair official telephoned us this week to advise that Friday, Sept. 3 (today) is Military Day at the exposition. All military officers and enlisted personnel in uniform will be admitted free of charge to most attractions. The carnival section is excluded under this invitation.

Low food, fun cost with coupon book

Special Services is still offering a coupon book that gives 54 pages of "super discounts" to active duty, reserve and retired military personnel, and federal civilian employees and their dependents.

The discounted books, which sell for \$3.50 each are good through March 31, 1983. They provide reduced prices at Arby's, Armadillo Pizza, Bonanza Steak, Burger King, Dandy Dogs, Denny's, H. Salt, Esq., IHOP, Mountain Mike's Pizza, Orange Julius, Pioneer Chicken, Rustler Steak House, Shakey's Pizza, Sizzler, Taco Bell, Taco Bravo, Taco Charly, Wendy's, and 7-Eleven.

Also, entertainment offered by the Blue and Gold Fleet, Earthquake Soccer, Golfland Miniature Golf, Guinness World of Unexplained, Haunted Gold Mine, Oakland A's, Old San Francisco, Ripley's Believe It or Not, Wax Museum, and Winchester Mystery House.

CELEBRATION TIME—"A Star Is Born" was the theme of a dinner dance held here Aug. 13 to commemorate the 35th Anniversary of the Navy Medical Service Corps. The theme referred to the announcement of the corps' first one-star officer, Commodore Lou Angelo.

Photo contest announced

The U. S. Naval Institute's annual naval and maritime photo contest is under way. The contest is open to all

civilian and military people, and both amateur and professional photographers may participate. Entries must pertain to naval or maritime subjects and may be black and white prints, color photographs or color transparencies.

Awards of \$100 each will be given to the top 10 photographs selected by the institute as prize winners. Winning photos will be published in *Proceedings*, the monthly magazine published by the Naval Institute, and will be displayed at the institute's annual meeting.

Deadline for entries is Dec. 31, 1982. Contest rules are available by contacting the Membership Services Department, U. S. Naval Institute, Annapolis, Md. 21402, phone (301) 268-6110.

Sea World offers birthday discounts

In celebration of the 207th birthday of the Navy, Sea World will offer 30 percent discounts to Navy and Marine Corps personnel and their families, Oct. 2-17.

Families who visit the park will be treated to a new killer whale show, the entertaining dolphins troop, and a cameo appearance of Avalon the pilot whale. Also in the Underwater Theater continuous entertainment is presented. Many educational exhibits and scenic ponds are located throughout the park.

The coupons may be picked up at the Special Services Office at the Navy Exchange building. With the discount, adults will be admitted to Sea World for \$6.95 and children, three through 11, for \$4.85. Children under three will be admitted free. As an additional bonus, a 30 percent discount will also be in effect for behind-the-scenes guided tours.

1979-33235-689-150/11

TRAVEL ON LESS PER DAY... THE MILITARY WAY

Looking for a low-cost vacation this year? Then perhaps you should consider traveling on less per day...the Military way. Two major all-ranks R&R hotels, the KMC military resort on the island of Hawaii and the popular Sanno Hotel in Tokyo, are covered in depth in the Special Jumbo 11th Anniversary issue of MILITARY LIVING'S R&R Report.

These two very different types of facilities are given the famous R&R Report blow-by-blow treatment with all the info needed to plan a low-cost vacation this year.

Also included in the birthday issue are features for those who want to hitch-hike on U.S. military aircraft, to include official hand-out info from military air terminals at Hickam AFB, Hawaii, the RAAF Base in Richmond, Australia and Elmendorf AFB in Alaska. In an upcoming issue, R&R will publish special charts giving complete info on Space A air travel out of all major U.S. terminals plus the MATCHO departure points from civilian airports.

A popular feature of Military Living's R&R Report is the CAMARADERIE department which serves as a clearinghouse for reader's trip reports and comments. Campers will also enjoy features on various military camping areas around the world.

In celebration of showing military families "how to travel on less per day...the military way," for over 11 years, Military Living's R&R Report is extending a one-time offer to military families. They will send you their special Jumbo Birthday Issue which includes the two R&R centers and a second surprise back issue for only \$2 to cover their costs. Or, if you prefer, you may get an introductory one-year (six issues) subscription PLUS a FREE copy of the Jumbo issue for only \$10. Please mention the words "Birthday Special!" Write to Military Living R&R, Birthday Special, PO Box 4010, Arlington, Va. 22204. Subscription orders are accepted by phone if you have a Visa or Mastercard. Sorry, no collect calls. Phone (703) 521-7703 or 521-2927.

OAK LEAF

Naval Regional Medical Center, Oakland, California

Vol. 44, No. 18

Friday, September 17, 1982

CDR Shimer in charge

Navy Drug Screening Laboratory expands

The Chief of Naval Operations has reiterated his objectives and determination that the use and trafficking of illicit drugs be stamped out in the Navy. In a message dated Sept. 3, he stated, "The war on drugs remains the same priority with the CNO as previously disseminated... we must not relent."

An immediate objective is for the five Navy Drug Screening Laboratories (NDSL) to increase productivity and provide a turn-around time of five working days on the testing of urine samples. In concert with this objective, all of the drug screening laboratories will be expanded immediately, with an influx of personnel and additional equipment.

The NDSL, Oakland will more than

double in size over the next few weeks, with in excess of 50 additional military personnel reporting for at least five months temporary duty.

As part of our preparations to meet increased production needs and to provide the requisite program management, the Drug Screening Laboratory has been separated from Laboratory Service, and it is now a separate clinical service under the direction of Commander Gary Shimer, Medical Corps, U.S. Navy.

Dr. Shimer, who has recently reported from the Armed Forces Institute of Pathology, will have as his administrative officer Lieutenant Commander Paul Bolduc, Medical Service Corps, formerly assigned to the Pre-

ventive Medicine Service. MSC Lieutenant Commander David M. Kouns will continue to serve as head chemist.

"The expansion of the Drug Screening Laboratory is one of the highest priorities of the Navy Medical Department. I want the regular Oak Knoll staff to extend a warm welcome to those reporting in to lend a hand with this very important task," said Captain H. James T. Sears, Director of Clinical Services. "They have been uprooted from their families and normal duties throughout the Continental United States, and we should do everything we can to help get them settled and make their tour of duty at NRMC Oakland a pleasant one. They have been sent here to help us."

Two-week visit

OPM to evaluate personnel management here

Beginning Sept. 27, the Office of Personnel Management (OPM), successor to the Civil Service Commission, will conduct a personnel management evaluation at Naval Regional Medical Center, Oakland. The evaluation team will be here two weeks and will consist of representatives of OPM and the Western Field Division of the Navy Civilian Personnel Command. Thomas E. Mason of OPM will lead the team.

Employees and representatives of the International Brotherhood of

Electrical Workers, who so desire, may talk with members of the evaluation team. While the members will be available to receive any information employees feel would benefit the team in conducting the evaluation, team members will not be in a position to take action on individual grievances or other problems of an individual nature.

Such information will only be used in evaluating the personnel program and in determining the need for possible

improvements in personnel management.

Sherry Robinson of Civilian Personnel Service will be the coordinator for those desiring to talk with members of the team. She can be reached at Extension 2116. Members of the team may also be contacted directly during the evaluation. They will be located in the Civilian Personnel Training Room in Building 73B and may be reached at the same telephone extension. Since they will be conducting the evaluation

away from the office during much of the time, early morning would be the best time to reach them. Contact may also be made by writing to the team leader, Mr. Mason, at the Office of Personnel Management, Western Region, 525 Market Street, 23rd Floor, San Francisco, CA 94105.

Any request to talk with members of the team should be received as near the beginning date of the evaluation as possible to minimize any possible conflicts in scheduling.

Medical Center's ER team ready for most emergencies

By Pat Heaphy

Emergency Medical Week, Sept. 12-18, has been set to make the public aware of hospital emergency departments throughout the United States and their contributions to the medical field. More than 82 million Americans

visit emergency rooms in hospitals each year. Here at Naval Regional Medical Center Oakland, 1,500 are seen each month. Oak Knoll has qualified staff on duty, around the clock, with modern equipment and facilities to care

for most any type of emergency.

Besides the civilian humanitarian cases, of which NRMC does its share, the bulk of our patients seen in the emergency room are retired or dependent; in fact, 75% of the workload comes from this group. Around 15% of the people seen in the emergency room each day are admitted as inpatients. The remainder, if care is not completed at the time of the initial visit, are directed to the proper clinic or facility for continued treatment.

The emergency room is manned by one staff physician and an intern as well as two nurses and two medical corpsmen. What seems to be chaos to the layman's eye is really a smooth-running emergency department. CDR Bernard Thomas, Chief of the Emergency Room and Primary Care, said that when patients come in the door a form of triage is done at the front desk. This includes testing for vital signs and determining basic nature of the visit. After this initial diagnosis the patient is cared for according to the severity of his or her illness or injury.

The emergency room is divided into six different patient care areas. The first is the Code Four Room, which at first look appears to resemble a stage for a science fiction movie. What it really is and how the qualified staff uses it makes the difference. The room is ready at any moment for the most extreme cases. The second most

important room is the Chest Room. If a patient comes into the hospital with a chest pain or related problem, he is placed in that area where the best possible emergency equipment for that type of problem is readily available. Three areas are set aside for general emergencies and a fourth area is for gynecology patients.

At the present time, CDR Thomas said, the staff is working on making space available in the emergency room for people who come in with problems that do not need a bed or specific medical equipment. This, Dr. Thomas and his staff feel, will improve the emergency service by freeing space for the more urgent cases.

QA workshop next week

Quality Assurance committee members and the heads of several clinical services will attend a two day Quality Assurance/Risk Management workshop to be held here Sept. 23-24.

Serving as faculty will be instructors Eric Joseph and Paul Kessler of Care Communications, Inc.

ER TEAM AT WORK — In this simulated Code 4 situation, two physicians do the preliminary examination while a corpsman assists in taking the "patient's" vital signs.

Editorial---

Semana de Herencia Hispana 12-18 Septiembre 1982

Our friends write...

...I was treated at Oak Knoll Naval Hospital three times during the past week and a half... seen as an outpatient in the Primary Care Clinic.

I would like to express my appreciation to Dr. DeMarco for the competent, caring treatment which he provided on all three visits. Although he had an unusually demanding patient load, he gave me personalized attention throughout the week and he was thorough in his laboratory evaluations to help in my diagnosis. I especially appreciated his going the extra mile on consulting other physicians. Not only was he patient, but he made himself and other hospital services available to me on an emergency basis. On one occasion he worked me into an already over-crowded schedule on short notice and continued to give me professional, personalized care.

As a senior nursing student I recognize and appreciate a physician who goes above and beyond the call of duty. Please commend Dr. DeMarco on his professionalism and competent care.

I would also like to extend a special thank you to the corpsman who draws blood in the Lab. He is an asset to your staff and his humor helped when all else seemed rather dim.

I appreciate your staff of professionals.

DeLayne Roethe
Walnut Creek

(To Drs. Mary Burchell, Roberts, Dickey, Whitman, Haller, Allshouse, Kase and staff of ICU and Ward 6 North)... I am writing this letter to all of you to express my sincere gratitude for the exceptional service you gave to me during my recent illness.

Before I entered the hospital, I asked the prayers of my brethren and sisters-in-Christ, that God would guide the hands that administer to my care. I now know with full assurance that those prayers were answered through each of you, and for this I am forever grateful. The dedicated and competent manner in which my surgeries were performed, and the tender loving care shown afterward during my recovery were instrumental in enabling me to regain my health as speedily as I have. Thank you, and may God bless each of you.

Mildred Perkins
Oakland

I'm going to try and inform you of the most kind and courteous service I've received from the hospital. This includes the doctors all the way to the corpsmen.

There is not enough they can do for you. If you happen to be out on cloud nine, they will ask if there's anything wrong or if they can do anything for you.

I can't even complain about the food, but there is one thing I'd like to say though... these nurses are overworked, but never have I heard one word of complaint. Sometimes after their shifts they really look beat.

I haven't been on all the wards but these facts are true for Wards 8S and 6N, and I might add, the Radiation Therapy people (civilians).

James E. Fleeman
Retired Enlisted

I would like to express my deepest appreciation and gratitude to the staff of the Alcohol Rehabilitation Service at your hospital. Their dedication and love have helped me considerably in making a new start on life.

This, I believe, is an extremely valuable service which helped me to renew my faith in myself and my fellow humans. Again, my sincerest thanks.

"Alan"
NAS Moffett Field

I would like to take this opportunity to compliment you on one of your apprentices, H.A. Cordier. I pick up the mail for Southern Illinois University daily, and I have been pleasantly impressed more than once.

Mr. Cordier is always dressed very neatly, and deals with people with a good, professional attitude. When I pick up the mail from him, he is fast, yet efficient, apparently perusing the mail to be sure it has been correctly placed in our slot.

What has prompted me to write this note is that a few days ago when our books for the next class arrived, Mr. Cordier was polite enough to help me by carrying the books to my car (40 books can be very heavy). Before this time, I usually had to struggle with the books, waiting outside the doors for some kind person to open them for me. Having Mr. Cordier assist me was certainly a welcome change.

Shelley Souza
Southern Illinois University

President Ronald Reagan has proclaimed this week as National Hispanic Heritage Week, in honor of the hispanic people who have enriched our daily lives, our traditions and our national security.

The theme for this year's observance in the Department of Defense is "Hispanic Americans: Progress in Military and Civilian Careers."

Secretary of Defense Caspar Weinberger, in a memorandum to top military leaders, noted, "Hispanic-Americans have contributed significantly to the defense of our nation... the Department of Defense owes a debt of gratitude to hispanics for their contributions to the culture, heritage and freedom of the nation."

President Reagan, in his proclamation, observed that "in times of war, Hispanic Americans have defended our nation with pride and courage. Thirty-nine of them have received the Medal of Honor, America's highest military decoration. This is a higher proportion of such heroes than in any other group, and we salute their sacrifices and courage."

Command Line

'Brown Bag' Area

COMMENT: Can the command provide a pleasant lunchroom or area for those of us who "paper bag" it?

REPLY: It is unfortunate that many of the human aspects of engineering design were not addressed in the construction of Building 500. The lack of an adequate facility for employees to eat lunches is certainly high on the list. This problem has been addressed on many occasions since occupancy in 1968.

Alternatives have included sectioning off a portion of the main dining facility and allocation of areas on Floors 6 through 9. Regulations specifically prohibit "brown baggers" from eating with individuals who purchase meal tickets. The use of patient-care floors is not feasible when contingency requirements are considered.

The issue is still active and alternatives are being developed by the Chief, Operating Management Service. Suggestions for a viable solution to this problem are most welcome and should be addressed to LT M.P. Lawson, Chief, Operating Management Service.

Getting a Fair Break

COMMENT: If I have a grievance how do I go about getting a fair break?

REPLY: The provisions of the grievance procedure are designed to give the employee a "fair break," but they must be used effectively. Possibly the most important thing to do is to present the facts as reasonably as possible, avoiding angry, inflammatory, or accusative statements. In other words, stick to the facts.

Another provision to assure a "fair break" is the right to a representative. A representative need not be an attorney, although an attorney is permissible, but should be someone who can be relied on for assistance in presenting the grievance and explaining the employee's side of the matter.

The designation of the Chief of Service or equivalent as the deciding official in most formal grievances assures an employee with a grievance access to the highest level of management within a service.

If the Chief of Service is the one directly involved in the matter being grieved, access is provided to a higher level as the deciding official. By using the provisions of the grievance procedures effectively, an employee can get a fair break.

(Correction: Command Line carried an item about uniform sales at the Naval Exchange in the Sept. 3 issue of Oak Leaf. The telephone number for assistance in ordering uniform merchandise was in error. Those who need help in ordering, should call Mary at ext. 2151.)

Opinions contained herein are not official expressions of the Department of the Navy. THE OAK LEAF receives American Forces Press Service and Navy News material.

Contributions from both staff and patients are welcomed and should be addressed to the Editor of the OAK LEAF, Naval Regional Medical Center, Oakland, CA 94627.

Inspector General and team visit NRMCC Oakland

Q'S AND A'S—Master Chief Hospital Corpsman John Jackson answers questions from the floor during a Clinical Assembly meeting with enlisted staff members.

COMMON CAUSE—Cheryl Crosswell of the IG team evaluates the Equal Employment Opportunity program of the command, conferring with Weldon, a medical center staff member.

CONFERENCE—IG team members comparing notes are (clockwise): Captain Barry Nelson, Captain Loyd Nichols, Commander Paul Johnson, Lieutenant Commander Wayne Glover and Lieutenant Commander Mary Frey.

INSPECTING WARD SUPPLIES—Rear Admiral Roger F. Milnes, Inspector General (Medical) and team leader, checks supplies against records in one of the hospital's inpatient wards.

HERB TO HERB—Herb Lindemann (II), Chief of Civilian Personnel, answers questions of IG team member Herb Margerum, whose normal duties are with the Western Field Division of the Naval Civilian Personnel Command in San Diego.

DIFFICULT OPENING—Captain Bernadette McKay, Nurse Corps representative on the IG team gets some advice from two Oak Knoll nurses on how to open a packet of medication with a safety cap. The advisors are (l to r): Lieutenant Jean Thurber and Lieutenant Commander Sharon Figg.

(Another photo, Page 4)

New health care coordinator here

Captain James H. Black has taken over the billet of Regional Health Care Coordinator for this command. No stranger to Oakland, he was an occasional visitor here in his former position as Medical Corps Assignment Officer for the Bureau of Medicine and Surgery and the Naval Military Personnel Command.

Dr. Black is a flight surgeon who, in previous assignments, served as Senior Medical Officer of the USS RANGER (CV-61) and as Head of the Aviation Physical Examination Review Section of BuMed.

He has been in the Navy eight years and holds the Navy Commendation Medal and Sea Service ribbon.

Dr. Black attended Gettysburg College and the Philadelphia College of Osteopathic Medicine. His hometown is Camp Hill, Pa., where his parents still reside.

The captain, his wife JoAnn, and three of their children live in quarters on medical center grounds. Another daughter makes her home in Arlington, Va.

While stationed in the Virginia area, Captain Black officiated at local swim league meets and was a member of the board of directors for a community swim-tennis club. He also enjoys the sport of scuba-diving.

Other hobbies include travel and playing English hand bells.

CAPT James H. Black

Tax bite may offer bonus for civilians

Civil Service employees who have worked only for the federal government and are anticipating retirement in the near future may find that it will be to their advantage to postpone retirement until after Jan. 1, 1983.

On that date, all federal employees will begin paying a new 1.3 percent tax for medicare benefits. These workers will qualify fully for medicare even if they work only a month after tax is levied. In some instances, if they continue their federal employee health benefits insurance, they can be covered up to 100 percent of hospital expenses. Also, by paying an optional \$13 a month premium at age 65, and keeping the present health insurance in force, they can be reimbursed for doctors' bills, prescriptions, etc., up to 100 percent of the expense.

There is also a possibility that such retired employees may be able to transfer, at age 65, from high to low option on their health benefits plan and still have the same complete coverage.

Other federal employees who also qualify for Social Security retirement benefits from other jobs they held before government service would gain no advantage in postponing retirement until next year as they already qualify for medicare.

CO addresses meeting

Better communications is civilian board's goal

Rear Admiral Robert C. Elliott, Commanding Officer, Naval Regional Medical Center, Oakland, addressed an Aug. 17 meeting of the Civilian Employee Advisory Board (CEAB), telling its members that they represent this center's workers to the command and serve as his advisors. He declared that he believes in giving explanations for his actions and expects honest feedback, better communication and support from the board in behalf of the civilian staff.

The commanding officer announced implementation of several methods for better communications, including weekly "Admiral's Call," with 20 to 30 employees at a time, the "Command Line" in Oak Leaf, an unannounced visit by the admiral to work areas and clinics for informal talks with personnel.

Other matters discussed included the roles of the Deputy Equal Employment Opportunity and Civilian Personnel Service staffs, the recruitment of members by the American Federation of Government Employees, the evaluation of civilian personnel matters by the

Inspector General (Medical) team, and parking problem of those working nights and weekends.

Complete minutes of each CEAB meeting will be posted on the bulletin board across from the main dining room on the third floor of the hospital.

Civilian employees who would like an issue discussed are encouraged to contact any of the following representatives directly: Robert Thompson, Supply Department (Ext. 2315); Beverly Billman, Alameda Branch Clinic (869-2978); Charlotte Simonson, Adolescent Clinic (2488); Betty Anderson, Special Chemistry (2219); Doris Parrish, Food Service (2493); Sam Barnett, Fire Department (2327); Deborah Elms, Food Service (2493); Kathleen Wade, OB/Gyn (2361); Quentin Moore, Housekeeping (2024); Jeanette Morgan, Surgery Office (2147); Elias Sellars, Transportation (2177); Paula Hammond, Housekeeping (2024); Eunice Turner, Laundry (2170); Arnoldo Sedayao, Public Works Center (2321); or James Crayton, Local Union 2297, I.B.E.W.

Laboratory worker needed by CSR

Applications for the position of Laboratory Worker, WG-4, in Supply Service, Central Sterilizing Room, will be received through Sept. 22.

Only those qualified personnel who are Career and Career Conditional employees of Federal activities in the San Francisco Bay Area, VRA eligibles, reinstatement eligibles, and eligibles within reach on the appropriate Office of Personnel Management register will be considered.

Detailed information concerning qualification requirements may be obtained from Jennie Thompson, Extension 2116.

Darr to replace Rabold in Public Works Service

Lieutenant Commander Barney Rabold, Public Works Officer here for approximately three years, departed this week for a new billet on the staff of the Commander, Naval Air Forces, Atlantic (COMNAVAIRLANT) in Norfolk, Va.

Now reporting to assume the duties as Chief of Public Works Service at this command is Lieutenant Commander Roger Darr, a Civil Engineering Corps officer whose last assignment was in Diego Garcia.

24 PMTs complete studies, receive certificates today

Twenty-four newly certified Preventive Medicine Technicians are heading out today for new assignments following graduation ceremonies this morning in the Clinical Assembly.

HM2 Joseph E. Clark, the class valedictorian, is on his way to Okinawa where he will be assigned with the First Marine Air Wing, while class spokesman HM3 Alan H. Czuprinski will join the Third Force Service Support Group, also in Okinawa.

Other graduates and their new duty stations are: HM2 Doris L. Barry, Naval Weapons Center, China Lake, Calif.; HM3 Joe R. Cepeda, Brooklyn (NY) Naval Station Branch Clinic; HM3 Stephen M. Farmer, Navy Environmental and Preventive Medicine Unit (EPMU) No. 7, Naples, Italy; HM3 George V. Fivgas, EPMU No. 2, Norfolk, Va.; HM3 Barry S. Grubb, Third FSSG, Okinawa; HM3 Leslie B. Hopper, Mountain Warfare Training Center, Bridgeport, Calif.; HM3 Achim Inman, Treasure Island Branch Clinic; HM2 John R. Kercheval, USS ACADIA; HM2 John F. Kelly, Third FSSG, Okinawa; HM3 Gregory S. King, NRMPC Pearl Harbor, Haw.; HM2 Deborah O. Langlois, NRMPC Pensacola, Fla.

Also, HM1 Godofredo E. Macaranas, Third FSSG, Okinawa; HM2 Michael P. McMahon, 2nd Marine Division, FMFLANT, Camp Lejeune, N.C.; HM2 David R. Mickey, NRMPC Yokosuka, Japan; HM1 Esmeraldo L. Ranches, 3rd Marine Air Wing, FMFPAC, El Toro, Calif.; HM3 Kelly D. Reber, USS PRAIRIE (AD-15); HM2 Randall E. Scott, EPMU No. 7, Naples, Italy; HM3 Patricia L. Severy, NARMPC Pensacola, Fla.; HM2 Daniel L. Spicer, USS PRO-

TEUS (AS-19); HM3 Michael L. Witt, 2nd Marine Division, FMFLANT, Camp Lejeune, N.C.; HM2 Michael L. Written, 1st Marine Division, FMFPAC, Camp Pendleton, Calif.; and USCG HM2 Michael L. Grady, U.S. Coast Guard Training Center, Petaluma, Calif.

Oct. 1 deadline to enter contest

The Freedoms Foundation Essay Contest theme for 1982 is "Peace through Strength." The contest is open to members of the U.S. Armed Forces, including Navy, Marine Corps, Army, Air Force and Coast Guard, as well as to reserve components, National Guard, Reserve Officers Training Corps and Junior Reserve Officers Training Corps members.

The purpose of the contest is to stimulate the thoughts of service members on the subject of freedom in the United States and to call attention to the obligations of all citizens—particularly those serving in the Armed Forces—to maintain and protect this freedom.

Entries may be in the form of an essay or a poem and may be 100 to 500 words long. Each entry should include the following typed information: name, rank, social security number, branch of service and complete unit address, as well as permanent address and zip code.

Entries may be sent any time before Oct. 1, 1982 to Freedoms Foundation, Valley Forge, PA 19481.

MORE INSPECTORS—M.W. ("Mort") Lockett and Captain Larry Nelson compare notes following a day's work at the hospital. Mr. Lockett's area of interest was instructional systems while Captain Nelson was most concerned with quality assurance.

Kudos

NAVY COMMENDATION MEDAL
Captain Frank Gareis, Medical Corps Pediatrics Service.

NAVY ACHIEVEMENT MEDAL
Chief Dental Technician Don Adams from 21st Dental Company, 1st Marine Brigade, Fleet Marine Force Pacific.

LETTER OF APPRECIATION
Hospital Corpsman Third Class Timothy Sherman, formerly of Urology Service.

FROCKINGS TO LIEUTENANT NAVY NURSE CORPS
George Bachman, Suzanne Basile, Debra Carlton, Katherine Copps, Anne D. Coulthirst, Deborah Driscoll, Anna Fricker, Carol Gibson, Beverly Hall, Larry Jacobs, Katharyne L. Johnson, Margaret Landolff, Theresa Lohr, Debra Lorick, Kathleen Madigan, Kevin J. Marty, David Manaway, Karen Malette, Mickhal Moulden, Karen Nielsen, Valerie Parantotto, Susanne Schallenberg, Herman Lee Standiford, Louise Therkult, Richard Titus, Michael L. Watkins, Laura Wotowic and Kathleen Williams.

Comings and Goings -----

"Fair winds and following seas" to the following personnel who have recently departed this command:
Captain Jay L. Luhtala, Dental Corps, released.
Lieutenant Commander Albert Baker to Pensacola, Fla.
Hospitalman Cindy Wakefield, released from active duty.
Ensign Patrick Lappert to Bethesda, Md.
Hospital Corpsman Third Class Timothy Sherman, released from active duty.
Hospitalman David DeKrey to USS AS (CGN-39).
Hospitalman James Smith, released from active duty.
Hospital Corpsman Second Class Steven Givens to NRMCC Corpus Christi.

Lieutenant Commander James Le, released from active duty.
Lieutenant Commander Belen Luna to NWS Concord, Calif.
Hospitalman Bill A. Dargavel to 1st MG, FMFPAC, Camp Pendleton.

Welcome aboard" to newly assigned:
Commander William A. Walker, Jr., Dental Service.
Lieutenant Peter Wolff, MC, Surgery Service.
Hospital Apprentice Brian Odom, Engineering Service.
Machinist's Mate Second Class David Burley, OOD's Desk.
Hospital Corpsman Third Class Kay-Elliott, Nursing Service.
Hospital Apprentice Donna Belfield, Engineering Service.
Chief Warrant Officer Second Bruce Smith, Primary Care, Moffett Branch Clinic.
Lieutenant Commander Margaret Thompson, Nursing Service.
Hospitalman Catherine Dunn, Nursing Service.
Hospital Corpsman Second Class Les Reynolds, Patient Affairs.
Hospital Corpsman Third Class David Osborn, Nuclear Medicine.
Hospital Apprentice Regina Carter, Engineering Service.
Hospital Corpsman Second Class Robert Pitcan, Nuclear Medicine.
Hospital Corpsman Third Class Jerry Pinto, X-Ray.
Hospital Corpsman Third Class George Turner, Hypertension Clinic.

Emergency chief likes Bay Area

Commander Bernard S. Thomas, Jr., 37, Chief of the Emergency Room and Primary Care Service, is new to the command, and reports he is very happy about being here. "I requested duty in the Bay Area after 4½ years in Orlando, which is my home," he said.

Dr. Thomas earned a bachelor of arts from Johns Hopkins University and a medical doctorate from Duke University. He completed his internship and residency in internal medicine with the University of Florida.

In his nine years of Navy service, his assignments have been with the Third Marine Division, two tours at Naval Regional Medical Center Orlando, and an assignment with the Naval Support Force Antarctica (Operation Deep Freeze), which earned him the Antarctic Service Ribbon with Winter-Over disc. He also holds the Pistol Sharpshooter Medal, a Sea Service Ribbon, a National Defense Medal, and a Meritorious Unit Commendation.

He has completed field medical courses at both Camp Pendleton and Camp LeJeune, and an alcohol course at NRMCC Long Beach.

The unmarried Navy physician lives in San Francisco and enjoys hobbies of sailing, cooking, travel and gardening.

Hospitalman Rebecca Banks, Nursing Service.
Captain David Feters, Nuclear Medicine.
Hospitalman Lee E. Steinkamp, Information Desk.
Hospital Corpsman Third Class Jeffrey Hubert, Pharmacy.
Lieutenant Commander John Rowe, Pediatrics.
Lieutenant Keith Lee, Internal Medicine.
Hospital Corpsman Third Class Peter Carrillo, X-Ray School.
Hospital Corpsman Second Class Darlene Franklin, Operating Room.
Hospitalman Eric Pinder, Nursing Service.
Hospital Corpsman Third Class Donnie Brachey, X-Ray School.

New commander at Oakland AB

Leadership of the Defense Department's traffic management agency for the Western U.S. changed on Sept. 15 as Brig. Gen. Eugene R. Lanzillo relieved the departing commander, Brig. Gen. Charles H. Edmiston, in ceremonies at the Oakland Army Base.

Lanzillo comes to Oakland from command of the 4th Transportation Brigade in Oberursel, Germany. A graduate of Harvard University with a Master of Science degree in Transportation/Industrial Management from the University of Tennessee, Lanzillo has a long list of prestigious transportation and logistics assignments to his credit. He also served as the Assistant

HM3 Baucom best sailor

HM3 Azer D. Baucom, III, Master-at-Arms and Area Coordinator for Psychiatry Service, has been selected as Naval Regional Medical Center Oakland's Sailor of the Month for August.

Since reporting here nearly three years ago, he has held a variety of positions on Nursing Service in Psychiatry. Initially assigned as a staff technician on the Acute Care Unit, he gained a reputation for his ability to function as an active member of the multidisciplinary treatment team, establishing professional rapport with patients and their families. In his present position, which he has held more than a year, his leadership abilities have been highly visible, officials said, resulting in their nomination for him to receive the command honor.

In the Navy slightly under four years, Petty Officer Baucom completed both boot camp and corps school at Great Lakes, Ill., and neuropsychiatry training at San Antonio, Tex., and Portsmouth, Va. He was honorman of his class at boot camp and holds a letter of commendation for his efforts there.

Originally from Orangeburg, S.C., he attended Wingate College, Appalachian State University and North Carolina State University. When he completes his Navy hitch in November, he plans to return to college to major in

HM3 Azer D. Baucom, III

either psychology or public relations.

Petty Officer Baucom and his wife Deborah were married about three weeks ago by Chaplain (LT) Jay Hoppus in a Berkeley Rose Garden ceremony. They make their home in San Leandro.

Baucom's main off-duty interest is tennis.

Leonard celebrates birthday and 40 Oak Knoll years

Lennie's Hobbies and Crafts Shop in the Union Plaza Shopping Center on Alvarado Niles Road was the site of Leonard Leal's 52nd birthday party and 40th year celebration of selling papers at Oak Knoll on Sept. 11.

In 1942 Leonard started a two week job as paper salesman at the Naval Hospital and he is still here. In celebration, Lennie invited all his friends from the hospital to his hobby shop for cake and champagne.

Leonard said, "lots of great people have been in the hospital and I knew many of them, including the late Fleet Admiral and Mrs. Nimitz."

Mr. Leal went on to say that there are good and bad people in the world and how a person is today depends on the way he was raised. The friendly Leonard, who spent his first nine years in a hospital for many operations due to birth defects, is one of those who must have been raised right.

New program for reserve doctors offers on-campus training setup

Doctors in the National Guard and Reserve will now find it easier to meet training requirements while completing their medical residency.

Under a new program initiated this summer, reserve medical officers may satisfy training requirements by performing liaison duties between civilian and military medical communities, teaching courses in military medicine, and providing on-campus contact for students and faculty members who want information about military medical programs.

Called the Reserve Physician Liaison Officer Program, the plan was

designed to attract medical and surgical residents into the reserve components by offering them flexibility in meeting training requirements. In the past, reserve doctors often experienced conflicts between their medical residency schedules and training requirements.

Defense officials expect the program will be instituted soon in medical schools throughout the country and that it will help to resolve a critical shortage of physicians in the Guard and Reserves. It is estimated that, in the event of an armed conflict, two-thirds of the required military medical force would come from the Reserve Components. (AFPS)

Visiting professor to lecture here

Ernest L. Mazzaferri, M.D., Chairman of the Department of Medicine, University of Nevada School of Medicine, Reno, will visit Naval Regional Medical Center Oakland to give a presentation in the Clinical Assembly at 9 a.m. on Oct. 9.

Dr. Mazzaferri will speak on "Papillary and Follicular Thyroid Cancer, the Impact of Therapy."

His visit is sponsored by the Clinical Investigation Center.

THERAPY PAYOFF—ST2 Martin Jumper, NRMCO Oakland's third successful toe-to-hand transplant patient, has put his recuperative time in Occupational Therapy to good use by crafting wooden toys for the Pediatrics Ward. The projects exercise his fingers and help develop coordination in the hand. Jumper is making good progress and can now distinguish different material through touch in the toe now functioning as a finger. Enjoying the finely finished toy trucks, boats, planes and cars is Nathan Whitehead, one of the Peds patients.

'All-fins' effort saves lad's life

A young boy swept into shark-infested seas July 31 owes his life to the crew of a Navy P-3 that stayed above him in the air and a dolphin that stayed beside him in the water.

The dolphin kept sharks at bay for three hours while the Navy plane conducted a methodical search, then guided a rescue boat to the spot where 11-year-old Nicky Christides was found floating helplessly.

The boy and some friends were playing with styrofoam paddle boards near the reefs surrounding the Cocos Islands when he was swept off his board, over the reef and out to sea. The islands, located in the Indian Ocean 800 miles southwest of Singapore, are inhabited by 200 Australians.

The Navy "Orion," assigned to Patrol Squadron Four at Barbers Point, Hawaii, and deployed to the Indian Ocean, was concluding an overnight

stop in Cocos when the incident occurred. The crew quickly launched an air search.

The effort was hampered by 25-foot waves, but after searching more than two hours from 500 feet, LTJG Roger Rouleau sighted the boy in the water. The crew dropped smoke markers to keep him in sight and guided a rescue vessel to the area.

After his ordeal, Christides reported that a rescue boat had passed within 25 yards of him at one point, but heavy seas prevented him from being seen and wind overpowered his calls for help. The boy added that the dolphin never left his side. Island residents insist that sharks will not enter an area where a dolphin is swimming.

LCDR Jim B. Bock, Jr., was the aircraft commander during the successful rescue mission.

WELL DONE—HM3 Michael Williams, Health Records Technician at the NAS Fallon Branch Clinic, receives the congratulations of LCDR Gerald V. Meskill, the clinic's officer-in-charge following presentation of a letter of appreciation. Williams was lauded by RADM R.C. Elliott for his response to an aircraft accident on Runway 31 of the air station earlier this summer. According to reports, "he displayed a high degree of professionalism and tenacity in resuscitative efforts from time of arrival on the scene throughout transport and after arrival at the clinic."

A world of medical reference available in third deck library

—By Jane C. O'Sullivan—

The Medical Library in Room 3-4-6, across from the Clinical Assembly, is open from 7 a.m. to 8 p.m. Monday through Friday, except for Federal holidays. Any member of the NRMCO staff—officer, enlisted or civilian—may apply for a borrower's card and use the collections for an official program of health care, training, research or administration.

Staff privileges include: loan of books from the reading room, access to journals, self-service copying of articles, reference assistance for answering questions or locating material; and, if appropriate, computerized literature searches and interlibrary loan service from the biomedical library network.

The book selection process provides for any user to recommend a purchase, obtain approval of the chief of service, and submit the request for consideration and action. The library provides reader services and coordinates book and journal procurement for regional clinics. Funding supports graduate medical education and all other training programs of the center. (The library in Preventive Medicine School is organized as a branch of the main library.)

The Medical Library is not open to the general public or to patients; however, courtesy cards may be issued to spouses of staff members or to other health professionals who need access. Students from local colleges who are assigned to NRMCO under a memorandum of understanding may have library tours and access arranged by the instructors.

Many individuals or groups with special interests enjoy coming in for demonstrations of MEDLARS and other data bases. These reveal the time-saving applications of computer technology to the retrieval of biomedical literature. Some users adapt the principles and techniques to their private files. A researcher may send an assistant to the library to be trained in locating and copying articles, verifying citations, and preparing reference lists for publication.

Hospital employees are often surprised to find out how useful the reference section can be in their work. Special books such as dictionaries, nomenclatures, directories, standards, product and trade information, course catalogs and book lists, and many others, do not circulate, but are kept close to the public service desk to answer questions in the health care field. A few examples are: What is a keratome and who supplies it? How can I order a film from a firm just called "BNA"? Is Dr. So-and-so board certified, and what is his current address? What is the phone number of a hospital in a distant city? How can I write a medical school, licensure board, society about their next meeting? Most important, questions can be answered about many special terms and definitions. Once a user has become familiar with the reference sources, he can call in specific questions on Extension 2031 rather than make a trip to the third deck.

Detailed information about Medical Library policies and procedures is presented in NRMCOAKINST 5070.1C. The Chairman of the Medical Library Committee is Captain D.M. Lichtman, MC, Chief of Orthopedics. Assistant Chairman, Captain A.M. Gomes, NC. Regional Nurse Coordinator, Administrative Librarian, Jane O'Sullivan; Reference Librarian, Harriet Cohen; Daytime Technician, Peggy Ilac, P.M. Technician, Jane Riss. The staff has enjoyed the assistance of Sharon Wilson, a student from Technical High School, this summer, and hopes to continue this in the fall.

Alcohol abuse kills sailor

A Navy petty officer assigned to a Pacific Fleet frigate died recently at a nearby Naval Regional Medical Center where he had been taken for observation after falling into a river while on liberty. There, he stopped breathing

and his heartbeat failed.

Cardiopulmonary resuscitation was administered, but was unsuccessful. The cause of death was listed as "acute alcohol intoxication."

Navy medics treat Russian

A Soviet seaman with a serious leg injury was recently transferred from his ship to the branch Navy hospital at Naval Station, Adak, Alaska, through the combined efforts of several station units.

The sailor was injured while aboard the Soviet fish processing ship "SULAK-UIPIO." A distress call from the ship to the U. S. Coast Guard was relayed to Adak, since the ship was near the island.

The yard tug MECOSTA (YTB 818), with a team from the naval hospital on board, rendezvoused with the Soviet vessel about five miles off shore. The medical team then boarded the SULAK-UIPIO to assess the extent of the seaman's injury and prepare him for transfer.

The injured man was placed on a stretcher and carefully lowered to the tug, which returned to Adak less than two hours after its departure. The seaman was taken to the branch hospital, where his condition was stabilized. He

was transferred to an Anchorage hospital for further treatment the following day.

Disabled vets get aids for living' in new VA program

The Veterans Administration is seeking seriously disabled veterans to participate in a new program of independent living services.

The goal of the program is to decrease the disabled veteran's dependence on services required from others in the family and community.

Independent living aids provided under the program may include housing modification, personal care attendants, artificial parts or limbs, transportation costs and training in independent living skills through coordination with other VA benefit programs.

The program is scheduled to continue through Fiscal Year 1985. An eligible disabled veteran may receive up to two years of services geared to increasing his or her level of independence.

Efforts are being made to explain the new benefits program in all 50 states and the District of Columbia.

Navy Relief supplements Red Cross assistance in periods of disaster

Although Navy Relief does not attempt to duplicate the work of American Red Cross as a national disaster relief agency, the Society stands ready to provide supplementary assistance to members of the Navy and Marine Corps and their dependents here needed in areas stricken by flood, storm, earthquake and similar occurrences. Although less spectacular, the assistance available from Navy Relief for individual catastrophes, such as home fires, is of equal importance to servicemembers.

There were no major disasters in the vicinity of Naval and Marine bases last year, but help with individual losses (primarily from fires) accounted for about \$60,000 of Navy Relief assistance in 1981.

Navy Relief's first objective is to help meet the immediate needs of food, clothing, and temporary shelter. Hereafter the servicemember must face the often awesome task of reestablishing his household on a scale commensurate with his income. This can involve the replacement of clothing, furniture, household appliances and supplies. Few servicemembers have ready access to funds for this purpose.

Navy Relief stands ready to help its people get a new start with the basic necessities of life. It must be recognized, however, that neither Navy Relief nor Red Cross can "insure" your belongings. All service families are strongly urged to purchase household effects insurance. Only an up-to-date insurance policy will protect adequately against the financial devastation of personal property loss.

Computers chasing loan defaulters

In a memorandum to service chiefs and secretaries of the military departments, Defense Secretary Caspar Weinberger spoke of serious consequences for DoD employees with overdue federal loans.

Secretary Weinberger's memo warned:

"As part of the government-wide effort to improve collection of debts, federal agencies have cooperated in providing information for interagency computer matches to identify employees who have an outstanding debt owed the federal government. A recent such computer match of the civilian and military payroll records with defaulted student loan accounts disclosed a significant number of DoD personnel.

"The President's Council on Integrity and Efficiency will oversee and monitor this debt collection effort on a government-wide basis. When specific information is provided to the Department of Defense, I will expect your full and complete cooperation in actively seeking repayment of each legitimate debt owed the federal government by DoD personnel.

"Meanwhile, please try to advise all who are benefiting from any government loans to keep up their repayments, because any defaults by DoD employees will be dealt with seriously."

Student nurses get scholarships

About 300 nursing school scholarships are being offered by the Veterans Administration to qualified students. Tuition, educational expenses and a monthly stipend are included in the awards.

Participants are to repay the scholarships by working a required amount of time in a VA medical facility upon completion of their schooling. The following table shows the number of years of service in a VA facility needed to repay the scholarships of different lengths:

1- or 2-year scholarship—2 years of service; 3-year scholarship—3 years of service; 4-year scholarship—4 years of service.

Other than the obligation to work a set number of years, no other form of repayment is required. While serving in VA medical facilities, participants will be regular salaried nurses.

To find out more about the program write to:
VA Health Professional Scholarship Program
Office of Academic Affairs

810 Vermont Ave., NW
Washington, DC 20420

SUMMER READERS—Melissa Curran, her sister Stephanie, and Lamie Ann Dela Cuesta proudly display the reading achievement awards they received this week from the medical center's General Library. The girls read at least 15 different books from the library during their summer vacation from school.

Some organic food not 'all' natural

If you shop at health food stores because you don't like the thought of eating things that may have been exposed to chemical pesticides, you may be kidding yourself.

Researchers at Wayne State and Michigan State Universities bought 10 brands of bread—five from health food stores and five from supermarkets. All 10 samples contained traces of pesticide residue.

In 1979 the Departments of Agriculture and Interior found that five out of six heads of organic lettuce bought at six health food stores contained pesticide residue. The level of the pesticide residue in one of the heads exceeded that of nonorganic lettuce purchased at supermarkets. The residue levels for both bread and lettuce, however, were within the limits allowed by the federal agencies.

The Department of Agriculture defines "organic food" as food free from synthetic fertilizers, pesticides, growth regulators and chemical additives.

While most organic foods are probably free from industrial chemicals, some may contain pesticide residues, which can remain in the soil for years after applications have stopped.

VA advises: Safeguard records!

The Veterans Administration today reminded veterans and their families to safeguard important documents relating to military service, marriage, life insurance and VA correspondence.

Discharge papers, marriage certificates or child custody evidence should be secured from fire, theft or loss. This could be, according to the VA, one of the most important legacies a veteran can leave his family.

Other documents that should be protected and filed with other family papers are government and commercial life insurance policies, any VA correspondence with identifying claim numbers, social security numbers, wills and, where applicable, naturalization papers.

Further, veterans and their families should be aware of survivors benefits such as VA pensions, dependency and indemnity compensation (DIC) for service-connected death, burial benefits and interment in a national cemetery.

Assistance concerning VA-administered benefits is available at all of the Agency's offices, or at veterans service organizations or county service offices.

Residues may also come from nearby farms in dust, wind and rainfall.

New VA research on 'Agent Orange'

The Veterans Administration's scientific inquiry into health related effects of Agent Orange will be enhanced by 10 new research projects approved and funded by the agency.

The new projects are supported for up to five years with VA research funds in excess of \$2 million, and were selected from proposals submitted by individual investigators working in VA medical centers across the country.

The scientists responded to a request for new research proposals issued by the VA's Medical Research Service, which specified a biochemical, physiological or toxicological focus on the delayed effects of exposure to Agent Orange and Agent Blue.

The projects primarily involve animal studies, but human tissue cultures will be analyzed in some of the experiments. Specific approaches range from behavioral observations of laboratory animals exposed to the defoliants used in Vietnam to biochemical studies of fat metabolism.

The San Francisco 'Fort Miley' medical center has been selected as one of the sites where the new studies will be conducted.

The following additions to the medical "family" have arrived at Oak Knoll:

A baby girl to Hospitalman Sharron L. Allen (Nutt), Mare Island Branch Clinic, and her husband Samuel E. Nutt, Aug. 26.

A baby girl to Dental Corpsman Third Class Dino Y. Smith, USS WABASH (AOR 5), and his wife Charlene, Sept. 2.

A baby girl to Hospitalman Anthony Dunlap, Emergency Room, and his wife Toni, Sept. 2.

A baby boy to Hospitalman Margaret Louis Kaczor (Harper), Hypertension Clinic, and her husband Tony L. Harper, Sept. 4.

A baby boy to Hospital Corpsman Third Class Terri D. Hamilton, Neurology, and her husband Michael, Sept. 6.

ALCOHOL

Having a baby is a time to take special care of yourself. When you're pregnant, everything you eat and drink affects the child you are carrying.

Drinking beer, wine or liquor may hurt your baby. Heavy drinking can result in serious permanent mental and physical birth defects.

Alcohol is not something to be taken lightly during pregnancy. For baby's sake... and yours... the safest choice is not to drink during pregnancy.

For more information, write the National Clearinghouse for Alcohol Information, Box 2345, Rockville, MD 20852.

NIAAA NATIONAL INSTITUTE ON ALCOHOL ABUSE AND ALCOHOLISM

IS NOT FOR UNBORN BABIES

Cross country races slated here Sept. 25

Cross Country season is here and you need not be "fast" to participate on the now forming Naval Regional Medical Center team. CDR Tom Dresser said "it's your chance to be on a championship team and everyone is welcome to participate. Entries are unlimited."

The Central Pacific Regional Cross Country Championship will be held at Oak Knoll on Sept. 25 at 10 a.m. Participants must register with the race director no later than 9:30 a.m.

The race, which will begin at the base swimming pool, will cover a six mile course. Awards will be given in the open, senior (35 years and over) and women's divisions.

For further information call CDR Dresser at Ext. 2526.

Drowning third cause of injury deaths in United States

In 1980, 7,000 drownings, primarily associated with recreational activities, occurred in the United States. After motor vehicle and fall deaths, drownings are the third leading cause of unintentional injury deaths, and for ages 5 to 44, rank second only to motor vehicle deaths. Data show that death rates from drowning are more than five times greater for males than females and nearly three times greater for blacks than whites.

It is often assumed that most aquatic deaths occur in swimming pools, but pools account for only about 10 percent of all reported drownings; persons are more likely to drown in lakes, rivers or oceans. Quarries, pits, ornamental ponds and bathtubs add to the toll. Residential home pools, however, do play a major role in childhood drownings when toddlers fall or wander into them. There is strong evidence that adequate fencing and self-latching gates substantially reduce the number of childhood drownings and virtually eliminate drownings among toddlers.

Although no precise statistical data exist on the total number of water-related injuries, it is estimated that 140,000 injuries associated solely with swimming activities occur annually. Diving and head-first sliding into water account for the most serious aquatic injuries because of damage to spinal cords, often as a result of striking the bottom or side of a shallow body of water. Of the estimated 700 spinal cord injuries resulting from aquatic accidents each year, the majority are sufficiently serious to cause permanent paralysis. A 10-year study of 152 sports-related cervical spinal cord injuries shows that three water-related activities—diving, surfing and water skiing—accounted for 77 percent of all reported spinal injuries. Spinal cord injuries from diving alone exceed the total reported from all other sports combined.

The data below identify three additional factors that significantly influence aquatic deaths and injuries:

1. In recent years, residential spa and hot tub use has markedly increased. In 1980, an estimated 1,100 persons with spa or hot tub injuries required emergency room treatment, as compared with only 200 the previous year. Alcohol was cited as a contributory factor in 12 of 30 residential spa-associated deaths reported to the Consumer Product Safety Commission since 1979. The high temperatures of spas and hot tubs combined with a moderate level of alcohol in the blood stream tend to accelerate drowsiness. Death often results from drowning after a victim falls asleep.
2. Coast Guard data shows that 7 percent of the boats involved in mishaps lacked available and accessible personal flotation devices, but this 7 percent accounted for 29 percent of fatalities.
3. Onboard and overboard falls contributed from 20 to over 30 percent of water-related fatalities, often when the victim was undertaking an activity other than boating.

'Seagull' run slated at TI

Treasure Island Special Services is sponsoring a "Seagull" run of the island on Saturday, Oct. 23, at 8:30 a.m. The run will include 5 and 10-kilometer races, with the 5K encircling Treasure Island and the 10K covering both Treasure and Yerba Buena Islands. You may choose either course on race day.

There is a \$6 pre-registration fee before Friday, Oct. 8. Packets will be mailed to all entrants. Race day registration is \$7, 6:30-8 a.m. only. Please register early.

Take Treasure Island exit from Bay Bridge. Personnel at the main gate direct you to parking (Athletic Ave. M) and race starting line. T-shirts will go to all finishers. Refreshments will be served and first and second place awards made.

Proceeds will benefit youth activities at Treasure Island. For more information call 765-6361 or 765-5088 between 7:30 a.m. and 4 p.m. weekdays.

Skeet, trap event set for Alameda

The Central Pacific Regional Skeet and Trap Championship will be held Sept. 25-26 at NAS Alameda. Squadding for participants will be at 8 a.m.

Teams of four shooters, plus alternate, may be entered from a naval activity. Naval Reservists, Reserve and retired naval personnel are allowed to fire as individuals. All participants must furnish their own weapons and ammunition; targets will be furnished.

International style skeet regulations and American style trap regulations govern the match and the design. The director will be GMGC Bill Callahan.

Awards will be given by the RSMC Recreations Section. For further information call Ron Brown, at ext. 235.

Greater discounts offered

Looking for something to do with the family, and save money at the same time? Sea World, San Diego's famous aquatic park, is offering discounts up to \$3 on advanced ticket purchases. These discounts are available to military and civilian Department of Defense personnel through advanced ticket sales at Special Services, and are effective through Dec. 31.

Sea World offers many attractions for the entire family with shows designed to entertain as well as educate. Some of the attractions include a new killer whale show, and a lagoon featuring the combined talents of the bottlenosed dolphin and the pilot whale. There are also other entertaining features like the walrus show, seal and otter show, white whales from the arctic, plus the new Sparkletts Water Fantasy, and the scenic Fuji Japan Village.

Service charge for layaways

Customers using the layaway program at Army and Air Force exchanges will now pay a \$1 service charge at the time of the transaction.

The service charge was found necessary after an exchange survey showed processing costs for each layaway sale to be over \$2. Most retailers charge customers a \$2 fee for the service, but the exchanges, officials said, will still absorb most costs.

The previously existing \$3 layaway cancellation fee has been discontinued.

HUNTING HINTS

"I didn't know it was loaded. We were only going out for the day and the weather was supposed to be nice."

"I never got lost in the woods back home. Statistics show that 90 percent of all hunting accidents are the result of carelessness or ignorance. There are ten basic commandments of firearms safety which every hunter should follow:

1. Treat every gun with the respect due a loaded gun.
2. Watch the muzzle.
3. Unload guns when not in use.
4. Be sure barrel and action are clear of obstructions.
5. Be sure of your target.
6. Never point a gun at anything you do not want to shoot.
7. Never climb a fence or tree, or jump a ditch with a loaded gun.
8. Never shoot a bullet at a flat, hard surface.
9. Store guns and ammunition separately.
10. Avoid alcoholic beverages before and during shooting.

When you go hunting, always remember to let someone know where you are going and when to expect your return. Don't travel alone, especially in rough terrain. Plan your activity and be aware of the terrain and landmarks. Take enough food for a few extra days and have basic survival equipment and proper clothing. Be familiar with first aid procedures.

NEW FREEBEE—Oak Knoll personnel may get a Funny Money certificate for each ticket to Great America purchased through Special Services (Room 216). This entitles the bearer to \$5 worth of games, merchandise or food at the amusement park. New park hours through Oct. 24 are 10 a.m. to 8 p.m., except for Oct. 30 and 31, when the park will stay open until midnight.

Fleet Week plans announced

Fleet Week, beginning Oct. 15, is an annual celebration hosted by the Mayor of the City of San Francisco to extend a warm hand of welcome to show heartfelt appreciation for the invaluable service rendered by the men and women of the fleet.

There are events, including dinners, receptions, scheduled throughout the week for the men and women of the fleet. Planning is well underway.

On Oct. 15, 13 Navy warships will enter San Francisco Bay and pass in review. A 17-gun salute will be fired as the ships pass Treasure Island for the opening ceremony of a long weekend celebration of Fleet Week 1982 and Navy's 207th Birthday. Planned for the opening ceremonies will be a helicopter flyover, Navy Special Boat Unit 11 demonstrations, drill teams, Navy Band, and welcoming remarks by Mayor Dianne Feinstein and the Commander in Chief, U.S. Pacific Fleet, Admiral S.R. Foley, Jr., USN.

Other major events include the Fleet Week 1982/Navy Birthday Ball on Saturday, Oct. 16, a Navy-City softball competition on Saturday morning, a band celebration on Sunday even-

ing, and a luncheon at the St. Francis Hotel with guest speaker Admiral Foley at noon on Monday, Oct. 18.

Visiting ships will conduct static displays and open house daily; divine services will be offered on Sunday onboard USS NEW ORLEANS, and Navy Special Boat Unit rides will be available on the Embarcadero, where Naval Regional Medical Center Oakland also plans a demonstration/exhibit in conjunction with ships' open houses.

Specifics follow.

Friday, Oct. 15—Fleet Week pass in review, 11 a.m. under the Golden Gate; ceremonies commence on Treasure Island. All interested military/civilians invited to join at the reviewing stand.

Saturday, Oct. 16—Navy versus City softball games at San Francisco Lang Field (Turk and Gough Streets). First game begins at 9 a.m.; second immediately following. Come out and support your Navy team. The city will support theirs.

Saturday, Oct. 16—Fleet Week 1982/Navy 207th Birthday Ball at the (Continued to page 3)

Asst SECNAV to speak here

As part of the Navy Week celebration, the Oakland Council of the Navy League of the United States will hold an Oct. 14 evening event at the Oak Knoll Officers' Club, with the Honorable John S. Herrington, Assistant Secretary of the Navy, Manpower and Reserve Affairs, as guest speaker.

The program will honor the Outstanding Reserve of the year from the maritime services—Navy, Marine Corps and Coast Guard. Several flag officers, including Vice Admiral Charles E. Larkin, Commander, Pacific Area and Twelfth Coast Guard District, are expected to attend.

Cocktails will be served at 6:30 p.m., followed by an hour of music from the United States Navy Band and dinner at 8 p.m.

Navy League members, spouses, friends and all military personnel are invited to attend. Since admittance will be reservation only and a very large turnout is expected, reservations should be made early by sending a check in the sum of \$17.50 per person to Dave Silverman, Treasurer, 4746 Mountain Blvd., Oakland, Calif. 94619.

Additional information may be obtained from the NRMC Oakland Public Affairs Office.

SHE'S GOT THE BALL—Navy Nurse Corps Lieutenant Commander Margaret L. ("Mickey") Burns, Combined Federal Campaign chairman for NRMC Oakland, receives a symbolic CFC football from former star wide receiver R.C. Owens of the San Francisco 49ers during a campaign kick-off on Sept. 17 at the Presidio of San Francisco. Owens, who gained fame for his reception of many clutch, "alley-oop" passes, is today a special assistant for "Niner" public relations.

Combined Federal Campaign underway

The annual Combined Federal Campaign (CFC) is underway and will continue throughout October at Naval Regional Medical Center Oakland under the direction of LCDR "Mickey" Burns, Oncology Nurse Specialist.

A kickoff meeting with key workers was held yesterday in the Clinical Assembly. Each was selected by his or her chief of service for "high motivation and enthusiasm."

"More Than Ever Before" is the theme of this year's drive, and according to Navy Captain Richard L. Slater, San Francisco Bay Area Chairman, "in today's changing economic and social climate, your generosity is needed *more than ever before*."

CFC is the authorized fundraising vehicle through which federal

employees are asked to give at their worksites. It is a single, unified campaign for all federal personnel. The proceeds contribute to the support of more than 300 agencies which help people around the world, and donors may designate the specific agency or agencies they wish to support in this era of high unemployment, crime, unaffordable housing and the multitude of difficulties that plague our friends, neighbors, relatives and many others who live in our communities. CFC provides an opportunity for us to continue the American tradition of caring and sharing.

Last year Oak Knoll personnel donated more than \$29,000. Officials hope the 1982 campaign will raise *more than ever before*.

Lichtman selected to receive AMSUS Philip Hench Award

Captain David M. Lichtman, Chief of Orthopedics and Head, Hand Surgery Service at Naval Regional Medical Center, Oakland, recently received notice that he has been selected by the Association of Military Surgeons of the United States to receive the 1982 Philip Hench Award.

This award is given in memory of Dr. Philip S. Hench, who first used cortisone in the treatment of arthritis. It is presented annually for "outstanding contributions in the field of rheumatology and arthritis."

Dr. Lichtman will receive the honor during a special awards program in Orlando, Fla. on Oct. 18. A plaque and an honorarium of \$1,000 will be presented.

In a congratulatory note to the winner, Vice Admiral J. William Cox, Surgeon General of the Navy, wrote, "it is especially rewarding to know that you have been recognized in this manner. I am also aware of your meaningful contributions to Navy Medicine which extend far beyond the limited scope of the award. Your devoted service to the various residency programs at NRMC Oakland are widely acknowledged by your peers."

Dr. Lichtman, assigned to the Oak Knoll staff since 1977, has lead a local

CAPT David M. Lichtman

team of Navy microsurgeons in the replantation of toes to stumps of severed fingers, and on Jan. 20, 1981, made the first reported successful transplantation of a patient's two toes to the stumps of a thumb and opposable digit. That surgery allowed a Navy (Continued to page 3)

Editorial---

The changing roles of military medicine

Editor's Note: The following remarks were made by Vice Admiral J. William Cox, Navy Surgeon General, at a Sept. 1, 1982 commissioning ceremony of Naval Hospital, Bethesda, Md.)

Today is a signal day in the long history of the Medical Department. Today we embark on a course which I believe will lead to enhanced effectiveness of our health care system.

Today we realign ourselves to better serve our patients, our Navy/Marine Corps team, and our nation. But today didn't just happen. First, we had to recognize the need for change; second, we had to decide how and what to change. All of this is not yet accomplished. Several decisions are yet to be made. But change we will—and change for the better.

But why change? What needs change? To answer, we must look to the past. During the past decade, we reverted to a peacetime health care system. During this period, manpower resources declined. We shouldered many new responsibilities and tasks. The technology of medicine took a gigantic forward leap; our retired population and their dependents grew from about 360,000 to over one million; medical regionalization brought hundreds of outpatient clinics under our management. Expanded and new programs such as occupational health and drug testing demanded our attention. At the same time we were faced with a change in society and its attitudes; we eliminated the draft as a ready source of physicians. Ever-increasing civilian influences developed in the form of health systems agencies, quality assurance/risk management criteria, and accreditation and regulatory agencies, to cite only a few.

We slowly drifted towards a more civilian approach to management. We formed committees for everything. In fact, the revised accreditation standards required them. We started to manage more by consensus than military authority, and we preoccupied ourselves with peacetime health care operations and criteria. Readiness training for our wartime mission was all but forgotten.

In the late 70s we realized what had happened. We initiated programs to correct our deficiencies in preparedness. We programmed the hardware—hospital ships, deployable medical facilities and equipment. We started training programs to prepare our personnel for their military contingency mission, and we began to emphasize once again good military order and discipline. These initiatives are readily apparent in the goals and objectives communicated to you not long after I took office. The response has been excellent and the change is already apparent. Much has been

done. More remains to be done.

But what does this have to do with Bethesda? Well, certainly technology has a profound impact on the National Naval Medical Center. Just a quick tour around this building will tell you this. Certainly medical regionalization has had an impact. Today, this command is responsible for health care in Annapolis, Quantico, Patuxent River and through a network of outpatient clinics, care throughout the capital area. You also have been tasked to support a university, the Health Sciences Education and Training Command, the Naval Medical Research Command, and numerous other activities on your own compound. Certainly the explosion in our retired and dependent population has had a major impact on your health care delivery system. And yes, NNMC too became preoccupied with its peacetime role over the years.

The result of all these additional responsibilities put a tremendous strain on management of the medical center. The management staff was inundated with regional problems, base support functions, and consumer demands. The commanding officer had over 25 different department heads, commanding officers and chiefs of staff reporting directly to him. As a result, management of the Bethesda Hospital component of NNMC did not receive all the attention it required.

Today we correct this. The broad responsibilities of the medical center will be placed in the capable hands of Rear Admiral Crews and a most able administrative staff. The management of the region and the support to the tenant commands will receive the attention they deserve. By establishing the naval hospital as a separate command, with Captain Quinn as its commanding officer, he can focus his attention on patient care management and ensure that this hospital maintains its reputation for excellence in the future. To assist him in the process, the new command is structured to provide clear lines of authority and accountability that will be confident will improve our efficiency, military effectiveness, responsiveness to the needs of the Navy and our patients, and maintain the high standards of care.

However, organizational restructuring is only part of the renewal. All of you are a part of the medical center and the Naval Hospital Bethesda will play a crucial role in the success of this endeavor. Your attitudes, your dedication, your support and your leadership will determine our final success. I challenge each of you to make changes within yourself that will permit this new organization to provide the best health care possible in an efficient and cost effective manner. Dedicate yourself to your profession, your command, and your Navy. Together you can make this a model for the rest of the Medical Department.

The early Navy—rum and punishment

There was once a time in the Navy when sailors received a daily allowance of half pint of rum. But then, the wage scale during that same era ranged from \$6.66 for seamen to \$32 for captains—per month. Daily rations might include a pound of bread, a pound of pork, a half pint of peas, 4 ounces of cheese and, of course, the rum.

A sailor could be punished by being whipped but could receive no more than 12 lashes at one time. If a sailor was caught swearing, his commanding officer could force him to wear a wooden collar around his neck as punishment.

These rules of the Navy were drafted by John Adams (who would later become the second president of the United States), one of three members of the original Naval Committee formed by the Continental Congress in the early days of the American Revolutionary War.

The opening battles of the war—Lexington, Concord and Breed's Hill (more commonly—although mistakenly—known as Bunker Hill)—had been fought. The 1775-1982

INTERNATIONAL BROTHERHOOD OF ELECTRICAL WORKERS

IBEW

LOCAL UNION No. 2297

GOVERNMENT EMPLOYEES

P. O. BOX 1385 • ALAMEDA, CALIFORNIA 94601 • (415) 523-0400

September 17, 1982

For inclusion in Oak Leaf:

To All Employees at Naval Regional Medical Center.

We at the International Brotherhood of Electrical Workers, representing all wage grade employees at NRMC and GS Firefighters, eligible to represent any Federal Workers in Alameda County, are concerned about misinformation being put out by AFGE. LT. Lawson has been very ably handling the contracting out situation.

We at IBEW have offered any possible assistance and have contacted all Congressman for their support.

No other Union has been delegated to speak for NRMC in the contracting out situation and IBEW can only speak in behalf of the employees we represent. We believe this includes all employees directly concerned.

Sincerely yours,

Donald A. Week

Donald A. Week
President/Business Manager

(EDITOR'S NOTE: THE PRINTING OF THE ABOVE ANNOUNCEMENT IS IN KEEPING WITH ARTICLE XXVIII, SECTION 7, OF THE AGREEMENT BETWEEN IBEW LOCAL 2297 AND NRMC OAKLAND, APPROVED BY THE SECRETARY OF THE NAVY ON 14 AUGUST 1979)

A farewell message to the staff

As I depart the command and the Navy, I would like to express my heartfelt appreciation to the staff of the region for the cooperation and support I have received the past two years. I take with me many fond memories and will always treasure the friendships I've enjoyed. I could not even begin to single out those who have been particularly supportive, and special friends.

I will take special note of those of you who have been, and remain, "in the trenches"—your support, cooperation, professionalism and friendships are appreciated and, yes, in the "highest traditions".

Thank you all and I do wish each and everyone "fair winds and following seas" in whatever the future holds.

In admiration,
Robert P. OWEN

THE OAK LEAF is published biweekly on Friday, produced commercially with appropriated funds in compliance with NNPR P-35, Rev Jan 1974. Deadline for copy is Wednesday noon of the week prior to publication.

Opinions contained herein are not official expressions of the Department of the Navy. THE OAK LEAF receives American Forces Press Service and Navy News material.

Contributions from both staff and patients are welcomed and should be addressed to the Editor of the OAK LEAF, Naval Regional Medical Center, Oakland, CA 94627.

Command Line

(This column permits direct access to command executives by either military or civilian staff members of any grade, rate or rank. Questions on matters impacting the medical center operations as a whole, reports of incidents of abuse or fraud, or items of concern to large numbers of the staff are invited. Please also submit recom-

mendations and report positive information of interest to all of us. Submit comments in any legible written form to the Public Affairs Office for routing. You may remain unidentified if you so wish.)

Distribution of directives

COMMENT: Supervisors of civilian employees do not receive current hospital instructions they need to adequately participate in OPM and EEO programs. Distribution Lists A and B do not correlate with supervisory duties. The Civilian Personnel office should keep a current roster by name, title and extension of every military or civilian staff member responsible for supervising civilian employees. Any directive relating to attendance, timekeeping, OPM or EEO programs should be directly sent from Civilian Personnel to the supervisors and they should keep them in a Personnel Administration Manual. The supervisor is responsible to make this information available to every person on the staff of the unit.

REPLY: Your suggestion for Civilian Personnel Service to maintain a roster of supervisory personnel by name, title and extension is a good one, as such a list could be used to schedule training and provide rapid, direct line communication when needed. Each Chief of Service, however, is responsible for the supervision of both civilian and military personnel within that service. Inherent in that management function is the obligation to provide subordinate supervisors with the means to accomplish their supervisory role. The routing or distribution of local directives regarding civilian personnel matters is one of those means and, accordingly, the obligation of each individual chief of service. He or she should see to it that each subordinate supervisor has copies, or immediate access to, any pertinent directives or instructions. (Additional copies of specific instructions are available by request. They may be obtained from Operating Management Service.)

The Command would like to see pro-active employee relations at this medical center and communication of policy is one of the most important ways to meet this objective. We welcome your suggestions and thank you for bringing this void to our attention.

Civilian use of pool

COMMENT: Why are civilian employees at NRMCMC not able to use the swimming pool on base? Is it true that the decision is up to the Commanding Officer?

REPLY: This is an excellent question which deserves consideration. The Commanding Officer is authorized to permit civilian employees at NRMCMC to use Special Services facilities. Higher authority specifically dictates that "the command must determine the adequacy of facilities to accommodate civilian employee utilization while ensuring protection of the primary interests of the active duty staff. A major determinant in ensuring protection of the interests of the active Navy population and their families shall be their identified attitude toward civilian utilization. Furthermore, civilian employee utilization of such facilities shall be subject to the payment of fees/charges at a level higher than required of active duty patrons and their dependents and which is sufficient to preclude subsidization of civilian interests by the military population."

The Chief of Special Services will conduct a survey of the current utilization of the

A SPOT TO BROWN BAG IT—Dr. Jared Haight of Primary Care takes a luncheon break at one of the newly installed picnic tables on the laboratory side of the main hospital. The tables, designed to accommodate patients in wheelchairs, were donated to the hospital from members of the 35th Waves Anniversary National Convention.

swimming pool to determine if there are any times which could be allocated for civilian employee use without interfering with the active duty. Furthermore, the attitude of the active duty patrons toward civilian use of the pool will be acquired through an opinion survey. If it is found that under-utilization of the pool should exist at certain times and there is no objection on the part of the active duty patrons, consideration will be given to authorizing civilian employees to use the pool at specific times and at a reasonable charge.

Job vacancy announcements

COMMENT: We often do not get to see vacancy announcements and many times do not hear of openings until after the jobs have been filled. Although we have been told that these are circulated and "should" be on bulletin boards this is not usually the case. If they are being removed by others interested in applying, why is there not a protected bulletin board where current vacancy announcements of NRMCMC Oakland can be displayed in a locked case in a lighted area, a case such as the one portraying the Equal Employment Opportunity representatives?

REPLY: Employee information about vacancy announcements has always been a difficult problem. In a continuous effort to increase employees' chances to find out about vacancies in time to file applications, several steps have been taken by Civilian Personnel Service. First, the length of time for filing applications has been doubled from one to two weeks. Second, whenever the period for filing coincides with publication deadlines, vacancies are publicized in *Oak Leaf*. Third, when a vacancy is likely to attract many applicants from a particular service, such as supply-type vacancies in Supply Service or medical technician/technologist vacancies in Laboratory Service, extra copies of that vacancy announcement are sent to the particular service (or services if more than one is likely to produce applications.)

Instead of removing vacancy announcements from bulletin boards, employees interested in applying can call the Civilian Personnel Service at Ext. 2116 and a copy will be sent to them through the Guard Mail—or, they may pick one up in person.

Because of the number of vacancy announcements, they're almost continuously overlapping opening and closing dates, and the extent of information required to be included in them, there are significant space problems involved in posting them in locked cases. The feasibility of doing so, however, will be investigated.

Fleet Week

(Continued from page 1)

Marathon Palace Hotel. Cost \$25 per person. Cocktails start at 6:30 p.m. Attendance limited to pay grades E-9 and above. Uniform is dinner dress blue. Advise the number and names of invitations by letter or call to Naval Station Protocol Officer, 765-6941. Checks should be made payable to Fleet Week Ball.

Sunday, Oct. 17—Church services at RUSS NEW ORLEANS. Catholic services, 9 a.m.; Protestant services, 11 a.m. If you wish to attend, please call 655-6056. One hundred attendees only can be accommodated at each service.

Sunday, Oct. 17—Rotunda ceremony, City Hall. All friends of the Navy and the city are invited to the rotunda celebration at City Hall at 5 p.m. Uniform is service dress blue for guests.

Monday, Oct. 18—The San Francisco Chamber of Commerce and the Navy League are hosting a luncheon in honor of the Navy's 207th Birthday at the St. Francis Hotel. Guest speaker is Admiral S.R. Foley, Jr., Commander in Chief, U. S. Pacific Fleet. Tickets may be obtained at \$20 each from the Chamber of Commerce at 465 California St., telephone 392-4511, Ext. 134.

CAPT Lichtman

(Continued from page 1)

Chief to subsequently return to active duty aboard a submarine.

Born in Brooklyn with Plantation, La., as his home of record, the orthopedic surgeon is the son of Dr. and Mrs. Harry Lichtman of Plantation and Greenwood Lake, N. Y. The Navy physician's father, a retired public health official and general practice physician, will attend the ceremony honoring his son.

Captain Lichtman attended Tufts University and graduated from State University of New York Downstate with an M. D. in 1966. He interned at University of Minnesota hospitals and then entered the Navy as a flight surgeon, serving in that specialty with both Carrier Air Wings Three and

Seven before completing a residency in adult orthopedics at NRMCMC Oakland and one in pediatric orthopedics at NRMCMC San Diego. This duty was followed by a hand surgery fellowship under Navy sponsorship with Dr. James Wilson of San Diego, and subsequent assignments to National Naval Medical Center, Bethesda, and in his present billet on the Oak Knoll staff.

Dr. Lichtman has lectured in his specialty at three universities and authored numerous publications, as well as making presentations at major medical meetings throughout the United States.

He and his wife Frances, a public librarian in Contra Costa County, are parents of two.

Membership rosters outdated

COMMENT: NRMCMCOAKNOTE—1300, 13 Aug 82, Boards, Committees and Collateral Duties, is inaccurate and out of date. As always, it was compiled from previous rosters and lists many persons who are already detached from the command, or who have left the committee. If the new system for reporting committee attendance and actions is to be effective, the roster should be current and reliable. This can be done by sending a questionnaire to each chairman with a deadline for the response, and compiling the results. For any board or committee required by JCAH standards the roster should be compiled by position as well as name and extension. The questionnaire should specify the responsible person for recording changes in membership.

REPLY: The problem in accuracy has been a recurring one and has been recognized. Central compilation of data used in the notice has not been the practice and the inaccuracies document the need for a central point of contact. Based upon your Command Line recommendation, a questionnaire is being developed for use as suggested. A point of contact will be identified, to also include responsibility to issue assignment letters. The interest and recommendations of the party submitting this comment is both appreciated and laudable.

CFC project officer is oncology specialist

Lieutenant Commander Margaret L. ("Mickey") Burns, this year's coordinator of the Combined Federal Campaign at Oak Knoll, has been stationed here 14 months.

An Oncology Nurse Specialist, she has 10 years of Navy service, with former duty stations at NRMCMC Memphis, Naval Hospital Port Hueneme, and Branch Hospital, Adak, Alaska. She served a previous tour at NRMCMC Oakland in 1977-78.

LCDR Burns hails from Bloomington, Ind., and earned a bachelor of science in nursing from the University of Evansville in the same state. She plans to work for a master's degree in nursing education or administration.

The Navy nurse is active in the East Bay Oncology Group, Oncology Nurses' Society, the American Cancer Society Advisory Board, and VP-31 Officers' Wives Club.

She sings in a church choir and enjoys cooking and playing the piano. She also plays tennis and assists with her son's soccer team.

LCDR Burns lives in Hayward with her husband Dale and children Bryan and Laura.

All hands to be inspected

The first of a series of quarterly personnel inspections will be held in the horseshoe of the main entrance to the hospital on the mornings of Oct. 15, 22 and 29, with one-third of the military staff being inspected each of the three dates. All military personnel of the command will be reviewed, and officials said there will be no exceptions.

Learn not to burn

Job, home fire safety spotlighted next week

Oct. 3-9 marks this year's Fire Prevention Week. Observed annually by the United States and Canada, Fire Prevention Week always falls during the Sunday-through-Saturday period that includes Oct. 9, the date of the "Great Chicago Fire of 1871" that killed 250 persons and destroyed \$168 million in property.

This year's theme for the week is "Learn Not to Burn—Wherever You Are." This thought is aimed at all of us, to remind us to be aware of our sur-

roundings at all times, whether at work, school, or at play.

Personnel are to fall in at 7:20 a.m. on each of the dates. Inspection will commence at 7:40 a.m., followed by colors and presentations and announcements.

roundings at all times, whether at work, school, or at play.

Oak Knoll's Fire Chief Bob Bobbitt says "awareness is the first step in preventing fires." He has submitted several good educational articles on the subject to this newspaper. Unfortunately, space limitations this issue preclude their use. Watch for them in future issues, however, because fire safety awareness must not be limited to only one week each year. It's an around-the-clock responsibility.

Captain Johnston completes 24 years as Navy nurse

Captain Georgia F. Johnston, Assistant Director of Nursing Service at Naval Regional Medical Center Oakland for a little over a year, leaves the command on terminal leave today with an official retirement date of Dec. 1.

A reception and "piping over" ceremony is being held to recognize her nearly 24 years of active duty. Nurse Corps officers honored her with a luncheon in the Officers' Club last Friday.

Captain Johnston is returning to her home state of Texas. She plans to do some renovations to her home and travel, but will keep her nursing license active in case she wants to return to the profession.

She earned her bachelor of science degree at Texas Women's University and a master's degree in nursing from the University of Washington.

She has held billets in New York, Morocco, Texas, recruiting in the Midwest, duty under instruction at the University of Washington, and also

assignments in North Carolina and Guam. She holds the Navy Achievement Medal.

CAPT Georgia Johnston

Private sector reps survey purchasing procedures here

Thomas Streff and Fallon Mikula, both business executives participating in President Reagan's Private Sector Survey on Cost Control in the Federal Government, visited Naval Regional Medical Center Oakland on Sept. 7 to review this facility's purchasing and procurement procedures.

The nonpartisan, nonpolitical review is concerned with all organizations of the Executive Branch of government. Initial emphasis is on the departments of Defense, Health and Human Services and Housing and Urban Development.

Hire the Handicapped Week set Oct. 3-9

Oct. 3-9 has been officially designated National Hire the Handicapped Week. The Rehabilitation Act of 1973 and Vietnam Era Readjustment Act of 1974 form the basis for the federal Handicapped Program. These two pieces of legislation require that agencies develop and implement Affirmative Action Plans for the hiring, place-

ment, and advancement of the disabled, including disabled veterans.

A major portion of the Department of Navy's handicapped program is to provide reasonable accommodation to all employees. This includes facility modification, restructuring of jobs, modifying work schedules and acquiring equipment.

IS COMING!

Nov. 15, 1982

Advisory Board meets informally

Despite the lack of a quorum due to heavy post-holiday workloads and extended vacations, five members of the Civilian Employee Advisory Board met informally with Rear Admiral Robert C. Elliott, Commanding Officer on Sept. 7.

Among the topics discussed were "contracting out" Food, Housekeeping and Laundry Services, Congressional liaison, communications methods, supervisory-employee relationships and achievement awards.

The commanding officer explained that he has no jurisdiction or control over the decision-making process which mandates whether or not contracting out will be required for the medical center. If it comes to pass, he said, every effort will be made to help displaced employees relocate. He promised to disseminate the facts to civilian employees who may be affected.

He also told the representatives that he will be meeting with Congressional aides to discuss major concerns, and spoke of several new methods which have been implemented here for better communication. They include meeting with military and civilian staff members, personal visits by the admiral to work sites, and institution of the "Command Line" column in *Oak Leaf*.

Full minutes of the Sept. 7 meeting will be posted on the advisory group's bulletin board located in the passageway across from the main dining hall on the third deck.

NIS special agent new to command

Mr. Kip R. Steele is now the resident Naval Investigative Service agent at Naval Regional Medical Center, Oakland, replacing Mrs. Carolyn Hahn who has transferred to Naval Air Station Alameda.

Mr. Steele, who has been with NIS for more than three years, served as Navy supply officer for nearly six years. He holds a bachelor of science in business administration from Oregon State University, and a master's in public administration from California State University, Long Beach.

"(I) am looking forward to a different command and environment," he said. "(It) should be a challenging experience."

Anyone with business to discuss with NIS may reach him at Ext. 2119. His office is located in the same building as Security.

Job openings

Applications will be received by Civilian Personnel Service through Monday, Oct. 4, for clerical positions in Supply, Management Information, and Dental Service.

A Supply Clerk, GS-4 is needed by the Inventory Management Branch, Stock Control Section, Supply Service, while there is a job opening for a Medical Clerk, GS-4 in Dental, and a Secretary (Typing), GS-5 in Management Information.

Applicants must be career and career-conditional employees of federal activities in the San Francisco Bay Area, VRA eligibles, or, in the case of the Supply Clerk, within reach on the appropriate Office of Personnel Management register.

Further information on all three jobs may be obtained by calling Maurine Tinsley at Ext. 2116.

DIAL 333**

operational readiness—a M.U.S.T.

Timely medical care for casualties in the battlefield plays an important role in the success of a combat unit. On the increasingly lethal battlefield of the future, the availability of appropriate medical care will be even more critical.

This modern battlefield philosophy recently became very real to 14 of the Naval Regional Medical Center's staff members. Some of Oak Knoll's finest were ported to Ft. Lewis, Wash., for a Rapid Deployable Medical Facility (RDMF) training exercise, where they worked with other naval medical personnel from Aug. 8 to Sept. 3. Personnel included all specialties of the Navy Medical Department and 23 Seabees, with training conducted by the Army's 47th Combat Support Hospital.

The Navy's mission was to learn how to set up and operate a Medical Unit Self-contained Transportable (M.U.S.T.). This type of combat support hospital is expandable to a 200-bed configuration—80 each for intensive and intermediate care, and 40 for general care. The hospital's capabilities include resuscitative surgery, treatment of critically injured, and surgical/medical services for general patients. Its major components included:

- A utility power pac, designed to be a multi-purpose turbine fueled by

JP-4. Through the use of eight of these, a 200-bed configuration provides patient care in a temperature controlled environment with hot and cold running water.

- An expandable shelter. These invaluable units house operating rooms, central sterilizing room, laboratory, pharmacy, and radiology. Oral surgery could also be housed in an expandable.

- An inflatable shelter capable of housing a 20-bed ward, supply, headquarters, ENT, communications, patient affairs, etc.

This article only scratches the surface of the complexity required to set up a Combat Support Hospital. Logistics, training, and staffing require much effort. Operating a field hospital necessitates a great deal of coordination and teamwork to insure a successful operation.

Training with the Army as an RDMF team member is a challenging, worthwhile experience that has helped to increase awareness of the Navy Medical Department's mission and our role in supporting the operational forces.

After three and a half weeks with RDMF, one can really appreciate the popular recruiting logo, "Navy, it's not just a job, it's an *adventure*."

SETTING UP—Inflating units for a field combat support hospital is an all-hands

TRIAGE—Field hospital physicians examine "casualties" and determine who needs first attention.

New exercise program debuts at training center

A new system of exercises, called the Scientific Program of Aerobic and Resistance Training exercise in the Navy (SPARTEN), will be introduced at Recruit Training Center San Diego, Calif., in an experiment designed to improve health and physical fitness throughout the Navy.

SPARTEN will be more demanding than the fitness programs currently in use at Navy training centers, and will

contain an added emphasis on aerobics—exercises that concentrate on the respiratory and cardio-vascular systems.

Recruits who are trained in the SPARTEN system will be given "before and after" fitness tests of their muscular strength, endurance and stamina. During recruit training they will exercise for two 40-minute periods six days each week. The morning period will

emphasize flexibility and calisthenics, while evening sessions will include a three-and-one-half-mile run, done at an "eight-minute mile" pace. Weight training machines will also figure prominently in the new programs.

SPARTEN test results will be followed closely, with an eye to introducing portions of the program to the fleet.

Former employee fatally beaten

Willie Drew, Sr., 61, a former cook in Food Services, was fatally beaten in his Oakland home about 10 days ago. Police are seeking a 30-year-old suspect in the case.

Mr. Drew retired from Oak Knoll about 10 years ago, friends said.

RAPID TRANSIT—A helicopter brings in "wounded" and medics rush the patients to the battlefield hospital.

Former DCS secretary

Mary Takai honored at retirement luncheon

Nearly 100 coworkers and friends attended a luncheon in the Officers Club yesterday, honoring Mary Takai on her birthday and last day of employment at Oak Knoll.

The former secretary to the Director of Clinical Services has now retired after nearly 24 years' federal service.

Born in Sacramento, she was one of the many Nisei interned at a relocation camp at Tule Lake in the early World War II days, and began her secretarial career there.

Other federal service, broken to accompany her Army husband on numerous assignments and to rear five children, included employment with the American Embassy in Tokyo, with the Treasury Department in San Francisco, and at the Concord Naval Weapons Station.

She came to work at Oak Knoll in 1968 and was the secretary in the Prosthetics Laboratory when it was in the process of being moved to its present hospital location. She said she was the only woman in a group of more than 30 employees and at that time the

department had more than 1,000 outpatients.

Subsequent jobs here were as Secretary to the Chief of Medicine in 1972, and Secretary to the Chief of Clinical Services from 1974 to retirement.

Mary is excited about her retirement plans, and said, "I deserve it after all these years." She and her husband Roy, a retired Army Intelligence Lieutenant Colonel, plan to travel throughout the United States and Europe while keeping their permanent home in Pleasant Hill. Three of their children are married and Mary and Roy are grandparents of one.

Displaced employees have priority in DoD job placement

The Department of Defense has an established Priority Placement Program to provide continued employment within DoD for career-conditional or career employees who are scheduled for involuntary separation through reduction-in-force (RIF), involuntary furlough for a period of six months or more or demotion by RIF. The program also aids those who decline functional transfer outside the commuting area, or who are satisfactorily completing duty in a foreign area, territory, possession, the Canal Zone or states of Alaska and Hawaii.

Firm measures must continue to provide maximum opportunity for DoD-placement through automated referral procedures, thus minimizing the individual effect of base closures, consolidations, transfer of functions, and reductions that result from organizational changes.

Support of this program to provide job opportunities for deserving DoD employees in need of job placement assistance is a vital ingredient of sound personnel management by all supervisors, both military and civilian, officials said. The policy of the Naval Regional Medical Center is to support this program by insuring maximum utilization of fully qualified surplus priority candidates during the recruiting process.

Columbia to hold fall classes at TI

Columbia College is offering 10 courses on Treasure Island during the fall session, Oct. 18-Dec. 11. Each class will meet one or two evenings per week during the eight-week session and carry three semester hours of college credit.

Classes are open to active duty military, their dependents, and other civilians as well. Tuition is \$80 per credit hour. Students may pay tuition through the GI Bill, military or civilian assistance, or on their own.

Courses include: Introduction to Criminal Justice; English Composition II, Mondays, 6 to 11 p.m.; General Psychology, Tuesdays, 6 to 11 p.m.; Business Communication, 5 to 7:30 p.m., Tuesdays and Thursdays; Macroeconomics, Tuesdays and Thursdays, 7:45 to 10:15 p.m.; Principles of Management; Statistics; Juvenile Delinquency—Wednesdays, 6 to 11 p.m.; US Social and Intellectual History, Thursdays, 6 to 11 p.m.; Human Resource Development, Saturdays, 9 a.m. to noon and 1 to 3 p.m.

Prospective students may obtain additional information by calling Jeanne Hopper at 397-5613.

Surprise survey shows drug use in Navy declining

On Sept. 14, the Navy announced preliminary results of a surprise urinalysis test of Navy personnel. This anonymous survey, held on Aug. 30 in San Diego and Norfolk, was conducted using the same rigorous Navy testing standards applied in a similar December 1980 survey. The independent firm of Booze, Allen and Hamilton Associates administered both surveys to achieve consistency and statistical comparability.

The 1980 tests indicated about a 50 percent usage rate for naval personnel tested at both west coast and east coast major naval bases. The 1982 tests indicate the drug usage rate has been cut by nearly two-thirds in San Diego and by one-half in Norfolk, for an overall average of between 20-25 percent. Final 1982 test results are expected to be published within three or four weeks.

While the Navy is pleased with the significant decline in drug usage by naval personnel, both Secretary of the Navy John Lehman and Chief of Naval Operations ADM James D. Watkins continue to stress the Navy's goal of "zero tolerance" for drug abuse. The Navy will continue to attack drug abuse with firm enforcement of naval regulations.

tions.

New York Representative Joseph Addabbo, Chairman of the Defense Subcommittee of the House Committee on Appropriations, took note of the results in a letter to the CNO.

In the letter, Congressman Addabbo said, "I wish to congratulate you and your predecessor, Tom Hayward, for taking a tough stand on drug abuse in our Armed Forces. As a consequence of your resolute, and in some quarters unpopular decision to promote a drug free environment for those dedicated people who are defending our country, there has been a 50 percent reduction in marijuana usage among our junior sailors. The long term impact of these dramatic results should not be minimized since the character and self-discipline instilled by the Navy can be expected to last a lifetime.

"I believe the results of this survey show a clearly improved situation and should be considered vindication for the Navy's 'get tough' policy. Every sailor who has stood up to the tremendous peer pressure to abuse drugs deserves special praise. That simple but often-time courageous decision surely represents the U. S. Navy at its finest."

Where 1983 legislation stands on military compensation

The Senate Armed Services Committee completed "mark-up" action on the FY-1983 Armed Forces Pay Bill Sept. 14.

The Senate proposal would affect retiring members by altering certain provisions of current law. Any individuals who retire between the date of enactment of the legislation and Sept. 30, 1985 would be eligible to use the current one-year "look-back" method to calculate retirement pay, if it would be advantageous for them to do so. In addition, members who become eligible to retire during that three-year "grandfathering" period and who elect to remain on active duty after that period, would have a "save pay" guarantee so that they would not receive less retired pay than they would have received if they had retired during the three-year grandfathering period.

The Senate proposal also provides a 4% across-the-board basic pay increase (except for paygrade E-1, which would receive no increase), a 4% Basic Allowance for Quarters (BAQ) increase and a 4% Basic Allowance for Subsistence (BAS) increase. The bill would also "de-link" military and federal civilian pay, for a one-year period.

The House Armed Services Committee version of the pay bill would also de-link military and civilian pay, but would allow the President to set the

Oct. 1 raise at any level between zero and 9.5%. If the House proposal became law, it is expected that the raise would still be about 4%.

Permanent change of static allowances would be modified in several instances if recommendations made by the Senate bill are followed. Travel reimbursement would be increased from 13 to 16 cents per mile for military personnel, while dependents' mileage allowances would be frozen at 7 cents per mile for dependents 12 years of age or older and 3.5 cents per mile for those under 12. The maximum household goods shipment weight would be increased to 1,500 pounds for members in pay grades E-7 through E-9 only. The House Armed Services Committee would freeze all shipment allowances at their present levels. Finally, the Senate bill would require service members to use water ports nearest the current duty station or port of embarkation when shipping a privately owned vehicle (POV) to an overseas duty station.

The Senate proposal also would authorize a restructuring of aviation officer continuation pay during FY 1983. Replacing the current payment plan would be contracts for three years (\$4,000 per year), four years (\$6,000 per year) and six years (\$6,000 per year). Three-year and four-year contracts could be entered into by aviation officers with six to ten years of active service who have not received an aviation bonus previously. Six-year contracts could be entered into by Aviation Officers with more than six but less than seven years of active service.

Other proposals in the Senate bill include: Denying career BAS for single enlisted members (E-5 and above) other than those now receiving BAS; extending SRB payment authority for one year, extending for one year the current authority to reimburse (up to BAQ/VHA) those personnel whose shipboard quarters are designated uninhabitable during overhaul and for whom government quarters are not available, allowing the President discretionary authority to stop separations of regular and reserve forces during "national emergencies," and rounding

18	78,184									

(Editor's Note: No official notification had been received on the above revised annual salaries for GS civilian employees at our deadline; however, assuming a four percent cost of living boost recommended by the President, and already included in legislation, the wages printed above seem likely. If accurate, they will probably become effective during the first pay period after Oct. 1.)

Barry on TV

Hospital Corpsman Third Class Thomas Barry of Naval Hospital Emory was one of those recognized and interviewed on television over the Labor Day weekend in conjunction with the annual Jerry Lewis Telethon for the Cerebral Palsy Association.

Petty Officer Barry was singled out because of his assistance as a volunteer in a summer camp for children crippled from the disease.

He appeared before KTVU Channel 2 cameras and also worked behind the scenes, assisting with some of the cerebral palsy victims who were also guests on the show.

OR school graduates to new assignments

On Sept. 24, Operating Room Technician School Class 82003 graduated 13 students. The course included two phases—six weeks of didactic instruction on aseptic technique and 20 weeks of clinical experience in the different surgical services.

The graduates included HM2 Michael J. Allanson and HM3 Thomas Taconet both reporting to NRM Charleston, S.C.; HN Agustin J. Marquez and HN Carlos A. Uhrbach reporting to NRM Jacksonville, Fla.; HM3 Jackson P. Brown and HN Pamela Johnson, both reporting to NNMC Bethesda, Md.; HN Cynthia E. Duhe to NRM Pensacola, Fla.; HN Jessica D. Harris to NRM Oakland; HN Michael Morgan to NRM Roosevelt Roads, R.I., and HN Jennifer A. Tate to NRM Keflavick, Iceland.

Specialty students from Oak Knoll who were with the first phase of training were DN Valerie J. Barbeault and Patti L. Holly both of Dental Service and HM3 Michael C. Koch from the Podiatric Clinic.

Mrs. Couser marks 39 years in Oak Knoll's Food Service

FLOWERS FOR A GREAT LADY— Food Service coworkers presented Marie Couser with a bouquet on Sept. 17, recognizing her 39 years of civilian service in that department. Marie is the affable lady who often works as door checker at the entrance to the main dining room and gives everyone a cheerful greeting.

Friday, Sept. 17 marked the completion of 39 years since Mrs. Marie Couser began her career as a Mess Attendant at the U.S. Naval Hospital, Oakland, California.

Marie, as she is known to her coworkers, has performed in every position open to a Food Service Worker. In the words of Mr. John E. Campbell, her immediate supervisor for the past 18 years, "she has always been a very dependable worker. Despite various duties in the salad room, meal pack line, dining room, and as a door checker, she has maintained her high quality of work standards.

"Over the years," he continued, "when absences occurred in various positions, Mrs. Couser stepped in with the utmost calm and assurance. She functions independently, requiring very little supervision. While the average employee sooner or later adjusts to changes, Mrs. Couser adjusts much, much quicker to any change in working conditions. In order to acquaint herself with new changes, she will come in before time and observe as much of a new operation as she possibly can so that her shift and supervisors will have less of a problem. Her positive contributions to this command have been many."

Marie has accumulated more than 1500 hours of sick leave, clearly indicating a commendable attendance record.

In 1948, after working at Oak Knoll for nearly five years, Marie met and married her husband Raymond, a sailor on the staff of the hospital. Their daughter and one of two granddaughters were born here also. After all these years Marie unhesitatingly states that she is very thankful for her job because it is responsible for everything she has.

Comings and Goings

"Fair winds and following seas" to the following personnel who have recently departed this command:

Lieutenant Commander Bernard Rabold, Jr. to Norfolk, Va.

Lieutenant Commander Dorrit Ahbel to NAVSUBASE Groton, Conn.

Lieutenant Commander James Hicks, to NRM Clinic Hawaii.

Hospital Corpsman Third Class Barry Tubel to 3rd FSSG, FMFPAC Okinawa.

Hospital Corpsman Third Class Deborah Langlois, Aerospace Regional Medical Center Pensacola, Fla.

Hospital Corpsman Third Class Gregory King to NRM Clinic Hawaii.

Hospital Corpsman Third Class John Husted to 3rd FSSG, FMFPAC Okinawa.

Hospital Corpsman Michael Written to 1st Marine Division, FMFPAC.

Hospital Corpsman Third Class Randall Scott to Naval EPMU, Naples, Italy.

Hospital Corpsman Third Class Patricia Severy to NCSL Panama City Branch Clinic.

Hospital Corpsman Third Class Michael McMahan to 2nd Marine Division FMFLANT.

Hospital Corpsman Third Class George Frigas to Naval EPMU, Norfolk.

Hospital Corpsman Second Class David Mickey to NRM Japan.

Hospital Corpsman Third Class Joe Medina to NSA Brook Branch Clinic, MC Groton.

Hospitalman Michael Witt to 2nd Marine Division FMFLANT.

Hospital Corpsman Third Class Hopper to MWTC Branch Clinic Edgeport, Calif.

Hospital Corpsman Second Class Joseph Clark to 1st MAW, FMFPAC Okinawa.

Hospital Corpsman Second Class

Doris Barry to NWC China Lake Branch Clinic.

Hospital Corpsman Second Class John Kercheval to USS ACADIA, San Diego.

Hospital Corpsman First Class Esmeraldo Ranches to 3rd Marine Air Wing, FMFPAC.

Hospital Corpsman Third Class Thaddeus Johnson, released from active duty.

Lieutenant Alice Rhetta to NRM Guam.

Hospital Corpsman Third Class David Wright to NSHS San Diego, Calif.

Hospital Corpsman Third Class Charles Wilson to NSHS San Diego.

Hospitalman Marc St. Marseille, released from active duty.

Hospital Corpsman Kelly Berber to USS PRAIRIE, Long Beach.

Hospital Corpsman Third Class Achim Inman to Branch Clinic, T.I.

Hospital Apprentice Aurelio Rareja to Pensacola, Fla.

Hospital Corpsman Second Class Daniel Spicer to USS PROTEUS.

Hospital Corpsman Third Class James La Venture, released from active duty.

Lieutenant Beatrice Harrold, released from active duty.

Lieutenant Mary Owens, released from active duty.

Lieutenant Janet Beardsley, released from active duty.

"Welcome aboard" to newly reported:

Hospitalman Edward Blackwell, Nursing Service.

Hospital Corpsman Second Class Reginald Robinson, Outpatient Service.

Hospital Corpsman First Class Roger Smith, NP Service.

Hospital Corpsman Third Class Chang Kang, Pharmacy.

EXAMINATION—Physician Assistants CWO2 Rick Weaver (left) and CWO3 Gary Sawicki examine a patient's scalp in the support activity's treatment room.

Our branch activities

Island named for home for two sp

In 1830, General Mariano Guadalupe Vallejo, while on a mapping expedition with a company of Mexican cavalry troops, was fording Carquinez Straits when one of his favorite horses, a white mare, became detached from the group and was carried away by the swift current. Ultimately the horse struggled ashore on an area called Isla Plana (flat island), where she was subsequently found. The General promptly changed the name of the site to Isla de la Yegua—Mare Island.

In 1853 the Navy purchased Mare Island and Commander David G. Farragut took command the following year to construct the Navy yard facilities. In 1869 construction began on the Naval Hospital, the first on the west coast, and continued through World War II and later until decommissioned.

Today Mare Island's medical needs are served by two Branch Clinics. One is designated the Naval Support Activity (NSA) clinic and serves the military, dependent and retired community. The other is the shipyard clinic which primarily provides occupational health and industrial hygiene services to the more than 10,000 shipyard civilian employees.

NSA Clinic

In addition to general primary care services the NSA clinic provides pediatric and optometry services full time and OB/GYN, wart, ENT, and pediatric subspecialty services through visiting physicians from NRMCOakland on a regular basis. Other services include a Family Advocacy Program, weight control clinic, CHAMPUS counseling, parenting skills seminars, prenatal classes and immunization and allergy clinics, as well as pharmacy, lab x-ray, military physical exams, and ambulance services.

The staff of the NSA clinic consists of 10 officers, 34 hospital corpsmen and 13 full time civilians plus two part time civilian employees.

LAB TESTS—HN Janae Braziel puts a smile into her work as she goes about her duties in the NSA clinic's laboratory.

POSITIONING—HM3 Jeff Menge instructs a patient in positioning his foot for an x-ray at the NSA clinic.

ASSEMBLY—HM1 Pat Gerrells (seated), Fleet Liaison, gets an assist from HM1 Jim Shaw of the NSA clinic in putting together oxygen regulators.

X-RAY CHECK—CWO2 Jack Lake, Physician's Assistant at the NSA clinic, points out a patient's x-ray to Medical Corps Commander Merv Rasmussen.

te mare long ago, medical clinics

Shipyard Clinic

The 36 full and part-time civilian employees of the shipyard clinic, plus two hospital corpsmen assigned from the NSA clinic, provide a broad spectrum of occupational and industrial health services. Civilian employee physical examinations required for various programs such as radiation, asbestos and other potential industrial hazards, as well as new hire and termination exams, provide the largest part of the occupational health workload. Other occupational health services provided are sick call, fitness-for-duty exams, disability evaluations, optometry, audiology, medical records maintenance, x-ray laboratory, and some employee counselling on medical matters.

The industrial hygiene section provides consultation services and industrial hygiene inspection and surveys to the shipyard and to the other commands throughout the Oakland medical region. The well equipped industrial hygiene laboratory serves the entire medical center region as well.

Currently, the two clinics are located in separate old buildings but that is scheduled to change soon. A new clinic is currently planned for construction and expected to be completed in 1984 or 1985. The new 61,000 square foot

building will provide for both of Mare Island's medical clinics as well as the base dental clinic. The new facility will allow for consolidating many of the functions such as x-ray, laboratory, pharmacy, and emergency services which are presently provided in both clinics.

Positioned at the tip of the bay, Mare Island is a most pleasant location to serve a tour of duty. The heart of California's wine country, the Napa and Sonoma Valleys, are just a few minutes away. Also nearby are the majestic redwoods, Russian River, the beautiful northern California coast, Lake Berryessa and a host of other recreational

(Continued to page 10)

OFFICER IN CHARGE—Medical Service Corps LCDR Len S. Watts supervises both NRMC Oakland clinics at Mare Island. One serves the Naval Support Activity and the other the Naval Shipyard population.

INDUSTRIAL HYGIENE—George Fulton uses a computer in his role as an industrial hygienist at the shipyard clinic.

CIVILIAN LAB TECH—J. Cesar English works in the Mare Island Naval Shipyard clinic's well-equipped laboratory.

X-RAY EMPLOYEE—Cleo Pulsifer is employed in the X-ray Department of the shipyard clinic.

ACCIDENT VICTIM—HM2 Thomas Castro bandages the wrist of an injured shipyard worker while Dr. Werner Schmidt looks on.

'TAKE A DEEP BREATH'—Cynthia Fokuda (l) tests the pulmonary function of one of Mare Island Shipyard's employees.

CHECKING IN—Mare Island Naval Shipyard civilian employees check in at the clinic's front desk for emergency treatment or medical evaluations.

Mare Island Clinics--

(Continued from page 9)

sites. Striped bass and sturgeon fishing are available off the piers on Mare Island or in the Bay and Carquinez Straits. There also is duck and pheasant hunting throughout the area. Of course, the state capitol, gold country, the Sierras, and the Delta Region are within easy driving distances as well. These are just some of the opportunities available in this area. The list could go on and on.

Today, nuclear submarines ply the waters to Mare Island rather than horses, but Mare Islanders feel fortunate that there was once a white mare that found her way ashore.

PULLING CHARTS—Civilian employee Dolores Henson of the Medical Records Department, pulls the chart for a patient at the NSA clinic.

MEDICAL TEAM—Hospitalman Earl Books checks the IV as Mary English, civilian R.N., takes a patient's pulse.

EYE EXAM—Medical Service Corps LCDR E. J. Uffens, optometrist at the NSA Branch Clinic, checks a patient for glasses.

HOLDING STEADY—Dr. Clifford Wong positions a patient for eye examination in the shipyard clinic.

PICKING UP POINTERS—HM3 Dave Camlin observes as Medical Corps LCDR Francisco Manansala checks an unconscious patient in the Emergency Treatment Room.

Patient contact representatives receive complaints, questions

Throughout the Oakland naval medical region, increased emphasis is being placed on a Patient Contact Program aimed at meeting patients' personal and comfort needs, receiving complaints, and referring or providing direct assistance to patients and their families in solving problems or answering questions.

"Total medical care is based on the appreciation of the inter-relationship of social, emotional and pathological forces in the care of the sick and injured," said Lieutenant Kay Schneider, Chief of Outpatient Administration and the Command Patient Contact Officer at the medical center. "It is therefore necessary," she continued, "to center interests not

merely on the disease process, but on the patient and his or her social background as well."

Officers in charge, or their administrative officers, at the region's branch clinics will implement the program at their activities. Contact point representatives have been appointed throughout the command and are undergoing special training to qualify them to receive patient complaints or inquiries, investigate, and insure patient satisfaction. Additionally, all newly assigned personnel involved in direct patient care will be briefed on the program before reporting to work sites in the hospital.

Effectiveness of the program will be periodically monitored through use of

patient satisfaction surveys.

Contact point representatives at Oak Knoll are:

Kim Babendir, Ruth Ball, Joan Boltwood, Barbara E. Budesilich, HM1 Linda S. Chamberlain, Nancy Cohen, LT Susan Colligan, Helen T. Cupper, HN Rudy N. Delumpa, Hope A. Dorman, Ada L. Frazier, Rennae Humphrey, Mildred Johnson and HM2 Terrie Kane.

Also, Jane Lippincott, Millie Lumley, RP1 Roger Minks, HM2 Stephen H. Palmer, LCDR Mary Petrosky, Marjorie J. Ritchie, Delma Shanahan, Frances Sheykhzadeh, Anita Smith, Gudrun Smith, HM2 Sheila Sundbye, DT3 Betty Williamson, Elisabeth Winsby and Joan M. Wisley.

Captain Alice Martinson becomes first woman to head Navy hospital

Captain Alice M. Martinson, Medical Corps, U. S. Navy, became the first woman to command a Navy medical facility recently when she took over the helm at Naval Regional Medical Center, Philadelphia.

She comes from a Navy family. Her father served 28 years as a Civil Engineer Corps Officer, while her grandfather, a line officer for 47 years, commanded minesweepers in WWII, and was a pall bearer for the remains of John Paul Jones when the body was returned to the United States from France.

A native of Philadelphia, Dr. Martinson earned her medical degree at George Washington University and completed her internship and residency at Naval Hospital San Diego, followed by a fellowship in children's orthopedics at University of Southern California in Los Angeles.

She was Chief of Orthopedic Services at NRMHC Long Beach and later, Clinical Consultant of the Bone and Joint Branch, Armed Forces Institute of Pathology. In 1980 she served as Assistant Chief, Orthopedic Services and Director of Resident Training at National Naval Medical Center, Bethesda. Before assuming command

CAPT Alice Martinson

at Philadelphia she was Director of Clinical Services at NRMHC Great Lakes, Ill.

Her professional interest is reconstructive surgery in hemophilia.

The early Navy-- (Continued from page 2)

original colonies were entering into an eight-year period of war with England, the second longest period of war in American history. Only our involvement in Vietnam lasted longer.

The Continental Congress was also concerned about a navy; they had none and realized that building one to oppose the British fleet's control of the seas and the American coastline would be necessary. But building and manning a navy could prove costly both in terms of lives and property.

Congress had intercepted letters from England that discussed two British ships sailing to Canada loaded with munitions and other supplies destined for the British army in the colonies. Many members of Congress urged that two colonial ships be commissioned, outfitted for war and sent to intercept and capture the two British ships. Capture of the supplies carried aboard the two British ships, as well as the capture of the ships themselves, they argued, would greatly aid the ill-equipped Continental Army around Boston and would establish the beginning of colonial naval operations.

Other members of Congress, however, argued that opposing the British fleet would be foolhardy and would only provoke the British into attacking undefended colonial coastal cities. Debate among Congressmen was heated, but when the motion was finally put to a vote, it passed. The Naval Committee was established Oct. 5, 1775, and was tasked with drawing up plans to intercept the two British transport ships sailing from England.

The three-man committee prepared a report for Congress in which it recommended the outfitting of two ships, the 14-gun brigantines **Andrew Doria** and **Cabot**, to cruise three months to the East to intercept the two British transport ships. The report was tabled for eight days so that all members of Congress could have a chance to read it. Then, on Oct. 13, 1775, Congress voted to adopt the recommendations of the Naval Committee and to commission the two ships. That marked the birth of the Continental Navy, forerunner of the U. S. Navy.

The Continental Navy was far removed from the modern Navy of today, but for the 13 colonies trying to gain their independence from England, it was a beginning. That date—October 13—is still celebrated as the birthday of the U. S. Navy. Happy 207th! (NES)

Advance pay for civilians moving to overseas jobs

Navy civilians transferred overseas can get a salary advance of up to six pay periods net base pay to help defray the moving and travel expenses. The single, lump-sum payment can be approved from a month before an employee's departure to three months after arrival at the new overseas duty station.

Employees reporting to an overseas duty station who want to supplement their regular travel and moving expenses may submit a "Request and Voucher for Advance Civilian Pay," DD form 2274 through their usual personnel or payroll channels. The forms are new and will soon be available from personnel and civilian payroll offices. Until the new form is available, advance pay can also be requested by submitting a Standard Form 50 and a letter. A copy of official orders must accompany all requests. A request for advance pay can also be included in the written official orders.

Employees repay the advance by payroll deduction over a maximum 13 pay periods beginning with the first pay period after the advance is paid. They also must guarantee in writing to repay in full any outstanding advance balance if they leave civil service.

Navy military people have received similar salary advances for about 35 years, and salary advances were authorized for civil service employees

in the Foreign Service Act of 1950. Further information is available at civilian payroll offices.

Household goods must be shipped within six months

Some former Navy members have reported they were not aware of the time limits regarding shipment of household goods. The Uniformed Services of America Act of 1981 required, effective Nov. 1, 1981, that personnel ship their goods or make application for shipment within six months of separation.

After applying, if personal hardship prevents shipment within six months, they must reapply to a Personal Property Shipping Office for an extension. Retiring members still have up to one year for shipment.

Shipping foreign autos creates some problems

Service members stationed overseas who ship foreign cars to the United States are finding, in some cases, their automobiles do not meet U. S. standards due to improper conversion. Service members are inconvenienced by fines and the need to pay another mechanic to do the work correctly.

The Environmental Protection Agency (EPA) will issue waivers of certain environmental standards, but warns that safety standards will not be waived. Vehicles that cannot be modified to conform to U.S. standards will be allowed to remain in the U. S.

Because of the expense and inconvenience of importing foreign cars, EPA officials advise buying only vehicles which are certified and labeled for sale in the United States.

Questions about emission standards can be addressed to: U. S. Environmental Protection Agency, Manufacturers Operating Division, Engine Investigation and Imports Section, Washington, D.C. 20406.

Safety requirement questions should be addressed to: Director, Office of Vehicle Safety Compliance, National Highway Traffic Safety Administration, U. S. Department of Transportation, Washington, D.C. 20590.

COLUMBUS DAY 1982 OCTOBER

Worldwide selection

DoD surveys 26,000 on drug, alcohol abuse

The Department of Defense has announced that a worldwide drug and alcohol abuse survey is being administered to approximately 26,000 military people. The survey will be conducted at some 60 locations through November 1982. It began last month. The objective of the survey, according to Dr. John H. Johns, Deputy Assistant Secretary of Defense for Drug and Alcohol Abuse Prevention, is to determine the use of alcohol and drugs in the military services. In addition, the survey is expected to depict any physical, social and work consequences, including drug and alcohol dependence. The survey is voluntary, Johns said, and individual responses will be

anonymous. "This survey is one of our ways of ensuring that we define the true nature of the problem," he explained.

A civilian contractor is conducting the survey. Representative samples are being selected from the Pacific, Europe, the United States and other sites by paygrade groups E-1 through E-5; E-6 through E-9; W1 through W4; O1 through O3; and O4 through O6. Individuals for survey participation will be randomly selected by name.

The survey will be similar to the one administered in 1980 which found that overall drug use had decreased since a previous worldwide drug abuse survey was conducted in 1974.

Med explains realignments

During the 1970s, the number of beneficiaries eligible for naval health care dramatically increased, while the staff of the Medical Department providing this care decreased. For a period of time, this dramatic asymmetry in health care providers and recipients was accommodated through rationalization of health care facilities and emphasis on peacetime medicine. It was determined, however, that this emphasis was at the growing expense of readiness for wartime contingencies in which navy medical personnel would deploy with the operating fleet. In recognition of this trend, a number of studies were conducted to look for efficiencies within the present system. No single solution was found which the existing Medical Department headquarters staff could adequately plan, program, and supervise both wartime medical readiness and peacetime health care constancy.

As a result of these conclusions, the Director General was directed to review the Navy hospitals and regional medical care systems and, in the course of his regular triennial inspection of the Bureau of Medicine and Surgery, determine whether present staffing was adequate and properly organized to support future naval health care requirements. His finding, which was widely anticipated, was that it did not.

As a consequence of these ongoing reviews, and after confirmation of current inadequacies by the Navy Inspector General, major realignments within the Medical Department are being implemented to improve our focus and capability in the area of wartime medical readiness. This implementation will be accomplished without adverse impact on peacetime beneficiaries. Among the steps now underway are: Separation of hospital management from regional medical center management to improve the span of control. Addition of staff to regional medical commands to improve the contingency planning, reserve affairs, and financial management of regional facilities.

The major naval hospitals, such as Bethesda, will be internally reorganized from a management standpoint, to improve internal control and better integrate administrative and clinical functions. For example, an Executive Officer billet has been established in this new organization to improve administrative and military oversight of hospitals.

Separation of policy and planning functions from budget execution and supervisory management responsibilities within the Bureau of Medicine

and Surgery headquarters, Washington, D.C. This action will require some increase in headquarters health care personnel, which will be offset from within overall Navy resources.

As an essential part of the realignment program, the Bethesda hospital was commissioned as a separate command on Sept. 1. The Naval Hospital in San Diego will be commissioned on Oct. 1. It is anticipated that these realignments will be continued throughout calendar year 1983, with the ultimate objective of redesignating the Bureau of Medicine and Surgery as the headquarters of the Naval Medical Command. These actions and their completion dates will depend upon a continuing review of the implementation process and necessary revisions to Title 10 of the U. S. Code.

In summary, naval health care over the past decade has developed a significant imbalance between the Medical Department and its constituency, with a staff ratio far below other military services. Actions are being taken to correct this situation, with particular emphasis on medical readiness for military contingencies, which has in the past necessarily been subordinated to the support of the Navy's peacetime health care system.

Volunteers needed for 'helpline' service

"Helpline," sponsored by the Family Service Center at NAS Alameda, is looking for volunteers to help provide counseling, advocacy, crisis intervention and referral services and information to the military community.

A 30-hour training period for volunteers will begin tomorrow and run through Oct. 10. Volunteers must be 18 years of age or older and experienced with military life.

Call 869-4256 for further information.

Vosloh to Philadelphia

Medical Service Corps Commander David Vosloh, former NRMOC Oakland Chief of Operating Management and more recently Director of Administrative Services (DAS) at Naval Regional Dental Center, San Francisco, is leaving the Bay Area today for a new billet as DAS for Naval Regional Medical Center Philadelphia, Pa.

Commander Vosloh detached from Oak Knoll in November 1980 but has continued to be a frequent visitor to the command in coordinating dental administrative matters.

AS THE USS PROTEUS puts out to sea on a three-day training cruise, Chief Henry O. Grady, applying chest compression, demonstrates advanced cardiopulmonary resuscitation (CPR) to the ship's medical corpsmen.

Medical corpsmen learn CPR at sea

Hospital Corpsman assigned to USS PROTEUS underwent 13 hours of intensive training in cardiopulmonary resuscitation (CPR) while "at sea" during a three-day training period earlier this year.

Chief Hospital Corpsman Henry O. Grady, an American Heart Association certified instructor in CPR assigned to the Naval Regional Medical Branch Clinic at Naval Station, Guam, joined the PROTEUS for the March 4-6 "underway" period to conduct the training.

"Little did I know in November, 1980, when I attended a CPR instructor course by the Guam Unit of the Hawaii Heart Association, that I would someday be aboard a ship in the Philippine Sea, conducting a CPR course."

"CPR is an essential skill for a shipboard environment," said PROTEUS Lieutenant Harrison Kerchner, Medical Division Officer. "The hazards of shipboard duty range from drowning to electrical shock. These hazards, coupled with the natural causes of cardiac arrest, make it a matter of 'the more the better' as far as CPR training is concerned."

"Our goal," he continued, "is to have all our Hospital Corpsmen certified as American Heart Association

CPR instructors, and have them train other crewmen in CPR.

"It was difficult to conduct such extensive training while underway at sea," said the Lieutenant. "We not only had our routine duties, but all the training that only going to sea gives us a chance to perform. Nevertheless, this was important enough to make the time available while we had Chief Grady aboard."

While at sea the ship was put through some vigorous training exercises, which interrupted the course from time to time, but the corpsmen are highly motivated personnel. They are dedicated to one goal: "to provide the best medical support possible" both in port and at sea for the USS PROTEUS and the submarines she services.

This CPR training is just a first step. The next is to certify the entire staff of Hospital Corpsmen as American Heart Association CPR Instructors, who will then be able to train the ship's company in continuing a certification and recertification program.

American Heart Association is one of the many national, health agencies financially supported by our contributions to the Combined Federal Campaign.

So you want to be a vegetarian?

Whether you are a vegetarian or have been thinking about becoming one, your body has certain nutritional requirements that must be met to maintain a healthy diet. Diet deficiencies are more likely the more restricted a diet is, particularly in growing children.

As long as a variety of plant foods is included in the daily diet, vegetarians will get along very well, according to the Food and Drug Administration. Vegetarians should never rely on a single plant food source.

To eat well on a vegetarian diet the following food groups are recommended.

Legumes, which are rich in protein, B-vitamins and iron, are particularly important for women since they have difficulty getting enough iron in normal diets. Grains are necessary to supply carbohydrates, protein, thiamine, iron and trace minerals. Nuts and other seeds contain B-vitamins, protein, iron, and provide fat which supplies energy. Dark green leafy vegetables are sources of calcium, riboflavin and carotene and should be used liberally.

A well balanced vegetarian diet contains two servings of high-protein meat alternatives (legumes, nuts, peanuts, eggs, meat substitute and dairy products) a day

The high fiber content of vegetarian diets provides a natural laxative and discourages overeating, since one fills up quickly on roughage.

More information is available free by writing.

"No, not before, take one instead of breakfast, lunch and dinner."

Early military medicine

First U.S. Navy physician to SF Bay Area in 1846

By Jane C. O'Sullivan

The first Naval physician to enter San Francisco Bay was Dr. DuVal, an officer with the ships that were active in California waters in 1846 during the war with Mexico. During early engagements of this war, Navy men served as the principal ground troops under General Kearny and in the Fremont Battalion. When Army troops finally arrived by ship they were debilitated by scurvy. After the Battle of San Pasquale in 1846 the wounded were transported to San Diego, where Naval surgeons cared for them under extremely primitive conditions.

California was a remote outpost in those days. When an Army doctor lost his mule he sent to the Sandwich Islands (Hawaii) for medical supplies. At first there were no hospitals. The first hospitals in California, built in 1852, were established by the U. S. Army. Navy doctors at San Diego, and Monterey used tents and log buildings. Eventually the double, two-tiered wooden bunks were replaced by metal bunks.

At frontier posts the sickness rate was 30% and troops were incapacitated by infectious diseases far more than by wounds. The occurrence was high for malaria and other intermittent fevers, respiratory and gastrointestinal infections, scurvy and other nutritional deficiencies. Troops were wounded far from the post, and their transport by horse or travois took many days or weeks.

During the Modoc Indian wars in Northern California occurred the first recorded instances of Army doctors, or civilian contract doctors, going into the field to rescue and treat the wounded.

Medical treatment on the frontier was non-specific, non-helpful, and often contributed to the patient's demise. The usual approach was cupping, leaching and purging. Quinine, a specific for malaria, was used for all fevers. Calomel, a mercurial preparation, was used extensively and was probably toxic. The treatment was primitive and the physicians and hospital stewards were poorly trained; but they were keen observers and were sympathetic. Army doctors were required to keep a daily log, not only for the hospital and health statistics, but of the climate, botany, zoology, geology, Indians and social events of the times. These logs contribute a great deal to modern historical knowledge of frontier life.

California was admitted to the Union in 1848 and had been a state for 16 years when the Civil War broke out. By that time money was pouring into the banks in San Francisco from the gold fields, and from the Comstock silver lode in Nevada. At the outset of the Civil War the medical service of the Union Army was not organized. Wounded lay untreated on the ground for many days. President Lincoln organized the United States Sanitary Commission. The Surgeon General, Dr. William Hammond, appointed Jonathon Letterman in charge of the Army Medical Service. Under the brilliant leadership of this young officer, for whom Letterman Army Hospital in San Francisco is named, the modern era of field medicine was developed. Dr. Hammond patterned a system of field ambulances after the Napoleonic campaigns. He took the regimental physician out of the command of the regiment and organized the Medical Corps, with experienced senior officers teaching the others and supervising the field hospitals. Supplies were delivered when and where they were needed.

The first hospital ship, Red Rover, appeared on the rivers of the south to transport the wounded and sick back to hospitals in the cities. Wounded who could be returned to serve were treated in the field rather than evacuated. The professional training of women for nurses was begun.

The cities of the north raised large sums of money to support the work of the Sanitary Commission; but about a third of the funds came from California. Every three months a ship left San Francisco for Washington with \$100,000 in gold and silver for the work of the Sanitary Commission in caring for the wounded of the Union Armies. Even though the first Union military engagements were disastrous, the medical system organized under Dr. Letterman worked.

Confederate doctors had the same training, the same books, and essentially the same system; but the blockade made supplies difficult to obtain. Many home remedies were used. Quinine was smuggled in and was considered as valuable as ammunition. Californians who had family members serving in the confederate forces also raised money for the relief of prisoners in Union camps. Although the newspapers tried to raise a hue and cry about this activity, the authorities tolerated it as long as it was done "quietly."

The collection of funds to support the work of the Sanitary Commission, begun as a project of the San Francisco Board of Supervisors, spread to other cities and to the mining camps. In 1863 note was taken of a special contribution from the officers at the Navy Yard at Mare Island.

There is no doubt in the minds of historians that gold from California and silver from Nevada played a substantial part in the Union strength in the Civil War. In addition, San Francisco Bay was strategically valuable. Remains of posts and fortifications may be visited in many local parks, and pictures and records are in the museums. Many Army and Navy doctors who saw service on the Pacific Coast in early days went on to become outstanding figures in national and world history, and in the beginnings of modern scientific medicine and bacteriology.

Camp for Kiefaber

Captain Joe D. Camp assumed command of the Military Sealift Command, Pacific, in formal ceremonies held yesterday at Naval Supply Center, Oakland.

He relieved Captain Thomas G. Kiefaber.

New Atlantic commander

The Defense Planning Committee of the North Atlantic Council in Brussels, Belgium, has announced that Vice Admiral Wesley L. McDonald succeeded Admiral Harry D. Train II as Supreme Allied Commander, Atlantic.

Concurrent with the announcement, Secretary of Defense Weinberger said that President Reagan has approved the nomination of Vice Admiral McDonald for appointment to the rank of Admiral and assignments as Commander-in-Chief Atlantic and Commander-in-Chief, U. S. Atlantic Fleet.

Vice Admiral McDonald formerly served as Deputy Chief of Naval Operations for Air Warfare.

Our patients write...

I want to express my thanks and gratitude to you and your staff while I was patient in Room 612 North. Your ENT Group, Drs. Mendez, Ellison, Perlman and Sameshima, handled my case in a very efficient manner and were very compassionate and concerned about me.

The nurses and corpsmen certainly gave me the best treatment ever.

My congratulations to you, sir, and your staff for a job well done.

LT COL (Ret) D.M. McCrea, US
Grass Valley

...

I would like to acknowledge the Medical and Surgical expertise of all the personnel of Primary Care, the Red Surgical Team, and Ward 6 North.

The medical expertise of Dr. Ford of Primary Care... undoubtedly added years to my life.

The prompt and corrective surgery of the Red cardiac vascular personnel has to be highly recommended.

The nursing care of all the personnel of Ward 6 North was the most attentive post-operative care any patient could desire.

In closing, I take great pride in thanking one and all involved in my recent surgery.

Ralph C. Miantino
CWO2 Retired

...

I find myself obligated to write this letter, because of the professionalism and treatment I received at Oak Knoll.

I'm not a doctor, but I say professionalism because of the manner in which all the doctors, CAPT Oller, Drs. Zeck and Reed, Nurses Owen, Herrera and two other nurses whose names I did not get; also corpsmen Sharon Hine, Brewer and Moon.

During my stay at Oak Knoll, I was treated courteously and with consideration, have never been treated better in any hospital at any time.

I am extremely grateful for the way I was treated and I just can't say it enough.

Again, thank you.

Salvador Ayala
QMC USA
(Ret.)

MED • SCAN

A quick look _____
at recent health care _____
developments _____

The National Cancer Institute (NCI) is expected to announce shortly a cancer prevention program. Prior to this announcement NCI's research interest has been primarily in treatment, but this new program, labeled "chemoprevention," will support broad-scale research into vitamins and the chemicals present in foods which may inhibit the development of cancers. Invitations will be extended to researchers to apply for grants in the fields. Among some of the prime candidates for investigation include brussel sprouts, cabbage, fruit, green coffee beans and black tea. It is expected, according to a speaker at the first international conference on the effect of vitamins on cancer, held at the University of Arizona, that in 10 years there will be a new scientific basis for the use of vitamins in the prevention and treatment of cancer. The renewed interest in vitamins has been spurred by mounting evidence that vitamins A, C and E somehow affect various immune functions. The complexity of the subject is emphasized by researchers who are still investigating the mechanisms by which vitamins are utilized by the body. Furthermore, it is theoretically possible to synthesize thousands of variations of such vitamins as A. But the scientists are sure that the synthetic versions of the vitamins will in time lead to the possibility that specific synthetic vitamins may be designed to combat specific cancers. But no one is ready to recommend a specific diet or the widespread use of vitamin pills.

...

Disquieting signs that the Environmental Protection Agency intends to drop its regulations limiting the lead content of gasoline prompted the American Academy of Pediatrics to urge the agency to reconsider its decision. Even now, small gas blenders are flooding the market with cheap, high-lead content gas, according to *Medical Tribune*. These blenders had been under notice to reduce their lead content by October of this year, but now apparently have no deadline. In the most recent check of blood levels of lead, four percent of all U. S. children between the ages of six months and five years had levels that were classified as "dangerous," and 11.6 percent of the children in the inner cities had dangerous levels. Children in families with incomes below \$6,000 had levels nine times those of families with incomes above \$15,000. The effect of lead poisoning on IQ level and learning ability is critical and well-documented. Although it is difficult to pinpoint the sources of lead concentration in the blood, nevertheless lead levels in the air and blood usually coincide. Between 1976 and 1980 the use of lead in gas production and the presence of lead in the blood declined at the same rate.

...

There he is, in all his glory, casually standing in the batter's box, the envy of every little leaguer who has ever slid heroically into home plate. Then the camera zooms into a close-up of his face, and there, lodged securely in his left cheek, is a lump the size of a golf ball. The advertising endorsement by George Brett, of the Kansas City Royals, is the answer to the lump on his cheek and to the skyrocketing sales of chewing tobacco and snuff. Role-model Brett and other sports figures and rock stars are featured prominently in TV ads for "smokeless" tobacco, which had more than seven million users in the U. S., in 1981. In 1976 a government survey estimated that six million Americans used chewing tobacco or snuff. The American Cancer Society lists three health hazards: leukoplakia, a disease of the cheeks, gums or tongue, characterized by white, thickened patches which in five percent of the cases progresses to oral cancer. Dental problems, particularly receding gums and cavities, and a dulled sense of smell and taste. One especially sinister note: A bubble gum manufacturer now markets shredded gum that has the look of chewing tobacco strands. The stuff is packaged in a roll-away package, just like the chewing tobacco packs, into which the George Bretts of the future can dip for their chaws.

DUNG RECRUIT — Michael Guerra, 2½, without prompting, named his dad, HM2 Aurelio Guerra, Jr. in taking a reenlistment oath in a mid-September Clinical Assembly ceremony. The youngster kept his hand raised during the entire pledging and appeared to sense the solemnity of the occasion. Also witnessing the ceremony was the ophthalmology corpsman's wife Mary Ann.

The following additions to the medical "family" have arrived at Oak Knoll:

A baby boy to Hospital Corpsman Second Class Jesse L. Laster, Treasure Island Branch Clinic, and his wife Karen, Sept. 12.

A baby boy to Chief Hospital Corpsman Frederick L. Lang, Education Center, and his wife Melody Ann, Sept. 12.

A baby boy to Lieutenant Commander Peter E. Fern, OB/GYN Resident, and his wife Susan, Sept. 13.

A baby boy to Hospital Corpsman Second Class Maria Mercedes Evans, Operating Room Technician, and her husband David, Sept. 18.

A baby boy to Hospital Corpsman Second Class Layne A. Pontnack, USS ENTERPRISE (CVN 65), and his wife Beverly, Sept. 18.

A baby boy to Senior Chief Master Armsman Phillip Sharp, Security Department, and his wife Linda Ann, Sept. 19.

A baby boy to Hospital Corpsman Second Class Renaldo Rucker, Branch Clinic Treasure Island, and his wife Sharon, Sept. 20.

A baby boy to Hospital Corpsman Second Class Michael L. Duarte, USCG Support Center, Alameda, and his wife Linda, Sept. 22.

Military pay--

(Continued from page 6)

own retired pay to the nearest dollar each month. None of the proposals listed above will become law unless approved by both the House and Senate, and signed by the President. The Senate bill is now pending action in the body. House action, on their version of the FY-1983 pay bill, is not yet scheduled, but is anticipated soon.

VA offers tips on education aid

The Veterans Administration has some suggestions to help students avoid delays in their VA education payments.

Every month 600,000 VA checks worth more than \$200 million are mailed, nationwide, to veteran-students and to eligible dependents. In an attempt to avoid possible delays, the VA suggests the following:

- * When a student believes the initial payment for the school term has been delayed, he or she should check with the school to find out the date the enrollment certificate was sent to the VA. At least four weeks should be allowed from that date before an education check can be expected.
- * If an advance payment check is

expected, the student should make sure the required written request is signed. The specific request for the advance money should have been submitted to VA at least a month before the beginning of the semester.

* Students who have gotten education benefits in the past should consider whether an overpayment is recovered by the VA.

For further information on possible education payment delays, veterans should contact the nearest VA regional office. Toll-free numbers are listed in the white pages of the telephone book under "U. S. Government."

The VA regional office in San Francisco is located at 211 Main Street (corner of Main & Howard).

Absentee voting requests due

The 1982 general election will be held Nov. 2. All 435 seats in the House of Representatives and 33 in the Senate will be up for election. In addition, 36 state governors will be elected, along with numerous state and local officials.

Navy Voting Assistance officers and counselors should ensure that every

eligible absentee voter is provided the Federal Post Card Application (FPCA) so that he or she may request a general election ballot from state officials. Members and their dependents wishing to vote in the 1982 general election should complete and mail the FPCA immediately.

For Sale

Pool Table-Genuine slate bed, Solid mahogany with walnut finish, Queen Anne legs, custom accessories, rack, sticks, balls etc. Really beautiful, like new condition. Must sacrifice, \$975 takes all. Call 639-2271 or 786-1308.

Walk, Then Jog To Fitness

Exercising now is a sound investment in good health later. And the first step to starting an exercise program is a thorough medical checkup. If you haven't had an exam in the past year, or if you are past 30, the checkup may help you avoid serious consequences.

Chances are, your physician will give you an unconditional go-ahead.

Printed below are walking and jogging programs recommended by the President's Council on Physical Fitness and Sports. Before you begin one, however, the Council suggests you take a walk and/or walk-jog test to help you find out what shape you're in, and at what level to start your fitness program.

Walk Test. The object of this test is to determine how many minutes (up to 10) you can walk at a brisk pace, without undue difficulty or discomfort, on a level surface.

■ If you cannot walk for five minutes, you should begin with the **Walking Program**.

■ If you can walk more than five minutes, but less than 10, you should begin with the third week of the **Walking Program**.

■ If you can walk for the full 10 minutes, but are somewhat tired and sore as a result, you should start with the **Walking-Jogging Program**.

■ If you can breeze through the full 10 minutes, you are ready for bigger things. Wait until the next day and take the Walk-Jog Test.

Walk-Jog Test. In this test you alternately walk 50 steps (left foot strikes ground 25 times) and jog 50 steps for a total of 10 minutes.

Walk at the rate of 120 steps per minute (left foot strikes the ground at 1-second intervals). Jog at the rate of 144 steps per minute (left foot strikes ground 18 times every 15 seconds).

■ If you cannot complete the 10-minute test, begin at the third week of the Walking-Jogging Program.

■ If you can complete the 10-minute test, but are tired and winded as a result, start with the last week of the Walking-Jogging Program before moving to the Jogging Program.

■ If you can perform the 10-minute test without difficulty, start with the Jogging Program.

Walking Program

Week	Daily Activity
1	Walk at a brisk pace for 5 minutes, or for a shorter time if you become uncomfortably tired. Walk slowly or rest for 3 minutes. Again walk briskly for 5 minutes, or until you become uncomfortably tired.
2	Same as Week 1, but increase pace as soon as you can walk 5 minutes without soreness or fatigue.

3 Walk at a brisk pace for 8 minutes, or for a shorter time if you become uncomfortably tired. Walk slowly or rest for 3 minutes. Again walk briskly for 8 minutes, or until you become uncomfortably tired.

4 Same as Week 3, but increase pace as soon as you can walk 8 minutes with soreness or fatigue.

When you have completed Week 4 of this program, begin at **Week 1** of the **Walking-Jogging Program**.

Walking-Jogging Program

Week	Daily Activity
1	Walk at a brisk pace for 10 minutes, or for a shorter time if you become uncomfortably tired. Walk slowly or rest for 3 minutes. Again walk briskly for 10 minutes, or until you become uncomfortably tired.
2	Walk at a brisk pace for 15 minutes, or for a shorter time if you become uncomfortably tired. Walk slowly for 3 minutes.
3	Jog 20 seconds (50 yards). Walk 1 minute (100 yards). Repeat 12 times.
4	(Same as Week 3)

When you have completed Week 4 of this program, begin at **Week 1** of the **Jogging Program**.

Jogging Program

Week	Daily Activity
1	Jog 40 seconds (100 yards). Walk 1 minute (100 yards). Repeat 9 times.
2	Jog 1 minute (150 yards). Walk 1 minute (100 yards). Repeat 8 times.
3	Jog 2 minutes (300 yards). Walk 1 minute (100 yards). Repeat 6 times.
4	Jog 4 minutes (600 yards). Walk 1 minute (100 yards). Repeat 4 times.
5	Jog 6 minutes (900 yards). Walk 1 minute (100 yards). Repeat 3 times.
6	Jog 8 minutes (1200 yards). Walk 2 minutes (200 yards). Repeat 2 times.
7	Jog 10 minutes (1500 yards). Walk 2 minutes (200 yards). Repeat 2 times.
8	Jog 12 minutes (1700 yards). Walk 2 minutes (200 yards). Repeat 2 times.

Reno package saves 'bucks'

Special Services offers a three-day travel package to the MGM Grand Hotel in Reno, Nov. 19-21, at a terrific discount.

A deluxe motor coach will leave NRMCO Oakland at 4 p.m. on Friday, Nov. 19 and return to the same location at 4 p.m. the following Sunday. The package includes bus transportation, two nights at the hotel, tickets to the fabulous "Hello Hollywood, Hello" show and two free cocktails.

The special military rate is \$88 single occupancy or \$63 per person, double occupancy. (Normal prices are \$18 for the show and room rates start at \$46 per night, so this package is a considerable savings.)

Call Sally at 639-2479 to sign up, or for additional information.

Military cowpokes to compete in rodeo

Some of the old west is kept alive by the military each year in Yuma, Arizona.

Yuma is the scene of the Annual National Military Finals Rodeo, scheduled for Nov. 12 and 14 this year. The best military cowboys and cowgirls in the world will match their wits and prowess against wild bulls, horses, steers and calves.

Events will include: Bull and bronc bareback riding, saddle bronc riding, wild horse racing, steer and calf roping, barrel racing and steer dressing. Steer dressing, in case you aren't familiar with the ways of the old west, is an event in which a three-man team attempts to put a pair of panties on a 500-pound (or more) steer while it's running loose in the arena.

Also this year, a military cowboy association will be set up prior to the rodeo, which will assist in keeping ratings on cowboys that can be used for future rodeos to establish eligibility.

For more information about the association or for an application for the rodeo events, contact Pat Schantek at the Yuma Jaycee Clubhouse, 1798 Arizona Ave., Yuma, Ariz. 85364, or call (602) 344-0072.

Steam train parties possible at discount

Every Saturday night throughout October, there'll be a Moonlight Steam Train Party at Roaring Camp in Felton (near Santa Cruz). The parties will feature a steam train excursion through giant redwoods, a barbecue steak dinner, old-time country music and dancing around the campfire.

Normal price for the package is \$25 per person. However, with an "All Aboard! Club" card, available from Special Services, the rate is \$22.50 each.

Private moonlight parties of your own for a minimum of 100 people are possible. For more information, call Sally Young at Ext. 2479.

Come out ahead: Stay behind

Want to stay alive and healthy? Try counting to two.

If you're not trailing at least two seconds behind the car ahead of you, you may not have enough time to react if that car suddenly slows or stops.

The "2-second rule" is easy to use, works at any speed, and is more accurate than the old "one-car-length-for-every-10-mph" guideline, according to the National Safety Council.

Here's how it works:

First, watch the vehicle ahead of you pass a fixed point such as an overpass, sign, fence post, etc. Then, begin counting off the seconds it takes you to reach the same spot in the road—"One thousand and one, thousand and two..."

If you reach that spot before two seconds have passed, you should slow down and increase your following distance. Then check the distance again until you are at least two seconds behind.

Remember, 2 seconds is the minimum. In bad weather and when driving conditions are hazardous, increase the number of seconds and your following distance to be sure you have enough time and space to react.

Military photo contests slated

The 19th Interservice Photography Contest, to be held Dec. 13-17, 1982 at Scott AFB, Ill. will include entries from the Navy, as well as the other military services, for the first time since 1976.

Navy entries to the contest will be selected at the 1982 Navy Photography Contest which is scheduled for the week of Nov. 8-12 at NAS Alameda, Calif. To be eligible for either competition, photographs must have been taken by Oct. 31, 1982.

Photographic categories are: general, people, scenic and experimental. Both novice and experienced photographers may enter the contests, and may submit three entries in each category. U. S. Savings Bonds will be issued to winners of the Navy competition whose photos will be submitted to the interservice contest.

For more information, contact the Recreation Branch, Navy Military Personnel Command, Autovon 224-4388 or commercial (202) 694-4388.

HM2 Stephanie Butler

Branch clinic corpsman in racquetball tryout

Hospital Corpsman Second Class Stephanie A. Butler of NRMCO Oakland's Naval Supply Center Branch Clinic has been selected to participate in the

1982 Navy Men's and Women's Racquetball Trial and Training Event, NAS Miramar, San Diego, Oct. 2-14.

If further selected, she will join team representing the Navy in 1982 Interservice Men's and Women's Racquetball Championships.

NRMCO trounces USS HALEAKALA

By Ron Brown

Defense was the key as NRMCO stopped several drives near the goal line, and with three key interceptions by Dale Graham highlighting the afternoon, NRMCO opened its 1982 Flag Football Season with a sounding 13-0 win over the USS HALEAKALA.

The two teams battled even in the second half as NRMCO went into the intermission with a 13-0 lead.

Putting pressure on the visitor's quarterback was Phil Herman (Frick) and Ian Anderson (Frack) of "Frick and Frack".

NRMCO scored touchdowns on a 30-yard pass and run play from Scott Claudus to Roosevelt Wardell. NRMCO could not muster a point after touchdown (PAT) and lead by a score of 6-0 until Mark Ford ran the ball in from five yards out to make the score 12-0 with five minutes left in the second quarter. The PAT was successful and NRMCO led 13-0. The score stood throughout the second half as several scoring drives by the USS HALEAKALA were stopped by the NRMCO stalwart defenses.

'Ironman' lures jocks to Hawaii

Thirty-three athletes from the Army, Navy, Air Force and Marines are among 850 men and women from 45 states and 10 foreign countries who have signed up to compete in the sixth Ironman Triathlon World Championship, to be held in Kailua-Kona, Hawaii on Oct. 9.

Considered the most demanding athletic event in the world, the Ironman Triathlon consists of a 2.4-mile open ocean swim followed immediately by a 112-mile bicycle race, then a 26.2 mile marathon. The total elapsed time required to complete the three legs of the triathlon determines the finisher's place. The person with the lowest overall time is the winner.

Race officials limited the number of entrants this year to 850 for logistic reasons. By June 17, two months before the application deadline, the race was filled. Since then, more than 400 applicants have been turned away.

The "Ironman" got its start in 1977 when Navy Commander John Collins and some athlete buddies, relaxing after a fun run, sought to dream up the ultimate test of athletic ability. Collins felt completing, in succession, Hawaii's three most difficult athletic events should do it.

Fifteen people accepted Commander Collins' challenge in 1978 with 12 finishing the first Ironman. Five years later, almost 600 athletes trained for over a year to compete in the event.

Prizes are trophies for top finishers and, for all finishers, a highly sought after "Ironman Finisher" T-shirt.

**ASKED ROBBER? MAN FROM
S? HALLOWEEN PRANK?—No,**
Marine Corps Staff Sergeant
Art Chapman, an instructor from
the Corps Air Station, El Toro,
was one of those conducting an
ational readiness training course
medical center staff Sept. 27-29.
s showing his students how to
gas mask. A total of 43 officers
33 enlisted staff members from
hospital completed the training.

Christmas Bazaar slated next week

The Naval Regional Medical Center
Officers' Auxiliary will hold its annual
Christmas Bazaar and Crafts Show on
Friday, Oct. 22, from 10 a.m. to 6 p.m.
in the Officers' Club Ballroom.
This is an opportunity for all person-
nel and their families to do a bit of early
holiday shopping from products of
members and professional crafts-
people of the Bay Area.
The bazaar is one of the club's
most money-making projects of the
year, with proceeds going to many
charities in the spring.
Members are encouraged to donate
items or sell them on consign-

'The Fleet's in!'

The USS CORAL SEA, "San Fran-
cisco's Own," will lead a six-mile long
column parade of Navy ships entering
the bay from under the Golden Gate
Bridge at 11 a.m. this morning to open
the second annual Fleet Week celebra-
tion.

A 17-gun salute will be fired at
noon, followed by a helicopter flyover,
as Mayor Dianne Feinstein, Assistant
Secretary of the Navy John Herrington,
CINCPACFLT Admiral Sylvester L.
Foley, Jr., and a host of other digni-
taries observe from a reviewing stand
on Treasure Island.

In addition to the parade, the Navy's
hot air balloon team will transit the bay
and the Goodyear blimp will also be in
the sky. On the bay, the Navy's Special
Boat Unit Eleven will demonstrate skills
and capabilities of the river patrol
boats.

Thirteen ships will make up the Fleet
Week force this year, 11 of them tied
up along the Embarcadero and open for
visiting daily from 1 to 4 p.m. on Satur-
day, Sunday and Monday.

Other events are a Fleet Week Ball, a
reception for enlisted personnel, soft-
ball games, etc.

ment, with 85 percent to the member
and 15 percent to the club. Call
Gretchen Fawcett, 635-0302, or
Jeannie Nelson, 537-4736, for more
information on selling or donating
items for the show. Baked goods have
been the biggest sellers in the past.

A shuttle bus will be provided from
the main entrance of the hospital and
from the swimming pool lot to the
Officers' Club, which will extend its
luncheon hours on the day of the
Bazaar from 11 a.m. to 2 p.m.

Planning is also underway to open
the Day Care Center that day only, and
(Continued to page 8)

NAVY RECORDS—As medical records supervisor, HM3 Billy Jack Tibbett
makes sure the handling of Navy medical records is up to par at the Army's
Presidio of Monterey Health Clinic. For feature on our Naval Medical
Administrative Unit, see Page 6.

Realignment

NMC Southwest Region established in San Diego

The Naval Medical Command
(NMC), Southwest Region, was estab-
lished Oct. 1, with headquarters of the
new command at the Naval Hospital in
San Diego, where it will oversee the
combined operations of the Navy's
medical facilities in southern California.
These facilities include: the Naval
Regional Medical Centers in Camp
Pendleton and Long Beach; the Naval
Hospital and Naval Medical Clinics at
San Diego; and the Naval Regional
Medical Clinic at Port Hueneme.

The new command is headed by
Rear Admiral E.P. Rucci, MC, USN, who
had been in charge of the Naval
Regional Medical Center (NRMC) San
Diego. He is assisted by a Deputy Com-
mander/Chief of Staff, Assistant
Chiefs of Staff for resources, logistics,
plans and operations, and other special
assistants.

The realignment is part of an ongo-
ing program designed to streamline the
span of control and enhance military
effectiveness throughout the Navy's
regional medical organizations. This
restructuring will allow increased atten-

tion to the separate but complementary
functions of quality patient care and
efficient administration.

Before the realignment, a single
command—the NRMC San Diego—
was responsible for both clinical and
administrative operations, not only
within the Naval Hospital, San Diego,
but also at all outlying clinics in San
Diego.

Upon completion of the restructur-
ing, NRMC San Diego will be divided
into three organizations: Naval Medical
Command, Southwest Region; Naval
Hospital, San Diego; and Naval Medical
Clinics, San Diego. Management will be
structured so that the Naval Medical
Command will be the parent organiza-
tion in the region, responsible for com-
mand and control of all regional func-
tions, including resource management,
reserve programs, contingency plan-
ning, quality assurance oversight, and
other activities related to health care
management.

The newly titled Naval Hospital, San
Diego, is commanded by Captain John
E. Carr, MC, USN, who is assisted by an
executive officer and directors of the
major areas of hospital administration,
nursing services, medical services,
surgical services, and ancillary services.
Because of the realignment of respon-
sibilities, the hospital will be able to
focus fully on the provision of quality
patient care within the facility itself,
leaving regional matters to the NMC,
Southwest Region. The Officer in
Charge of the third command to result
from the realignment, the Naval Medi-
cal Clinics, San Diego, had not yet been
named at this writing.

The plan is part of an overall realign-
ment of the Navy's Bureau of Medi-
cine and Surgery and is expected
to continue throughout 1983. A similar
realignment of functions was com-
pleted Sept. 1 at the Naval Medical
Command, National Capital Region,
Bethesda, Md.

Navy Energy Week

Oct. 25-31

See Pages 2, 3, 5

UNDER THE GOLDEN GATE—It's a Navy tradition of long standing to take your reenlistment oath in unusual
places. HM2 Jesse Laster, Physical Therapist and CPR instructor at Treasure Island's Branch Clinic, selected
a spot by the world-famous Golden Gate Bridge for his on Sept. 27. The Coast Guard obliged by carrying him,
CDR Dave Vosloh and HM2 Garry Silk, the photographer, on a cutter at the ceremony site. Petty Officer
Laster, who has been assigned to the TI clinic for three years, will soon be leaving for the Advanced Hospital
Corps School in San Diego.

Editorial---

THE SECRETARY OF THE NAVY
WASHINGTON, D.C. 20350

ENERGY KEY TO SEA POWER

The Navy and Marine Corps are at the forefront of our national defense strategy. Maritime deployments to distant points can be achieved quickly and efficiently, a testament to this nation's strength through sea power. However, the mobility of these forces on land and sea is only as long-reaching as are our efforts to insure the adequacy of energy resources.

Energy and fuel logistics have always played decisive roles in the movement of ships, aircraft, and Marines. Efficient energy management efforts afford our growing fleet greater flexibility and readiness, heightening our ability to respond wherever needed. Increases in energy productivity and reductions in energy waste can be accomplished in any phase of naval activity. The knowledge and dedication we employ towards this end will affect our forces for years to come.

To increase our understanding of and dedication to skillful energy management, commands are to prepare themselves for full participation in the Department of the Navy's fifth annual Energy Awareness Week, scheduled for 25-31 October 1982. The theme of this event, "ENERGY KEY TO SEA POWER" illustrates the inseparable relationship between energy and naval strength. We have a duty to pursue more efficient energy use and reduce waste every practical way, daily and throughout the year.

Energy Awareness Week should give all hands a better understanding of the importance of using our energy resources as productively as possible. Energy management has saved the Navy and Marine Corps millions of dollars and slowed the consumption of a finite resource. Your efforts will continue to further this progress so important to our mission.

JOHN LEHMAN
Secretary of the Navy

EEAP—educational good deal

The Enlisted Education Advancement Program, administered by the Chief of Naval Education and Training, provides a program of study leading to an associate degree for highly motivated career Navy enlisted people. Education under this program offers selected personnel the opportunity to improve qualifications in their technical skill and to improve their supervisory and management skills. Although participants pay for all tuition, books and fees required to complete their associate degree, they continue to receive full pay and allowances during their enrollment in school (less proficiency pay).

In 1980, 90 enlisted members were selected to participate in the program, with courses of study ranging from culinary arts to electronics. One hundred Navy people were selected in 1981, 125 in 1982, with 150 scheduled to be selected in 1983.

Eligibility requirements for the 1983 EEAP selection are as follows:

- Have at least four years (or E-5 with minimum of three years), but no more than 14 years of active duty service as of Sept. 1, 1982.

- Be a high school graduate or have passed the General Education Development Test.

- Have a general classification test (Arithmetic Test—GCT/ARI) or Word Knowledge/Arithmetic Reasoning (WK/AR) of at least 110.

- Be recommended by their commanding officer.

- Be eligible for rotation to a normal shore tour with PRD between Sept. 1, 1983 and Aug. 31, 1984, or, if on a normal shore tour, have at least two years remaining on shore duty.

- Have no record of non-judicial punishment, conviction by court-martial or by civil court for other than minor traffic violations during the two years prior to the expected date of enrollment.

- Must agree to re-enlist or extend their enlistment to have six years of active-obligated service remaining from the date they enter school.

Official information for the 1983 EEAP selection process can be found in OPNAV NOTICE 1510, which will be published this month. The notice will contain a sample application letter, address and deadlines for submission of application.

For further information on the Enlisted Education Advancement Program, contact local Navy Campus offices. The point of contact at CNET is Lois Martin, Autovon 922-1758; commercial (904) 452-1758.

If you see a college education as part of your future, EEAP may be the way for you to get it! (NES)

Robert Crecca
M.D.

Nov. 15, 1982

'Energy: Key to Sea Power

The theme ENERGY: KEY TO SEA POWER, has been selected to kick-off the 1982 Energy Awareness Week program and all other energy conservation promotions from October 1982 through September 1983. The message it carries reminds us that the strength Navy and Marine Corps forces hold are to a great extent measured by the degree of mobility its weapon systems and troops can attain and maintain.

The success of last year's energy awareness theme message, "Energy is Readiness," guided this year's selection. Sea power is unique to the Navy and Marine Corps, whether patrolling the oceans, the air space above the sea, or conducting a beach-head landing. It is sea power that allows America's strength to be known worldwide. Approximately 97 percent of the Navy's surface ships are petroleum dependent, demanding of each of us a

precious regard for all fossil fuels.

In a memo to all military departments, Frank Carlucci, the Deputy Secretary of Defense, stated that "One percent of the (DoD) fuel bill can be saved through good management with the procurement, for example, of three A-10s, three F-16s, three F-15s, three F-14s, three F-18s, three F-19s, three F-20s, three F-21s, three F-22s, three F-23s, three F-24s, three F-25s, three F-26s, three F-27s, three F-28s, three F-29s, three F-30s, three F-31s, three F-32s, three F-33s, three F-34s, three F-35s, three F-36s, three F-37s, three F-38s, three F-39s, three F-40s, three F-41s, three F-42s, three F-43s, three F-44s, three F-45s, three F-46s, three F-47s, three F-48s, three F-49s, three F-50s, three F-51s, three F-52s, three F-53s, three F-54s, three F-55s, three F-56s, three F-57s, three F-58s, three F-59s, three F-60s, three F-61s, three F-62s, three F-63s, three F-64s, three F-65s, three F-66s, three F-67s, three F-68s, three F-69s, three F-70s, three F-71s, three F-72s, three F-73s, three F-74s, three F-75s, three F-76s, three F-77s, three F-78s, three F-79s, three F-80s, three F-81s, three F-82s, three F-83s, three F-84s, three F-85s, three F-86s, three F-87s, three F-88s, three F-89s, three F-90s, three F-91s, three F-92s, three F-93s, three F-94s, three F-95s, three F-96s, three F-97s, three F-98s, three F-99s, three F-100s, three F-101s, three F-102s, three F-1233s, three F-1234s

How some of our shipmates save energy

"What have you done this year to conserve energy either at work or at home, or both?"

Sally Young, Special Services.

"I'm still conscious of water use from the big drought a few years ago. I never use the dishwasher without it being full, plus I never run the water at an excessive rate. I'm also very aware of the amount of electricity I use. At home I pull the plug on the TV when it is not in use since it is always draining electricity when plugged in. I've installed lower watt light bulbs except in areas where I read. Excess use of electrical equipment has been stopped. This winter I will be buying a more efficient heater instead of using the stove and an ineffective wall heater. A regular occurrence around my house is cleaning the coils on the back of the refrigerator. This increases the efficiency and cuts the amount of electricity used. I've also found that using the top of the stove for cooking is more efficient and energy saving."

Dorothy Laurence, Secretary at ARS.

"Here at work we keep the heat at 65° and during the summer the furnace is turned off. The blinds are opened and closed according to the sun and the newly-done patients' rooms are smaller and less heat is needed to be comfortable in comparison to the old ward styles. At home I do as little cooking as possible. I try to eat more salads and things that take very little cooking."

Ellis Harris, Food Service.

"At home I always fill the washing machines, and at work, I always cut off the machines when not in use."

Jennie Thompson, Civilian Personnel.

"At home I turn the furnace completely off when not in use. In the office we turn off machines that are not being used very often and pull the blinds in the summer to keep the sun out and open the windows for a cross ventilation."

Rene Courts, Fire Captain, Fire Department.

"At work we have been doing a lot of different things to conserve energy. Among them are closing down the garage doors earlier to save heat, putting out the lights at night (when an alarm comes in they go on automatically); replace heating filters on the furnace. Installation of venetian blinds in the office and other rooms to keep the sun out in the summer helps. At home I have installed those new blinds and have not had to use the air conditioners at all; in fact, I've probably saved over \$300 this summer!"

Barbara Pavlakus, Alameda Coast Guard Credit Union.

"I know at home we don't use as much light. It is very patriotic and American to conserve energy."

HM3 Nancy Marchiando, Cardiology Clinic.

"We have turned down the heat at night and use less lighting. I always try to be conscious of what energy I use. In fact, at work I walk up and down the stairs. I never use the elevator unless I'm transporting some piece of equipment."

LCDR Paul Garst, Chief Resident, Internal Medicine.

"I think I do less driving than I used to, in fact, I know I do."

Eunice A. Turner, Laundry Seamstress.

"Here at work we cut lights when not needed and turn off machines not in use. In fact, I turn off the hot press and stamping machines that used to be running all the time. I also use this small fan instead of the larger floor model. I called PG&E and had them come to my house to see what I could do to improve the efficiency of power use and they said I've done mostly everything possible. Among these were lined drapes, cold water clothes washing, hand watering the lawn, keeping the shades pulled on hot days, and insulating."

LT David Anderson, Staff Nurse, Operating Room.

"On cool days I put on more clothes instead of turning up the heat. My electric bill at home is only \$5, so as you can see I don't over-use energy in my living space. In the operating room we have very few options over the use of electricity."

Maureen Com-mack, Secretary, Nursing Service.

"I open the windows and allow the winds to blow through; this rids the house of bad gases. I put on roller skates and 'snickers' (sic) and run around the house. This keeps me warm."

CDR Stanley Bagby, Nursing Service.

"At work I'm always turning off lights, even in other people's offices. I'm also active on an energy conservation committee here at the hospital. At home I bought two new fur pussies for around the door so drafts will not come in, turned down the heat, and sleep in a chair with a blanket and two cats—one on each side. My water heater has a new fur coat and I've lined the house, or is that insulated, or whatever you call it."

HM3 David Ten-besel, Emergency Room/Primary Care.

"My car is always kept in good tune and I'm always aware of the lights that are on. I realize that we must be conscious of the energy we use. We must remember all resources are limited. I was raised on a farm in Minnesota and when I moved to the city I really became aware of the amount of wasted electricity. We must always keep in mind the energy we use."

David Velez, Navy Exchange Gas Station.

"I'm not sure—I do not drive as much—in fact, I ride my bicycle more these days. At work we are very aware of the amount of lights we use."

MM1 Odelon Tabayon, Security Department.

"At work we are very conscious of lights that are being used in the office. At home we are using more blankets at night instead of the heating system."

DEPARTMENT OF THE NAVY

ENERGY: KEY TO SEA POWER

Command Line

(This column permits direct access to command executives by either military or civilian staff members of any grade, rate or rank. Questions on matters impacting the medical center operations as a whole, reports of incidents of abuse or fraud, or items of concern to large numbers of the staff are invited. Please also submit recommendations and report positive information of interest to all of us. Submit comments in any legible written form to the Public Affairs Office for routing. You may remain unidentified if you so wish.)

Effects of contracting out

UNIONS

COMMENT: If and when Food Service is contracted out, will the contractor be unionized?

REPLY: The contractor need not be unionized, but must pay a minimum rate determined by the Department of Labor which is based on equivalent rates paid by others, including those unionized, in the area.

RETIREMENT FUNDS

COMMENT: How would contracting out affect the money Civil Service employees have already placed in their Civil Service Retirement Program if they work for the contractor, or are RIF'd and cannot get another (federal) government job?

REPLY: The following information applies whether the employee works for the contractor or for another non-federal employer:

- Employees who are eligible for retirement may not receive a refund of money that they have already placed in the Civil Service Retirement Program. Instead, they are entitled to an annuity upon separation.
- Employees who do not meet the length of service or age requirements for retirement eligibility may apply for a refund of their contributions to the retirement fund if they wish. It should be noted, however, that if they have completed five years of service under the Civil Service Retirement Program, they will be entitled to an annuity upon reaching age 62, and in general, the amount received through the annuity will exceed the amount of the refund.

TRANSFER POSSIBILITIES

COMMENT: Is there somewhere else in the Bay Area that RIF'd employees can transfer to keep federal status of employment? If so, please explain how this is accomplished.

REPLY: There are many federal agencies in the Bay Area to which RIF'd employees may transfer providing there are vacant positions available for which the employee qualifies. Placement of these employees is accomplished through registration in any of several special programs. The Civilian Personnel Service schedules each employee being RIF'd as a result of contracting out of work, for a counseling session in which placement opportunities, as well as other matters, are explained. Among the special programs for placement, each with its own features, are: The Voluntary Interagency Placement Program (VIPPP), coordinated by the Office of Personnel Management (OPM), the DoD Priority Placement Program, and the Displaced Employee Program (DEP), coordinated by OPM. In addition, the Civilian Personnel Service contacts the state employment service for registration of employees for vacancies in non-federal government agencies and the private sector.

HOW TO LOOK FOR FEDERAL JOBS

COMMENT: How can employees, displaced by contracting out, look for and attain federal employment?

REPLY: In addition to registration through special placement programs, employees may contact individual federal employers or may contact the Federal Job Information Center of OPM in San Francisco. An employee will have to submit a Personal Qualifications Statement (SF-171) for each vacancy for which they seek consideration.

RIGHT OF FIRST REFUSAL

COMMENT: How does right of first refusal for jobs with a successful bidder work and what are the effects on future federal employment?

REPLY: A successful bidder is obligated to offer every job involved in accomplishing the new contract to the employees displaced by the contract. The contractor must hire the displaced employees, who are qualified and accept the offers, before employing any others, including the contractor's current or former employees, to accomplish the contract. The contractor does not have to follow any particular reemployment, retention or seniority order in offering these jobs. The effect on future federal employment is the same as any other non-federal employment. It does not count as federal service for any purpose, including retirement.

RIF ACTIONS

COMMENT: How are reduction in force (RIF) actions accomplished?

REPLY: Employees affected by RIF actions are first grouped by length of federal service within categories of veteran preference and career, career-conditional, or temporary status. Their qualifications for other positions are then determined according to the personal information in their official personnel folders. They are then compared with other employees in positions at the same or lower grade who have less federal service and/or are in a lower retention group according to detailed regulations of OPM. When a placement opportunity for a RIF'd employee is identified, the employee is offered that position. If no placement opportunity is identified for the employee, or the employee declines the offer, the employee is separated. Separated employees are entitled to severance pay based on their age and length of service unless they are eligible for retirement, accept other federal employment at equal pay, accept a position with comparable pay with a successor contractor, or decline an offer of a position with equal pay, tenure and seniority.

EARLY RETIREMENT

COMMENT: Who is eligible for early retirement?

REPLY: Employees who are separated by RIF action are eligible for early retirement if they are 50 years of age or older and have at least 20 years of federal service, or they are any age with at least 25 years of federal service. The employee's annuity will be reduced by two percent for each year under age 55.

REGULAR RETIREMENT

COMMENT: Who is eligible for regular retirement?

REPLY: Employees are eligible for regular retirement when they meet the following combinations of age and federal service:

- Age 62 with 5 years' service.
- Age 60 with 20 years' service.
- Age 55 with 30 years' service.

Why no day care center?

COMMENT: Why does this command not have a day care center anymore? This has come to my attention as well as to a few expecting parents who are will be in need of a baby sitting, child care facility, who work at this hospital. There some way we can get back the old day care center or since there are a lot of parents who need employment, can we not organize a baby sitting co-op? Not only would this fill the needs of the staff but it also would aid the parent who have appointments at this facility, or are in need of a sanctuary for their children in emergencies or child/spouse abuse cases.

REPLY: The previous day care center, operated by Navy Exchange, was eventually closed because of financial loss. Appropriated funds cannot be used to support the child care center; it must be self-supporting. In order to establish reasonable rates, there must be sufficient demand to enable the day care center to be self-supporting. The command will conduct a survey of the staff to determine whether enough interest exists to justify the center's reopening.

Uniform allowances

COMMENT: I am requesting clarification about reimbursement for the recent uniform change which went into effect for personnel in the rates of E-1 and below. The required changes entail a significant expense to all of the involved people, many of whom were not issued jumper-style uniforms in Boot Camp. Isn't this actually a uniform change without due compensation?

REPLY: The Navy started wearing jumper-style uniforms in Boot Camp on 1 May 1980. At that time personnel started to receive a Clothing Maintenance Allowance (CMA) for the upkeep and maintenance of those items. In addition, the CMA has been supplemented approximately \$3.28 per month for 36 months for the purchase of the new jumper-style uniforms. This supplemental CMA can be broken down as follows:

Uniform Item	Am't rec'd 5/1/80 9/30/80	Am't rec'd 10/1/80 9/30/81	Am't rec'd 10/1/81 9/30/82	Am't rec'd 10/1/82 4/30/83	Total rec'd	Current Price of Item
Service Dress Blue Jumper	\$10.23	\$8.03	\$10.07	\$9.19 =	\$37.52	\$30.00
Service Dress White Jumper	4.50	2.81	3.57	3.99 =	14.87	7.00
Trousers, Blue	7.68	7.17	8.50	7.90 =	31.25	25.00
Trousers, White	3.25	4.19	4.75	6.00 =	18.19	9.00
Neckerchief	.90	2.29	.53	1.85 =	5.57	5.00
White Hat	2.32	2.32	3.02	3.05 =	10.71	3.00

In essence, personnel have received monetary compensation for the uniform changes. Unfortunately for many, they did not recognize the supplemental CMA, and did not plan ahead.

Paychecks fatter

A four percent across-the-board increase in basic pay, BAQ and BAS has been approved and was effective Oct. 1. The pay increase will be reflected in pay received on today's payday.

New variable housing allowance (VHA) rates were also effective Oct. 1. The new VHA rates will be reflected Nov. 15 paychecks and Leave and Earnings Statements (LES), and will be retroactive to Oct. 1.

QA/RM COORDINATOR—LTJ Stephen M. Farber, recently assigned to this command, now heads the Quality Assurance/Regulatory Management Office established on the North to coordinate standards for this hospital. Farber holds a bachelor's of arts from Queen's College in New York and a master's in health administration from Long Island University. He worked five years in administration at New York City Bellevue Hospital and has three years experience with medical malpractice investigations. He also spent three years with a medical malpractice law firm as a risk management consultant. The Medical Service Corps officer, his wife Vicki and two sons are making their home in quarters on Hamilton Force Base.

Energy monitors aid conservation at 'grass roots' level of hospital

The Department of the Navy's fifth annual Energy Awareness Week will be observed Oct. 25-31 to focus on ongoing local energy management projects, accomplishments and lessons learned. In FY 1981 alone, energy savings efforts by naval commands resulted in an estimated cost savings of \$100,000,000. As more personnel become aware of conservation methods, the potential for future savings becomes even greater.

At Naval Regional Medical Center, Oakland, our energy needs are estimated at \$10,000 per day. What are we doing to conserve, we asked Bruce Jones, the center's Energy Conservation officer and he told us what he believes is the best and fastest way.

"Although many structural and design projects are being studied, both here and at BuMed, the funding and implementation are usually a long process," he said. "Local energy monitors, however, bring up ideas on how to save energy at the grass roots level of the command," he continued, and if these ideas are approved by the Command Energy Conservation Group under the chairmanship of the Director of Administrative Services, the idea can be implemented immediately."

One of the most novel recent suggestions is a "Quiet Hour." This energy conservation idea is directed to patients. The proposal would include turning off all non-essential electrical equipment (TVs and radios) during a one-hour period in the afternoon.

Other ideas include closing blinds on the west side of the hospital during hot summer hours, opening the same during the cold winter days to let in the sun, strict adherence to the 10 p.m. TV curfew, and of course, turning off lights in rooms and offices not in use.

The first of the three primary monitoring groups which have representatives on nearly every floor and department, is headed by HMCS Andrew Latigue of Patient Affairs. This group includes Floors One through Four in Building 500. Representatives are: Janice Reynolds, Patient Affairs; Sandra Brumble, Dermatology; Michael Koch, Orthopedics; HMC Spin DeRosas, Radiology; William Attington, Housekeeping; HM1 Rudy Jampa, Operating Management; James Cogley, Management Information Systems; LTJG Joel Libby, Nursing Administration; Gloria Lars, Legal Office, and John E. Campbell, Johnnie Campbell and Woodrow W. Stuart, Room Food Management Service.

Also, RP3 Davy Carey, Pastoral Services; DT3 Betty Williamson, Dental; Shelley Gofstein, Laboratory; George Gavrell, Urology; CDR Earl May, Otolaryngology; CAPT Donald Mass, Anesthesiology; HM2 Edward Baker, Ophthalmology; LCDR Melvin Baker, Pharmacy; Ollie Johnson, Intermediate Medicine Clinic; Gladys Lowe, OB/GYN; Mrs. Lenore Brady, Pediatrics; HM3 Richard Williams, Military Power.

Group II, headed by CDR Valaine Pack, 8th Deck Nurse Corps Area Coordinator, will hold its second meeting on Nov. 5. Energy Monitor Group II consists of representatives from Floors Five through Nine in Building 500. They include: HM2 Janet Hall, Neuropsychiatry; David Johnson, Clinical Investigation Center; LCDR Patricia Mailander, 8th Deck Nurse Corps Area Coordinator; CDR Roadhouse, 6th Deck Nurse Corps Area Coordinator; CDR Bernice Miller, 7th Deck Nurse Corps Area Coordinator and CDR Shirlee Hicks, 9th Deck Nurse Corps Area Coordinator.

Energy Monitor Group III, headed by Anna Paul from Hypertension Clinic, consists of all the medical center's

departments outside of Building 500. The next meeting for this group will be Nov. 9 at 1:30 p.m. in the Clinical Assembly. Members are Robert Ostrand, EM/CPO Club; Cathy Curtis, Supply; Janet Wilson, American Red Cross; Kathy Bradford, Special Services; HMC Steven Putter, Preventive Medicine; Isaac Starke, Alcohol Rehabilitation; Linda Ostrand, Consolidated Package Store; Maurine Tinsley, Civilian Personnel; Cindy Brown, Commissioned Officers Mess; HM1 John Colony, Operating Management and PNC Jaime Hernandez, Personnel Support Activity Detachment.

BEST DICTATOR—CDR R.P. Umfrid, III, Head of Cardiology, receives the first Dictator of the Month Award from Betty Raab, head of the Word Processing Branch. He was cited by the branch for his excellent dictation, "particularly noteworthy for preparation, enunciation and adherence to dictating formats." In addition to the gift of a framed certificate, Dr. Umfrid was the guest of honor at a coffee and cake ceremony hosted by branch employees.

New language evolving

'Incentivized conversion' could fatten your wallet

If you're beginning to get comfortable with liters at the gas pump and have even dabbled a bit in centimeters and kilograms, you've still got a long way to go—metrically speaking.

While Americans are gearing up to learn metric terms and measurements, the metric conversion process itself has given birth to a whole vocabulary of special terms. Here are a few:

Metritication—The process of converting from inch-pound to metric.

Metriticizing—Same as metritication but not preferred by conversion administrators.

Soft conversion—Conversion to metrics without changing the shape or size of a piece of equipment. This is done simply by rewriting its measurements in metric equivalents.

Hard conversion—Building or rebuilding a piece of equipment in metrics from scratch. This usually results in a change in the shape or size of the equipment.

Interoperability—The ability to exchange services and equipment between armed forces of different countries while maintaining effective operation of equipment or systems involved in the exchange. This entails compatibility of measurement systems and other considerations as well, such as the location of controls on a piece of equipment.

Hybrid system—Part metric and part inch-pound, but it works.

Acquisition barrier—This is a situation where you have trouble acquiring a metric item because a law or regulation specifies that some or all of the paperwork related to the acquisition be written in inch-pounds. For example, a truck driver or dispatcher may leave a crate marked in centimeters and kilograms on the loading dock because a regulation requires the shipping order to be written in inch-pounds. (Action is underway to get such laws and regulations rewritten, according to DoD officials.)

Incentivized conversion—A program that encourages people

(manufacturers, consumers) to switch to metrics by providing tax advantages, price breaks, etc. (AFPS)

New Mideast medal OK'd

United States military and Department of Defense civilians are authorized to accept and wear the Multinational Force and Observers Medal, according to a memorandum recently signed by Frank Carlucci, Deputy Secretary of Defense.

Military personnel and certain selected civilians are eligible for the medal which was designed to recognize people who participated in the Mideast peace-keeping force.

The medal depicts a dove clutching an olive branch and the words "Multinational Force and Observers" on the front. "United in Service for Peace" is on the back. The ribbon is orange, white and green. (AFPS)

Job openings

Therapeutic Radiologic Technologist, GS-7, Radiology Service. Closing date: Oct. 25. Contact Maurine Tinsley, Ext. 2116.

Supervisory Management Analyst, GS-12, Management Information Service, Management Analysis Branch. Closing date: Oct. 18. Contact Christine Lessler, Ext. 2116.

Medical Record Technician, GS-4, Patient Affairs Service, Medical Records and Data Branch. Closing date: Oct. 18. Contact Maurine Tinsley, Ext. 2116.

Interested applicants for any of the above positions should submit a complete and current SF-171 to Civilian Personnel Service.

Our branch activities

Unit looks after Navy's interest thru coordination with Army medics

SMALL BUT EFFECTIVE—Personnel of the Monterey, Calif., Naval Medical Administrative Unit, a subordinate command of NRMOC Oakland, serve Navy people's medical needs in the area. Pictured (left to right) are HM3 Billy Jack Tibbett; Lt. Ray Moran, Officer in Charge; HM2 William Charron; HMC David Hearndon; HN Jennifer Hamilton, and HM2 Joe Rangel.

FULFILLING NAVY MEDICAL NEEDS—HM2 William Charron is leading petty officer of the small unit with a big task.

SEEING TO MISSION—HMC David Hearndon, the unit's administrative assistant, pours over messages on admitted patients.

Drug urinalysis program 'beefed'

The Navy has announced a number of steps to further strengthen its drug urinalysis program. The steps include: purchasing additional urinalysis equipment, ordering detachments to temporary duty in areas which are experiencing the greatest requirement for analysis, and increasing the number of lab technicians assigned to certain centers, including Naval Regional Medical Center, Oakland.

The improvements will increase efficiency of the system and reduce "turnaround times" of samples sent from local commands at Navy Regional Medical Centers for analysis. This will facilitate judicial or administrative actions involving abusers.

The Navy's "get tough" posture toward drug abuse has been credited for the drop in drug usage in the service. Preliminary results of an independent survey, published last week, have indicated a drop of about 50 percent in the level of marijuana use in major fleet centers.

Gapuz X-Ray grad

HM3 Daniel M. Gapuz graduated from Basic X-Ray School on Oct. 8 after maintaining a 97.5 average overall in the school.

The petty officer performed a practical phase of training in the Radiology Service and was sent on temporary duty to the USS HECTOR (AR-7) for a week to enhance his professional performance due to impending shipboard duty.

Gapuz received orders to the USS DURHAM (LKA-114), homeported in San Diego.

Emory King dies suddenly

Emory King, former Laundry Service employee here who retired several years ago with more than 30 years' service, died suddenly on Oct. 2.

Mr. King had visited his old friends here the day before and told them of his well-being and happiness in retirement.

By J03 Walt Fitzmaurice

The Monterey Peninsula brings to vision a picture of sea and sand, fishing boats and frolicking sea lions, but the picture would not be complete without an image of the Navy on the Peninsula. In addition to the Naval Post Graduate School, other Navy commands dot the area.

To ensure that the area's Navy and Marine Corps personnel and dependents are provided optimal medical care, the Naval Medical Administrative (NAVMEADMINUNIT) works in conjunction with the U. S. Army to coordinate medical care of Navy and Marine Corps people, maintain health records, and perform physical examinations.

The NAVMEADMINUNIT is under the support and command of Naval Regional Medical Center, Oakland, Calif., and is located at the Army's Presidio health clinic in Monterey.

One of 14 such subordinate commands of Oak Knoll, the Monterey-based unit functions under the direction of its Oakland superior as a liaison for the local Navy commands with Army medical authorities.

In overseeing the health care that Navy and Marine Corps personnel receive from the Army's local outpatient services, and in operating as a local representative of Naval health care, the NAVMEADMINUNIT is an extended arm of NRMOC Oakland.

Under the Officer in Charge, Lt. Ray Moran, the seven enlisted persons assigned to the unit see to the administrative functions of the unit itself and are responsible for the

ARMY-NAVY COOPERATION Located on the Presidio of Monterey, the U. S. Army Medical and Dental Clinic houses the Navy's Medical Administrative Unit.

upkeep of health records for Navy people in the area.

The scheduling, preparing, and review of all military physical examinations is handled by the unit's physical examinations branch. Working with the Fort Ord Silas B. Hayes medical activities, the unit insures that Navy guidelines concerning exams are carried out to Navy specifications.

In addition, the unit serves as the contact point for Navy and Marine Corps referrals to NRMOC Oakland. Due to the close proximity to the Point San Francisco Naval Facility, the Monterey medical unit offers direction and support to that facility's branch clinic.

The Monterey unit also acts as a local center for questions and complaints about Navy medical concerns.

In all, the unit's personnel work closely with the Army and other service medical staff toward a common responsibility of providing the best health care for all servicemen and their dependents on the peninsula.

Fallon corpsman cited by Sheriff

This summer, a rock climber in the back country of Calaveras County broke his leg while rock climbing in the area of Salt Springs Reservoir. The County Sheriff's office called on the Search and Rescue unit at NAS Fallon, Nev., which rapidly responded with a helicopter at the scene within an hour and 15 minutes after the call. The highly-trained Navy team, which included HM2 Ralph D. Gordon of the NRMOC Oakland's Branch Clinic at Fallon as the inflight medical specialist, was able to lift the victim from the rock cliff and transport him to a hospital in South Lake Tahoe.

For his role in the mission, Petty Officer Gordon recently received a letter of appreciation from Sheriff Claud C. Ballard, who said, "(my Search and Rescue Coordinator, Sergeant James Marz) advises me after surveying the

situation that it would have taken at least 20 ground personnel approximately eight to 10 hours to rescue the victim from the area he was located in. The terrain was extremely rugged and dangerous and by the use of your helicopter, it not only expedited the victim to the hospital but saved putting other persons in jeopardy in the rugged county."

Gordon, an operating room technician at the Branch Clinic since March, was part of a SAR crew which included LCDR Richard McCann, pilot, LT J.C. Earl Gay, co-pilot, Chief Petty Officer Gene Ponce, crew chief, and Steve Hay, a second class crew member. All were cited by the Sheriff for "their expertise, dedication and willingness to place their lives in jeopardy to save another."

APPRECIATED—LCDR Gerald V. Meskill, officer in charge of the Fallon Branch Clinic, reads a letter of appreciation from the Calaveras County Sheriff to HM2 Ralph D. Gordon, for the latter's help in a search and rescue mission.

Sanders new MCPO of Navy

Master Chief Petty Officer of the Navy Thomas S. Crow was relieved at Pier 1 by Master Chief Avionics Technician Billy C. Sanders, at ceremonies in Washington, D.C.

"It's been very rewarding to be in the Navy and see a positive momentum begin again," said Master Chief Crow on his tour. "We've rounded the corner, and we're in the best shape we've been in years."

"We have a better quality of sailor today than we have ever had before. We've cleaned house with project 'upgrade' and raised our recruiting standards. Today's Navy is intent on dealing with quality people."

As Master Chief Petty Officer of the Navy, Crow played a major part in organizing the Command Master Chief Program. He also was a key adviser in the formation of the Navy Junior Enlisted Academy, the Third Class Petty Officer Indoctrination Course and the Chief Petty Officer Indoctrination Course.

Former Chief of Naval Operations, ADM Thomas B. Hayward, awarded Master Chief Crow the distinguished service medal for "aggressive leadership, sound judgment, and persuasive logic in articulating the interests and viewpoints of Navy enlisted policies." The medal is the military's highest lifetime award.

Master Chief Crow, a veteran of 30 years service to the Navy, will retire Nov. 1.

NEW PUBLIC WORKS CHIEF—LCDR Rodger W. Darr is the new Chief of Public Works Service at NRMC Oakland. A Navy Civil Engineering Officer for 10 years, he holds both a bachelor of science in mechanical engineering and a master's in nuclear engineering from Purdue, and a master's in systems management from the University of Southern California. Prior billets have been in Diego Garcia; Washington, D.C.; Lakehurst, N.J.; Yokosuka, Japan, and Ft. Belvoir, Va. He holds the Navy Achievement Medal, Navy Unit Commendation, two Meritorious Unit Commendations, the Navy Expeditionary and National Defense, and is a registered professional engineer in Pennsylvania.

Navy plans to expand Key West

The Secretary of the Navy has announced his intention to expand the naval station at Key West to be used as a forward operating base in support of naval operation and exercises in the Straits of Florida. As previously planned, Key West will be the home port of a squadron of the Navy's PHM class (hydrofoil) missile patrol boats, and the Truman Annex harbor will be restored to facilitate frequent and regular visits by destroyers and other units of the Atlantic Fleet.

The increased Navy presence in Key West will include permanently stationed Navy members and their families as well as crews of visiting ships and aircraft squadrons operating in the Key West area. The expanded facilities will also improve the Navy's response time to possible contingencies in the Caribbean and provide a potential homeport site as the Navy expands to 600 ships.

Secretary Lehman determined that this action can be taken without using all the land previously declared excess. The land and waterfront area, which the Navy will retain and renovate, comprises approximately 47 of all 133 acres the Navy declared excess in the early '70s. The Navy will make available for sale two deep-water piers known as the Bravo Piers, the waterfront land immediately adjacent thereto, and much of the historical district of the former naval station. This land and deep-water access will be available for private or municipal development in accordance with applicable laws and regulations. The preliminary decision to reopen a portion of the base is subject to compliance with the National Environmental Policy Act.

Command changes today at FHSO

Commander Larry F. Stangl relieves Captain Everett L. Jones today of command of the Fleet Hospital Support Office in Alameda.

Commander Stangl is the former Executive Officer of the support office. Captain Jones has been transferred to another assignment. Both are Supply Corps officers.

The activity under the Naval Supply Systems Command provides health care to Navy and Fleet Marine Forces through acquisition and reposition of 200, 500 and 1,000 bed self-contained, air-transportable, relocatable, quickly erected modular hospital units.

Rear Admiral Almon C. Wilson, Medical Corps, U. S. Navy, Program Manager of the Fleet Hospital Project, is guest speaker at today's change of command ceremony.

Honda/Subaru owners warned about leaded fuel

Service members stationed in overseas areas are experiencing major engine problems when running Honda/Subaru vehicles on leaded fuel.

Both American Honda and Subaru of America do not recommend converting any of their vehicles to use leaded fuel when the vehicles are made exclusively to run on unleaded fuel.

Honda has indicated that leaded gasoline will cause excessive damage to the valve and valve seats and piston and piston rings. Subaru indicates leaded fuel will damage the engine and the emission control components.

NEW SERVICE HEAD—Captain L. Wayne Rushing returned to NRMC Oakland earlier this month to become Chief, Pastoral Care Service. He was last assigned here from January 1973 to June 1977. In the intervening years, he served aboard the USS CORAL SEA (CV-43) and more recently, as the Senior Chaplain at NAS Alameda. The Kokomo, Miss. native earned a bachelor of arts at Delta State College and a bachelor's and master's divinity degree from Emory University in Georgia. Before entering the Navy, he served as pastor at three Methodist churches in the south. His Navy career began in 1961 and he has spent 10 years at sea, mostly on destroyers and carriers. The chaplain and his wife Eunice have a son, David, 23, and a daughter Karen, 18. The family home is in Livermore.

Heating system check-up time

Oak Knoll Fire Chief Bob Bobbitt says we shouldn't wait until the first cold snap of the season to think about getting our home heating systems ready for winter.

This is an ideal time, he says, to have furnaces and chimneys professionally serviced and, if necessary, repaired.

Also, fire officials caution, we should be sure that we are thoroughly familiar with instructions for fueling and operating any portable heaters, wood or coal-burning stoves, or other heating devices we plan to use.

Overseas mail may be inspected

The Department of Defense and the U. S. Postal Service have reached an agreement which will allow military authorities to inspect and open overseas mail to prevent traffickers in drugs or other contraband from using the military mail system.

The new regulations will allow commands to screen mail using dogs, metal detectors and other similar security devices. Search authorizations may be issued to open mail when "probable cause" exists that an item of mail contains drugs or other contraband.

Personnel who are implicated as suspects in military justice investigations may, in limited circumstances, have "mail covers" placed on their mail. This directs postal clerks to gather information from the outside cover of mail sent to the suspect, including addresses and package size. The information is then passed to law enforcement authorities.

The rules also will allow postal clerks to submit mail for inspection to host county governments in compliance with local Status of Forces Agreements, or give military customs officials permission to inspect mail for the host country.

NEW JERSEY in first sea trials

The battleship NEW JERSEY (BB-63) left Pier 1 at the Naval Shipyard Long Beach, Calif., Sept. 25, for her first sea trials since beginning reactivation one year ago.

This marks the first time that the ship has been underway under her own power in 13 years. The last time NEW JERSEY was at sea was in 1969, when the battleship sailed to Bremerton, Wash., for her third decommissioning. Scheduled sea trials will test different aspects of the reactivation. The first trial examining hull, mechanical and electrical systems; the second will test combat systems; and the third will include inspection by the Board of Inspection and Survey to certify the material condition of the ship for participation in refresher training and future fleet operations.

The battleship has been undergoing a period of reactivation and modernization at the Naval Shipyard for the past year. While much of the original equipment in NEW JERSEY will remain, the electronic, combat systems, interior communications and damage control systems have been upgraded. The crew's berthing and messing facilities have been modernized and the battleship has been air-conditioned. Tomahawk and Harpoon missile systems have been added to increase long range offensive power, while the Vulcan-Phalanx close-in weapon system was installed to substantially improve defensive protection.

ANOTHER LITTLE MIRACLE

If you've ever loved someone who's fighting a deadly disease, you know what fear is. You know what hope is too. And you pray for a miracle—because they do happen. We make them happen with your CFC gifts. Medical research to find the cures, a helping hand to those afflicted now, the latest information on diagnosis and treatment for your doctor. Please remember us this fall.

Applications due for fellows program

Interested personnel must submit a written application to the President's Commission on White House Fellowships to be considered for the program. Application forms may be requested by writing to: The President's Commission on White House Fellowships, 711 Jackson Place, Washington, D.C. 20503. Additional information is available from the Navy Military Personnel Command White House Fellowship Program manager at Autovon 224-3321 or Commercial (202) 694-3321.

Bazaar--

(Continued from page 1)

babysitters are urgently needed. interested, contact Leslie Kopp, 562-4847, or Nancy Hannig, 632-3703. Babysitting privileges will be extended only to those working or shopping at the Bazaar. Reservation for your child must be made by Monday, Oct. 18, by calling either Leslie or Nancy at the above numbers. Parents must provide lunches, diapers, etc. for their own children and there will be a charge of \$1 per child per hour.

with videotapes

AWRT chapter helps spirits soar in Peds

The young patients on the Pediatrics ward now have a whole new world of selected entertainment available to help them pass the hours as they recuperate, thanks to the "Soaring Spirits" program of the American Women in Radio and Television (AWRT).

On Oct. 1, Marlene Holderbaum, president of the Golden Gate Chapter, Caroline Klas, "Soaring Spirits" chairman, and Ruby Peterson, otherwise known as "Miss Nancy" of Romper Room fame, came to the hospital to present 20 hours of videotaped children's program. The AWRT gift is received by Captain H. James T. Sears, Director of Clinical Services, and Captain Harold Koenig, Chief of Pediatrics, while Lieutenants Marci Swell and Adrienne Ayers, Mrs. Virginia Willis (R. N.), HM3 Douglas McInteth, and other staff members looked on.

"Miss Nancy" also visited with the young patients, passing out gifts and photographing souvenir photos for the families.

AWRT began the "Soaring Spirits" program in 1973 to:

- Bring quality radio and TV programming to hospitalized children during their recuperative period, a time when stimulation and diversion can be

MISS JULIE, MISS NANCY—"Miss Nancy" of Romper Room holds patient Julie Hannum, 2, daughter of Mr. and Mrs. John Hannum of Richmond.

- highly beneficial to recovery; and,
 - Redirect the attention of young patients away from the possible traumas of hospital environment and toward meaningful time consumers of therapeutic diversion and entertainment, without the need to implement manipulative skills and/or body mobility.
- Since receiving endorsement, the project has mushroomed with nearly 85 hospitals in the United States and Canada participating.

New publications for Navy families

The Navy Family Support Program has made available to commanding officers and Navy people two new publications.

The *Navy Family Ombudsman Manual* was written to help commanding officers in establishing an ombudsman program. Since 1970, family ombudsmen have consistently demonstrated that the concerns of family members and their families are important and warrant command attention. When they need it, families always have an "open door" to the command through the CO-appointed family ombudsman.

The ombudsman program is undergoing a transition to more formalized program administration, and the new manual provides important information about this change. The manual provides valuable ideas, examples and approaches which have been used effectively by those who have served as command ombudsmen. It also discusses how to implement an ombudsman program, its functions, the development of councils and the relationship with commanding/assistant officers and command senior chiefs.

Exceptional Children—A Navy Parent's Handbook is designed for Navy parents with handicapped children. It seeks to provide valuable information and suggestions which will serve as an important tool in providing optimal care and education for exceptional children.

Additionally, it points out the important role Family Service Centers play in aiding "special needs" families. The handbook also contains resource information such as key legal provisions of handicapped legislation, a list of state directors of special education and suggestions for parents seeking diagnostic services.

Requests for copies of the *Navy Family Ombudsman Manual* (S/N 0420-LP-400-4000) and *Exceptional Children—A Navy Parent's Handbook* (S/N 0420-LP-400-0500) should be addressed to: Commanding Officer, Naval Publications and Forms Center, 5801 Tabor Ave., Philadelphia, Pa. 19120. (NES)

- The following additions to the medical "family" have arrived at Oak Knoll:
- A baby boy to Hospital Corpsman Third Class Mark P. Lewis, Coast Guard Training Center Alameda, and his wife Dorene, Sept. 22.
 - A baby girl to Commander Blaine Hibbard, Pediatrics Clinic, and his wife Alison, Sept. 27.
 - A baby girl to Lieutenant Commander Jackson O. Pemberton, Laboratory Service, and his wife Marcile, Sept. 27.
 - A baby boy to Hospital Corpsman Third Class Robert J. Palen, Moffett Field Branch Clinic, and his wife Lorna, Sept. 30.
 - A baby girl to Hospital Corpsman Second Class Donald R. McClure, Moffett Field Branch Clinic, and his wife, Linda, Oct. 4.

JUST ONE OF TWENTY—Caroline Klas, AWRT "Soaring Spirits" chairman and staffer of KTVU, Channel 2, presents one of 20 videotapes to Captain H. James T. Sears while Captain Harold Koenig and registered nurse Virginia Willis look on.

GOODIES FOR GOOD PATIENTS—Four-year-olds Patrick Wright (background) and Nathan Whitehead show interest in gifts from "Miss Nancy."

Law requires parents to buckle-up children

In response to statistics indicating that restrained children are 50 to 70 percent less likely to be injured or killed in an auto accident than unrestrained children and that back seat passengers are less likely to be injured than front seat passengers, 21 states have enacted laws requiring the use of, or have instituted public education programs on, safety seats or belts for children.

Tennessee, which passed the first such law, requires parents of children under four years of age to use federally approved child restraining systems. The law became effective Jan. 1, 1978, and active enforcement and public education campaigns have increased child restraint use in large metropolitan areas from 9 percent in 1977 to 32 percent in 1981. Injury rates in Tennessee among children under four years of age have decreased from 440.0 injuries per 100,000 children in 1979 to 306.1/100,000 in 1981, a 30 percent decrease, while death rates have decreased 55 percent from 7.72 deaths/100,000 children in 1979 to 3.5/100,000 in 1981.

Sixteen of the 21 states enacting restraint laws for children, encompassing over 40 percent of the American population, have passed laws requiring parents to use car restraints for their children. Three—California, Indiana and Maine—have passed laws requiring state agencies to conduct public information campaigns on the importance of child passenger safety. Hawaii has enacted a state income tax credit for purchase of a child safety restraint. In

other states, child restraint legislation is pending.

There will be more educational material forthcoming on this subject at Naval Regional Medical Center, Oakland. In the meantime, parents may obtain further information at the Oak Knoll Safety Office.

Two-servicemember marriage benefits now being studied

The Assistant Secretary of Defense (MP&FM) has directed the Navy to take the lead in establishing a joint service study group to study compensation policy as it relates to servicemembers who marry other servicemembers.

The group will examine all allowances and benefits offered to servicemembers in this category, identify problems in the compensation system and recommend remedies to the Secretary of Defense.

Congress has shown considerable interest in this area of compensation, especially with respect to paying quarters allowances to members on sea duty.

The study group is coordinated by RADM A.J. Herberger, Director, Military Personnel Policy Division, and his counterparts in the other services, with day-to-day work assigned by the services' Directors of Compensation.

The group, which first met Sept. 9, will meet for approximately six months.

HELPLINE opens

Family Service Center, Naval Air Station Alameda, announced the opening of the HELPLINE (522-HELP) on Oct. 11.

The HELPLINE will be operational 6 p.m.-10 p.m. Monday through Friday. It is designed to provide crisis intervention, support, information and referral to military personnel and their families. Under the sponsorship of the Family Service Center, the HELPLINE is staffed by volunteers who have undergone an intensive 30-hour training program.

If you have a problem and need someone to listen, please call (522-7777).

BEDS REPLACED—HN Robert Cavner of 6 West helps patient John W. Sharbonow into one of more than 150 new beds recently received at the hospital. The beds feature full manual crank capability in all therapeutic positions in the event that power is not available. They also take the guesswork out of prescription positioning and have an angle of knee elevation scale that is particularly useful in vascular and orthopedic cases. Controls are "feather touch," enabling even the arthritic to operate with the knuckle or back of the hand. The beds are also safer and save staff time in positioning patients.

Toll-free phone calls offered for CHAMPUS claim info

CHAMPUS beneficiaries who have questions about their claims can reach the claims processor for their state on a toll-free telephone line. The lines have been set up during the past year to better serve beneficiaries in the United States. (OCHAMPUS-Europe and Hawaii do not have toll-free phones.)

Beneficiaries should send claims to the processor for the state in which care was received. The toll-free lines for each claims processor can only be used from within the states the firm serves.

For example, the CHAMPUS claims processor for Colorado is Mutual of Omaha, while Blue Shield of California serves neighboring New Mexico. A beneficiary who received care in Colorado but lives across the state line in New Mexico, must send the claim to Mutual. But the beneficiary cannot use the toll-free line to Mutual of Omaha from his or her home. The beneficiary would have to call commercial long-distance—or travel back to Colorado to use the toll-free hookup.

The toll-free lines of most of the claims processors are open during the business hours of the time zone in which the processors are located. Blue Shield of California, which processes adjunctive dental care and Christian Science claims throughout the country, is only reachable toll-free from the states it serves generally.

Here's a list of the claims processors for each state and their toll-free and/or commercial numbers:

STATES SERVED: Alabama, Colorado, Georgia, Mississippi, Nebraska, Ohio, West Virginia. (Also serves Canada, Mexico, Central and South America where there is no toll-free service):

Mutual of Omaha, Mutual of Omaha Plaza, Omaha, Nebraska 68175.

Toll-free number:
1-800-228-7100

Commercial number:
(402) 978-2934

STATES SERVED: Alaska, Idaho, Montana, Oregon, Utah, Washington, Wyoming.

Blue Cross of Washington-Alaska, P.O. Box 77084, Seattle, Washington 98177

Toll-free number:
1-800-426-9250

1-800-426-1337 (Alaska only)

1-800-562-1312 (Washington only)

Commercial number:
(206) 361-3460

STATES SERVED: Arizona, California, Connecticut, Florida, Maine, Massachusetts, Michigan, Nevada, New Hampshire, New Mexico, Vermont. (Also serves Puerto Rico):

Blue Shield of California, P.O. Box 85020, San Diego, California 92138

Toll-free number:

1-800-854-2667

1-800-295-9681 (San Diego only)

1-800-532-3401 (Northern California only)

1-800-532-3952 (Southern California only)

1-800-854-2549

Commercial number:
(714) 297-7600

STATES SERVED: Arkansas, Illinois, Indiana, Iowa, Kansas, Kentucky, Louisiana, Minnesota, Missouri, North Dakota, Oklahoma, South Dakota, Texas, Wisconsin.

Wisconsin Physicians Service, P.O. Box 7938, Madison, Wisconsin 53707

Toll-free number:

1-800-356-5954

1-800-362-7445 (Wisconsin only)

Commercial number:
(608) 221-4711

STATES SERVED: New Jersey, New York, Rhode Island

Blue Cross of Rhode Island, P.O. Box 786, Providence, Rhode Island 02901

Toll-free number:

1-800-556-7860

1-800-662-5260 (Rhode Island only)

Commercial number:
(401) 272-8500

STATE SERVED: Tennessee
Blue Cross-Blue Shield of Tennessee, 730 Chestnut Street, Chattanooga, Tennessee 37402

Toll-free number:

1-800-572-7247

Commercial number:
(615) 755-5600

STATES SERVED: Delaware, Maryland, North Carolina, Pennsylvania, South Carolina, Virginia. (Also serves District of Columbia):

Blue Cross-Blue Shield of South Carolina, P.O. Box 6119, Columbia, South Carolina 29260

Toll-free number:

1-800-845-2572

(Continued to page 11)

Key points to remember regarding CHAMPUS

CHAMPUS is a medical benefits program provided by the federal government to help share the cost of civilian medical care given to spouses and children of active duty and retired military people. Also eligible are spouses and children of deceased active and retired service members.

Following are major points to remember concerning CHAMPUS eligibility:

- Active duty people are not eligible for CHAMPUS. If active service members receive emergency medical care from civilian sources, they should initiate payment of the bill with the office which holds their health records. NAVMED form 6320-10 should be completed through that office.

- "Children" is defined as unmarried and under age 21, including legally adopted children, stepchildren and certain illegitimate children. Unmarried sons and daughters age 21 or 22 are

eligible for CHAMPUS if they enrolled in college full time.

- Parents, mothers-in-law, fathers-in-law who are claimed by vice members as dependents are eligible for CHAMPUS.

- A current, valid military identification card is required to establish eligibility for CHAMPUS benefits.

- All beneficiaries who live within a 40-mile radius of a uniformed services medical facility must obtain a non-availability statement, form 1280, before CHAMPUS will share the cost of non-emergency inpatient care received from civilian sources.

- Inpatient care—As long as the patient's attending doctor states in writing that the admission was a medical emergency, a non-availability statement is not mandatory.

- CHAMPUS does not cover dental examinations.

Tylenol

No extra-strength capsules here

Patients of Naval Regional Medical Center Oakland need have no concern about headache drugs dispensed at the hospital pharmacy, said Captain J.R. Lucas, Chief of Pharmacy Service, in answering *Oak Leaf's* questions about the nationwide Tylenol scare, where eight persons have been fatally

poisoned with capsules containing cyanide and a man taken ill with a capsule containing strychnine.

"We have never ever carried Extra Strength Tylenol in capsule form," the captain declared. "Furthermore, we use a generic form of the medication."

TRAINING—Eight Licensed Vocational Nurses on the Oak Knoll staff recently completed a one-week course for certification in intravenous/venipuncture. The class, approved by the California Board of Vocational Nurse Examiners, was presented by Education and Training Service. Students were credited with 30 contact hours. In the background is LCDR Michele Comte, an instructor for the specialized training.

MED • SCAN

A quick look
at recent health care
developments

Researchers at the Massachusetts Institute of Technology and the Harvard Medical School have developed an artificial skin for burn victims which holds the promise of promoting the regrowth of lost tissue. The scientists, as reported in *Science*, have been working on the development of the membrane since 1970. The material consists of two layers: an outer surface made of medical-grade silicone rubber and a bottom layer of protein fibers (Collagen) and a starch-like substance (lysaccharide) which are both components of the bone, tendon and skin of animals. The scientists get cells from the victim's own skin which are then separated and placed by complex procedures in the space between the two layers of the membrane. These "seed" cells then form a sort of template which guides the growth of new epidermal cells. The silicone layer can be peeled away in 10 to 14 days. There is a minimum of scarring and no skin grafts are necessary. It is developments such as this which permit today the survival of victims with burns over as much as 80 percent of their bodies.

Vanity, thy name is humankind. Women for too long have taken a bad rap about their supposed willingness to stretch the truth to conform with a fanciful self-image. Researchers, reporting in the *American Journal of Epidemiology*, found in analyzing data from the Hypertension Detection and Follow-up Program in Minneapolis of 1973-1974 that when people reported their height and weight the figures contained small but significant errors. Women under-reported their weight by 1.6 percent while men only under-reported theirs by 1.6 percent. But men overstated their height by 1.3 percent and women only by 0.6 percent. Over-reporting of height increased with age and weight, but decreased with height and educational level. Under-reporting of their weight by women wasn't as great as they matured, but increased with weight.

Improved techniques are resulting in an increasing success rate in the "test-tube baby" (in-vitro fertilization) procedure. Currently, actual conception occurs between 20 and 30 percent of the time. With this improved rate The American Fertility Society at its annual meeting in Las Vegas endorsed in-vitro fertilization as acceptable treatment for women with damaged or absent tubes. Spokesmen also expressed the hope that health insurers will reconsider covering the costs of the procedure which run about \$3,000. Surprisingly, some "pro-life" groups oppose this conception concept, even though they find nothing wrong with the surgical treatment of fertility.

Memory teasers

1. There are currently nine commissioned destroyer tenders in the U. S. Navy. USS PRAIRIE (AD-15) is the oldest. Can you name the rest?
2. There are 15 aircraft carriers currently commissioned in the U. S. Navy. One is USS LEXINGTON (AVT 16). Can you name the rest?
3. The Navy retained four battle-ships in reserve that could possibly be activated, if needed. One is the IOWA (BB 61). Can you name the other three?

BOARD OF VISITORS—Rear Admiral Robert C. Elliott (second from right), Commanding Officer, NRMOC Oakland, leads off the discussion in the first of quarterly meetings with Commanding Officers of other Navy, Marine Corps and Coast Guard activities in the Bay Area. The "Board of Visitors" has been established to address any problems or concerns the fleet and other bases have with health care service here or at branch clinics.

DIXIE lowers Navy Jack, passes to USS PRAIRIE

USS *Dixie* (AD 14), once the only destroyer tender to fly the Navy Jack—the Revolutionary War-era "Don't Tread on Me" flag—hailed down its ensign during decommissioning ceremonies in San Diego on June 15. "Dependable Dixie" was commissioned in 1940 and, by virtue of being the oldest Navy ship in continuous active service, was the only U. S. Navy ship authorized to fly the jack. The honor has been passed to another destroyer tender, the USS *Prairie* (AD 15), homeported in San Diego.

The Navy Jack has a colorful background. The flag, with a rattlesnake on a field of red and white stripes and the words—including a misspelling—"Don't Tread on Me" emblazoned across it, was once the personal banner of Commodore Esek Hopkins, the first and only commander in chief of the Continental Navy. The jack first flew from the mast of Hopkins' flagship *Alfred* and was hoisted by young John Paul Jones, a member of *Alfred's* crew. Jones raised a flag on Dec. 5, 1775,

but there is some question as to exactly which Navy Jack was flown.

Technically, there may have been two American Navy Jacks.

The first of these was the Gadsden flag, created by Colonel Christopher Gadsden of South Carolina, and offered to Congress as the flag for the commander of the Navy. The Gadsden flag also carried a rattlesnake but against an orange field, and it also included the words "Don't Tread on Me." In presenting the flag to Congress, Benjamin Franklin explained, "The rattlesnake is found only in North America; among the ancients, serpents were considered to possess wisdom and vigilance (because snakes have no eyelids to close). The rattlesnake does not attack without first giving warning, and the number of rattles increases with age." The snake on the Gadsden flag had 13 rattles, perhaps symbolic of the 13 colonies.

The words "Don't Tread on Me" were in response to British Lord North's threat made to America. Lord North swore he would never relax his coercive measures until England and the king again controlled the colonies. The flag was a warning that it would be as dangerous to tread on America as it would be to tread on her symbol—the American rattler. Although Congress discussed the idea, it did not formally adopt the Gadsden flag for the Navy.

The flag now known as the first American Navy Jack, or the Continental Jack, has a rattlesnake stretched diagonally across a red and white striped banner. This is the flag that John Paul Jones presumably ran up, even though he didn't like the symbol that it bore. "I had no choice but to break the pennant as it was given to me," he later wrote. "But I had always abhorred the device and was glad when it was discarded." The jack faded into obscurity for almost 200 years following the Revolutionary War.

In 1975, a Chicago attorney suggested the Continental Navy Jack be flown on U. S. Navy ships in celebration of the Navy's 200th birthday. He voiced his idea to his two active duty Navy sons and, with their encouragement, contacted the Navy Chief of Information. The idea was adopted, and on Oct. 13, 1975, Navy ships around the world hoisted the now famous "Don't Tread on Me" ensign and were allowed to fly the jack through December 1976.

The honor of flying the American Navy Jack has since been designated to the oldest Navy ship in continuous active service. *Dixie* proudly flew the historic jack from April 1981 until June of 1982. That honor and prestige now passes to the *Prairie*.

Sanno Hotel: A Tokyo bargain

An inexpensive way to visit Tokyo is available to U. S. Navy people and their families at the Navy's Sanno Hotel. Whether on leave, a family vacation or official travel, members of the military community can enjoy nearby tourist attractions inexpensively while enjoying the comfort and familiarity of an American style hotel.

Located in "Akasaka," a central downtown-Tokyo district known for its fine restaurants, shops, deluxe hotels, nightclubs and discos, the Sanno has elegant neighbors. The American embassy is only a few blocks away, and Tokyo's excellent, inexpensive and easy-to-use subway is just two minutes outside Sanno's rear door. The Sanno makes an excellent home base for discovering Tokyo.

The American environment provided by Sanno includes a variety of dining rooms to suit most budget, taste or style preferences. A newly renovated cocktail lounge beckons nightly. Entertainment is offered regularly and ranges from piano bar, dancing, floor shows and "big band" sounds, to feature-length major motion pictures and outdoor garden parties.

Other services at the Sanno include pack-and-wrap, a Navy Exchange, 10 gift shops, an antique shop, a package store and delicatessen, game room, travel service, flower shop, bookstore, barber and beauty shops, postal services, and a swimming pool and exercise room.

The Sanno's 150 rooms are varied in size and price, ranging from deluxe suites to economical single or double rooms with shared baths. Per-person, per-day prices run from \$9 to \$15 for singles and from \$7.50 to \$17.50 per person for doubles.

The Sanno is a joint-services hotel for active duty, retired or active reserve U. S. military people and their dependents. U. S. civilian employees of U. S. forces and other U. S. government agencies accredited to the U. S. embassy are also eligible to use the Sanno. The Navy has served as executive agent for the Sanno since 1980,

with support from the other military services.

It's easy to reserve a room at the Sanno. Simply write to The Sanno Hotel, APO San Francisco 96503 to request reservations and include a \$20 reservation deposit. Reservations can also be made by telephone or telex: Autovon 229-7117/7107 or Telex 2222511 SANTEL J. The Sanno's commercial phone number in Tokyo is: 581-6471, ext. 7117.

To find a touch of America in downtown Tokyo, come stay at the Sanno. There is something more: perhaps the friendliest, most gracious hotel staff you will ever encounter. All yours, at bargain prices. (NES)

Masquerade Ball slated here Oct. 29

The annual Masquerade Ball will be held at the Oak Knoll Officers' Club on Oct. 29, with festivities scheduled to begin at 7 p.m.

The party will feature an Italian buffet and dancing to the music of an Air Force combo. Prizes for the best costumes will be awarded.

Tickets at \$10 each are available from secretaries in the following offices: Director of Clinical Services; Nursing Service; Dental Service; Operating Management and Chief of Pediatric Service.

Although costumes are not mandatory, they are strongly recommended, according to one Recreation Committee member.

VA Qs and As

Q—If I do not agree with a decision the VA makes on an application for benefits, what can I do?

A—You may file an appeal on benefit decisions you disagree with. All that is necessary to start the appeal procedure is for you to write the VA stating why you disagree with the decision and include information you believe should be considered by the VA.

...

Q—Can a veteran purchase a condominium or townhouse with a GI home loan?

A—Yes, as long as it meets VA appraisal requirements and is going to be occupied by the borrower as his/her permanent primary residence.

...

Q—If a veteran dies before a home loan guaranteed by the Veterans Administration is repaid, will the VA pay off the balance?

A—No, the surviving spouse or other co-borrower must continue making payments.

PRACTICAL SOUVENIR—CDR Ben Ho's belt buckle award is admired by Rear Admiral Robert C. Elliott (left) as Captain Richard O'Reilly looks on. The belt buckles were awarded to Navy participants in the recent Fleet Admiral Rifle, Skeet and Pistol Match.

Four from NRMCO Oakland in rifle, skeet, pistol meet

The 43rd Annual Fleet Admiral Nimitz match in Rifle, Skeet and Pistol shooting took place on Oct. 3. The contest is an annual competition between the Pacific Fleet and the Olympic Club of San Francisco.

NRMCO Oakland had four participants this year. CDR Ben Ho represented the Navy's number one team and finished with a score of 510-6X. The second Navy Team consisted of LCDR George Grasel, CAPT Richard

O'Reilly and LCDR Charles Blankenship.

The Navy Team won the skeet match while the Olympic Club won the .22 cal. rifle match and the .45 pistol match, giving the Olympic Club this year's total winning points.

The Navy team is looking forward to a better showing next year. Anyone interested in participating in the next event may get more information from this year's participants.

Reserve now for Reno trip

Space is still available on the Special Services-sponsored trip to the Reno/MGM Grand, Nov. 19-21, but reservations must be in by Oct. 29, Sally Young reports.

A deluxe motorcoach will leave Oak Knoll at 4:15 p.m. on Friday, Nov. 19 and return Sunday, Nov. 21 at approx-

imately 6 p.m. The package includes accommodations at the MGM Grand Hotel, a ticket to the "Hello, Hollywood Hello" show, two drinks at the show, trip downtown to Reno's strip, plus casino bonuses.

Call Sally at 639-2479 if you have any questions.

Best employee

EOQ to be selected here

An Employee of the Quarter (EOQ) program is being established at this command to recognize Oak Knoll's outstanding civilian employees, it has been announced.

A memo to all Chiefs of Service from Rear Admiral Robert C. Elliott, Commanding Officer, declared the program's objectives are to "enhance individual and collective morale; provide an incentive for loyalty, attendance and production, and promote a military-civilian team concept."

An EOQ Awards Committee under the chairmanship of Medical Service Corps Commander George Hansel of Preventive Medicine Service is being formed to judge nominations submitted by Chiefs of Service. In addition to CDR Hansel, the committee is comprised of Margaret Miller, Drug Screening Laboratory; Donna Ostrowski, Patient Affairs; Joseph Isoefa, Clinical Investigation Center; Mary Smith, Equal Employment Opportunity Office, and Paul Hammond, Housekeeping Service.

Nominations for the first selectee close Dec. 1. The committee will meet in mid-December and announce its selection. The employee honored will receive several awards, including a reserved parking spot for three

months, a letter of commendation, and a command plaque. He or she will also have his/her photograph prominently displayed in the hospital lobby and be featured in *Oak Leaf*. Other rewards are also being explored.

Criteria for selection are;

- Dedication to duties.
- Loyalty to the U. S. Navy.
- Courtesy or deportment.
- Good attendance record.
- Appropriateness of appearance.
- Quality/quantity of work.
- Exceptional acts or accomplishments.
- Concern for patients (if applicable to job).

Civilian employees of any grade or job specialty are eligible for this award.

Regional meet today

Officers in Charge of Naval Regional Medical Center Oakland's outlying activities are meeting this morning in the Officers' Club with key staff members of the command.

The Regional Executive Planning Committee began its quarterly conference at 10 a.m. and a no-host luncheon will follow.

(Continued to page 2)

New vaccine here for high-risk staff

A new Hepatitis B virus vaccine recently marketed under the name of Heptavax-B (R), is now available at Naval Regional Medical Center Oakland in limited quantity for those members of the staff in high-risk positions.

According to LCDR Dan Lancaster, Infectious Disease Officer, "the vaccine is very effective in most cases, and the hospital has aboard enough vaccine for several hundred persons."

Hepatitis B is a major form of infection for all hospital workers, despite all routine precautions. Anyone who comes in contact with the blood of patients runs a risk of getting the infection. Formerly, the only preventive measure against the infection was the administration of Hepatitis B immunoglobulin, an expensive procedure not always effective. The new vaccine, officials say, is a breakthrough for the medical field worker and the risk of infection will be practically eliminated.

The high risk areas of this hospital are the dialysis units, Dental Service, Pathology, Surgery, ICU, CCU, Emergency Room and Nursing Service. Selected personnel of these departments are now undergoing blood screening to see if they have developed antibodies against the disease. If they have, immunization will not be needed. Others will be given the vaccine on a volunteer basis.

The vaccine is in short supply because of its cost. Priority will go to those staff members in closest contact with patients and blood. Priority will be determined after the screening process.

The cost per course is \$90 to \$100 and takes six months to administer.

Winter uniforms in effect Nov. 8

The shift to winter uniform for the San Francisco Bay Area will take effect on Nov. 8. No transition uniform period is authorized.

The uniform of the day for the winter period will be:

• **Male Officers/CPOs:** Prescribed—Service Dress Blue; Alternate—Summer Khaki; Optional—Winter Blue.

• **Female Officers/CPOs:** Prescribed—Service Dress Blue (A/B); Alternate—Summer Khaki (A/B); Optional—Winter Blue (A/B).

• **Male E1 to E6:** Prescribed—Service Dress Blue/Blue Jumper; Alternate—Winter Blue.

• **Female E1 to E6:** Prescribed—Service Dress Blue (A/B); Alternate—Winter Blue (A/B).

Summer white uniforms may be worn as a working uniform in the patient care areas of this hospital; however, the summer whites will not, repeat NOT, be worn off base, even in transit between home and medical center.

SECOND TIME AROUND—Captain H. James T. Sears, Director of Clinical Services, receives the Meritorious Service Medal pinned on by Rear Admiral Robert C. Elliott, Commanding Officer. This is Captain Sears' second MSM. He earned the latest one for outstanding service at his last duty station, NRMCS San Diego.

Chaplain's corner

The significance of living

By Chaplain M. Kathy Brown
LT, CHC, USN

As long as man has a dream in his heart, he cannot lose the significance of living. The dream in the heart is the outlet. It is one which the living water welling up from the very springs of being nourishes and sustains life.

Take no thought for your life—it is in God's hand. A dream lives in the inwardness of the heart; it is deep within where the issues of life and death are ultimately determined.

As long as a man has a dream, he cannot lose the significance of living.

Get hazards corrected BEFORE accident occurs—not afterwards

"Hey, Safety, how about getting this tripping hazard corrected? It's been this way for two weeks now. Somebody is going to get hurt."

"Well, if it isn't Safety! It's been a long time since I've seen you in this service. While you're here, I'd like to show you a couple of unsafe conditions. They've been that way for a month and nobody's done anything about them."

Sound familiar? It sure does. Safety Office functions include daily inspection of work sites, facilities and branch clinics for unsafe and unhealthy conditions—and getting the problems corrected. The office also investigates mishaps to determine the cause and recommends corrective action to ensure that a similar accident doesn't occur.

And, the paper work is monstrous, just like for any other job. So, what we are saying is this: "Don't wait until you see a safety representative to report a problem. Notify your supervisor or the Safety Office to get it corrected now."

Another alternative is a Navy, Military and Civilian Report of Unsafe or Unhealthful Practice or Condition, NRMCO 5101/4, available in boxes in hallways throughout Building 500 and most of the outlying buildings. This form is also available in Operating Management and the Safety Office.

Don't wait for a mishap to happen before getting a problem corrected. Safety is everybody's business.—Connie Watkins

Prevent fire from casting spell over plans for Halloween fun

Don't let fire "bewitch" your children this Halloween.

This warning comes from the head of the National Fire Protection Association (NFPA) as families get busy with costumes and decorations in anticipation of the youngsters' fun Oct. 31.

"One of the great dangers lurking about for the trick-or-treat set is the hazard of fire," according to President Charles S. Morgan of NFPA, the national center of fire safety information. "Far more scary than any monster or ghostly figure is the possibility of

flaming clothing and furnishings," he points out.

Here are four life-saving suggestions from NFPA for parents to keep in mind while planning for Halloween:

- Home-made costumes should avoid flimsy materials and the yards and yards of old sheeting popularly used for witch and ghost disguises. A touch of flame could start a fire in such billowing skirts and sleeves. Also beware of paper-bag masks and costumes made of paper—although economical, they too can ignite in an instant.

A time to remember...

November 11

Veterans Day

- Ready-made costumes, masks, wigs and beards should be labeled "flameproof." Do not buy any Halloween items not so marked.

- Use flashlights—never lighted candles—to illuminate the faces of pumpkins being carried about. If candles are used in jack-o-lanterns on display, be careful to place pumpkins

where they can't set fire to curtains or other decorations and where they can't be tipped.

- Be extremely careful with the tinder-dry cornstalks and other harvest-season decorations. Don't place them near fireplaces or other sources of heat, and don't let them block doorways or stairs.

Retired secretary sends thanks

Thank you very much for making my retirement day such a memorable one. Thank you, Sara Lou Knight, Marge Lesage, and the committee for the perfect luncheon. I appreciated the tributes from Admirals Elliott and Lonergan, Captains Sears and Strom and Phil Harkov—and the letters and telegram from the six Directors of Clinical Services, plus the plaques (including the one from the EEO Officer.)

In my short farewell speech I forgot to say the two most important things, which are:

- With mixed emotions I depart today for the next chapter in my life, and,
- It was a privilege working with all you lovely people at Oak Knoll.

Thank you also for the "ship's wheel." I'll cherish it all my life.

Mary Takai

A bereaved family's appreciation

Thank you, friends and former shipmates, for your kind letters, cards and other expressions of sympathy on the recent loss of our son Joe.

His sudden death was a tremendous shock to us, but we would like you to know that we are gradually accepting and coping. Your friendship has helped considerably during this trying time.

CDR and Mrs. Bruce Panas and family
San Diego

QA study now conducted here leads to research publication

A quality assurance research article co-authored by Navy Medical Corps officers, LCDR James K. Schmitt, CDR Joel R. Poole and CAPT Stephen B. Lewis, will be published in the November issue of the prestigious journal *Metabolism*, it has been learned.

The paper is entitled "LDL-HDL Cholesterol Correlates with Hemoglobin A1 in Normal Weight Type II Diabetics."

Diabetics have two to three times the incidence of cardiac-related death as non-diabetics, and it has been postulated that this increase in risk is due to lipid abnormalities. Because the relationship between diabetic control and cholesterol level has not been established, medical quality assurance standards for what levels of diabetic

control are acceptable have not been ascertained.

Using a computerized data base, Drs. Schmitt, Poole and Lewis correlated hemoglobin A1 (an index of long term diabetic control) with the level of cholesterol and cholesterol fractions in 50 diabetics. They found a definite correlation between strictness of diabetic control and cholesterol levels, especially in women. These results suggest that improvement of diabetic control may decrease long term cardiac mortality.

These local investigators are now attempting to determine at what level of diabetic control maximum benefits to cardiovascular risk are achieved. Using such data, future medical quality assurance standards may define the acceptable level of diabetic control.

Civilians may still enroll in FEGLI

You may still have an opportunity to enroll in the Federal Employees' Group Life Insurance (FEGLI) Program or increase the coverage you already have.

If it has been a year or more since you have waived basic insurance or one of the forms of optional coverage, you are under the age of 50 and you can furnish proof of medical insurability, you can sign up for FEGLI or increase your existing coverage. This may be done by obtaining a copy of SF2822 from the Civilian Personnel Office.

If you have married or had a child within the last 60 days you may be eligible to increase or add to your FEGLI coverage. Under Option B you can

enroll or increase your coverage without medical examination if you are under 36 years of age. If you are over 36 but under 50, you can increase your coverage if you already have at least some Option B coverage. This may also be done without a medical examination.

If you do not already have Option B coverage, and you are under age 50, you can enroll if it has been a year since you last waived coverage and you furnish, at your own expense, satisfactory evidence of insurability.

You can enroll in Option C regardless of your age. For further information as to eligibility rules call the Civilian Personnel Office at Ext. 2116.

New drug penalties instituted

President Reagan has approved several amendments to the Manual for Courts-Martial (MCM), which provide a comprehensive and uniform system of definitions and punishments for combat drug offenses in the military. The changes became effective Oct. 1.

The amendments reduce the former reliance on Navy, Army and Air Force regulations in the prosecution of drug offenses by expanding their treatment in the MCM. This is expected to result in more uniform treatment of offenders in the different military services. In addition, the proposals

increase penalties for some types of offenses, providing a greater deterrence to potential drug abusers.

The changes replace the former Universal Code of Military Justice (UCMJ) prohibitions against wrongful use, possession or transfer of marijuana or habit-forming drugs (and the respective maximum sentences of five or ten years' confinement at hard labor) with several new classes of offenses.

The offenses and their maximum punishments are:

- Illegal use, possession, manufacture or introduction of drugs—five years' confinement, total forfeiture of all pay and allowances, reduction to the lowest paygrade and dishonorable discharge.

- Distribution, or possession, manufacture or introduction with the intent to distribute drugs—15 years' confinement, total forfeiture of all pay and allowances, reduction to the lowest paygrade and dishonorable discharge.

- If the use, possession, distribution, etc., occurs while onboard a ship or aircraft, on watch, in a hostile fire pay zone or in time of war, the punishment can be increased by an additional five years' confinement and forfeitures.

The exact language of the new changes to the UCMJ is contained in NAVOP 130/82 of Oct. 13.

FY82 SRB announced

New Selective Reenlistment Bonus (SRB) award levels, which become effective Nov. 1, were announced by NAVOP on Oct. 1. The NAVOP grants authority to execute all SRB reenlistments which were approved "for planning purposes" under the provisions of NAVOP and allows personnel who

HOW IT'S DONE—Lieutenant Commander David M. Kouns of the Drug Screening Laboratory, explains the processing of urine samples to Assistant Secretary of the Navy John Herrington, who visited Naval Regional Medical Center Oakland on Oct. 14.

WARD VISIT—In a walking tour of the hospital during his visit here, Assistant Secretary of the Navy John Herrington dropped by to chat with active duty patients in the orthopedics wards.

★★★★ New VHA in effect ★★★★★

New FY-1983 Variable Housing Allowance rates, based on April 1982 surveys showing a 9.6 percent average increase in housing costs for servicemembers, became effective Oct. 1.

Most VHA rates showed substantial increases, but a few housing areas declined slightly. These cases were thoroughly investigated to ensure that

new rates accurately reflect the housing market costs in those areas. VHA continues to be a major compensation improvement which reimburses members more fairly for off-base housing costs.

Navy members should begin receiving new VHA rates on the Nov. 15 payday retroactive to Oct. 1, 1982.

MAKING IT OFFICIAL—Rear Admiral Robert C. Elliott, Commanding Officer, NRMC Oakland, signs the renewal of a three-year agreement between management and the International Brotherhood of Electrical Workers. Among those witnessing are (clockwise): James Crayton, Chief Steward at the Medical Center and Vice President of the local; Herbert Lindemann, Chief of Civilian Personnel Service; LCDR Pat Shannon, Assistant Director of Administrative Services; Donald Week, President and Business Manager of the local, and Frederick L. Jensen, Chief Negotiator for the union.

**Robert Crecca
M.D.**

Our branch activities

Treasure Island clinic in beautiful location

The Branch Medical Clinic at Naval Station, Treasure Island, is located on perhaps the most scenic real estate owned by the Navy today.

Treasure Island is the largest man-made island in the world, approximately 403 acres, and was created in a 14 month period, beginning in November 1937 to serve as the site for the 1939-40 Golden Gate International Exposition. The island rests on the shoals of Yerba Buena Island, a natural island that was covered with tons of rock and silt dredged from the San Francisco Bay. Much of the silt had washed into the bay during the California Gold Rush which helps to explain the name "Treasure Island."

The island was leased to the Navy early in 1941. After World War II, San Francisco traded the deed to the island for government land, south of the city, which is now San Francisco International Airport. The medical department first occupied the current Medical Clinic Building in October 1947.

Since then, the clinic has operated in several capacities, including command status as the Navy Regional Medical Clinic, Naval Support Activity, Treasure Island, San Francisco, California. In September 1977 the facility was decommissioned and redesignated as the Naval Support Activity Branch Clinic, Treasure Island, a clinic of the Naval Regional Medical Center, Oakland, California. The Commanding Officer billet was deleted and redesignated as Officer in Charge. In September 1980 the Naval Support Activity, Treasure Island was redesignated as Naval Station, Treasure Island, and the clinic continues to medically support that activity; more than 30 host activities; the family housing areas located on Treasure Island and Yerba Buena Island; the Hunters Point Naval Shipyard facility; and a Branch Medical Clinic located at the Naval Supply Center, Oakland. In total, Branch Clinic, Treasure Island, serves a potential beneficiary community in excess of 15,000.

The clinic also offers 24-hour emergency ambulance service with two ambulances and an after-hours duty crew. The clinic is authorized 33 hospital corpsmen billets, four civilian clerical positions, five general medical officers, one pharmacy officer, one optometrist, one pediatrician, one psychiatrist, one clinical psychologist, one Navy Nurse Corps officer, two physician assistants, and the Officer in Charge. The clinic is currently staffed at the 85 percent manning level.

The Branch Medical Clinic Naval Supply Center is authorized one civilian

THE GANG'S ALL HERE—Staff of the NRMC Branch Clinic at Treasure Island pose at the entrance for a group shot. (Photo by David Sims)

physician, one industrial health nurse, eight civilian health technicians, and two clerical personnel.

In addition to routine outpatient services and immunizations, the Treasure Island Branch Clinic provides a number of other services to its beneficiaries. The Pediatric Department provides routine outpatient pediatric medical care, school physicals, and immunizations for children who are 18 years of age and under. The Psychiatric Department provides psychotherapy, counseling, and psychological testing. The Optometry Department provides all types of eye examinations and treatment of routine eye disorders. The Physical Therapy Department provides therapy as prescribed by medical officers such as exercise, whirlpool, heat, and mechanical treatments under the guidance of a physical therapy technician. The Preventive Medicine Section routinely inspects and reports on the sanitation conditions of all facilities on the island. All of the clinical facilities are supported by inhouse laboratory, x-ray, and pharmacy services.

Naval Station Treasure Island is a major Naval transient facility processing approximately 2,000 transient per-

sonnel per month for assignments, separations, legal hold, discipline, and a medical holding company which normally has an average daily count of 80 personnel. In support of these facilities

the clinic performs an average of 40 physical examinations monthly. During the last project upgrade the daily average for separation physicals exceeded 60 per day. In addition, the clinic supports the Navy Brig, Treasure Island which normally operates with a daily population of 150. The clinic conducts pre-confinement physicals on prisoners, holds daily sick call, and maintains a medical office in the brig.

The Branch Clinic also offers some unique services which support the mission of the Naval Station and tenant activities. Qualified instructors provide CPR and basic first aid classes for non-medically trained personnel on the island. The clinic offers a behavior weight control program for all eligible beneficiaries and is developing a smoking program to be offered in the future. The Optometry Department provides screening exams for High Technician A School students who are exposed to potential arc welding injuries.

The future for the Branch Medical Clinic shows a potential for growth and expansion. In the fall of 1982 Naval Station Treasure Island will open a Correction Custody Unit, and plans are being developed for a new 300-man brig facility, expanded family housing area, and the homeporting of ships to the island. The Naval Technical Training Center is expanding its facilities and expects to reach a student population of 500 students. As the island community grows, so will the functions of the clinic.

Command Line

(This column permits direct access to command executives by either military or civilian staff members of any grade, rate or rank. Questions on matters impacting the medical center operations as a whole, reports of incidents of abuse or fraud, or items of concern to large numbers of the staff are invited. Please also submit recom-

mendations and report positive information of interest to all of us. Submit comments in any legible written form to the Public Affairs Office for routing. You may remain unidentified if you so wish.)

Small offices 'contracted-out?'

COMMENT: There are numerous rumors in the hospital since the word came out about Food Service, Housekeeping and the Laundry. There is one that strikes terror in our hearts. We hear that every office or service in the hospital with six or less employees will be contracted out. Could you please tell us what is happening?

REPLY: The rumor is INCORRECT. "Contracting Out" of hospital functions is the end result of studies accomplished under the Department of Defense Commercial Activities Program. To date, only Housekeeping, Laundry and Food Service have been announced under the program. This means that a study and a cost comparison must be accomplished to determine which (in-house vs. contract) is less costly to the government. Studies of the above functions are in various states of completion and the decision to contract out or not rests with the competitiveness of our costs to several vendors.

Although NRMC Oakland anticipates involvement in other Commercial Activities

studies this year, no other functions here (of more than 100 such functions) have been announced at this time. Selecting areas for study is accomplished by high authority and approved by Congress.

Why no commissary?

COMMENT: Why can't we have at least a small commissary on this base? Alameda, Treasure Island, Moffett Field are really inconvenient to use, so consequently many of us end up paying the prices in the civilian community. I believe you can save money shopping in the commissary but not if you have to drive miles to get there.

REPLY: Commissary stores are generally located in areas where there is a heavy concentration of military personnel, or in remote areas where there is a less dense military population but where access to items carried in commissary stores might be

(Continued to page 6)

DST SQUARED AWAY—HM3 Selwyn Cave (left) of Psychiatry Service, and HM2 Robin Guzzo, Cardiopulmonary Lab, were singled out as the most "squared away" sailors at a recent inspection. Rear Admiral Robert C. Elliott announces their selection at the microphone while Command Master Chief Charles Dackerman looks on. The two corpsmen honored were granted a 72-hour mid-week liberty as a reward. One member from each of two enlisted platoons will be selected at each inspection.

Battleship needs old salts

An official call has gone out to selected and Fleet Reservists to come aboard the soon-to-be reactivated battleship IOWA (BB61) for a two-year tour of active sea duty beginning late in 1983.

Applications for active duty may be made as early as now, with a reporting date to the Fleet Training Center, Norfolk, Va., in November 1983.

The number one need on IOWA is gunner's mates who are familiar with the ship's big 16-inchers. Fire control technicians with MK-37 GFSC experience also are in critical need.

IOWA needs 24 other ratings. They are BM, BT, DK, DT, EM, ET, EW, HM, IC, MA, ML, MM, MR, MS, NC, OS, QM, RM, SM, SK, SH and YN.

Otherwise qualified Selected Reservists may serve aboard IOWA as long as their two-year tour of duty expires before age 60.

Applications will be accepted in five time groups—nucleus I, nucleus II, balance crew.

Reserve applications for nucleus I

will be accepted Oct. 10 through Dec. 31, 1982. Selections will be made in April 1983. Those selected will report to Norfolk on Nov. 1, 1983, and aboard ship on Jan. 1, 1984.

Applications for nucleus II will be accepted from Jan. 1 through March 31, 1983. Selection will be made in June 1983. Those selected will report to Norfolk Jan. 1, 1984 and aboard ship March 1, 1984.

Balance crew applications must be received between May 1 and July 31, 1983. Selections will be made in November and those chosen will report to Norfolk July 1, 1984 and aboard ship Sept. 1, 1984.

Applications not accepted in the first increments will automatically be retained for the next increment unless otherwise indicated on the application.

Applications should be mailed to: Commander, Naval Military Personnel Command (NMPC-21), Navy Department, Washington, D.C. 20370. The envelope should be clearly marked "Iowa Recall."

7 WEEK PARTICIPATION—Naval Regional Medical Center Oakland was represented at the Embarcadero in San Francisco during recent Fleet Week ship houses. Volunteers from the medical center were there to answer questions, take blood pressure and demonstrate cardiopulmonary resuscitation for visiting public. Here two active duty men from one of the visiting ships stop to have blood pressures taken by Hospitalman Robert Arrowsmith and Nurse Lieutenant Commander Suzanne Norton.

DT3 Williamson is top sailor

Dental Technician Third Class Betty A. Williamson has been selected as Naval Regional Medical Center Oakland's Sailor of the Month (for September).

Petty Officer Williamson has served as the Preventive Dentistry Technician, the Oral Diagnosis/Endodontic Branch Technician, and the contact point for Dental Service at the main reception desk since her arrival to this command in November 1981. She has also been Dental Service's Energy Conservation Monitor.

According to Captain G. W. Oatis, Jr., Chief of Dental, Betty has accepted and accomplished each of her duties in a responsive, forthright and proficient manner, and has proven time after time that she can be relied upon to perform any function and continue to produce the desired results. Her superior officer also notes that her appearance is always impeccable, that she is courteous yet sincere, and has concern for her shipmates and patients.

Petty Officer Williamson is the daughter of Mrs. Wanda Williamson of Akron, Ohio. She attended college for one year before entering the Navy five years ago. Her career goal is to become a dental hygienist.

The trim, attractive technician is also a sports enthusiast, having played on

DT3 Betty A. Williamson

the All-Navy Softball and Basketball teams.

Her previous assignments in the Navy, in addition to Dental Technician 'A' School, have been in Naples, Italy, and at Bethesda, Md.

She has also completed contact point management training.

Retiring nurse honored today

CDR Joan Tulich

Ceremonies are being held this morning in honor of Commander Joan S. Tulich, Quality Assurance coordina-

tor for Nursing Service, who will retire Oct. 31 after 20 years active duty in the Navy.

"I've been looking forward to this day," she said. "I have no immediate plans—just get up and do whatever I feel like doing."

The Massachusetts native is a graduate of Boston College and the Catherine Laboure School of Nursing.

In addition to Oakland, her Navy career has taken her to the hospital in San Diego twice, and to Kodiak, Alaska; Groton, Conn.; Lemoore, Guam, and aboard the USS SANCTUARY (AH-17).

She holds the National Defense, Republic of Vietnam Campaign, Vietnam Service Medal, and the Vietnam Armed Forces Honor Medal First Class.

Married to Lieutenant Commander Eugene N. Tulich of the Coast Guard, she lives in Danville and says her new job will be "housewife."

The Navy nurse enjoys travel and is a fan of all New England's sport teams.

Joe Panas dies in vehicle crash

Joseph Allen Panas, 19, son of CDR and Mrs. Bruce Panas, was killed in a motor vehicle accident in the San Diego area on Oct. 11.

CDR Panas, formerly Chief of Food Management Service at Naval Regional Medical Center, Oakland, and his wife Bonnie, and family were active members of the Oak Knoll community during their tenure here. The deceased son was employed part-time at the Officers' Club on base here. After his father's transfer to NRMCC San Diego, he attended college in Southern California and planned to enter the Navy early next year. He was reportedly enroute to class when the fatal accident occurred.

Friends and former shipmates who would like to express sympathy to the family may do so by writing to the residence, 10439 Gurnard Street, San Diego, CA 92124.

Contributions to Ascension Catholic Parish, 5335 La Cuenta Drive, San Diego, 92124, will be accepted in Joe's memory.

Chemist sought

Applications are being received by Civilian Personnel Service for a Chemist (GS-1320-9) in the Drug Screening Branch.

Those applying must be Career or Career Conditional employees. Nationwide consideration is given but relocation expenses will not be paid by this command.

Duties of this job include, among others, testing in support of the DoD Drug Abuse Prevention Program by performing a variety of qualitative and semi-quantitative analytical procedures to detect drug levels in urine specimens.

The requirements for the job are—a four-year degree or higher in one of the physical or life sciences, or engineering, which included 30 semester hours of chemistry, at least six semester hours of physics, and mathematics through differential and integral calculus.

Interested applicants should submit a complete and current SF-171, Supervisory Appraisal, and a Supplemental Experience Statement to the Naval Regional Medical Center, Civilian Personnel Service, 8750 Mountain Blvd., Oakland, Calif. 94627, or call Christine Lessler at (415) 639-2116.

'TEN-SHUN!—The Commanding Officer reviews one of the enlisted platoons at a recent command inspection.

OFFICER REVIEW—Captain H. James T. Sears inspects the officer ranks conformance with Navy uniform and grooming standards.

Kudos.....

NAVY COMMENDATION MEDAL

LCDR Michael J. Little, Medical Corps.

LT Becky Simpkins, Nursing Service.

HN Gerald Moreno, ARS.

HN Jerry Guzman, X-Ray School.

HN Jessica Harris, Operating Room.

ENS Vincent Basile, Nursing Service.

Don't take 'sniffer' on trip to Japan

Travelers to Japan could unknowingly violate Japanese drug laws if they carry certain commercial brand inhalers.

An American citizen was detained by Japanese authorities on Okinawa recently because he was carrying with him a Vicks inhaler, according to Kadena AB Staff Judge Advocate. Vicks brand inhalers contain desoxyephedrine, a drug outlawed by the Japanese government. Use of the product in that country could lead to prosecution by Japanese officials even though charges were dropped in the Okinawa case.

Travelers to Japan and others who may be changing duty stations and stopping in Japan, are advised to insure they do not carry nasal inhalers containing desoxyephedrine into the country.

Although the Okinawa case involved a Vicks inhaler, other brands also contain the prohibited substance.

Inhalers were withdrawn in July from Army and Air Force Exchange Service (AAFES) exchanges in Japan. Other decongestants that do not contain the banned drug are still stocked by the exchanges.

Authorities noted that the unlawful inhalers could inadvertently be brought into Japan from bases in the U.S. Other places where purchase of the inhaler is legal.

Spending a few seconds before leaving for Japan to check purse pockets, carry-on baggage and luggage for inhalers could avoid unfortunate encounters with Japanese authorities and facilitate entry to the country.

CHAMPUS change

The Undersecretary of Defense has informed the Navy that "Continuity of Care" will not be accepted by CHAMPUS fiscal intermediaries as a reason for issuing a non-availability statement. This policy became effective Oct. 1, 1982.

CHAMPUS information is available from the CHAMPUS Office located on the second deck, Bldg. 500, off the rear lobby.

LOVING CARE—Nurse Corps Lieutenant Susan Kowalski lets us know that the Intensive Care Unit staff is all heart as she models a "deebopper" with a couple of the love symbols sprouting from her head.

Wilson back in Navy

HM2 Thomas Malcolm Wilson, a former member of this command, has reenlisted after being separated from the naval service.

He reenlisted at the Navy Recruiting District San Francisco on Sept. 9 and was transferred to RTC San Diego, Calif., for outfitting and further assignment.

Command Line-- (Continued from page 4)

limited or totally unavailable. In this area there are stores at Alameda, Treasure Island, Mare Island, Stockton, Moffett Field, Hamilton, Travis, Oakland Army Base and the Presidio. The Alameda store is 11 miles away and serves the population residing in NRMCO. Commissary store managers in this area are constantly trying to make things more convenient for their patrons, while staying within the budgetary constraints under which we all must operate. As an example, the Alameda store now stays open until 7 p.m. two days a week and has installed automated checkout equipment to speed up the checkout process. You may rest assured that everything possible is being done to accommodate the commissary store patron.

COPY CONVERSATION—Captain Arthur Osborne (left), Commanding Officer, Presque Isle Naval Station, enjoys a laugh with Rear Admiral Leroy V. Issac, Commanding Officer, Region 20, Reserve Readiness Command.

IDENT ENTERTAINMENT—Navy Band, San Francisco, musicians entertained Navy League party goers in the courtyard of the Oak Knoll Officers' Club.

BEST RESERVISTS—The Oakland Council of Navy League honored the outstanding reservists of the year from the maritime services in a dinner at the Oak Knoll Officers' Club on Oct. 14. Honorees (showing their gifts of gold watches) are, l to r: Yeoman Second Class Roman Becerra, USNR; Sergeant Ronnie N. Krites, USMCR, and Electrician's Mate Second Class Donald R. Harris, USCGR. Standing at right are Assistant Secretary of the Navy John Herrington and Rear Admiral Robert C. Elliott, NRMC Oakland Commanding Officer.

SOCIALIZING—Clockwise, Mrs. Arthur Osborne, Mrs. Kaune, James E. "Ed" Kaune (General Manager, Todd Shipyards) and Mrs. Jo Mockabee (National Director of the Navy League) enjoy each other's company at the reception preceding the awards dinner.

SN to the rescue of Scots in distress in three separate Edinburgh incidents

Scottish-American relations were strained considerably during a port call to Edinburgh, Scotland, by the folk-based aircraft carrier USS AMERICA (CV 66), when seven members provided aid to citizens in distress.

In the morning of Sept. 17, as they were returning to their hotel from a meal, three officers of Fighter Squadron 33 embarked in AMERICA noticed a woman lying on the 18-inch ledge of a bridge spanning a downtown railway station. As the group approached they realized that the woman, sobbing uncontrollably, was about to jump from the 60-foot bridge to the tracks below. Engaging her in conversation, the officers found she was despondent about her boyfriend being away at sea. LT "Wally" Guilford continued to

edge closer until he could grasp the woman and prevent her from jumping over the edge. LT Bob Van Wert and LT Paul Miles meanwhile kept the gathering crowd away and awaited the arrival of police, summoned by a nearby taxi driver.

Edinburgh Chief Constable Sir John Orr, in a letter to AMERICA's Commanding Officer, CAPT Denis T. Schwaab, stated that LCDR Guilford had put his own life in jeopardy and his conduct reflected great credit on the U. S. Navy.

Later that day, ATAN David G. Carter, assigned to ocean-based Fighter Squadron 33, was enjoying his liberty when he heard a woman cry for help. The 72-year-old woman told Carter that a man had snatched her purse and pointed the man out. Carter pursued the man for two-and-one-half blocks before overtaking him. Carter then tackled the man and brought him under control. The woman identified her assailant at a local police station, where he was arrested.

The third incident, also on Sept. 17, occurred as three petty officers with Helicopter Antisubmarine Warfare Squadron 11 in AMERICA, were sightseeing in Edinburgh.

AD1 Ronald J. Berry, AD1 Paul L. Cleveland and AD2 John W. Kozemcsak were touring the city when they saw a woman collapse on the street. The sailors quickly ran to the woman, checked for a pulse and found none. Working together, the trio administered cardiopulmonary resuscitation (CPR). After several minutes, the woman resumed breathing normally. At approximately the same

time, the police and an ambulance arrived and rushed the woman to a hospital.

According to reports received by AMERICA from Royal Navy Headquarters,

the woman had suffered a heart attack and the men's action "saved her life." The Royal Navy report commended the men for their quick response.

Psychiatry to offer group treatments

In a continuing effort to be more responsive to the needs of this hospital and the military community it serves, the Psychiatry Outpatient Clinic is beginning group treatment programs for weight-reduction, smoking cessation, and stress reduction. One group in each problem area is scheduled to begin the first week of November. Additional groups may be started later depending on demand, staff availability and how successful the first groups are. Space is presently available in all groups. If it becomes limited in the future, however, priority for treatment will be given to active duty personnel and to eligible beneficiaries with medical problems requiring changes in behavior or lifestyle.

Present plans are for each group to meet once weekly for 1 to 1½ hour sessions depending on the problem area. The focus in all groups will be on making desired changes. Participants will be given educational background information, numerous suggestions for behavior change, and assistance in exploring and overcoming obstacles to success. Suggestions and emotional support from other group members are expected to contribute significantly to success.

The weight-reduction group is a collaborative effort between Outpatient

Psychiatry and the Dietician, LT Faythe Weber, and is available as a support group for active duty personnel on required weight control programs. Each session will be preceded by the weekly weigh-in. New members will be accepted into the weight-reduction group at any time, space permitting, while the stop-smoking group will accept new members only at the first meeting of each month.

Outpatient Psychiatry continues to offer Coping Skills groups and a marital growth group. The goal of these groups is to deal effectively with developing personal, work, or marital problems before they cause serious personal or professional damage.

Outpatient Psychiatry welcomes suggestions or inquiries concerning other possible services. A brief assertiveness training program may be started soon in response to such expressions of interest. Other possibilities include support groups for particularly stressed groups of staff members, patients, or their families, and in-service training presentations by psychiatry staff.

To obtain further information on any current services or to make suggestions for additional services please call Ext. 2187 or 2387.

The following additions to the medical "family" have arrived at Oak Knoll:

A baby girl to Hospital Corpsman Second Class Manuel E. Naguit, Pharmacy Service, and his wife Linda, Oct. 12.

A baby boy to Hospital Corpsman Second Class Jose S. Gaerlan, USS ALBATROSS (CV 43), and his wife Linda, Oct. 12.

Additional bus for Reno trip

The Special Services-sponsored trip to the Reno/MGM Grand on Nov. 19-21 now has plenty of space since an additional bus has been added. If you're interested in going, contact Sally at Special Services no later than Monday, Nov. 1, at 639-2479.

The buses will leave Oak Knoll on Friday, Nov. 19 about 4:15 p.m. and return on Sunday evening at 6 p.m. The package includes accommodations at the MGM Grand Hotel, a ticket to "Hello, Hollywood, Hello," two drinks at the show, a trip to downtown Reno, and casino bonuses.

Special Services offers discounts

With the purchase of one ticket from Special Services to Marriott's Great America, you may receive one free admission to the park's special "Halloween Fright Night," good Oct. 29, 30 or 31.

The amusement park, offering many attractions, is located in Santa Clara.

...

Also available from Sally Young in Special Services (Bldg. 38 upstairs) are San Francisco Bay Area Military/DoD Civilian Employee Discount Coupon Books for \$3.50 each.

The books feature 54 pages of bargains.

Bargain passport to Disneyland park

A Passport to Disneyland for \$9 per person is being offered to all military personnel, their families and friends, Nov. 3-Feb. 27 (excluding Dec. 25 and Jan. 1). This price includes admission and unlimited use of attractions (except shooting galleries).

Many of the attractions will be closed during the Military Salute as in most winter seasons. It is the time of the year that Disneyland refurbishes

NRMCO second in cross-country

Naval Regional Medical Center Oakland's cross-country team placed second to Mare Island in the recent Central Pacific Regional championships.

Manuel Hernandez lead the finishers from the command and was third overall, while Susan Colligan was the first woman finisher.

Other runners from the command were Osborne Watkins, Vito Almaraz, Gary Smith, Casey Bartor, Joe Grant and Tom Dresser.

\$800 for \$10

Two-for-one gift certificate coupons worth up to \$800 may be purchased from USO for only \$10. Of this \$10-\$3.33 goes to the USO and \$3.34 goes to Save the Cable Car Fund. So besides the fun, you are also making a worthy contribution.

The coupons for restaurants, entertainment, and sightseeing are to great places like Yet Wha, Hog Heaven, Benihana's, Bill's Place, Great Electric, McDonald's, Wienerschnitzel, the ballet, Morrison Planetarium, Wax Museum, S. F. Zoo, and rides on and over the bay. There are 79 coupons in all.

This offer is good thru Jan. 1, 1983 and the coupons expire Sept. 30, 1983. Order as many as you like by sending a \$10 check for each one to Bay Area USO, Naval Station, T. I., San Francisco, CA 94130, or stop by at the USO in San Francisco at 1107 Mission or the Oakland or S. F. Airports.

and repairs. So for specific information about attractions and their status call (714) 999-4565 or (213) 626-8605, Ext. 4565.

To purchase tickets, see Sally at Special Services.

Variety talent contest soon

Local Thespians, here is your chance! Put on your tap shoes, tune those instruments, practice those high notes, paint your faces and masks, and start sewing your wardrobes because November 16 could be your day.

The Central Pacific Regional Talent Contest will be held that date on Treasure Island at the Base Theater, Bldg. 401. All active duty personnel of the Navy, Marine Corps, and Coast Guard, as well as other branches of the service with personnel assigned to Naval Commands within the Central Pacific Region, may participate.

Acts may include drama, singing, dancing, music, comedy, interpretations, and whatever. An act may consist of individuals or groups of up to five people. The performance must not exceed six minutes and the Navy Band

San Francisco Combo will provide musical accompaniment if required.

For more information and applications call DTCS Joe Brown, Ext. 2255, before November 1.

Caldwell returns

'Home is the sailor, home from the sea'

THE 'ARUANA'—LCDR Craig Caldwell's 31-foot sloop "Aruana" weathered the nine-day journey up coast without difficulty.

Medical Service Corps Lieutenant Commander Craig R. Caldwell has returned to the Oakland medical region after a three-year absence and has been assigned to the Drug Screening Laboratory as its administrative officer. That's only half the story. . . The other half is the unconventional way he traveled from his former duty

as the Force Medical Administrative Officer for COMNAVAIRPAC in San Diego to his new assignment in the San Francisco Bay Area. In appropriate Navy fashion, he sailed. . . in his own boat. . . with a crew of two other MSC officers from this command. . . over a nine-day period, stopping to fish occasionally and pulling into shore four times. The trio enjoyed beautiful sunsets and following seas most of the time, but ran into some tricky winds and choppy waters off Pt. Conception while enroute aboard Caldwell's 31-foot sloop, "Aruana."

Caldwell, Commander Jack Bartlett and Lieutenant Ken Hutton (both of Lemoore Naval Hospital) completed the journey from San Diego to Treasure Island with stops along the way at Catalina Island, the Channel Islands Harbor, Anacapa Island, and Morro Bay. They made some outstanding catches of Bonita (a type of tuna), and observed killer whales, porpoises and seals at play over the route up the coast. "It was beautiful," remarked LCDR Caldwell, as he produced an assortment of color photographs supporting this statement.

When he was attached to this medical region from 1976 to 1979, he was Officer in Charge of our branch clinic at Naval Weapons Station, Concord. After he left Concord he served for a period of about one year as an A School officer of the Naval School of Health Sciences, transferring to COMNAVAIRPAC staff in July 1980.

REACHING HOMEPORT—"Skipper" Caldwell (at helm), flanked by crewmembers Ken Hutton (left) and Jack Bartlett, arrive near their final destination of Treasure Island with "Old Glory" and the Bay Bridge seeming to wave them on.

JCAH visit postponed

The anticipated Joint Commission for Accreditation of Hospitals (JCAH) visit, previously scheduled for Nov. 15, has been postponed, it has been announced.

According to Captain H. James T. Sears, Director of Clinical Services, the visit may now be expected shortly after

the first of the year.

Both Rear Admiral Robert C. Elliott, Commanding Officer, and Captain Sears urge that staff members keep up the momentum in full compliance with quality assurance standards in both direct patient care and record keeping.

THANKSGIVING

November 25

Turkey, pumpkin pie and football games usually occupy our thoughts on the traditional American Thanksgiving Day holiday. The feasts, family gatherings and entertainment are much fun. However, we sometimes neglect to give the true meaning of the holiday much serious thought. Let us all take just a few moments to recognize our day-to-day blessings.

As I personally prepare to spend my first Thanksgiving Day in California, I give thanks, as I have in the past, for the gifts of a wonderful family, fine friends and good health. This year I have reason to give special thanks. . . and that is for the privilege of being Commanding Officer of this medical region and its approximately 2,100 staff members. You are the most dedicated and professionally competent group of people with whom I have worked. We have made much progress in a number of areas over the past four months, and I feel that you truly share with me the desire to make NRMC Oakland the most outstanding medical region in the United States Navy.

I offer my heartfelt thanks for your support and wish you and your loved ones a most enjoyable Thanksgiving Day with an added bounty of good health, happiness and prosperity.

R.C. ELLIOTT

Rear Admiral, Medical Corps, U.S. Navy
Commanding Officer

Patience requested with construction projects scheduled to begin here soon

Seven construction contracts have recently been awarded by Western Division, Naval Facilities Engineering Command to accomplish various repairs at Naval Regional Medical Center, Oakland. Projects are:

- Repairs to UEPH, Building 69, awarded to W.B. Coast, Inc. of Pleasanton for \$77,997. This project will provide improved lighting, a new suspended ceiling, and new carpeting in this building.

- Implement Traffic Engineering Study and Road Repairs, Phase I, was awarded to Sarott Construction Company of Pleasant Hill for \$141,000. This project will repair and repave some roads on the base and will restripe roads and install traffic signs at

numerous locations. .

- Parking Lot Repairs and Erosion Control and Sidewalk Repairs awarded to Bay Cities Paving and Grading, Inc., of Richmond, for \$124,027. This project will repair and repave selected parking lots and will repair the sidewalk and provide erosion control adjacent to Building 501.

- Repairs to UEPH, Building 73, awarded to Eagle Electric Co., San Jose for \$179,288. This project will renovate areas in Wings A and B to provide additional UEPH berthing space.

- TRIMIS Computer Installation, Phase 2, was awarded to E.C.&S. Corporation of Isleton for \$112,153. This

FEATURED—The branch clinic at Naval Weapons Station, Concord is featured on Page 4 of this issue as part of our continuing series on NRMC Oakland's outlying facilities.

Editorial---

Our patients write...

...I would be most ungrateful if I did not acknowledge the kindness and help that was given to me and my children by the hospital while my husband was a patient there.

There is no doubt in my mind that every effort was made to provide the best medical care for him. I also know that every effort was made to help us, his family, to accept what we knew was going to be. The hospital offered all they had... the nurses gave us comfort and strength that we needed so very much, and which we gratefully accepted.

Somehow, thank you doesn't seem to be enough to say at a time like this, but I want you to know it is with deep gratitude and appreciation that I do thank everyone who helped us through a very difficult time.

HARRIET M. NEWMAN
Galt

...

I thank you and your ENT staff, particularly Doctors George Grasel and John Taylor, for their exceptional concern and superior healing service provided me...

Unfortunately, I have been plagued with a recurring problem which even went so far as to necessitate unscheduled visitation to your facility for treatment. In all cases, the coordination and interface between your staff, our flight surgeon and myself have been exceptionally smooth, efficient and professional. Despite the awesome, heavy patient load in your ENT Clinic, those two doctors were spring-loaded to assist me even at the expense of their own personal needs. Throughout my leadership experience, I've found that sense of dedication to be the exception rather than the rule, and certainly deserving of recognition.

I personally chatted with Captain Sears and expressed my gratitude; however, I feel it's even more fitting to communicate my observations and gratitude to you directly. Of course, John Taylor had done most of the work on me since inception of the originating problem in 1980. His concern and professional care last Thursday were just as genuine, efficient and thorough as they were back then.

Again, I thank you and your staff for their attentiveness, dedication and, most especially, for being there when needed and trying to help at all costs. They are truly professional.

ROBERT H. ZANNINI
Colonel, USAF
Castle Air Force Base

...

Last week I was admitted to the hospital for... surgery, and I'd like to thank all of you for the excellent care I received. Dr. Cave, Dr. Frisby, the nurses and corpsmen did everything to make me comfortable, and I am deeply grateful to them. Thank you all and God bless.

JUNE SHANLE
Fresno

...

Thank you and your staff, especially LCDR Lynn O'Neal, MC, USN, of the Ophthalmology staff for improving my vision and for the effective glaucoma controls.

CHARLES P. WOODSON
Captain, USN, Ret.
El Cerrito

...

On Sept. 8, 1982 I entered Oak Knoll Hospital... Dr. Ellison was my doctor. What a "jewel" he is! So very professional! He explained the technique he would use, down to the tiniest detail... told me what to expect before, during and after the surgery.

I have been a very healthy person all my life, so I have to admit before our conversation, I was very apprehensive—but his calm, efficient manner allayed my fears. I am certainly impressed with the fine, capable doctor he proved to be.

Then when I went to Ward 7 North I have never met a nicer, more efficient, "on the ball" group of young people. I wish I could name them all individually, but a blanket coverage will do, for there wasn't a single one that wasn't on their toes continually, from the nurses at the desk to the nice young... man who made the beds, to the attendant who mopped the floor. We in the room agreed they were all specially trained in being extra pleasant, as they were in the ward so frequently, always in the best of humor. They even made the 5 a.m. call easy to take with their cheerful "good morning."

I have had friends at... (three civilian hospitals)... who have bitterly complained about lack of friendliness, so I wanted you to know the fine attention we four in Room 75N received.

I might add my husband heartily concurs with my sentiments, and he is a retired (27 years) lieutenant of the Medical Service Corps.

MARTHA BOONE
San Leandro

...

I was injured while serving in the Air Force and as a result spent a great deal of time in different military and Veterans Administration hospitals. I have received excellent care and some not so excellent in the different facilities.

...From the time I arrived at the (NRMCO) emergency room until I left, I was afforded the most professional, courteous service I have ever received in any hospital. I came away with a really good feeling about your facility, and would not hesitate to drive the extra distance from my home in Vallejo to receive future medical service...

I would like to thank the following individuals for being tops in their professions: Doctors Ford, Dyson and Pacious and Enlisted Personnel Butler and Bertrand.

STEPHEN J. BRANCH
USAF, retired

(More letters, Page 11)

'Billy Ball'

"That's all, ya'll. Why's everybody always pickin on me?
Billy Ball, Billy Ball, have fun ya'll.
You just wait and see,
it'll never be the same—not without me."

Billy Ball, Billy Ball, oh what a great hurt
not to see him kick up the dirt!
What a shame to attend an A's game and to let out
a shout to an empty dugout.

That's all, ya'll, for Billy Ball.
It'll be a sight on a hot summer night
at the Oakland Coliseum not to be able to see—
"Oh why's everybody always pickin on me?"

Oh Billy Ball, Billy Ball, we love you all...
it just won't be the same you see, not for you or me.
Billy Ball, Billy Ball, why'd you go away? Why couldn't you stay?
We love you so... wherever you go.

--Dottie Bau

Oak Leaf to take holiday

The final edition of *Oak Leaf* for calendar year 1982 will be published on Dec. 24, 1982, with copy deadline of Dec. 13 (two days ahead of normal deadline).

The Jan. 7 edition is being suspended to allow the editor her first vacation more than a year.

First issue of 1983 will be on Jan. 28 (copy deadline Jan. 19). Normal biweekly publication will then resume.

Treating the patient with respect

They may all look the same when they're wearing government-issue pajamas... it pays for us to keep in mind that all military patients, active or retired, like to be called by rate or rank.

And so they should. Most of them, regardless of branch of service, have worked long and diligently to achieve a certain grade. Several have been decorated for bravery and may even have been wounded sometime in the past.

When we make a courteous gesture of addressing them as "Senior Chief Smith," "Colonel Andrews," "Sergeant Jones," or "Commander Carlson," we raise our own professional stature. It's a matter of mutual respect, and it goes a long way toward enhancing the image of this medical center and the class of its staff.

NAVAL REGIONAL MEDICAL CENTER OAKLAND, CALIFORNIA

RADM R. C. Elliott, MC, USN
Commanding Officer

CAPT H. James T. Sears, MC, USN, Director of
Clinical Services

CDR C.R. Loar, MSC, USN
Administrative Services

Editor Betty Beck

Editorial Clerk Pat Heaphy

HM2 Larry Marchionda

THE OAK LEAF is published biweekly on Friday, produced commercially with appropriated funds in compliance with NNPR P-35, Rev. Jan. 1974. Deadline for copy is Wednesday noon of the week prior to publication.

Opinions contained herein are not official expressions of the Department of the Navy. THE OAK LEAF receives American Forces Press Service and Navy News material.

Contributions from both staff and patients are welcomed and should be addressed to the Editor of the OAK LEAF, Naval Regional Medical Center, Oakland, CA 94627.

PMT School to graduate 27

Graduation ceremonies for Class No. 9, Preventive Medicine Technician School, will be held in the Clinical Assembly on Wednesday, Nov. 24 at 9 a.m.

The 27 graduates have completed 16 weeks of study which consisted of a combination of on-the-job training and class and field work. Four weeks were spent in the Disease Vector Ecology and Control Center at NAS Alameda.

Those completing the course and their new duty stations are: HM2 Arturo G. Banaag, 3rd FSSG, Okinawa, Japan; HM2 Jon G. Bangs, NRMCCamp Lejeune, N.C.; HM2 Scott D. Cowden, Branch Clinic Sasebo, Japan; HM1 Paul W. Conlin, NNMCBethesda, Md.; HM3 Michael Duran, NRMCCSubic Bay, Philippines; HM1 Nestor M. Feliciano, USS NEW ORLEANS; HM2

Blaise A. Fossum, 3rd FSSG, Okinawa, Japan; HM1 Robert A. Gurney, NAS Glenview, Ill.; HM3 Paul Jackson, NRMCCamp Pendleton; HM3 David C. Killingsworth, NRMCCSubic Bay; HM3 Mitchell L. McNair, USS KITTY HAWK; HM3 Terrell M. Perkins, Branch Clinic, Balston Spa, Scotia, N.Y.; HM3 Thomas J. Petrilak, Naval Hospital Quantico, Va.; HM2 Aurellio B. Picart, 3rd Marine Division, Atsugi, Japan; HM3 Anthony W. Pridemore, NARMC, Pensacola, Fla., and HM3 Garth A. Renaud, NNMCBethesda, Md.

Also, HM1 Michael W. Roach, 1st FSSG Camp Pendleton; HM3 Deborah L. Schafer, NRMCCLong Beach, Calif.; HM1 Jon D. Schnoor, Kodiak, Alaska; HM2 Mark C. Sejeck, USS L.Y. SPEARS; HM2 Joseph F. Sheltry, Branch Clinic Widsbey Island, Wash.; HM2 Daniel L. Shulla, 2nd Marine Division, Camp Lejeune, N.C.; HM3 Pamela Z. Smith-Cronkhite, NRMCCCamp Pendleton; HM3 Lee C. Tandus, NRMCCBeaufort, S.C.; HM3 Julie Ullrich, NRMCCOrlando, Fla.; HM2 Lowell F. Van Etten, NRMCCGreat Lakes, and HM3 Vicki J. Zeller, NRMCCLong Beach.

Interns visit San Diego commands

Thirty-four medical interns from this command visited the San Diego area Oct. 25-29 as part of the BUMED-sponsored Operational Medicine Intern Orientation Visit for 1982.

They flew out of NAS Alameda on Oct. 25, toured the USS CONSTELLATION (CV-64) the following day, visited squadrons, static displays and aviation physiology training units at NAS Miramar on Oct. 27, and submarine diving facilities in San Diego on Oct. 28.

They returned to Oakland on Oct. 30.

General visits

Marine Corps Brigadier General Donald Humphrey, Director of the Council of Naval Personnel Boards, visited NRMCOakland on Oct. 25.

He spent part of his visit conferring with Lieutenant Commander Roy Arkley regarding patient affairs.

Urology seminar here tomorrow

A Bay Area Urology Residents' Seminar will be held all day tomorrow in the Clinical Assembly at this medical center.

Some 48 to 54 representatives of this command, University of California Davis, University of California San Francisco, Stanford University, and Letterman Army Medical Center are expected to attend.

Papers will be presented on laboratory research and clinical investigation case reports and a prize awarded.

The seminar has been held annually for the past nine years to afford urology residents an opportunity to present papers and answer questions from colleagues.

FIRST OF THE SEASON—The first Christmas tree of the 1982 season was a live one with a huge star, red bow, popcorn garlands, tinsel, and sparkling eyes to match the ornaments. The "tree" was Andrea Ford of the Credit Union, all dressed up for Halloween. For other photos, see Page 7.

Construction-- (Continued from Page 1)

project will provide electrical power and air conditioning for the Tri-Service Medical Information System phase supporting Radiology, patient appointment, and uniform chart of accounts functions.

- Upgrade Power ICU/CCU was awarded to Faires Electric, Incorporated of Hawthorne, Nevada, for \$24,483. This project will provide additional power circuits in the ICU and CCU areas.

- Interior Painting, Building 500, was awarded to Elias Pamfilis Painting

of Daly City for \$127,000. This project will paint most areas on floors one through five.

During these construction efforts there will be varying degrees of disruption of normal operations in many areas of the hospital and base. All personnel are requested to be patient with any such inconvenience in order that the repairs may be accomplished as rapidly as possible while minimizing any adverse impacts to normal operations or patient care.

Command Line

This column permits direct access to command executives by either military or civilian staff members of any grade, rate or rank. Questions on matters impacting the medical center operations as a whole, reports of incidents of abuse or fraud, or items of concern to large numbers of the staff are invited. Please also submit recom-

mendations and report positive information of interest to all of us. Submit comments in any legible written form to the Public Affairs Office for routing. You may remain unidentified if you so wish.)

Climbing the chain

COMMENT: If a person is not satisfied with one's own supervisor in terms of effectiveness, may one ever defer to a higher authority in the chain of command? Serious problems presented to the supervisor, both in writing and orally, go met with indifference or simply not acted upon. If it is not possible to circumvent the chain of command, what other possibilities are open?

REPLY: NRMCOakland Instruction 12771.1A, "Administrative grievance; procedures for," provides that an employee may present matters of concern or dissatisfaction to Chiefs of Service and equivalent officials if the employee cannot obtain resolution informally with the immediate supervisor. Where the Chief of Service or equivalent official is personally involved in the events leading to the employee's concern or dissatisfaction, the matter may be referred to the Director of Administrative Services or the Director of Clinical Services, as appropriate. This is not considered circumventing, but rather, following the chain of command.

Reserved parking

COMMENT: May civilian employees use the reserved parking areas near Bldg. 500 when we work overtime or on weekends?

REPLY: This is permissible in nearly all of the parking lots. NRMCOakland Instruction 5560 2D dated June 22, 1982 covers this issue in detail and it is recommended that all personnel familiarize themselves with the policy. One word of caution—pay particular attention to the hours when these lots are open to general staff parking. Illegal parking carries a \$25 fine.)

Two lots near the hospital are reserved 24 hours a day, seven days a week. They are Parking Lot No. 3, reserved exclusively (all five levels) for use of outpatients and visitors, and Parking Lot No. 5, a small area reserved for Chiefs of Service.

For your information and convenience, the instruction covering traffic and parking regulations will be posted on the bulletin board at the Oak Leaf office for a period of 10 days.

Why no automatic teller?

COMMENT: Why doesn't the Credit Union have an automatic teller?

REPLY: The Credit Union will install an automatic 24-hour teller, available for use by Feb. 1, 1983. Exact details of its operation will be available in early January.

Union update

COMMENT: What is the current status of the proposed "white collar" union at NRMCOakland?

REPLY: The command announces that it has reached a new agreement with the American Federal of Government Employees (AFGE) extending its organizing drive throughout the medical region (with the exception of Lemoore Naval Hospital) from Nov. 1, for a period of 45 days. The agreement permits the AFGE organizing representative to contact employees during lunch and break periods between the hours of 6 a.m. to 6 p.m., Monday thru Friday. (Contact may also be made with night shift employees during their lunch and break periods.) Other stipulations are that prior arrangements must be made with the officers in charge of branch clinics before entering those facilities; that AFGE will use only certain designated bulletin boards for promotion of union materials; that organizing efforts will be restricted to GS employees (other than firefighters), and that AFGE representatives will not knowingly permit any employees represented by another union to attend any AFGE organization meeting.

All civilian GS employees who are interested in joining AFGE are free to do so. Conversely, those who don't care to join are under absolutely no pressure or obligation to do so. It is strictly a matter of individual choice.

Our branch activities

NWS Concord—where fox, elk, deer play

HM2 Ramon Yee dispenses medications in the branch clinic pharmacy.

The Naval Regional Medical Center's Branch Clinic at Naval Weapons Station Concord is an active primary care/industrial health clinic providing health

Mrs. Arlene Schaefer doubles as both an optometry and audiology technician.

care and emergency ambulance service to 300 Marines, 180 Navy and 30 Coast Guard active duty personnel, seven ammunition ships homeported in Concord, and primary care to 5,000 other military beneficiaries. It also provides industrial health service to more than 1,100 civilian employees of the station.

Although relatively small, the clinic offers full outpatient services, and in a usual month, statistics show about 1,500 outpatient visits, 2,800 prescriptions filled, and 4,000 lab tests.

It is currently staffed with one each, Navy and civilian physician, two physician's assistants, one registered nurse, one licensed vocational nurse, seven ancillary civilians and nine military personnel.

NWS Concord is the largest and most important military facility on the West Coast for trans-shipment of ammunition and other hazardous cargo. It also provides material and technical support for ammunition, weapons and weapons systems and is the homeport and logistic support agency for Pacific Fleet auxiliary ammunition ships used for replenishment of naval ships at sea.

Located in Contra Costa County about 35 miles northeast of San Francisco, the weapons station covers 12,000 acres. It is also a designated wild life preserve where deer, Tule elk,

golden eagles, quail, pheasants, fox and other birds and animals are unmolested by man.

Health technician James Worn gives Jennifer O'Neal, receptionist, a ride up the ramp in a wheelchair.

HM2 Ernest Marks positions patient for chest X-ray.

UCSF sponsors free community health talks

The UC-San Francisco Office of Public Service Programs and the Committee for Arts and Lectures will present a series of free evening health sciences lectures for the general public beginning in November.

The first lecture, "Horrible Herpes: Why Nothing Works," will be presented by Marcus A. Conant, MD, UCSF associate clinical professor of Dermatology, on Wednesday, Nov. 17, 7:30 to 9:00 pm, in Toland Hall in the University of California Hospital Building, 533 Parnassus Avenue, San Francisco. The lecture will review herpes, the physiological effects of the baffling infection, the latest treatment therapies and hopes for new approaches in the future.

The second lecture in the series, "Attaining Sexual Fulfillment," will be presented on Wednesday, Dec. 1 by Evalyn S. Gendel, MD, director of the UCSF Human Sexuality Program, and Emmett J. Bonner, PhD, a San Francisco medical sociologist. The talk, from 7:30 to 9:00 pm in Toland Hall, will focus on prevention and treatment of sexual problems common to women and men, as individuals and as couples, and emphasize counseling and therapy techniques.

At both free lectures, there will be ample time for questions and discussion. Refreshments will be served. Those attending the lectures may park for free in the Millberry Union Garage.

Last year the lecture series was initiated as a pilot program, however, it is now being continued because of strong public interest, according to Vida Labrie, Senior Planner in the Office of Public Service Programs. The series, geared to a lay audience, was designed to help fulfill UCSF's role in the community as a resource for current health information, and specific information about UCSF's teaching, research and health care programs, Labrie said. Planning has already begun for a series of talks in January and February.

For more information on the lecture series, call 666-3206.

Group to examine uniform allowance

The Assistant Secretary of Defense (MRA&L) has directed that the Navy take the lead in establishing a joint service study group to examine uniform allowances.

The study group will examine the present system, identify shortcomings, and recommend remedial action to the Secretary of Defense.

Officer uniform allowances, as well as the enlisted clothing maintenance allowance, will be reviewed.

Retired pay tax breaks voted in NY and Colo.

Colorado and New York have passed laws allowing military retirees state income tax exemptions of up to \$20,000 on military retired pay. The exemptions are effective for this tax year in both states.

The New York law allows military retirees who are 59-and-one-half years old or older to collect up to \$20,000 dollars in tax-free retired military income. The bill was passed last year, but did not become effective until 1982.

The Colorado law was passed in 1975 but amended earlier this year to allow retirees in the state who are 55 years old or older to claim up to \$20,000 dollars in tax-free military retired pay. The previous limit was \$15,000. Colorado retirees under a certain age can also exempt \$2,000 from state income taxes.

Residents of either state should contact state revenue officials for further information.

"He's doing a staff study."

HM3 Teofilo Geron examines a slide through a microscope.

Soviets featured

The October issue of *Proceedings* magazine features a special 176-pages on the Soviet Navy. It covers the latest Soviet advances: their missions and tactics, command and control, surface forces, mine warfare capability, and much more.

Single copies of this issue are available for \$3, including postage and handling. Write to the Membership Services Department, U. S. Navy Institute, Annapolis, Md. 21402, or call (301) 268-6110.

NRMI celebrates 40th

The Naval Medical Research Institute (NMRI) observed the 40th Anniversary of its commissioning Oct. 27. The institute studies biomedical devices and techniques.

Advances developed by NMRI for the treatment of environmental casualties and improvement of safety and survival equipment have saved countless lives during and since World War II.

Radiology job still open here

Applications will be taken now until further notice for the job of Therapeutic Radiologic Technologist GS-7, in Radiology Service at NRM, Oakland.

Applicants will be evaluated on the knowledge of radiation protection standards, devices and techniques; anatomy and physiology, and basic physics; therapeutic exposure techniques and skill in positioning patients for a wide variety of difficult treatments.

For further information call Maurine Tinsley at 639-2116.

LOOKING GOOD—(l to r) HM3 Donald G. Henry, Jr., DN Patti L. Holly and SA Norman C. Furbush, Jr., were recently singled out by Rear Admiral Robert C. Elliott (r) as outstanding in appearance. During the same inspection, HM2 Orlando S. Smythe was also selected.

LSO SQUARED AWAY—(l to r) HN Beverly Hall, HN Mark K. Ford, HN Randell Flynn and HM2 Renato B. Ramirez. Also cited for excellent military appearance in this second inspection was HM3 Robert R. Ramirez of Physical Therapy, not pictured.

HM2 Bonilla selected SOM

Hospital Corpsman Second Class Vic G. Bonilla of the ENT Clinic is NRMCC Oakland's Sailor of the Month (for October).

He was nominated for the award because of sustained professional excellence in the superior performance of duties as a technician in the Department of Otolaryngology—Head and Neck Surgery, and is said to have served with distinction as his service's senior technician in the Main Operating Room. Other assets cited included devotion to duty, willingness to provide an extra measure of effort, and an impressive military bearing and courtesy.

Petty Officer Bonilla has been in the Navy nearly six years. He has been assigned to Oakland for three years and eight months. All prior duty has been in the San Diego area.

In speaking of his selection as best sailor, Bonilla said, "I was surprised and yet proud to be selected as Sailor of the Month. It has made me more aware of the responsibility of representing my peers, my command, and the Navy."

The son of Joseph and Hilda Bonilla of Shelby, Mont., is married and lives with his wife Leslie and children Tasha, Joshua and Caleb in base housing at

HM2 Vic Bonilla

Oak Knoll.

He plans to work toward a nursing degree and then go for a master's.

Petty Officer Bonilla likes to play intramural basketball and baseball, play the guitar and study fish. He is also active with a young people's group at the Vallejo Bible Church.

HMCS Estes new staff detailer

Senior Chief Hospital Corpsman Charles A. Estes, who recently arrived at Naval Regional Medical Center Oakland from duty with Naval Communications Station H.E. Holt in Australia, is this command's new Enlisted Staff Detailer in Military Manpower Services.

Estes was here once before—as a student in the Preventive Medicine Technician School. Still other assignments have been at Naval Regional Medical Centers Bremerton and Long Beach, with the First and Third Marine Divisions, Naval Communications Station, Adak, and on the staff of Hospital Corpsman B School in San Diego.

Originally from Greenville, S.C., he has 19 years of service in the Navy and has a career goal of some day becoming a Command Master Chief.

The senior chief, his wife Barbara, and daughter Ronda, are making their home in Castro Valley.

He is a sports enthusiast.

HMCS C.A. Estes

'High-flying star' now outpatient

By Pat Heaphy

AM2 Gary Hanson

Aviation Structural Mechanic Second Class Gary Hanson, who some call a "high-flying movie star," recently became an outpatient after being a resident of the hospital since May when he arrived here from Rota, Spain, where he was injured in a motorcycle accident.

Although he may not be recognizable to you, he appeared in the movies

"Wild Geese," "Moonraker," and "The Nude Bomb." These roles put him on top. In fact, it was 8,000 feet up. Gary jumped out of airplanes, you see, and appeared in the skydiving or parachuting scenes.

"Probably the most fun movie to shoot was **The Nude Bomb**," said Hanson. "We got to jump from a DC3, which has a bigger and more stable platform than the normal Cessna 182 and 185s."

Among the major stars he jumped with was the late Steve McQueen. Gary has also jumped with Lee Major's stuntman.

Hanson has 10 years of military service, the last four in the Navy. Previously he served with the Army paratroopers and the Tenth Special Forces (Green Berets). During his Navy career he has landed on the flight decks of the carriers SARATOGA and FORRESTAL.

With his leg injury, he believes it will be two years before he can jump again. He's not giving up, however, and is proud of his License NO. C-14235, granting him the right to do any form of skydiving or jumping.

After 1,400 jumps the sailor has perfected his skill so that he is able to jump from more than 6,000 feet and

(Continued to Page 9)

It's a long way from the high seas near Okinawa, Japan, to the East Bay, and it's an even further leap from losing one's leg to playing tennis a little more than a year later in Oakland. One young man has made it with apparent ease, however, due to the help of some skilled craftsmen at this medical center.

On March 3, 1981, ABHAN Michael Dean Smith, 21, was a member of the deck crew of the USS BELLEAU WOOD (LHA-3) as the ship's helicopter division practiced flight operations while enroute to the Western Pacific.

Smith was handling the running chains when one of the choppers with its nose gear up slammed back, tried to take off, crashed and exploded on the deck, killing one helicopter crewman and injuring another, the pilot, co-pilot and Smith, who lost the lower portion of his left leg and had his right hand crushed in the tragic accident.

He remained aboard in the sick bay under care of the ship's medics for a week before being transferred to the Navy Hospital on Okinawa for surgery to clean up the wounds.

On April 15, 1981 he was medically evacuated to Naval Regional Medical Center Oakland where further surgical amputation was performed to fit a prosthesis to the stump of the severed limb and rehabilitation began on his hand. He remained here as an inpatient until last October, when he was discharged from the hospital and granted a medical retirement from the U. S. Navy.

In the intervening months, except for a short period when he made a temporary move to Ohio, married and returned to his hometown of Oakland, he has remained an outpatient of NRMCC Oakland and is now wearing a third prosthesis made by the civilian technicians in the Prosthetics Laboratory here. The last one is a bit different from the other two, however. It has a turning device at the ankle to enable the wearer the mobility he needs to play tennis.

And for Smith, this is very important. Although he works days as a

short order cook in a fast-food restaurant, he has been taking tennis lessons at night at Laney College, and with his hand healed and a three-month-old prosthesis that moves like real flesh and bone ankle joint, he is beginning to perfect his game.

The slim, athletic young man has also learned to throw his bodyweight on the good leg when he jumps to reach the ball. "With this new device, I have no problem playing tennis," he says. "Someday soon I hope I can help other amputees learn to enjoy the game."

Betty Beck.

SWIVEL POINT—The prosthesis specially manufactured for the former Navy man allows him motion at the ankle.

Local doctors in tinnitus research

At the recent annual meeting of the American Academy of Otolaryngology in New Orleans, three NRMCC Oakland doctors presented results of a clinical trial concerned with symptomatic treatment of tinnitus. The work by LCDR David L. Mehlum, LCDR George Grasel and Charles E. Fankhauser, all of the Department of Otolaryngology, received advance publicity in a news bulletin distributed at the meeting, so their presentation was well-attended and subsequently has received national attention.

Tinnitus is a medical term which describes a condition in which a person hears a sound not present in the external environment. The sound is variable in patients and may be described as loud or soft, continuous or intermittent, high-or low-pitched, and steady state or pulsating.

Everyone has experienced tinnitus at one time or another, but it normally lasts from a few seconds to a minute or two. When the symptom is more-or-less constant, a person can be handicapped. In a few cases, tinnitus can indicate presence of a serious disease. However, in most cases a treatable problem is not found, and the patient is faced with a prospect of learning to live with the sound.

Various methods of treating tinnitus have been proposed, but success has been limited. Mehlum and his colleagues evaluated use of various devices and environmental controls for the symptomatic relief of tinnitus. They were encouraged to find that many of their patients found relief from their

tinnitus with use of one or another of the trial devices.

This work was funded by the Navy's Health Sciences Education and Training Command under CIP Project Grant 80-48-1318, and Mehlum and his colleagues have been encouraged to continue their endeavor in a collaborative effort with the Kresge Hearing Research Institute at the University of Oregon and by the American Tinnitus Association.

Apparently the Department of Otolaryngology—Head and Neck Surgery of NRMCC Oakland is one of few centers nationally that offer such a complete program, so efforts are now underway to continue it on a regular program basis.

'High-flying'

(Continued from Page 5)

land in the center of a baseball diamond. In all his jumps, a chute failed on him only three times. He feels these are good odds, "especially since you must rely on the Federal Aviation Administration-packed reserve chute if your own doesn't open."

In his highest jump, Hansen put his "knees in the breeze" at over 13,000 feet and had a free fall of more than 84 seconds. "At a speed of 210 miles per hour, this brings you down to about the 3,000 foot elevation, a point where you can 'put out your laundry' to make a safe landing," he explained.

Credit Union employees dress up (and down) for Halloween

If you want to buy a savings certificate, this "Headless Horseman" (Josie Sperry) is at your beck and call.

Down through the aisles of files wanders Joyce O'Connell dressed as a lady down with combat boots. Do you think she'll really file that "dead chicken" hanging from her belt?

DoD school students outscore average in college entrance tests

For the seventh straight year, sons and daughters of military personnel stationed overseas have scored higher on college entrance tests than high school students in the United States.

Students attending 63 high schools maintained by the Department of Defense (DoD) for military families in 10 countries registered higher scores on both the Scholastic Aptitude Test (SAT) and the American College Testing Program (ACTP), for the 1981-82 school year.

The overseas students averaged 37 in S.A.T. verbal testing, 11 points higher than the average of high school students taking such tests in the United States.

In mathematics, the average S.A.T. score for high school students in DoD schools was 477, or 10 points higher than in the U. S.

In the American College Testing Program, the average performance of military family students abroad topped the national sample in all achievement areas, natural sciences, reading, English usage, mathematics and social studies reading.

The composite A.C.T. scores for military family students abroad was 19.9, compared to the national score of 18.4.

DoD dependents schools in the Pacific Region will be limited in the number of space available students they may enroll for the school year 1982-83, according to Director Dr. Beth Stephens.

An unexpected increase in the number of students in that area is the cause for the limitations. Sponsors scheduled for unaccompanied tours to Japan, Korea and the Philippines are advised

"My Fair Lady" Linda Sylva watches out for your interests as "Witch" Roberta Johnson puts a magic spell (hopefully a lucky one) on a customer's account records.

The following additions to the medical "family" have arrived at Oak Knoll:

A baby girl to Lieutenant Commander Douglas Love, Jr., formerly of Food Service, and his wife Dallas, Oct. 21.

A baby girl to Lieutenant Frank J. Waskey, Nursing Service, and his wife Ursula, on Oct. 28.

A baby boy to Lieutenant Commander Steven R. Jensen, Radiology Department, and his wife Patricia, Oct. 30.

A baby boy to Equipment Operator Third Class Kenneth R. Anderson, NAS Alameda Branch Clinic, and his wife Raquel, Oct. 31.

A baby girl to Hospital Corpsman Second Class Mark D. Norton, USCG, PMT School, and his wife Kathleen, Nov. 2.

MAKING IT CLICK—Pediatrics Service staff (l to r) HM3 Christopher Rogers, Edna Hudson, Catherine Corbett, CAPT Ricci Larese, Shirley Butler and Lenore Brady helped the Uniformed Services West Chapter of the American Academy of Pediatrics win a summer safety contest. The chapter collected more than 3,500 signatures from children and parents pledging to buckle up for a trial period of two weeks in "Make It Click," the first comprehensive grassroots effort to motivate persons to buckle up in safety seats or seat belts.

CHAMPUS may help buy durable medical equipment

Military families can now buy durable medical equipment, such as wheelchairs or respirators, when it's cheaper than leasing or renting. The change in the CHAMPUS regulation should save eligible families money and trouble, while helping the government avoid more than \$500,000 in rental or lease costs over the next four years. The change became effective Sept. 28. Under the old rules, CHAMPUS couldn't share the cost of buying durable medical equipment, even when it wasn't available for rent or lease. Beneficiaries of the program had to bear the entire cost themselves. The new rules require CHAMPUS patients to get approval in writing from the regional claims processor before buying the equipment. If the processor

agrees that the patient needs the equipment, and that the government can save money in the long run by cost-sharing the purchase, the okay will be given. Persons eligible for CHAMPUS should check with their CHAMPUS claims processor before committing themselves to rent or buy durable medical equipment. The local military installation's Health Benefits Advisor can also help explain the rule change, and aid in contacting the proper claims processor. Certain conditions must be met. CHAMPUS cannot share in the payment for eyeglasses; contact lenses and other optical devices; and hearing aids or other communication devices. They don't qualify as durable medical equipment.

Signature requirement eased

Physicians who have only limited contact—or no contact at all—with their CHAMPUS patients, will no longer have to get the patient's signature on the CHAMPUS claim form. The signature obtained on a CHAMPUS claim form by the hospital or other institution will suffice when certain specialists bill separately for services during the patient's hospital stay. The new rule applies to radiologists, pathologists, neurologists, cardiologists and anesthesiologists who accept CHAMPUS assignment. When such a provider does not accept assignment, the claim form still needs the patient's signature. Relaxing the signature requirement is one of many moves to speed claims processing and make it easier for physicians to accept CHAMPUS assignment. CHAMPUS officials note that when a claim is returned because of signature problems, as many as 36-60 days may be added to the processing time. Most claims are otherwise processed within 21 days of submission. In addition to speeding up claims processing, the change is expected to help CHAMPUS avoid up to \$150,000

annually in administrative costs from claims returned because of signature problems.

Civilian Employees

"ONE GOES ON THIS DOOR, TOO"

Blood donor fears unfounded

By Annie Wing
Irwin Memorial Blood Bank

On Nov. 22 and 23 the familiar blue truck from the Irwin Memorial Blood Bank will roll up to Oak Knoll Hospital for its quarterly blood drive. A mobile unit will be set up on 5 East in the main building from 10 a.m. to 4:30 p.m. on Monday, and 7 a.m. to 1:30 p.m. on Tuesday. Through continued donations, Irwin Memorial is able to supply this hospital with blood and blood products. For every three donations collected during the drives, NRMCOakland receives a \$60 credit directly benefitting patients needing transfusions. At the last NRMCO blood drive in September, 240 units were donated, representing a 20 percent participation. Blood drive coordinator LCDR Tom Wadsworth hopes the November blood drive turnout will surpass this figure. However, in order to accomplish this goal, the number of first time donors must increase.

Reluctant donors often give the following excuses:
They'll take too much blood, then I'll feel weak and dizzy!
Nonsense. You have between nine and 12 pints of blood in your body. The donation consists of less than one pint; your body won't even miss it. Plus, your body makes new blood constantly. The volume will be replaced within hours.
I might pass out!
Fat chance! Giving blood is safe and easy. All donors are screened carefully to insure they're medically fit. You can go about your usual routine as soon as you've rested and had some refreshment.
President cites antidrug success
Increasing the number of Federal enforcement personnel, attorneys and judges, along with effective use of information derived from military intelligence and airborne radar, have combined to produce a "dramatic success" in combating drug trafficking in the South Florida area, according to President Ronald Reagan. The President cited a 40 percent increase in drug-related arrests, an 80 percent increase in marijuana seizures, and a more than 100 percent increase in seizures of cocaine to support his Oct. 2 statement, adding, "the important thing is, we're hurting the trafficker."

Navy assistance to the "South Florida Task Force" has included surveillance operations by E-2C "Hawkeye" early warning aircraft, reports of sightings of suspicious vessels, the embarkation of U. S. Coast Guard detachments on Navy ships and augmenting Coast Guard interdiction efforts with Navy assets where permitted by law. Calling the drug war "a campaign we cannot afford to lose," President Reagan reminded Americans that while general health has been improving, "the death rate for young Americans between the ages of 15 and 24 is now higher than 20 years ago." He called drug and alcohol abuse major contributors to this "frightening trend." In addition to the enforcement element, the President promised efforts directed at international cooperation, education, prevention, detoxification and treatment and research. "The mood toward drugs is changing in this country and the momentum is with us," the President concluded. "We've taken down the surrender flag and run up the battle flag. And we're going to win the war on drugs."

★ REMEMBER-

I don't like needles!
Who does? Actually, the pain you think you'll feel will be more of a slight discomfort. And that feeling will last only momentarily.
I'm afraid to give blood!
So is everyone else the first time. But if you'll put your fears aside long enough to donate, you'll wonder why you ever hesitated.
I'm too busy to give blood!
What's one hour of your time every three months when you think of the life-saving results it produces? The donating process from registration to refreshments takes less than an hour. The actual donation time is between seven to 10 minutes. Plus, each time you donate you receive a mini physical which includes a hematocrit to check for anemia and a temperature and blood pressure reading. Remember one hour of your time can mean a lifetime for another. As you can see, many fears are unfounded. Giving blood is easy. Ask any blood donor, or find out for yourself, Nov. 22-23.

Put fire prevention high on list when making family Yuletide plans

To keep the holiday season merry, keep fire hazards out.

Attention to fire safety when planning Christmas trees, lighting, decorations and gifts will go a long way toward making this Yuletide a happy one, advises the President of the National Fire Protection Association (NFPA).

Here are some Christmas-time fire safety recommendations from Charles S. Morgan, head of NFPA, the international center of fire prevention information.

Tree: Select a firm, fresh one, and put it at once in a cool place with its base in water. Before setting it up, cut about an inch off the base to help the tree absorb water, then place the tree in a sturdy stand containing water. To be sure the water level stays above the cut, check it daily.

Locate the tree away from heat and where it won't block exits. Take it down as soon as possible after Christmas—the more it dries out the

more of a hazard it becomes. Don't rely on do-it-yourself flameproofing treatments.

Lighting: Never use lighted candles on a tree or near any evergreen decoration.

Check sets of electric lights closely, for worn insulation, broken plugs and loose bulb sockets, and use only sets that carry the label of a leading national testing laboratory.

Use extension cords sparingly.

Never hang sets of lights on a metallic artificial tree—to avoid shock hazard, use only indirect spot lighting instead. If artificial tree has built-in electrical system, it should be "listed" by a recognized national testing laboratory.

Turn off all indoor tree and decorative lights when leaving the house or retiring for the night. Outdoor lights should have special wiring intended for outside use.

Decorations: Use materials which are non-combustible, such as glass, or which are flame-retardant. Keep natural evergreens and polystyrene decorations away from candles, fireplaces and other open flames.

Be sure holiday costumes and masks, such as Santa suits and whiskers and children's pageant outfits, are flameproofed.

Wrappings: Pick them up while opening gifts and put into covered trash containers. Never burn wrappings, boxes, etc., in the fireplace.

Gifts: To meet safety standards, all electric toys should be "listed."

EXPLANATION—LCDR Albert S. Gesh explains a TRIMIS system joining three major Bay Area military medical centers in pharmacy records processing to visitors (l to r) Fred Hannett, Office of the Assistant Secretary of Defense for Health Affairs, and Ed Lombard and Austin Smith, House Appropriation Committee staff members. The three Washington, D.C. visitors were here Oct. 25.

Official mail to get a lickin'

Official Mail USA

USA 20c

Penalty for private use \$300

If an upcoming Air Force test proves U. S. Postal Service theory to be correct, you just might find yourself licking stamp every time you mail an official letter.

Because it feels that an official mail stamp system would provide a more precise means of collecting postage revenue from official mail users, the Postal Service has asked certain elements of the Air Force and the Department of Agriculture to test the new system early in 1983.

If the test is successful and the concept is adopted government-wide, stamps will replace the official mail indicia now in use, and government agencies will buy official mail stamps instead of preprinted "For Official Use Only" franked envelopes.

The Postal Service emphasizes that the stamps will be restricted to official government mail. Envelopes bearing the stamps must have a government return address.

(Answers, Page 10)

MED • SCAN

A quick look
at recent health care
developments

Approximately one in 5,000 children is afflicted with puberty that comes too soon because of glandular disorders and other causes. The age of the children at the onset of the disease can range upwards of nine months. The child will suddenly begin to grow inordinately fast, causing premature maturation of the skeleton. The child shoots past his peers but then his bones reach maturity and stop growing far short of normal adult height. Babies may grow facial and pubic hair and breasts. Now the National Institute of Child Health and Human Development in Bethesda, Md., is investigating a drug, LHRH (analogue of luteinizing hormone-releasing hormone) which has shown remarkable success in actually reversing this precocious puberty. About 80 children are currently receiving daily injections of LHRH. These children ranged from nine months to nine years at the start of the treatment and more than 90 percent have responded satisfactorily, slowing their growth and losing their sexual maturation. In addition to exhibiting the physical changes of puberty, the children also show adolescent emotional behavior. That, too, tended to improve with medication. At the present time the Institute is admitting two to three children weekly.

During the past 30 years the Russian health care system has been playing catch-up to bring the number of hospital beds on a par with western standards. An article in the *British Medical Journal* compares the number of beds in England and the Russian Republic, the most populous of the 15 Soviet republics. It was found that in 1950 England had 10.4 beds per 1,000 people, while in that same year, the number of beds in the Russian Republic was 5.6 per 1,000 people. By 1978 the number of beds had more than doubled, to 12.2 per 1,000 people. The author of the article makes the point that the Russians in the 50s and 60s engaged in a crash program that entailed makeshift arrangements and the subordination of quality to quantity. It is also interesting that in the same period the English, and latterly the Americans, have changed their strategy and now emphasize the provision of outpatient care.

Environment has always been accepted as an important influence on IQ, but only recently has the environment of the womb been included in the equation. As an offshoot of the federal government's Special Supplemental Food Program for Women, Infants and Children, psychologists were able to measure the effect of supplemental nutrition on IQ. The scientists contrasted, in the *American Journal of Public Health*, scores of children who first receive supplemental nutrition between the last trimester of pregnancy and one year of age—the period of the brain's "growth spurt"—with their siblings, who were on the average two years older when they started the program. The paired children and their mothers did not exhibit signs of malnutrition at the beginning of the program, but they were in nutritional risk categories: Anemia or low weight for height, and, in the case of pregnant women, frequent pregnancy, young or old maternal age, or high weight for their height. The children were tested five years after they started the program. Those youngsters who first received supplemental nutrition, either while in the womb or in the first year of life, consistently scored higher than their older siblings in each of the tests administered. The most striking difference was seen in the full scale IQ test, in which the younger children scored an average 13 points higher than the older children.

Surgeons can now weave repairs to ligaments and tendons, using a carbon fiber implant. Developed at the University of Medicine and Dentistry of New Jersey,

the material has been used successfully in 48 patients, many of whom had chronic conditions which had not responded well to multiple attempts at surgical repair. The implant stimulates the growth of tissue that grows around the fiber. The repair seems to be as strong or stronger than the original tendon or ligament. The surgeon weaves the material in and around the injured tissue to connect and reinforce the damaged section.

New ligaments or tendons are not in fact re-grown. What happens, apparently, is that fibrous tissue is encouraged to grow on the fiber "scaffold" at the site of the repair. In a sense it is scar tissue. The carbon fiber implant has been used to repair knee ligaments and Achilles tendons.

If you once nurtured a neurosis in your bosom, forget it—it's no longer considered a disease. The country's psychiatrists have been engaged in codifying their diagnostic classifications and have consolidated, reclassified, eliminated and otherwise reordered their armamentarium. The elimination of "neurosis" as a condition to be diagnosed prompted one distraught psychiatrist to write to the *Archives of General Psychiatry* and ask plaintively: "Must we really part, dear word?" So hereinafter you no longer have a *neurosis* but instead enjoy "anxiety" and other disorders.

Want to live longer? Get out and mingle. Results of an ongoing study of community health showed that the more socially active people lived longer than their quieter neighbors. The study, reported in the *American Journal of Epidemiology*, took into account such variables as cholesterol, drinking, and height-to-weight ratio as well as others such as smoking, which could be expected to have an effect on longevity. For men, passive solitary leisure activities such as television viewing and reading, were "positively associated with mortality." Frequent social contact with other people substantially lowered the risks of dying in the 12 years that the study has been in existence. For women, the association between solitary leisure activities and the risk of dying was even more positively associated. Marital status for women was less significant than for men in the study.

Cutting through all the sensationalism that understandably clings to the subject of transsexualism is this sad fact: It is a "no-man's land whose denizens, with or without sex reassignment surgery, with or without psychotherapy, can, unhappily, never experience biological or emotional fulfillment." That is the conclusion of an editorial in the *British Medical Journal*. Transsexuals are differentiated from other sexual deviants because they see themselves unequivocally as women. Their belief is so strong that it could be classified as near delusional. In the case of transvestites, who obtain a degree of sexual excitement by dressing as women, and homosexuals who obtain satisfaction from other men, there is seldom confusion as to sexual identity. It has been found, however, that the three conditions can overlap to some extent. Women, apparently, seldom are true transsexuals. The tragedy is that the demand for the operation has grown inordinately and that a great many of these would-be patients would benefit more from psychotherapy rather than this surgically drastic operation. Yet for that select group of true transsexuals, a psychiatrist who has worked with them for 30 years says: "In the main, the conservative attitude, thorough screening, ruthless exclusion, of doubtful cases, and prolonged pre-surgery observation, led to successful results with excellent individual social and sexual adjustment."

Food and Health Quiz--

(Continued from Page 9)

1. FACT

Overweight is related to heart disease. The more overweight you are, the greater your risk of coronary heart disease.
2. FICTION

You don't have to give up snacks to lose weight. In fact, nutritious, low-calorie snacks can help you lose weight by keeping your appetite under control throughout the day. It's the total amount of food (and calories) you eat each day that counts—not the time of day you eat it.
3. FACT

You can eat bread and potatoes on a reducing diet. They're not high in calories if eaten without "extras." And they are a good source of many essential vitamins, minerals and carbohydrates. "Extras" do add up, however:
70 calories—One slice of bread
105 calories—Bread with 1 pat of butter or margarine
105 calories—One medium baked potato
190 calories—Potato with 1 pat of butter or margarine and 2 T. of sour cream
4. FICTION

Skinny children will not necessarily become skinny adults. Active, growing children do burn a lot of calories. If you encourage a sweet tooth or a taste for fatty food, your children are more likely to become overweight adults. Your food choices shape your child's eating habits for life. Help make them healthy ones.
5. FICTION

Exercise will not make you overeat. Regular exercise actually helps control your appetite. It also helps tone muscles, improve circulation and strengthen your heart.
6. FACT

Fats have more than TWICE as many calories as protein or carbohydrates. (Approximate calories)
255 calories—one ounce fat
113 calories—one ounce protein
113 calories—one ounce carbohydrates
7. FICTION

All fats are not alike—different fats affect your blood cholesterol in different ways: Fats from animals (saturated fats) raise your blood cholesterol level. Fats from most vegetable sources (polyunsaturated fats) lower your blood cholesterol.
8. FICTION

Whole milk is not better for you than skim milk. Skim milk has all the nutrients found in whole milk without so much saturated fat and calories. (Some evidence suggests that some milk fat may be beneficial for VERY young children. If you have questions about this, consult your pediatrician.)
9. FACT

Most Americans eat more protein than they need, especially protein from meat. This is expensive, unnecessary and may be harmful. Why? Proteins from animal products are high in saturated fat. It's healthy to replace some meat protein with starchy foods like bread, potatoes, rice, spaghetti, noodles, cereal and other grain products.
10. FACT

Chicken skin is about 17% fat. Dark chicken meat is about 6% fat and white meat is only 3% fat. If you're watching how much fat you're eating, it's a good idea to remove the skin before cooking.
11. FICTION

You don't need red meat every day. Although red meat is high in protein, it can also be high in fat. Chicken, fish, lowfat dairy products and dried beans are also high in protein but low in fat.
12. FACT

Vegetarians who balance what they eat can be just as healthy as people who eat meat. In fact, some studies show that, compared to people who eat the usual American diet, vegetarians do not suffer from as much high blood pressure and coronary heart disease.

VA Qs and As

Q—My VA benefits check goes by direct deposit to my bank and I wish to terminate the direct deposit. What should I do?

A—To cancel a direct deposit, you need only to notify the VA in writing of a new address for your VA check. One precaution—do not close the account to which the direct deposit was going until you receive the first VA check at your new address. This will prevent any interruption in receipt of benefits.

Q—Can I make arrangements in advance for the burial of my wife and children in the event one or more of them dies before I do?

A—No, application for burial in a national cemetery must be made at the time of death of an eligible veteran or his/her eligible dependent. The selected mortuary, VA cemetery or any VA office will provide information and assistance in matters pertaining to burial and allowances.

Q—When are dividends paid on participating National Service Life Insurance policies?

A—Dividends are normally paid on the anniversary date of the insurance policy. No application is necessary.

Q—I was injured while on active duty in World War II, but have never filed a claim for compensation with the Veterans Administration. Is it too late to do so now?

A—No. There is no time limit for filing a claim for compensation. Contact the nearest VA office for assistance.

Sock hop' slated

All Naval Regional Medical Center and military personnel and guests, regardless of rate or rank, are invited to a "sock hop" sponsored by the Enlisted Club, but to be held at the Officers' Club on base Nov. 19. The evening will feature radio station KYA personality Gary Mora, a deejay who handles the "Oldies Road Show." Music will be from the 50s and 60s and all attending are urged to dress in the 50s ("Fonzie") era style. Activities begin at 8 p.m. A no-hostess bar will be available. For those wishing to reserve in advance, the Enlisted Club will be open. There is no charge for the dance.

Hard thanks partygoers

A Halloween party sponsored by the Enlisted Club on Oct. 29, was apparently a "winning" success, according to HM2 Jones, Vice President of the club's advisory board. According to Pat, the guests included "E.T.," Groucho Marx, the Three Brothers, a pirate and a number of other ghosts and goblins. The "Little Band" provided music all night long. The advisory board members would like to thank all those who partied and helped make that event one of the most successful events of the year.

Contributions welcome for Christmas basket

Hospital staff not previously contacted by the NRMCM Officers' Auxiliary, are advised that the club is sponsoring its annual Christmas basket for a needy family and accepting donations of food items to make that family's holiday a merry one. Contributions will be accepted at either of the following locations before

Dec. 10:

- Labeled Box, Manager's Office, Officers' Club.
 - Information Desk on the second floor of the hospital.
- For further information call Pam Ferrario, 582-7057, or Jeanie Torkildson, 895-2675.

More patients write...

Recently I was in the hospital for nine days and want to tell you how grateful I am for the wonderful care and treatment I received. Without exception, the doctors, nurses and staff were outstanding in efficiency and (in) the warmth of their concern. The ward I was on is 6 West, and the surgical team was the Gold Team. Dr. West was my surgeon and he and all his team were so kind. The nurses on the ward went out of their way to be helpful and supportive. Also, I should like to mention the people in the O.R. area, especially Lt. Allen, who were especially kind at a time when this was so important. I do feel that such efficient and concerned care has a tremendous effect on a patient's well-being and recovery. My thanks to you and to the fine people who work so hard and with such devotion to make the hospital what it is.

Virginia Thomas

I would like to take this opportunity to convey our appreciation to you and your staff in supporting the medical needs of the crew of the Hector. We find that appointments are made in a timely manner by the friendly individuals at your appointment desk. Clinics seem to go out of their way to accommodate our people. We recently returned from a long deployment and did not always find the naval hospitals as supportive as they could have been. We are looking forward to a long and close working relationship with your facility. A special thanks to Operators 1, 3, 4, 6, 10; to Dermatology, Orthopedics, General Surgery, the E.R., ENT and Urology.

K. Sawada, LT, MC, USNR
Medical Officer, USS HECTOR (AR-7)

During a Permanent Change of Station transfer, my wife had a seizure. . . Because of my transitory status, CDR Raymond Lilly, the new Assistant Chief of Neurosurgery, expedited the . . . operation. During this traumatic period, I and my family were extremely impressed with the dedication and professionalism of the entire Neurosurgery Ward, from the E-3's to the O-5's. They treated all patients with the utmost courtesy and consideration, regardless of how trying the patients were or how fatigued the staff member. In my 28 years with the Navy, I have never observed a more uniformly professional group of Navy people; they were not only a credit to the U. S. Navy but also to the medical profession as well. I commend the Oakland Naval Hospital Neurosurgery Ward on a job "Well Done!"

Donald L. Lukinbeal
Captain, U.S. Navy Reserve

"WARM ENOUGH, HONEY?"—An emperor penguin broods its young in Sea World's penguin research facility, one of the stops on the itinerary of military families taking a behind-the-scenes guided tour. A 15 percent daily discount is available to military and DoD civilian employees and their families, upon request at the tour assembly booth.

GO NAVY—The U. S. Naval Academy football team will soon challenge that of West Point in the traditional Army-Navy game, to be played this year on Dec. 4 in Philadelphia.

Thanksgiving services set

Pastoral Care Service has announced its Thanksgiving services for Nov. 24-25. The Protestant Communion Service of Thanksgiving will be held on Nov. 24 at 12:30 p.m. in the Chapel of Hope. The liturgy will be recited by LT Jay Hoppus and a devotional presented by LT M. Kathy Brown.

The Catholic Mass of Thanksgiving will be held in the Chapel of Hope at 9 a.m. on Nov. 25. The Thanksgiving Mass will be celebrated by LT Edward Masse.

Rhymes of the Times

A bit of Bay Area nostalgia

By Jane O'Sullivan

In 1915, a few years after the devastating earthquake and fire, San Francisco held a great world's fair to celebrate its rebuilding and the opening of the Panama Canal. The fair romanticized the pioneer past and turned the eyes of the world toward South America as well as the wonders of developing technology.

This was the Panama Pacific International Exposition. Displays have been gathered and put into an exhibit to run through 1983 at the Lowie Museum of Anthropology just off Bancroft Way at the University of California, Berkeley. Admission costs one dollar. The museum is open from 1 to 4:30 p.m. on Saturdays, as well as on weekdays.

A diorama shows the full extent of the romantic, dreamlike city within a city. The only remaining building on the site, the Palace of Fine Arts, was designed by Bernard Maybeck and is still a favorite landmark.

At the museum, national displays from Sweden, Japan and China are of great interest. The Eastman Kodak Company won many awards and inspired a wave of "shutterbugging," but the cameras look very primitive compared to those on sale today. Toasters, typewriters, telephones and a host of labor-saving devices burst on an enthusiastic public. A highlight of the exhibit is an old movie by General Electric, in which a winsome housewife, circa 1915, shows a visitor through her electric kitchen and modern home. (There is even an electric cigar lighter for the husband.)

Three companies of Marines from Mare Island established a very well-organized camp next to the Texas pavilion. Thousands visited the hospital tents where Navy corpsmen displayed the latest in first aid and preventive medicine. Although World War I seemed very far away and received little newspaper attention, San Franciscans were always close to their own contingents of the armed forces, and loved the participation of the band and marching units in parades and ceremonies.

The Claremont Hotel was built in Berkeley to offer the latest luxuries to visitors arriving by transcontinental railroad or by steamer through the Canal. The train and ferry ride across the bay to the fair was part of a carefree day.

People loved the fair so much that they did not go home the night it closed, but wandered around the grounds singing until dawn. The buildings were quickly demolished; but many statues, paintings, and art works were moved to other parts of the Bay Area, where they can be seen today. A catalogue of these artifacts may be bought for a quarter. The influence on architecture and city planning still beautifies our communities.

Misty run returns to Redwood Park

The Fifth Annual Misty Redwood Run, a 7.6-mile foot race through beautiful Redwood Regional Park in Oakland, is scheduled to begin at 10 a.m. Sunday, Dec. 12.

Co-sponsors of the event are East Bay Regional Park District and the Lung Association of Alameda County.

Participants should check in between 8:30 and 9:30 a.m. at Canyon Meadow, which is reached via the park entrance on Redwood Road.

The race course will be up the Stream Trail, returning on the East Ridge Trail.

Entry fee is \$6 until Dec. 6, and \$8 on race day. More information on Redwood Run can be obtained by contacting Joe Rubini, run coordinator, at East Bay Regional Park District, (415) 531-9300, ext. 249.

INDIVIDUALIST—All pumpkins are not beaming, happy, orange-colored vegetables whose heads light up at Halloween. Some take a pretty dim view of being carved up for a one-day display. This one with a drill sergeant's mouth seems to be telling off its creator, AN Gregory J. Shackel, a patient on medical hold, whose hobby is calligraphy.

ce-a-year decision

Health benefits 'open season' now on for civilian employees

an open season, during which eligible federal employees may enroll or change enrollment to a new Federal Employees Health Benefits (FEHB) plan, is now underway and will close Dec.

Under open season regulations, any eligible employee who is not currently enrolled may enroll, and an enrolled employee may change from one plan to another, or from self only to self and family, or any combination of these. Employees who do not wish to make a change in current enrollment should take no action during this open season.

Distribution of open season literature is being, or has been made, through administrative offices. This year, each employee should receive a booklet containing the following material:

- The Booklet, enrollment Information and Plan Comparison Chart (BRI 41-331), containing enrollment instructions and a comparison chart of major benefits of all FEHB plans;
- BRI 41-212 biweekly (or BRI 41-333 monthly) list of premium rates for plans.

The comparison chart in BRI 41-331 gives employees general descrip-

tions of the benefits of each plan available. It can also be used to compare benefits among plans. However, since this booklet contains only a general description of plan benefits, do not rely solely upon it when deciding to enroll in or change enrollment to another plan. It is also important to remember that only you can decide which plan is best for you and your family.

If, after examining the comparison chart, you decide that you are interested in enrolling in, or changing to, a particular plan, consult the brochure of the plan for a complete description of benefits. Brochures will be available for your inspection at Civilian Personnel Service. However, due to the limited quantity available, brochures must be returned after you have reviewed them. For those employees who are considering enrolling in or changing to another plan, you should remember there are four types of plans available under the FEHB Program: Service Benefit Plan (Blue Cross/Blue Shield—provides benefits through direct payment to doctors and hospitals); Indemnity Benefit Plan (Aetna—provides benefits through direct payments to doctors and hospitals); Employee Organization Plans (provides benefits by reimbursing

you, or at your option, doctors or hospitals. Some of these are open to all federal employees, regardless of agency or occupation, while others are open only to a certain group of employees. Generally, you must be, or must become, a dues-paying member of the organization in order to join the plan it sponsors); and Comprehensive Medical Plans/Health Maintenance Organizations (Kaiser, etc.—delivers health care services in addition to providing coverage).

Employees wishing to enroll or change their enrollment must complete a Health Benefits Registration, Form 2809. These forms are available from Civilian Personnel and must be completed and submitted to that office prior to the close of business on the last day of the open season.

New enrollments and changes in current enrollments elected during the open season will become effective in January (first day of the first pay period beginning after Jan. 1).

SERENE SETTING—Our branch clinic on Rough and Ready Island is situated on a pleasant, tree-lined street. For story on Naval Communications Station, Stockton clinic, see Page 4.

Editorial---

Reporting waste, fraud

Hotline callers save US bucks

If a fast buck can be made illegally, the odds are good that some one will try to make it. Maybe that's not Murphy's law, but it's true just the same.

That's why the DoD Hotline was created, to ferret out the ferrets who are trying to come up with get-rich-quick schemes at the taxpayers'—that's us, partner—expense.

In the 3-month period ending July 31, 1982, 508 calls were received on the DoD Hotline to report fraud, waste and abuse. Of these, 238 provided sufficient specific information to warrant further inquiry and action.

Hotline officials recently reported the following two examples of positive results gained through the program:

A caller complained that two companies were owned by the same individual, including one company that existed in name only. Both companies allegedly bid competitively on the same con-

tracts to create the illusion of competition. In addition, it was alleged that kickbacks were paid to DoD buyers.

An investigation of this case uncovered cost overcharges of 30 to 40 percent and a former Defense employee has admitted to receiving approximately \$20,000 in kickbacks.

In a second case, a Defense employee hand delivered a contract proposal to the Hotline office which he felt was an example of waste and mismanagement. The Hotline office agreed, and a \$400,000 proposed contract was cancelled with instructions to conduct the study in-house using Defense employees.

The Dod Hotline is a means for reporting crimes against the Department of Defense and the military services involving fraud, waste and the abuse of authority for personal gain.

Officials remind potential

callers, however, that the hotline is NOT to be used for reporting grievances. Those who have legitimate complaints about discrimination, sexual harassment or other wrongful practices not related to fraud or waste should report them through appropriate command channels.

If you do become aware of a crime involving fraud or waste of DoD property or resources, report it promptly using the following telephone numbers or address. (You are not required to reveal your identity when calling or writing.)

Call:

800-424-9098 (TOLL FREE)
693-5080 (Washington area)
223-5080 (Autovon)

Or write:

Defense Hotline
the Pentagon
Washington, DC 20301

How's your attitude at work?

Attitude towards the job is perhaps the most important factor in accident prevention. Groups influence attitudes. Since attitudes are influenced by people from whom man associates and works, it can be understood how he will work carelessly and without proper precautions, if reckless behavior is condoned. If the group doesn't believe in accident prevention, the individual will generally go along with the group's views. The individual may adopt this attitude. The supervisor's attitude of "Don't do as I do, do as I say," will not work. People develop attitudes by the examples of others.

We hear the old adage, "Familiarity breeds contempt," and this is valid in safety. Refusal to use correct tools, work procedures and safety equipment, and failure to observe hazards are functions of attitude. Consequently, we cause accidents by our own devices. The environment is also a manifestation of our attitude. Cluttered aisles, uncleaned spills, unsecured items on shelves or in high places, and file drawers left open into passageways are prime examples of hazards that will cause accidents if not corrected.

A few quotes from accident reports of negative attitudes are listed:

"I told my supervisor about the walkway before I tripped and fell, why wasn't it corrected then?"

"I've lifted the same item the same way for three years. Why should I change now?"

"I didn't think I needed to wear the splash goggles. No one else wears them."

Attitudes must be changed so that there is an awareness of hazards and the threat these hazards present.

(C. L. Watkins, Safety Specialist)

Ethics

Standards of Conduct

* Civilian and military personnel are prohibited from participating in private business or professional activity having conflict in any way with public interest or agencies of the U. S. Government.

* Navy personnel will not engage in any private business transaction or professional activity involving use or apparent use of information gained through their position.

* Navy position shall not be used in any way to induce or coerce persons or organizations to provide financial benefit to the holder of that position or any organization with which there are personal or business ties.

* This does not preclude Navy personnel from teaching, lecturing or writing nor does it preclude Navy personnel from having financial interests or engaging in financial transaction to the same extent as private citizens not employed by the Government so long as they are not prohibited by law or these regulations.

Our patients write...

All too often we do not take time from our busy schedule to thank and comment those professionals who have done an outstanding job. In this instance I would like to pause and advise you of two outstanding medical officers on your staff.

...After enduring... for some 10 days, I obtained an appointment with your Primary Care Department. On Sept. 9, 1982 at 7:15 p.m., I was examined by Dr. Musliner in a very thorough and professional manner. After some discussion, Dr. Musliner decided that my case should be referred to the... Department on an expedited basis. Upon checking with the corpsman on duty, Dr. Musliner learned that to get an early appointment, he personally would have to call the... Department and set it up. Dr. Musliner kept my records and telephone number and told me that he would set the appointment and call me the next day, which he did.

Dr. Ruggles evaluated my case and determined that (other tests were required) view of the time that had elapsed since the initial attack, Dr. Ruggles decided to perform (one test) immediately. A CAT scan was performed on Sept. 13.

Of particular importance to me was the concern and professional handling of my case by both doctors... my wife was with me and she also was impressed by the concern and dedication. Both my wife and I feel that their responsiveness was instrumental in allaying any fears that something was seriously wrong. Not only did Dr. Musliner go beyond the call of duty, but Dr. Ruggles obtained information on when we would be over the weekend should he need to contact me.

My family and I feel very fortunate to have such fine facilities available to use and also to know that your staff has doctors of the caliber of Doctors Musliner and Ruggles. We would appreciate it if you would pass on to them our heartfelt thanks and appreciation for their interest and concern.

I am confident that with health care of this caliber, your center is having a favorable impact on the retention of active duty personnel. My family and I are most appreciative of this care and are pleased that you are able to offer it to retired personnel such as myself and my dependents.

THE OAK LEAF is published biweekly on Friday, produced commercially with appropriated funds in compliance with NNPR P-35, Rev. Jan. 1974. Deadline for copy is Wednesday noon of the week prior to publication.

Opinions contained herein are not official expressions of the Department of the Navy. THE OAK LEAF receives American Forces Press Service and Navy News material.

Contributions from both staff and patients are welcomed and should be addressed to the Editor of the OAK LEAF, Naval Regional Medical Center, Oakland, CA 94627.

Command Line

(This column permits direct access to command executives by either military or civilian staff members of any grade, rate or rank. Questions on matters impacting the medical center operations as a whole, reports of incidents of abuse or fraud, or items of concern to large numbers of the staff are invited. Please also submit recommendations and report positive information of interest to all of us. Submit comments in any legible written form to the Public Affairs Office for routing. You may remain unidentified if you so wish.)

Phone book revisions

COMMENT: I highly recommend that the base phone book be reformatted and dated to include names, locations and phone extensions of all key personnel, both civilian and military. The argument that the work force is too transient doesn't wash. Key personnel don't rotate that often and, in any case, the phone directory should be updated at least yearly. The reformatting should include listing by service name, with service chief indicated, and a breakdown of individual branches or units within the service. Too, how about a cover of a distinctive color to make the directory instantly recognizable?

REPLY: A new NRMCO Oakland telephone directory has just been published and is in process of being distributed. Its cover is a bright salmon, and it should be instantly recognizable. Your suggestion of including names of key personnel as a separate listing will be considered when it comes time for next year's publication.

More realistic sizes

COMMENT: Why doesn't the Navy Exchange carry more realistic sizes in uniforms and street clothing? The majority of the sizes seem to be 8s and 9s. I don't think the majority of the women on this base wear those sizes.

REPLY: It is not the intent of the Navy Exchange to imbalance stock assortments in smaller sizes. Merchandising and seasonal transition combined with merchandise varieties has created an imbalance of sizes. Efforts to correct this have been ongoing for sometime, and during the past three weeks new arrivals are beginning to correct the situation. In regard to uniforms, most sizes are in stock and any particular requirements will be met by requesting assistance through Exchange personnel.

Slippery curbs

COMMENT: I started working here last winter during the rainy season. I noticed then that the very prettily painted curbs around the front of Bldg. 500 were awfully slippery when wet. This is a real hazard that was brought to the attention of one of the safety specialists who agreed that it was indeed a safety hazard. However, nothing's been done yet about sanding or putting some kind of abrasive material on those curbs. Are we waiting for an injury to occur as proof that something should be done before the next rainy season begins in earnest?

REPLY: Thanks for reminding us about this problem. A work request has been submitted to Public Works for development of a slip-resistant surface on the curb markings.

Larger exterior signs

COMMENT: We need larger signs that can be read from an automobile. The small signs that are in use are so small that you can't read them until you are right next to them. That means stopping and that is not safe.

REPLY: We agree with you, but it's going to take a little time. We hope you have noticed the recently installed large, attention-getting directional signs for emergency vehicles. Other improvements will be made when economically feasible.

Sunday shopping

COMMENT: Why isn't the Navy Exchange open on Sunday—at least the main exchange, alternate, or Mini-Mart? Maybe even just half a day?

New fitness program for Navy personnel

The Navy has established a new health and physical readiness program which will work through local commands to help personnel improve their overall health. The program is detailed in recently released OPNAV Instruction 0.1B.

The program's initial focus will be on physical fitness, weight control and nutrition. Each command will appoint a fitness coordinator to establish policies in these areas. Once these programs are organized, fitness coordinators will address other areas, such as smoking, management of stress and hypertension, drug and alcohol abuse and accident prevention.

Navy services and community health resources at the local and state levels eventually will be incorporated into command programs.

The emphasis on quality of life will include members with fitness goals, such as decreased weight and improved cardiovascular performance. The program's theme, fitness for life, emphasizes personal commitment to long term goals. Having all members fit and functioning at their maximum potential enhances the Navy's combat readiness.

The Naval Military Personnel Command will provide technical assistance to commands to initiate and develop the program. Additional information is contained in OPNAV Instruction 6110.1B.

Questions concerning the program may be addressed to the Special Assistant for Health and Physical Readiness, Naval Military Personnel Command (NMPC-6H), Autovon 224-5742 or Commercial (202) 694-5742.

Transfer/redesignation board meeting slated

The convening date of the 1983 Transfer/Redesignation Board has been set as Feb. 6, 1983.

Applications must be received by Commander, Naval Military Personnel Command (NMPC-211) by Dec. 6, 1983 to be considered by the board. Applications received after the Dec. 6 cut-off will be deferred to the next board, currently scheduled for Aug. 22, 1983.

REPLY: Store hours are established to correlate with traffic patterns for each base. At NRMCO Oakland these are mainly determined by patient appointments at the hospital, i.e., Monday through Friday. This differs from other bases where Saturdays and Sundays may be better utilized with a Monday closing along with the Commissary.

Federal Women's Program

COMMENT: Is there a Federal Women's Program Coordinator here? If so, what kind of information is distributed; what kinds of functions are held to promote the program? If there's none here, why not?

REPLY: When first established, Federal Women's Program (FWP) emphasis was awareness and visibility. Annual, even monthly, sessions were held to make managers and supervisors aware of the woman's role in the working place. At some activities where women are still not fully considered for "male only" jobs and are under-represented, this emphasis is still taking place. However, with the Civil Service Reform Act of 1978 and EEOC Affirmative Action monitoring, greater emphasis was placed on "bottom line" results.

The FWP Manager (FWPM) for NRMCO Oakland is Mary Smith, who is physically located in the Equal Employment Opportunity (EEO) Office on the third deck of Bldg. 500.

The EEO program is the vehicle established to accomplish equal opportunity in employment for all employees in federal activities. Within the framework of the EEO program, the FWP exists to address the special problems and concerns of women in achieving equal employment opportunity. The overall goal of the program is to ensure that women are employed at all levels, in all occupations, and in all segments of the center.

All EEO programs at NRMCO are coordinated with the FWPM. As an EEO specialist, the FWPM is available to receive any specific concerns of women in achieving equal opportunity. A 24-hour message line is available at 639-2554.

Federal Manager's Association

COMMENT: Why isn't there a chapter here of the Federal Manager's Association?

REPLY: Because no one has ever proposed it.

Directories for pedestrians

COMMENT: We need directories for people who are walking—good, readable maps inside enclosed cases, using "you are here" phrase, to tell people where they are in relation to where they want to go. Need one at end of sidewalk before it intersects with main road; another one between PSD and PMT School, and a third between the two Credit Union buildings to identify buildings on top of that hill.

REPLY: Maps posted outdoors, even in enclosed cases, are unfortunately a prime target for vandalism. Perhaps more directional signs can be installed in the future. We'll keep your idea in mind, and thank you, by the way, for your concern for patients, visitors, and other newcomers. Help them with personal directions whenever you can.

Oatis awarded ACD fellowship

Captain George W. Oatis, Jr., Chief of Dental Service and Head of Oral and Maxillofacial Surgery, was awarded a fellowship in the American College of Dentists on Nov. 7 at Las Vegas, as recognition of his "contributions, leadership, and fine examples as a professional person."

The American College of Dentists, organized in 1920, recognizes through fellowship those who have contributed to the advancement of humanity and the profession. Its programs include seminars and workshops and it conducts studies in associated areas of interest to dentistry and service to the public. Fellowship in the college is by invitation only.

Dr. Oatis, assigned here since 1978, has 19 years of service in the U.S. Navy. Prior billets include NRMCO Long Beach where he was Assistant Head, Oral and Maxillofacial Surgery, 1972-74, and NRMCO San Diego, where he was head of the same specialty from 1974 to 1978.

A graduate of the University of Maryland where he earned his D.D.S., the Dental Corps captain completed residencies at Johns Hopkins Hospital, University of Alabama and Naval

Hospital, Philadelphia.

Flying and skiing are his hobbies. He is a flight instructor and owns an acrobatic airplane. His civic volunteer service includes the Boy Scouts, and his church, where is a warden and lay reader.

He and his wife Nini make their home in Moraga. They are parents of three grown children.

Our branch activities

Clinic situated on island named for Zachary Taylor

Naval Regional Medical Center Oakland's Stockton Branch Clinic is located on Rough and Ready Island, four miles west of the city of Stockton.

Rough and Ready Island was first settled in 1850, and named in honor of General Zachary Taylor, 12th President of the United States. The 1,433-acre island's first military installation was built after World War I. In 1960, the Naval Communications Station headquarters moved to the island, and at present, is host to 10 tenant commands. Approximately 400 acres of the island are leased for local farming, and there is also a large wildlife preserve.

The branch clinic itself is 5,350 square feet, with a modestly sized laboratory, x-ray and pharmacy, staffed in support of a full-time physician.

ATTRACTIVE CORRIDOR—Interior of NAVOMSTA Stockton Branch Clinic features wood paneling and clean, uncluttered lines.

Outpatient medical care and referral where necessary, is provided for active duty, retired military personnel, and their dependents living over a 50 square mile area. The clinic provides physical examinations, industrial monitoring and emergency treatment of work-related illness or injury to more than 2,000 federal employees. Additionally, the clinic is the Naval Regional Medical Center's liaison with all commands in the area on medical matters.

The staff consists of Dr. William Babaian, Senior Chief Hospital Corpsman Joe Eastham; Hospital Corpsman First Class Angelo Manluta; Dental Pierce and Peter Franke; Hospital Corpsman Third Class Melvin Williams and Ms. Lisa DuBois.

Update on Navy uniforms

Navy uniforms have undergone some changes recently. To keep Navy members up to date on the changes in enlisted and officer uniforms for both men and women, NES is providing the following checklist. These changes are also outlined in BUPERSNOTE 1020 of Sept. 13, 1982.

- **Standardized Fabric for White and Khaki.** A new fabric has been selected to become the standard for white and khaki uniforms for officers and chief petty officers. It is a 100 percent polyester texturized woven fabric. This fabric will be available in service dress white, summer khaki and summer white in exchanges in March 1983. The above mentioned uniforms are authorized in all existing fabrics until April 1, 1985, at which time the new fabric will be required. Polyester/cotton will remain available indefinitely as the standard for working khaki and female summer white "bravo."

- **Iron-on Breast Insignia.** Qualified individuals are authorized to wear iron-on versions of the enlisted surface warfare specialist, aviation warfare specialist and enlisted submarine insignia on chambray shirts. The insignia will be worn one-quarter inch above the stenciled name above the left breast pocket. No metal breast insignia will be worn on chambray shirts. The iron-on insignia may be purchased at any Navy Exchange uniform shop.

- **Collar Devices.** Collar devices for wear on the blue and khaki windbreakers are currently optional for E-4-E-9s. They are worn in the same manner as collar devices on the short-sleeve white and khaki shirts. The collar devices will be required beginning Jan. 1, 1983.

- **Apprentice Training Graduate Badges.** Authorized for wear for E-1 through E-3s who have completed apprentice training. The badge is worn above the group rate mark in the same manner as the striker's mark until a

striker's mark is earned or paygrade E-4 is achieved. Apprentice training badges will be required beginning Jan. 1, 1983.

- **Jumper-Style Uniforms.** The jumper-style uniforms were prescribable beginning Oct. 1, 1982, for all men E-5 and below. Men in this category are required to have one set of blue and one set of white jumper-style uniforms and may be required to wear them at any time. The coat-style uniform is no longer authorized, but summer blue, winter blue, and summer white uniforms will still be prescribable.

- **Service Dress White.** The service dress white uniform will become prescribable beginning April 1, 1983, for chief petty officers. This date was selected to allow the uniform to be purchased in the new woven polyester fabric that will become the standard by spring 1985. The Navy uniform regulations contain further details on wear.

- **Rating Badges.** Rating badges made of the new woven polyester fabric are currently available for Navy women. The badges are designed to be worn on the optional open collar white shirt of the same fabric and will be required on the shirts beginning Jan. 1, 1983.

- **Gold Rating Insignia.** All former Marines and Marine reservists who join the Navy and qualify for gold rating insignia and service stripes by having fulfilled the requirements for good conduct in the U.S. Marine Corps are authorized to wear gold rating badges and service stripes.

- **Women's White Shirts.** White shirts with epaulets are required for wear with the summer blue and summer white uniforms and authorized for wear with the service dress blue and service dress white uniforms. White shirts with epaulets will be required for wear with service dress blue and service dress white uniforms after Jan. 1, 1983. (NES)

More job openings--some at clinics

Applications will close Dec. 1 for the job of Health Technician, GS-5, at the Naval Supply Center Branch Clinic; Payroll Clerk, GS4 or 5, Comptroller's Service; and Claims Clerk (Typing), GS-4 (two vacancies), in Patient Affairs Service.

Job applications will be accepted until the position of Therapeutic Radiologic Technologist, GS-6, is filled in Radiology Service at Oak Knoll.

Also open until Jan. 19, 1983 are Medical Clerk and Medical Clerk (Typing), GS-4 positions at Oak Knoll and at the Alameda, Concord, Mare Island, Moffett Field, Naval Supply Center and

Treasure Island branch clinics.

Point of contact for all of the above vacancies is Maurine Tinsley, Civilian Personnel Service, 639-2116.

Red Cross cites five who died in Vietnam

A special annual memorial service for American Red Cross personnel who died in Vietnam was held at the National Headquarters in Washington, D.C., last month.

This year's ceremony included a

presentation by their colleagues who served overseas, of a special bronze plaque in memory of the five staff members of the American Red Cross who died in Vietnam in service to the Armed Services.

DISTINGUISHED SERVICE AWARD—Safety Director Matthew Riley displays a plaque recently awarded by the U. S. Department of Labor to Naval Regional Medical Center, Oakland, "for dedicated personal leadership in the implementation of occupational safety and health programs within the Federal Government." The Distinguished Service Award will soon be displayed in the hospital's main lobby.

Chemist, computer positions open here

There are currently openings at Naval Regional Medical Center Oakland for a Chemist, GS 9 or 11, and a Computer Specialist, GS 7 or 9, for career and career conditional employees of federal activities, reinstatement eligibles, or applicants within reach on the Office of Personnel Management register.

Applications will be received through Dec. 5 for the Computer Specialist job, which is located in the Clinical Systems Branch of Management Information Service.

Applications will continue to be accepted for the chemist job until the position is filled. The job is located in the Drug Screening Laboratory.

For further information on either of the two vacancies, call Christine Lessler, Civilian Personnel Service, 639-2116.

Matrimonial Bond

Take stock in America.

U.S. Savings Bonds interest increased

As of Nov. 1, all Savings Bonds purchased and held for five years began to earn 85 percent of the average yield on Treasury marketable securities.

The rate will be adjusted every six months to reflect the average yield. The rate for the current six-month period is 11 percent. There is no upper limit on how much bonds will be able to earn, but there is the protection of a minimum guaranteed rate of 7.5 percent. In other words, should interest rates drop to six or seven percent, Savings Bonds will continue to earn 7.5 percent.

Older bonds automatically will benefit from the new market rate if held five years.

Kudos.....

Comings and Goings-----

"Fair winds and following seas" to the following personnel who have recently departed this command:

LCDR David Thompson, released from active duty.

LT Susan Goodwin, released from active duty.

HM2 Manuel Hernandez, released from active duty.

HM3 Mary Buhalog, released from active duty.

"Welcome aboard" to newly arrived:

CAPT Kenneth Scheidt, ACDUTRA Nuclear Medicine.

CAPT Samuel Powers, Occupational Health.

CDR Elizabeth Stockmoe, Physical Therapy.

CDR Edward Masse, Pastoral Care.

SK2 Gwendolyn Morgan, Drug Screening.

HN Jesse Friesen, Nursing Service.

HM3 Cindy Wiley, Lab Service.

HM3 John D'Angelo, X-Ray.

HM3 Edward McCalley, X-Ray.

HM3 Darmon McClintock, X-Ray.

SK3 Helen Betts, Drug Screening.

MAC Rodolfo DeJesus, Security.

HN Major Suttles, Nursing Service.

Equal opportunity specialists needed

The Navy Equal Opportunity Program is currently being expanded to better respond to the needs and circumstances of the local command. The revision will require quality, career-minded personnel in billets as Equal Opportunity Program Specialists (EOPS). The EOPS will help Commanding Officers to monitor and implement Navy Equal Opportunity efforts. The specialists will be assigned for one tour to a major staff or large command, float or ashore, and at overseas locations. Following this tour, they will return to duties in their rating specialty. Qualifications for EOPS personnel may be found in the Trans Man, Chapter 920. There is a wide variety of jobs available for personnel entering the program. Personnel seeking more information on the program should contact their Command Career Counselor, or call the Special Programs Detailer at Autovon 225-9316/225-9382 or Commercial (202) 695-316/695-2982.

BOMAN'S BULL—Ensign Mark Boman became possessor of the Medical Service Corps bull when its former custodian, Ronald Logan of Pharmacy, was promoted to LTJG. The command's new bull ensign is Chief of Military Manpower Service.

SRB requests will require 'precertification'

New Selective Reenlistment Bonus (SRB) procedures, requiring "precertification" of SRB requests, will become effective Dec. 1. The new procedures are being implemented to improve accuracy of bonus payments and optimized management of available funds.

Under precertification procedures, commands will submit data in a formatted message to the Enlisted Personnel Management Center (EPMAC, Diary New Orleans), the Navy Finance Center (NFC) and Commander, Naval Military Personnel Command (NMPC-483). NFC will compare the information to pay record data and provide a precertified bonus amount to NMPC for approval.

Selected units in the Atlantic Fleet have been testing the SRB Precertification System since Nov. 1. Precertification of all SRB requests will become mandatory throughout the Navy Dec. 1.

NMPC will continue to be the point of contact regarding SRB authorization requests. Specific details and guidance are available in the recently revised SRB instruction, OPNAVINST 1160.3A of Oct. 27, 1982.

Remember: JCAH is still coming!

New PT head wears Army medal

Commander Elizabeth A. Stockmoe, new head of Physical Therapy, holds an Army (yes, that's right, Army and not Navy) Commendation Medal. Although she has never served in the ground service, she earned the medal for her contributions while assigned as a Navy officer with the Army's Academy of Health Sciences at Ft. Sam Houston, Tex.

The physical therapist, who arrived here in late October from a previous billet with National Naval Medical Center, Bethesda, is originally from Windsor Locks, Conn.

She is a graduate of Tufts University and has been in the Navy for 16 years. Additional duty stations have been with Naval Hospital, Great Lakes, Ill.; Naval Hospital, Quantico, Va.; and Naval Regional Medical Center, Charleston, S.C.

Commander Stockmoe and her husband Lyle are making their home in San Ramon. The couple has six children, and the physical therapist is also a step-grandparent.

Off-duty interests are camping and bowling.

CDR E.A. Stockmoe

MTMC issues holiday travel tips

The Military Traffic Management Command is urging servicemembers to carefully plan their trips and make reservations, as early as possible for leave travel during the holiday season. This should make it easier to shop around for the discount fares available to military personnel traveling on leave at their own expense and help avoid some of the rush and congestion at transportation terminals.

Fare discounts, ranging from 25 to 50 percent, are available on most airline and Amtrak routes. Travelers should check with their local Scheduled Airline Traffic Office (SATO), travel agent or airline to make sure they are getting the best price available, since many promotional fares may be even lower than the military discount.

Many services are available to military members and their families transiting airports around the country. The United Service Organizations (USO) has centers in 18 U.S. airports and five terminals overseas. The centers provide information, refreshments and recreation facilities. Some have babysitting services, nurseries and interpreters. Hours vary from center to center, but all are open during heavy traffic hours.

Personnel who experience service-related problems during their travel can get help at the military information desk located in major U.S. air terminals. Assistance can also be obtained

from the nearest military installation, regardless of the traveler's own branch of service. Additionally, the American Red Cross, Traveler's Aid and the various USO Centers listed in local telephone directories are available for help.

Military personnel are urged to report excellent service or travel problems to the Military Traffic Management Command (MTMC), Washington, D.C. 20315, on a DD Form 1341, which can be obtained from your local transportation office. MTMC uses these reports to ensure that servicemembers continue to receive high quality service.

Tuition aid available

Tuition assistance is available for Navy personnel enrolled in approved off-duty education and training courses. Tuition Aid, a Navy CAMPUS Program, pays tuition costs and related fees for Navy personnel enrolled in accredited colleges, universities, trade, technical and public schools.

Personnel enrolled in high school completion courses receive 100% tuition aid. Enlisted members E-5 or above, with less than 14 years service, receive 90% of tuition costs. Officers and other enlisted taking post-secondary courses receive 75%. Officers incur a two-year service obligation following the completion of the training.

NEW PROGRAM COORDINATOR—LCDR Julia Washington (left background), Diabetic Nurse Educator who has collateral duty as the Command Coordinator for Equal Opportunity Programs, meets with a Navy Medical Command EO representative from D.C., and members of the local training team.

Military families near service hospitals must use them in lieu of CHAMPUS

The Department of Defense has instituted several cost reduction initiatives in the Civilian Health and Medical Program of the Uniformed Services (CHAMPUS) to provide better use of the department's health care dollars.

Deputy Secretary of Defense Frank C. Carlucci said the overall thrust of the new initiatives will be to **reduce the use of civilian medical facilities by military families who reside within 40 miles of a military hospital** and preserve CHAMPUS benefits for those families who live too far away to use military hospitals.

Certain cost-saving measures such as tightening up on the non-availability statements have already gone into effect. These statements are required before families who live within 40 miles of military hospitals can get non-emergency inpatient care in civilian hospitals, and will only be used when the needed care cannot be provided by the military hospital.

The following new initiatives will be implemented, with **some starting Jan. 1, 1983** and others being phased in over the next two years.

Zip codes to determine non-availability statement requirement

The zones around all military hospitals within which residents must get non-availability statements will be changed in the coming months.

Rather than the 40-mile radius by air that presently determines the zones, a new system of adjacent zip codes will be issued. This will mean that additional families in outlying areas will be required to obtain non-availability statements before using civilian hospitals for non-emergency inpatient care under CHAMPUS. Families on the periphery of the present zones, that is **those who live approximately 35 to 50 miles from military hospitals, will have to check with the local military hospital to find out if their homes fall within the new boundaries.** Start up dates and other details will be released before the new system goes into effect.

New medical service area for Washington, D.C.

The zones around the five military hospitals in the Washington, D.C. area, in which residents must obtain non-availability statements will be redefined into one large medical service area. As of Jan. 1, 1983, non-availability statements will not be issued if any of the five hospitals can provide the needed care.

Non-availability statements needed for outpatients in three cities

The Army, Navy and Air Force will each designate one of their hospitals around which non-availability state-

ments will be required before nearby military families can use civilian facilities for outpatient care. The three hospitals should be designated within the next two months. Details on this initiative will be released at a later date. **Study of caps on CHAMPUS use in four cities**

The cost-saving implications of limiting the use of CHAMPUS funds will be studied in the zones around the military hospitals in Denver, Seattle, **San Francisco**, and San Antonio. Under this study, limits will be set on the number of non-availability statements for which CHAMPUS funds would be used. It is important to note that the study **will not limit the availability of necessary civilian or military care to beneficiaries, rather it will examine alternative ways to pay for the civilian care.**

National goals set to reduce non-availability statements

Each military service will set goals for reducing the number of non-availability statements issued by military hospitals in Fiscal Year 1983.

Services to pay for care near service hospitals

Each military service has been encouraged to work with the Assistant Secretary of Defense (Health Affairs) to study the possibility of reallocating funds so that **each military hospital can assume the fiscal responsibility for health care received at civilian facilities by those military families residing within the approximately 40 mile zones around its hospitals.**

Contracts with local health professionals

The Department of Defense is exploring ways to contract with local civilian health professionals to **expand the military hospital system's capacity to provide care for more patients.**

"These and other cost-saving initiatives on the part of the DoD and the military services," Mr. Carlucci said in conclusion, "are critical to controlling the awesome spiral in our health care costs. Hopefully these moves will allow us to preserve the present level of benefits for military families everywhere."

Tougher sentences for drug convictions

Sentences for military people convicted of drug offenses are much tougher as the result of a Oct. 1 change to the "Manual for Courts-Martial." President Ronald Reagan has issued an executive order amending existing regulations and clarifying prosecution and sentencing procedures for military

Assertion training available for those who feel isolated

Do you sometimes feel taken advantage of? Are you someone who is still thinking about what you could have said or how you could have behaved three hours after an incident has happened? Have you ever gotten angry and blown up at something that should not have caused such an extreme reaction? These are a few of many indicators that suggest you may not be behaving in an assertive manner.

What is assertive behavior? Literature on assertion training distinguishes between nonassertive, aggressive and assertive behavior. When a person behaves nonassertively, he or she is self-denying and inhibited from expressing his feelings. The nonassertive individual often feels anxious and hurt as a result of inadequate behavior and allows other people to make choices for him. He tends to avoid many social situations because of his anxiety.

The aggressive individual may appear expressive and to get what he wants in the short run, but he, too, has problems behaving assertively. Contrary to popular belief, aggressive behavior is not assertive behavior. Aggressive behavior tends to hurt others and results in people avoiding the individual. While the nonassertive individual appears to have no respect for himself, the aggressive individual shows no respect for others. Both nonassertive and aggressive behavior can result in social isolation.

Assertive behavior, on the other hand, allows the individual to express his feelings, and maintain respect both for the individual and the person with whom he is dealing. The individual who behaves assertively feels good, makes his own choices, and often achieves his goals.

What is assertion training and how can it help? Assertion training focuses on social skill learning and anxiety reduction. It teaches the individual: (1) to become aware of one's personal rights and to behave in ways that respect one's own rights as well as the rights of other people; (2) to recognize nonassertive, aggressive, and assertive behavior; (3) to identify and reduce

thoughts and feelings that hinder assertive behavior; and (4) to develop assertive behavior by role-playing techniques.

In addition to enhancing one's self esteem in relations, assertion training can result in the reduction of somatic complaints that are often physical correlates of internal stress. As guilt and anxiety are reduced, symptoms such as headaches, back and neck aches, gastric distress, and general fatigue may improve.

Where can you get help or find out more about assertive behavior? The Outpatient Psychiatry Department is offering an assertion training group beginning Friday, Dec. 3, at 9:30 a.m. in the department on the fourth deck. The group will be led by Mavis Mizumoto, M.A., psychology intern, and classes, not to exceed two hours each weekly session, will run 6-8 weeks. Please call 639-2187 if you have any questions or to arrange for a screening interview.

New CHAMPUS claims processor

Beginning Jan. 1, 1983, Blue Cross of Washington/Alaska will be the new claims processor for four Southwestern states. They will meet with military sponsors and their families including those in Oakland, over the next few weeks to explain the transition from the present processor, Blue Shield of California.

Persons living in Arizona, California, Nevada and New Mexico will be affected by this change. CHAMPUS beneficiaries should continue to send their CHAMPUS claims to Blue Shield of California for processing through Dec. 31, 1982.

A transition meeting for CHAMPUS beneficiaries will be held at 7 p.m., Dec. 2, in Oakland at the Travelodge, 150 Hegenberger Road.

For more information, CHAMPUS beneficiaries may call the Health Benefits Advisor at each local military installation.

Beginning Jan. 1, 1983, Blue Cross of Washington/Alaska will offer a toll-free telephone number for the use of military families in the four states mentioned. The number is: 800-426-802.

The new claims processor's mailing address for California is Blue Cross of Washington/Alaska, P.O. Box 1231, Seattle, Wash. 98111.

LENDING A HAND—An Army aircrewman helps Navy medics roll a patient to a waiting ambulance shortly after a helicopter medevac from Fort Ord to Oak Knoll.

You'll Be Glad You Used Your Head As A Hatrack!

members charged with a contraband drug offense.

Formerly, naval personnel charged with drug offenses were prosecuted under Article 92 of the UCMJ for violations of U. S. Navy Regulations, which permitted a maximum penalty of two years confinement. As a result of the recent change to Navy regulations, prosecutions will now be conducted under Article 134 of the UCMJ, a general article, with much harsher punishment limits.

The effects of the executive order are far reaching. Not only are the maximum possible sentences longer, but the change to the "Manual for Courts-Martial" provides definitions of all drug offenses. Manufacture (including growing), distribution and possession or introduction with the intent to distribute controlled substances are defined as offenses. The offense of distribution, which includes sale or any transfer of drugs, eliminates the so-called "agency defense" to a sale. An agency defense was a sale in which the accused was only the middleman to a drug transfer. "I was only holding it for my buddy" is now prosecutable under the distribution statute.

The new sentences are:

- Up to 15 years at hard labor, dishonorable discharge and forfeiture of all pay and allowances for convictions

anta's mailbag getting in gear

Children can receive a letter from
anta complete with North Pole
stmark, thanks to the Military Airlift
mmand's Detachment 2, 11th Air
ather Squadron at Eielson AFB,
aska
What began in 1954 as a program
children of U.S. servicemembers
tioned overseas blossomed into an
ual project bringing good cheer to
ousands of children over the world.
It's Santa's Mailbag Program, and it
rks this way:
Children write a letter to Santa
us. Relatives or friends answer the
er as if it were from Santa, then
d the letter, inside a stamped
velope addressed to the child, to
achment 2, 11th Air Weather

Squadron, Eielson AFB, Alaska 99702.
Answers are returned with Santa
art work and the North Pole postmark
stamped on the envelope.
Occasionally letters are received
without the letter from a relative or
friend or with no return stamp. When
this happens, volunteers reply with a
form letter. They do it all on their off-
duty time, and receive no funds from
the government. Donations from
friends and base members usually help
pay for stamps.
Santa's "helpers" urge parents to
be sure to **include the self-addressed
stamped envelope and the return let-
ter and to mail before Dec. 1**, so let-
ters can be returned by Christmas.

Thanksgiving—EVERY day

By Father Edward J. Masse
LCDR, CHC, USN

Perhaps we Americans have been blinded by the rapid growth of our nation and
have lost sight of the original meaning of Thanksgiving. Sometimes we get confused
in the "big sell," the holiday cards, fake pilgrims, pumpkins and turkey but this isn't
the real meaning of this great holiday. Let's look back in history and see what we can
learn from our pilgrim fathers.
The day began as an authentic demonstration of Thanksgiving by the settlers of
Plymouth, Massachusetts. In 1620, the year before the first observance, those brave
and noble people reached a shore, uttered their thanks and continued their journey of
freedom. They had discovered land and new life. Today, there is a rock which
Americans have named, "Plymouth Rock," marking the traditional landing place.
There is no church, only a rock. Yet, the gathering of pilgrims is strangely reminiscent
of the large assembly of Israelites before the temple Solomon built. In both gather-
ings, people offered thanks to the Lord; in another sense, both groups had arrived
at—the full meaning of life with God.
Life with God means acknowledging our dependency on the Supreme and render-
ing proper thanks and praise always. Thanksgiving is just one reminder of how great
our God is. As Americans, we have many blessings such as freedom, peace and
justice for all and with such marvelous signs of His love we need to celebrate
Thanksgiving—not just once a year, but every day of our lives.

Navy personnel receive 'snapshots'

All Navy members on active duty will
receive a "statement of Military Com-
pensation" this month. The state-
ments, which will reflect a Oct. 31
"snapshot" of the value of an
individual member's compensation
package, commonly are provided to
employees in private industry and now
will be issued yearly to active duty per-
sonnel.
Included in the three-page docu-
ment are sections named "direct com-
pensation," which itemizes basic com-
pensation elements common to all
members; "indirect compensation,"
which assigns a cash value to govern-
ment-funded items such as retirement
pay; "expense allowances," which
itemizes reimbursements such as varia-
ble housing allowance and family
separation allowance, and "additional
considerations programs," which
attaches a value to benefit programs

and other considerations associated
with military service.
For the direct and indirect compen-
sation categories and expense
allowances, dollar amounts will be
centrally computed for each individual.
Items which are not applicable to a
member, such as the value associated
with retirement pay for a non-careerist,
should be subtracted from the total
value. The statement's additional con-
siderations/programs section will
require members to provide their own
estimates of the value of items such as
commissaries, exchanges and bonus
programs, since their value depends
upon individual circumstances.
The statement will provide the
individual an easily understandable
approximation of the total value of his
or her compensation package. It will be
useful as a personal financial planning
aid and for such purposes as educating
prospective mortgage lenders on the
worth of an individual's compensation
in order to qualify for a mortgage.
The statement will be accorded the
privacy normally provided to individual
pay matters.

(Continued from Page 6)

• Wrongful use, possession,
manufacture or introduction of
amphetamine, cocaine, heroin, lysergic
acid diethyl amide, marijuana (except
possession of less than 30 grams or
use of marijuana) methamphetamine,
opium, phencyclidine, secobarbital and
schedule I, II, and III controlled sub-
stances are punishable by dishonorable
discharge, forfeiture of all pay and
allowances and confinement at hard
labor for up to five years.

• Wrongful possession of less than
30 grams or use of marijuana, and
wrongful use, possession, manufacture
or introduction of phenobarbital, and
schedule IV and V controlled sub-
stances are punishable by dishonorable
discharge, forfeiture of all pay and
allowances, and confinement at hard
labor for a maximum of two years.

If the offense is committed while
"the accused is: on duty as a sentinel
or lookout; on board a vessel or aircraft
used by or under the control of the
armed forces; in a hostile fire pay zone;
or in time of war, the maximum period
of confinement at hard labor and for-
feiture of pay and allowances
authorized for such offense shall be
increased by five years."

The changes are significant. The
executive order and subsequent
changes to Navy regulations clarifies
that all drug offenses are prosecutable
under Article 134 of the UCMJ and
subjects all naval personnel to
increased punishment under this
change to the "Manual for Courts-Mar-
tial" (NES)

The following new additions to the
Navy Medical "family" have arrived at
Naval Regional Medical Center, Oak-
land:
A baby boy to Lieutenant Com-
mander Ellsworth Weatherby, III,
Radiology Department, and his wife
Cynthia on Nov. 6.
A baby boy to Hospitalman
Christopher H. Eades, Naval Hospital
Lemoore, and his wife Victoria on Nov.
9.
A baby boy to Lieutenant John L.
Olson, Internal Medicine Department,
and his wife Deborah, Nov. 10.
A baby boy to Lieutenant Com-
mander Michael A. Cassaday, Internal
Medicine Department, and his wife
Diane on Nov. 11.
A baby boy to Chief Hospital Corps-
man William A. Alexander, Fleet
Hospital Support Office, and his wife
Rose on Nov. 12.

VETERANS' VETERAN—Miss Mary Valle has served the Veteran Hospitals' Christmas Committee for 57 Christmas seasons. The committee is comprised of community volunteers who annually donate their time and money to make the holidays a bit more cheerful for inpatients of Naval Regional Medical Center Oakland and Bay Area VA hospitals.

Special Services offers bargain

For a very limited time (until Jan. 1), Special Services offers a still further discount on admissions to Great America.

Tickets are now available in the Bldg. 38 office for \$10 each. Normal admission is \$13.95.

Call Sally, Ext. 2479, if you have any questions.

Football brunch to feature Army-Navy game

KPIX, Channel 5, will televise the Army-Navy game on Saturday, Dec. 4, with kickoff time scheduled for 9:35 a.m.

To celebrate the occasion, USS MARS/NAS Alameda will sponsor a brunch starting at 8 a.m. in the NAS Alameda Officers' Club Main Dining Room.

Contact points for this event are CDR Karl Kowalski, USS MARS, Telephone 869-3880; CDR Jerry Daniels, NAS Alameda, 869-3957, or CWO Bruce Doyle, Commissary Officer, 869-2580.

Medical center hosts Christmas committee

Naval Regional Medical Center, Oakland hosted the principals of the Veteran Hospitals' Christmas Committee at a dinner in the Officers' Club on base Nov. 16.

The event is an annual appreciation for the loyal volunteers who come to Oak Knoll and Veterans Administration hospitals each year to decorate, entertain and pass out Christmas gifts to those patients who are hospitalized over the holidays.

Mr. Arden Kolsrud of Lawrence Livermore Laboratories is this year's chairman for the committee. Although a new chairman is appointed each year, Miss Mary Valle, the Secretary-Treasurer, has always provided the continuity. For 57 years she has been involved with the project, which has included the Oak Knoll hospital for the 40 years of its existence.

The dinner program included a showing of slides depicting the decorating and wrapping of gifts, both here and at VA hospitals, during recent years.

A duet also entertained the partygoers with Hawaiian songs and music.

CHAIRMAN—Mr. Arden Kolsrud, committee chairman, addresses dinner guests at the Oak Knoll Officers' Club.

Christmas season starts at Dunsmuir

A visit to Dunsmuir House and Gardens is a nifty way to get into the holiday spirit and is a tradition this time of year in Oakland.

Beginning tomorrow (Nov. 27) through Dec. 5, the mansion at 2960 Peralta Oaks Court will be open to visitors from 10 a.m. to 4 p.m., Sunday through Thursday; 10 a.m. to 9 p.m. on Fridays and Saturdays.

It is tradition to:

- Tour the decorated mansion.
- Visit the "Americana Collection" exhibit.
- Shop in the Greenhouse Boutique.
- Gather holiday decorating ideas.
- Listen to the sounds of Christmas.
- Brunch, lunch or supper at the Calico Pantry.
- Stroll the Dunsmuir Gardens.
- Learn the history of Dunsmuir House.
- See the Christmas lights after dark.
- Share the joy of Christmas.

Donations are Adult \$6, Senior, \$5, and Junior \$2.

The attraction may be reached by taking I-580 SW from Oakland to 106th Ave. exit, or I-580 NE from Hayward to Foothill Blvd. exit.

MUTUAL INTERESTS—Rear Admiral Robert C. Elliott (left) chats with Dr. Edgar A. Reed and Mr. Marvin O'Rear, both of the Veterans Administration Hospital in Livermore.

MELEKALEKEMAKA—Two Hawaii-born musicians who now live in the Bay Area, entertained those attending the Veterans Hospitals' Christmas Committee in the Officers' Club on Nov. 16.

Basketball season opens here

The 1982-83 Intramural Basketball League play opened at Oak Knoll on Nov. 17.

In Game No. 1, ENT whipped NP 63-23. High scorers were Settles (ENT), 18 points, and Geer (NP), 12 points.

Surgery took Radiology 39 to 35 in the second game, with high scorers Williams of Surgery at 13 points and Odom of Radiology, 12.

OPD didn't show and therefore forfeited the win to CPO in the third game.

Standings after the first week's play of the season:

Team	W	L
ENT	1	0
Surgery	1	0
CPO	1	0
Special Services	0	0
NP	0	1
Radiology	0	1
OPD	0	1

Other games scheduled for the season (all on Wednesday nights beginning at 6 p.m.) are Dec. 2, 9, 16; Jan. 5, 12, 19, 26; Feb. 2, 9, 16, 23; March 2, 9. Playoffs will then begin.

Some airport!

Mr. Loyd Cox, an Army veteran and an outpatient at Naval Regional Medical Center, Oakland, stopped by the *Oak Leaf* office the other day to show us a souvenir postcard of the 1939 Golden Gate International Exposition/World's Fair on San Francisco Bay.

As most everyone knows, the famous fair was held on Treasure Island, which was man-made especially for the exposition. The site today is, of course, a naval station.

What most of us probably didn't know, but what is printed on Mr. Cox's postcard is "... (the) man-made land (is) destined to be a great airport."

Tip for ski fans

Twenty-four hour ski and California road conditions may be obtained by calling local numbers:

California Auto Association (Ski Conditions)—864-6440

California Highway Patrol (Road Conditions)—557-3755

Disneyland for \$9

Special Services has military discount tickets for Disneyland for \$9. They are good until Feb. 27, excluding Christmas Day thru New Years Day.

Information on other holiday festivities at the attraction may be obtained from Sally at 639-2479

Naval Regional Medical Center, Oakland, California

Operational Readiness... through health care to the Navy family

Friday, December 10, 1982

Vol. 44, No. 23

MUTUAL INTERESTS—Brigadier General Frank F. Ledford, Jr., Letterman Army Medical Center commander, paid a recent visit to Naval Regional Medical Center Oakland and conferred with his counterpart, Rear Admiral Robert C. Elliott.

Not over six months

Enlisted advancements delayed to save costs

Due to uncertainty as to the date of passage for the FY-1983 Appropriations Bill and its level of funding, certain cost-saving actions, including a delay in enlisted advancements, are necessary. In no case will any individual's advancement be delayed more than six months. The postponements were announced in NAVOP 129/82.

Personnel selected from the September 1982 E-4/5/6 advancement examination who would have been advanced between January 1983 and May 1983 will now be advanced in June 1983. Selectees from the June 1982 E-7 Selection Board who would have been advanced between February

1983 and July 1983 will now be advanced in August 1983. Selectees from the March 1982 E-8/9 Selection Board who would have been advanced between January 1983 and May 1983 will now be advanced in June 1983.

As previously announced in NAVOP 118/82, officer promotions for November and December were also delayed.

Both of these actions will be reviewed after passage of the FY-1983 Appropriations Act and adjustments made according to funds finally made available for the "military personnel" appropriation.

Testing begins for USM program

Last Monday selected departments at this center became pilots for testing the implementation of Uniform Staffing Methodologies (USM).

This program, mandated by Congress to the Department of Defense in 1976, accounts for and analyzes health care delivery staffing utilization and needs. The method measures actual productive time applied to mission accomplishment and relates the productive time to standardized measures of workload.

The permanent, mandatory reporting system affects all personnel (military, civilian and volunteer) within the region. It is a link between FORSTAMPS/SHOROC program and the Uniform Chart of Accounts (UCA) currently in use.

Data is collected and audited at the level of the individual. The information will be analyzed each month at work center level as defined by UCA, with quarterly reports to the Naval Medical Command in summary form as prescribed in DOD6010.11-M (USM Manual). Information produced by USM will be used in decisions affecting personnel resource allocation throughout

the Department of Defense, via each Service Secretary.

The Management Analysis Branch staff of Management Information Service, together with Military Manpower Service, are currently designing a method of accurately depicting the use of manpower within the region. Project coordinator is Mr. Rick A. Suerth, Head of the Management Analysis Branch. Ensign Mark O. Boman, Chief of Military Manpower Service and Mr. Herbert Lindemann, Chief of Civilian Personnel, are participating as members of the project group in the development, testing and implementation of USM and in site training of personnel in its use.

"Full cooperation from all hands is imperative in the development and implementation phases, and in the maintenance of this program," officials said. An instruction and user's manual will be distributed this month. Department heads and chiefs of service should appoint a member of their staff as an USM coordinator to collect data for submission as directed.

The command has taken a keen interest in this program and expects all hands to comply.

Health care mission

New slogan highlights Line Navy and family

"Operational Readiness... through health care to the Navy family," is the new slogan of Naval Regional Medical Center Oakland and its branch clinics.

The phrase, typifying our mission, is a minor revision of a slogan submitted by Nurse Corps Captain Alma M. Gomes, Regional Nurse Coordinator.

The slogan now becomes part of the permanent nameplate for the *Oak Leaf* and will also be imprinted on the hospital's guide and directory. Other possible use will be in future exhibits and displays, and on certain types of stationery. All activities of the command are encouraged to use it whenever and wherever appropriate.

More than 60 ideas for a slogan were received and selection was delayed while all were carefully considered. The entries come from numerous military and civilian personnel at this center and at branch clinics. One was submitted from a visiting Rear Admiral.

Several slogans were considered appropriate and many were amusing. In

the latter category was one suggesting the phrase, "The Best Little Health House in Oakland."

Early February inspection probable

According to the most recently available information, Naval Regional Medical Center Oakland may expect a representative of the Joint Commission on the Accreditation of Hospitals (JCAH) sometime in early February.

Captain Paul Daniel, Director of the Quality Assurance Division at the Naval Medical Command, is also expected to visit here in January to review progress.

Local officials said the JCAH inspection was postponed by the Chicago headquarters due to a burgeoning workload. The commission inspects civilian, as well as military, hospitals, with recent increased emphasis on quality assurance in health care.

Health benefits open season extended to December 23

Open Season for the Federal Employees Health Benefits (FEHB) program has been extended an additional 13 calendar days, according to an announcement from Donald J. Devine, Director of the Office of Personnel Management (OPM).

Originally scheduled to run from Nov. 22 through Dec. 10, the Open Season is being extended to Dec. 23. The Open Season provides federal employees an opportunity to change their present health benefits coverage or to select a new benefits program from among the 131 separate benefit providers.

"Without this extension, it is possible that some federal employees would not receive needed enrollment information in a timely manner due to delays in the distribution process," Devine noted. "I want to insure that everybody receives that information in a timely

fashion and with an appropriate period to consider their needs and make decisions."

Devine also noted that copies of the Government Employees Hospital Association Benefit Plan brochure contain an error on its page three. A correction sheet is being made available to agencies on a priority basis. The brochure sent to enrollees directly from the GEHA office in Kansas City, Mo., and those sent to retired federal employees do not require correction.

To assist in processing FEHB paperwork during the Open Season, 10 persons currently enrolled in the District of Columbia's Vocational Rehabilitation Services Administration have been hired as temporary employees by OPM.

Civilian paychecks smaller in January

Beginning with the first pay period in January 1983, all federal employees will have 1.3 percent of their salaries deducted for Medicare under the Social Security System.

These deductions will qualify federal employees for Medicare benefits upon retirement from civil services.

Bi-weekly deductions will range from \$4.34 for Grade 1, Step 1 (no special rate), to \$28.75 for Grade 15, Step 7. To find your specific deduction, simply take 1.3 percent of your gross, bi-weekly pay (if your annual salary does not exceed \$35,100).

A party invitation from Red Cross

All Naval Regional Medical Center Oakland staff members and patients are invited to the annual Red Cross "Holiday Open House" in the third floor conference room of Bldg. 500 on Friday, Dec. 17 from 10:30 a.m. to noon.

Editorial---

Our patients write...

During a recent admission to your hospital, the surgical service treated... (me). I am not surprised that the staff was attentive to duty, warm and friendly. Even the housekeeper displayed these qualities.

I, of course cannot name all the people whose skills and disciplines contributed to my well-being while in the hospital. Getting them all to work as a team is what makes it go, and we know everyone is important. But the surgical team was made up of Doctors Mayo, Zech, Pugh and Reed, and a nurse named Herrera spent much time skillfully keeping the intravenous plumbing going for two weeks.

This was my first time in your hospital because of my recent move to this area. This problem you solved for me had been presented to other doctors and emergency room operations without significant results. Because of this, I especially appreciate your emergency room service where the key diagnostic decisions were made and which ended in such favorable results for me. I was seen there without delay at 10:45 in the evening by a Dr. Bradbury who directed the hospital effort for my benefit in what must have been a complicated series of procedures that did not produce (a) diagnosis until 4 a.m. While she was seeing to the needs of other patients as well, I saw no delay as I moved from step to step. While she was supported by the hospital staff, it was she who saw the problem, applied her professional knowledge of the medical disciplines, issued the orders and lead the staff in their execution. And... she didn't miss where others had. I'm sure this was just a routine performance for her, but it wasn't for me, and I'd give high marks.

Fred C. Herriman
Commander, U.S. Navy
Pleasant Hill

...

On Oct. 6, 1982 I was admitted to the Oak Knoll facility. . . Since one hears all the negative comments regarding treatment at your command as well as others, I felt it only appropriate to express my feelings and impressions.

The care I received was outstanding in all respects. I was attended to in oral surgery by Captain Oatis and LCDR Baker. They were thoughtful and considerate in my treatment and I was informed at all times what was being done and its purposes. They imparted the feeling to me that they were genuinely concerned and in so doing eliminated needless worry on my part.

I was examined and seen several times each day by LCDR Caldwell, and again I was made to feel confident I was in good hands.

I was assigned to ward 6 West when admitted and I cannot praise the ward staff enough for the excellent treatment I received. I wish I could remember the names of all these fine professionals so I could thank them individually.

I know I have not included names or positions of all who are deserving of praise, but only because I don't know their names. It is my hope that by expressing my thoughts to the Commanding Officer these persons may know their efforts were greatly appreciated by this patient.

Joseph R. Averl

Oak Leaf announces publication dates

Oak Leaf readers and contributors are reminded that the Dec. 24, 1982 edition will be the final issue for the calendar year. Copy deadline is Dec. 13, two days ahead of normal.

Publication will resume on Jan. 28 (copy deadline Jan. 19) and every two weeks thereafter.

Your editor wishes all of you a merry—and meaningful—holiday season.

Following are Calendar Year 1983 publication dates, together with deadline dates for each edition:	
Publication Date	Copy Deadline
Jan. 28, 1983	Jan. 19, 1983
Feb. 11, 1983	Feb. 2, 1983
Feb. 25, 1983	Feb. 16, 1983
March 11, 1983	March 2, 1983
March 25, 1983	March 16, 1983
April 8, 1983	March 30, 1983
April 22, 1983	April 13, 1983
May 6, 1983	April 27, 1983
May 20, 1983	May 11, 1983
June 3, 1983	May 25, 1983
June 17, 1983	June 8, 1983
July 1, 1983	June 22, 1983
July 15, 1983	July 6, 1983
July 29, 1983	July 20, 1983
Aug. 12, 1983	Aug. 3, 1983
Aug. 26, 1983	Aug. 17, 1983
Sept. 9, 1983	Aug. 31, 1983
Sept. 23, 1983	Sept. 14, 1983
Oct. 7, 1983	Sept. 28, 1983
Oct. 21, 1983	Oct. 12, 1983
Nov. 4, 1983	Oct. 26, 1983
Nov. 18, 1983	Nov. 9, 1983
Dec. 2, 1983	Nov. 23, 1983
Dec. 16, 1983	Dec. 7, 1983
Dec. 30, 1983	Dec. 21, 1983

(Above schedule subject to change due to unforeseen emergencies.)

Holiday tips that bear repeating

The Christmas/New Years season, perhaps more than any other holiday time brings to most people special feelings of love, life and hope for a bright future. It is ironic then, that each year this joyous season is a time of accident-caused tragedy for thousands of families. The very nature of the seasonal celebrations pose more hazards to people and property than at any other time of year. Party-going, cooking and baking, decorating, traveling, gift-giving and other activities must be approached with safety as the first consideration.

Here are some hints to keep your holiday safe:

- Be sure to obtain a fresh tree a few days before Christmas. Test it to see if the needles are not dried out and already falling. Cut the trunk diagonally, a little above the original cut. Keep the tree in water or wet dirt or sand until used. When you bring it indoors, use a stand that contains water, and keep it filled.
- Make sure the tree is not located near a fireplace, radiator, stove, TV set, or any other source of heat. Never block exits by placing a tree in the line of traffic. Remember these same rules if you assist in decorating a church, school or assembly room.
- Use only lights and wiring with the Underwriters Laboratories label. Make sure that extension cords, if used, do not present a tripping hazard. Never overload circuits by having too many plugs in one outlet. Check lighting sets from previous year for frayed wires, loose connections and broken sockets.
- Many tragic fires start when there is no one at home or when the family is in bed. For this reason, do not leave the lights burning too long and always turn them off when you retire for the night.
- Candles should never be used on your tree. Angel hair and snow spray can be flammable if they are used together in decorating. You may use one on a tree, but never both. Electric lights should not be used on metal trees because of the danger of electrocution. Glass, metal or non-combustible materials are safest for decorations.
- Don't smoke near the tree, and be sure those cigarettes butts are disposed of safely.
- Take the tree down when needles start to fall... and remember, a dry tree can burn away in less than 27 seconds! (Safety Manager)

Conduct standards for Navy personnel

- Navy personnel (military or civilian) shall not engage in criminal, infamous, dishonest, immoral, or notoriously disgraceful conduct, or other conduct prejudicial to the government.
- Navy personnel shall avoid any action, whether or not specifically prohibited which might result in or create the appearance of:
 - a. Using public office for private gain.
 - b. Giving preferential treatment to any person.
 - c. Impeding government efficiency or economy.
 - d. Losing complete independence or impartiality.
 - e. Making a government decision outside official channels.
 - f. Affecting adversely the confidence of the public in the integrity of the government.

THE OAK LEAF is published biweekly on Friday, produced commercially with appropriated funds in compliance with NNPR P-35, Rev. Jan. 1974. Deadline for copy is Wednesday noon of the week prior to publication.

Opinions contained herein are not official expressions of the Department of the Navy. THE OAK LEAF receives American Forces Press Service and Navy News material.

Contributions from both staff and patients are welcomed and should be addressed to the Editor of the OAK LEAF, Naval Regional Medical Center, Oakland, CA 94627.

Command Line

This column permits direct access to command executives by either military or civilian staff members of any grade, rate or rank. Questions on matters impacting medical center operations as a whole, reports of incidents of abuse or fraud, or concerns of concern to large numbers of the staff are invited. Please also submit recommendations and report positive information of interest to all of us. Submit comments in any legible written form to the Public Affairs Office for routing. You may remain unidentified if you so wish.)

Code One Team for Medical Boards

COMMENT: I suggest a Code One team for medical boards made up of personnel from designated departments who would respond rapidly in the event there is a medical board on a patient that is dying or in imminent danger of dying. This team would be primarily administrative so that the paperwork flow would go much smoother when there is an immediate need. The team would be composed of a primary and a secondary person from each of the designated departments. These individuals would suspend all other work at the time they were contacted for a Code One until the paperwork was completed for the patient in that department.

REPLY: Following are the present procedures for this type of situation:

- The physician starts the process by dictating a medical board on the stat line and notifying Management Information and the Medical Board Section of Patient Affairs by telephone.
 - The Medical Board Section contacts the Physical Disability Counselor who immediately notifies Central Physical Evaluation Board in Arlington, Va.
 - The board is immediately typed in the rough by Management Information and the Medical Board Section is notified when completed.
 - A representative of Patient Affairs hand-carries the rough board to the board members for editing and approval, after which it is returned to Management Information for typing in the smooth format.
 - The smooth board is picked up in Management Information by a Patient Affairs representative, assembled, and hand-carried for all signatures.
 - When the board is completed, a purchase order for Federal Express Mail is prepared in Patient Affairs, hand-carried to the Comptroller for approval and delivered to the Supply Officer with the medical board to be dispatched.
- The entire process (from the time the board is dictated until it is delivered to the Supply Division) is accomplished in one working day, which is considered reasonable. NRMCC Oakland processes one to three such boards each year and it is

not considered appropriate to appoint a special team for this purpose. It is felt that the total time would not be reduced unless such a team were to conduct weekly drills. These drills would be disruptive to normal operations and would probably not reduce the time involved by any significant amount.

Symbols to aid outpatients

COMMENT: (Why doesn't the medical center) use symbols that represent a clinic or person? Place a symbol on patient's record or paperwork, with a larger symbol on the door of the clinic or office to indicate that they are in the right place.

REPLY: This suggestion is well thought-out and a very good one; however, its application at this hospital would be hard to achieve because of a high number of clinics and persons that would require a separate symbol. Selective application to various high use areas such as laboratory, x-ray and pharmacy might be possible if symbols can be selected that are immediately recognized and associated with the clinic or person. A group will study this suggestion with possible implementation in the future. Thank you for this very positive suggestion.

Flag flown over Bldg. 105

COMMENT: Why isn't a colored flag flown on top of Building 105 so that it can be easily located, even from the front lobby of the hospital?

REPLY: A general consensus of the several people we asked is that Building 105 (Personnel Support Detachment) is not all that hard-to-find, and for newcomers the location information is readily available from any staff member asked. If we installed a colored flag on top of that building, what's to stop all the other services located around the compound from requesting their own distinctive ensign? In no time at all, the base could resemble a circus instead of a military establishment. Although we must turn this particular idea down, we do appreciate you suggesting it.

Educational opportunities available for civilians

During recent Admiral's Calls with civilian personnel of this medical center, and through the medium of the Civilian Employee Advisory Board, several employees have voiced interest in educational opportunities for Civil Service workers.

Both Staff Education and Training Service and Civilian Personnel Service are consequently requested to develop a listing. Results are capsulized as follows:

• **Correspondence Courses:** Offered through University of California Extension, Berkeley. A current catalog is on file in Staff Education and Training, 6 South, or personnel may call the university office at 642-4124, or write University of California Extension, 2223 Fulton Street, Berkeley, CA 94720.

• **New Skills for Unemployed:** Courses available through San Francisco Community College District, Civil Service College, 800 Mission St., San Francisco, CA 94103. Some of these classes are offered at Treasure Island, and personnel may contact Ms. Paula Swanson, Employment Development Specialist, 765-6656, for details. A current catalog is also available in Staff Education and Training.

• **On Base at NRMCC Oakland:** —Ms. Marj Stillings of Navy Campus is in the 6 South Education Office every Thursday from 8 a.m. to 3 p.m. All personnel (military and civilian) who desire educational counseling may call HM1 Abbott, Ext. 2003, for an appointment with Ms. Stillings.

—Ms. Sherry Robinson from Civilian Personnel coordinates civilian training requirements and provides courses through Vista College year-round. She is located in Bldg. 73B and can be reached at Ext. 2116. Currently underway are courses in interviewing techniques and effective writing for managers and supervisors.

—Southern Illinois University offers a BS degree in Health Care Services. The SIU office, with program manager Mike Manning, is located in Bldg. 75A. His office hours are 8 a.m. to 3 p.m., Monday through Friday. Call 562-3605.

—California State University

Hayward offers lower division courses on base in the evening that meet SIU requirements for the BS in Health Care Services. For more information, telephone 881-3605.

• **Community College Centers:** Offered tuition free to all California residents who are high school graduates or over the age of 18. All programs are occupationally oriented, providing training in entry level, promotional and new technological areas. For information Monday through Friday, 8 a.m. to 5 p.m., call 239-3070.

• **San Francisco Bay Area Colleges:** —Chabot College, Hayward, telephone 786-6700

—City College of San Francisco, 239-3000

—Contra Costa College, San Pablo, 235-7800

—College of Alameda, 522-7221

—College of Marin, Kentfield, 485-9700

—Diablo Valley College, Pleasant Hill, 685-1230

—Foothill College, Los Altos Hills, 948-8590

—Indian Valley College, Novato, 883-2211

—Laney College, Oakland, 834-5740

—Los Medanos College, Pittsburg, 798-3500

—Merritt College, Oakland, 531-4911

—Napa College, Oakland, (707) 255-2100

—Ohlone College, Fremont, 657-1108

—Santa Rosa Jr. College, (707) 527-4211

—Skyline College, San Bruno, 355-7000

—Solano College, Suisun City, (707) 552-4330

—Vista College, Berkeley, 841-8431

• State Universities:

—California State University, Hayward, 881-3000

—San Francisco State University, 469-2411

—San Jose State University, (408) 277-3266

—Sonoma State University, Rohnert Park (707) 664-2182

—University of California at Berkeley, 642-0200

—University of California at San Francisco, 666-4986

—University of California Extension at San Francisco, 861-6833

—University of California at Santa Cruz, (408) 429-4412

• Private Colleges:

—Academy of Art, San Francisco 673-4200

—Armstrong College, Berkeley, 848-2500

—Cogswell College, San Francisco, 433-5550

—Dominican College, San Rafael, 457-4440

—Golden Gate University, San Francisco, 442-7272

—Heald College, San Francisco, 673-5500 (Business); 441-5555 (Engineering)

—Holy Names College, Oakland, 436-1327

—John F. Kennedy University, Orinda, 254-0200

—Mills College, Oakland, 430-2255

—New College of California, San Francisco, 626-1694

—St. Mary's College, Moraga, 376-4411

—San Francisco Conservatory of Music, 564-8086

(Continued to Page 4)

Classes offered on base for civilian, military staff

Tentative dates have been established for spring semester classes offered by Vista College at Naval Regional Medical Center, Oakland for both military and civilian staff members.

Further course information and information on nomination procedures will be sent out approximately one month in advance of each class. Following is the anticipated schedule:

• **Effective Writing for Secretarial and Clerical Personnel:** Feb. 1, 3, 8 and 10, 8:30 a.m. to 12:30 p.m. each day. Students will learn to make their writing clear, concise, precise and readable. This training may also reduce anxiety connected with writing.

• **Time Management:** April 12 and 14, 8:30 a.m. to 12:30 p.m., both days. This course is for those concerned with effective utilization of time for themselves, their peers, and their subordinates. Emphasis is on creative control and maximization of time

through the setting of realistic goals and priorities.

• **Communications and Managing People:** March 15, 17 and 22, 8:30 a.m. to 12:30 p.m. Designed for people who manage or supervise others. Covers the "art" of giving directions and the ideas surrounding non-verbal behavior, behavior modification and the result(s) of positive expectation. Role-playing and active discussion of current work situations will be held throughout the seminar.

• **Medical Terminology, Phase I and II:** Full semester, Feb. 3—June 9; Thursdays only, 3:30 to 5:30 p.m. If you have already had Medical Terminology I and want Phase II, or if you have had a brief introduction to medical terminology on the job and want to pursue a formal introduction, this is the course for you.

For further information, contact Sherry Robinson in Civilian Personnel Service, Ext. 2116.

COMMENDED—Chief Hospital Corpsman Dominador P. Datu (right) receives a letter of commendation and best wishes from Rear Admiral Robert C. Elliott on the former's retirement after 22 years of Navy service. Looking on is the chief's wife Priscilla.

HMC Datu retires from Navy

Chief Hospital Corpsman Dominador P. Datu, who served here nearly a year as leading chief of the Operations Branch, Preventive Medicine Service, retired from the Navy last week.

Chief Datu had 22 years' service, including duty aboard the submarines USS TRUMPET and USS AMBER-JACK, and shore duty with Commander, Submarine Flotilla Six, and hospitals at Portsmouth, Great Lakes, Long Beach, Subic Bay and Oakland. He also served aboard the USS BIDDLE and completed Preventive Medicine

Technician School here several years ago. Of all his assignments, he said, he found the one at Subic Bay the most challenging.

The Preventive Medicine Technician makes his home in Vallejo with his wife Priscilla and son. Mrs. Datu works as a visiting nurse in Alameda.

Chief Datu is originally from Manilla and plans to travel to the Philippines over the holidays. He will then return to Vallejo and plans to enter the real estate business.

Uniforms required on military aircraft

The Commander in Chief of the Military Airlift Command (MAC) has announced that MAC passenger agents will decline to process and board servicemembers who are not in uniform, beginning Dec. 1, 1982. The policy applies to duty and leave passengers traveling on military and MAC-contracted (Category B) civil aircraft departing from military airfields and commercial terminals. The only exceptions to the policy are in cases when civilian attire is required by the U. S. Air Force Foreign Clearance Guide or when travel orders authorize civilian clothes.

The policy may be waived only when a designated local representative of the traveler's service certifies that the servicemember is not in uniform for reasons beyond his or her reasonable control.

The MAC policy was established after recognizing that all services now have their own regulations requiring military members to travel in uniform on DoD-owned or controlled aircraft.

Back in Navy blue

Hospital Corpsman Second Class Charles Harmon, former shipmate at Naval Regional Medical Center, Oakland, reenlisted in the Navy at Naval Recruiting District, Jacksonville, Fla., on Oct. 22.

Education--

(Continued from Page 3)

—Stanford University, Palo Alto, 497-2300

—University of San Francisco, 666-6563

—California Culinary Academy, San Francisco, 543-2764

—California Maritime Academy, Vallejo (707) 644-5601

Staff Education and Training has an assortment of current college catalogs located in its Learning Resource Center. The staff is available to assist personnel and encourages all to stop by or call Ext. 2003 or 2110.

Civil Service retirement rules amended by new public law

Civil Service retirement provisions were significantly changed by Public Law 97-253, with most amendments effective Oct. 1, 1982. Major changes are:

- **Refunds:** An employee may receive a refund of his/her retirement contribution only if the individual is separated from the service for at least 31 consecutive days, or is transferred to a position in which he/she is not subject to Civil Service retirement deductions (or does not retain coverage by reason of continuity of service) and remains in such position for at least 31 consecutive days. Other qualifying requirements are that the employee must file an application for refund with OPM; not be reemployed in a position subject to Civil Service retirement deductions, and will not become eligible to receive an annuity within 31 days after filing the application.

- **When annuities are paid:** The annuities will commence on the first day of the month in which the employee retires or pay ceases and the age and service requirements for title to an annuity are met. This "first-of-the-month after" provision does not apply to survivor annuities, disability annuities, or those discontinued service annuities based on involuntary separation, death or last day of pay, as appropriate.

- **Credit for military service:** Any employee first employed by the federal government under the Civil Service Retirement System on or after Oct. 1, 1982, will receive Civil Service Retirement credit for the post-1956 military service at time of retirement only if a deposit for military service is made. The deposit will be seven percent of the military base pay the individual received for the post-1956 military service. If the employee who is first hired on or after Oct. 1, 1982, makes such deposit within two years of being hired, no interest will be charged. Individuals who were first employed before Oct. 1, will have the option of either making the seven percent deposit for post-1956 military service (thereby avoiding a reduction in annuity at age 62), or receiving credit as in the past and having his/her annuity adjusted at age 62.

- **Nondeduction Civilian Service:** Employees will now be required to make a deposit, with interest, for entire periods of nondeduction (previously referred to as optional) service performed on or after Oct. 1, 1982, before such service can be used in the annuity computation.

- **Early retirements:** Early retirement for employees who are involuntarily separated from the service on or after Oct. 1, 1982, will be permitted only when the conditions specified below are met. Employees, if otherwise eligible, must not have declined a reasonable offer of a position in their agency for which they are qualified. The offered position must be in the employee's same commuting area, at the same tenure and work schedule, and may not be lower than two grades below the employee's current position. In addition, voluntary early retirement will be permitted only if an agency's major reorganization, reduction-in-force, or transfer of function would have resulted in a significant number of employees being separated from the federal service or immediately reduced in pay.

- **Cost-of-living adjustments:** The effective date of cost-of-living adjustment (COLA) is changed from March 1 of each year to April 1, in 1983; May 1, in 1984, and June 1 in 1985. While this change in effective dates applies to annuity adjustments for fiscal years 1983, 1984 and 1985, the amount of the COLA will continue to be based on

the preceding December-to-December increase in the Consumer Price Index except for those under age 62.

- **Interest rates:** Effective Jan. 1, 1985, the interest rate charged on deposits for periods of military or civilian service performed on or after Oct. 1, 1982, and for redeposit of refunds on or after that date, will change from the current three percent compounded annually to a variable rate that will be determined by the Secretary of the Treasury each year on the basis of the average yield of new investments purchased by the Retirement Fund during the previous calendar year. If redeposits of refunds were made before Dec. 31, 1984 for service performed on or after Oct. 1, 1982, interest is charged at the rate of three percent per year.

The new Public Law contains many other complex changes which may, or may not affect your individual situation. If you are nearing retirement and need counseling, contact Beverly Keller, Civilian Personnel Service, Ext. 2118.

Mail inspection rules in effect

An agreement between the Department of Defense and the U. S. Postal Service, which extends to military commanders the Postal Service's authority to inspect and open overseas mail, became effective Nov. 20.

The agreement, established to prevent traffickers in drugs and other contraband from using the military mail system, took effect 30 days after publication in the Federal Register, as required by law.

The new regulation will allow commanders to randomly screen mail externally using dogs, metal detectors and similar security devices. Commanding officers and commanders with special court-martial convening authority may issue search authorizations to open mail only where there is sufficient reason ("probable cause") to believe that a specific item of mail contains drugs, contraband, or other evidence of a crime.

The regulation does not allow indiscriminate opening of personal mail and does not grant the federal government any new powers. The purpose is only to transfer existing authority to military officials in areas where there are no U. S. Postal Inspectors, thereby improving the effectiveness of our war on drugs.

The rules also allow Navy postal clerks to submit mail for inspection to host country governments in compliance with local Status of Forces agreements and, in some cases, authorize military customs officials to inspect mail for the host country.

Exercise underway

More than 7,000 sailors and airmen aboard 22 ships and almost 100 aircraft are currently participating in a readiness training exercise in southern California and Hawaii operating areas.

Ships in the exercise, under the Command of RADM Paul E. McCarthy, Commander, Carrier Group One, will train in most facets of naval warfare.

Some of the U. S. Navy units will operate for a brief period with units of the Japanese Maritime Self Defense Force (JMSDF). JMSDF ships and aircraft are in the area conducting routine training.

The 31-day battle group training exercise for U. S. Navy units was scheduled by VADM William P. Lawrence, Commander, Third Fleet.

HN Comins selected SOM

Hospitalman Steven P. Comins,
Senior Corpsman on Seven North, was
selected as Naval Regional Medical
Center Oakland's Sailor of the Month
(November).

Of his selection, the 19-year-old
corpsman said modestly, "I was
shocked at first to find out that I was
picked. . . I thought there were other
personnel more deserving. . . I am very
proud to have been picked from the
hundreds of Navy personnel at this
command and I feel this is a significant
step forward in my Navy career."

As the senior corpsman on an active
38-bed orthopedic/ENT ward, he is
responsible for direct patient care,
administration of medication, leader-
ship of fellow corpsman, cleanliness of
the ward, and maintenance of supplies
and equipment.

His superiors singled him out for
superb performance in these duties and
for exemplary military behavior. One
said he is always courteous and sincere
and takes an individualized interest in
each patient. "He is admired and
respected by all levels of staff. . ."

The hospitalman entered the Navy
about a year and a half ago after gra-
duating from high school in New
Jersey. He completed Corpsman "A"
School and arrived at Oakland, his first
duty station.

Comins will next attend Basic

Laboratory "C" School at Fort Sam
Houston, Tex. He said his career goal is
completion of advanced schooling and
regular advancement as time-in-rate
requirements will allow.

The sharp young sailor is the son of
Grace and David Comins of Hights-
town, N. J. He enjoys numerous out-
door activities, including fishing, camp-
ing, backpacking, football and frisbee.

Comings and Goings -----

"Fair winds and following seas"
to the following personnel who have
recently departed this command:

LCDR James Dickey, MC, to Guam.

Former Oak Knoll resident President's personal dentist

Navy Captain Lawrence Blank, who
completed a dental general practice
 residency at Naval Regional Medical
 Center, Oakland, shortly after he
 received a degree from the University
 of California, San Francisco, School of
 Dentistry in 1968, is President Ronald
 Reagan's personal dentist.

Dr. Blank, in addition to his billet as
 chairman of the General Dentistry
 Department at National Naval Dental
 Center, Bethesda, was named White
 House Dentist in January 1981.

According to a recent UCSF alumni
 publication, Dr. Blank reports that the
 president has a regular checkup three
 or four times a year in the fully-equip-

ped dental operatory in the White
 House.

The Navy dentist served in the
 Philippines, at Philadelphia Naval
 Hospital and aboard the USS NIMITZ
 after he left Oak Knoll. In 1974, he
 earned an MS degree from George
 Washington University while assigned
 to Bethesda in his first tour there. After
 shipboard duty, he entered the Univer-
 sity of Michigan and earned a second
 MS degree in restorative dentistry.

DOUBLE EVENT—Four recent graduates of the Preventive Medicine Techni-
 cian School used the graduation ceremony to reenlist in the U. S. Navy. Taking
 the reenlistment oath from Rear Admiral Robert C. Elliott are (l to r): HM1 Paul
 W. Conlin, HM2 Blaise A. Fossum, HM2 Mark C. Sejeck and HM2 Daniel L.
 Shulla.

O speaks Navy League

Rear Admiral Robert C. Elliott, Com-
 manding Officer, Naval Regional Medi-
 cal Center, Oakland, was the guest
 speaker at yesterday's luncheon meet-
 ing of the Oakland Council, Navy
 League of the United States.

It was a Christmas luncheon
 attended by members and spouses,
 and was held at the Sea Wolf on Jack-
 son Square.

PARTICIPANT—Lieutenant Commander Thomas E. Daniel, Orthopedics resident at Oak Knoll, lectured on hand surgery at the recent UC-Letterman sponsored conference.

Statue to honor corpsmen

Forty years ago while engaged in combat as a U. S. Marine, Raul Avina saw one of his comrades hit, then noticed a Navy corpsman begin to carry the wounded man down the slope to safer ground for medical attention.

That scene, forever etched in Avina's memory, created a permanent respect for "docs" in combat. In speaking of his memories of the battle, Mr. Avina said, "We (the Marines) could take cover, advance or crawl; in other words, protect ourselves. Corpsmen could hardly take cover or concealment, and they provided good targets to the enemy. But even under devastating enemy fire, the U. S. Navy corpsmen—hungry, fatigued to the point of no return—carried out their mission of aid and mercy. After you've seen the things they do, under the conditions they have to operate, you have to admire them. It burns into your memory, and you never forget it."

Today as a well-known Southern California artist, Mr. Avina is spearheading a campaign to honor Hospital and Dental Corpsmen with a memorial statue erected at Naval Regional Medical Center, Camp Pendleton.

The monument will depict three figures carrying a fourth to safety. Each figure will be recreated in painstaking detail to ensure authenticity. Avina will be assisted in the construction by

sculptors John and Larry Zamora.

All the time and labor for the project are being donated by the artists. Private donations, however, are sought for the purchase of the needed materials. The Naval Regional Medical Center Oakland-Bay Area Chief Petty Officers' Association has already contributed \$100 toward the project. Others desiring to donate may do so to the HM/DT/USMC Memorial Fund, P. O. Box 439, NRMCC Camp Pendleton, Calif., 92055. Information may be obtained from HCMC C. C. Roberts, Command Master Chief at Camp Pendleton's medical center. His autovon number is 993-1313.

Ship establishes unique physical fitness program

The amphibious assault ship USS OKINAWA (LPH 3), using the talents and assistance of San Diego area physical fitness professionals, has established a command physical fitness program which has produced "impressive" improvements in most participants.

The program, which emphasizes exercises to improve the cardiovascular system, was designed with the help of Mr. Tom Strickland, assistant football coach for the University of San Diego, and Mrs. Vicki Cutting, an aerobic physical fitness instructor.

The Okinawa program begins with a water immersion weighing at Naval Training Center San Diego, which measures true body weight in terms of the ratio between fatty and muscle

tissue. Each participant is then given a physical pre-test similar to the test required by OPNAVINST 6610.1B. These pre-tests are retained and compared with similar examinations administered at the end of the program. In every case the results have been impressive.

While most participants are crewmembers who are having difficulties meeting Navy weight standards, many have participated to improve muscle tone, increase stamina or build muscle.

Okinawa plans to videotape the classes so that the training can be continued at sea. Commands interested in more information on the innovative program should contact USS OKINAWA.

SF conference honors pioneer hand surgeon

A medical conference with an interesting history took place last month at the Letterman Army Institute of Research (LAIR) Auditorium at the Presidio of San Francisco.

The University of California and Letterman Army Medical Center conducted the 20th Annual Sterling Bunnell Memorial Lecture on Surgery of the Hand. The lectureship was established in 1961 in honor of Sterling Bunnell, MD, world renowned for his work in reconstructive surgery of the hand.

The 1982 lecture commemorated the 100th anniversary of the birth of Dr. Bunnell, and the 20th anniversary of the lectureship. Bunnell, who died in 1957, was the world's leading authority on reconstructive surgery of the hand. He wrote a classic text on the subject, which was published in 1944, and became known as the "Hand Surgeon's Bible".

After completing undergraduate and medical degrees at the University of California, Bunnell served as a captain in the Army Medical Corps during World War I, then made a reputation as a surgeon in private practice in San Francisco. During World War II he served as a civilian consultant to the Army Surgeon General, teaching and performing hand surgery at nine hand centers set up at Army General Hospitals in the United States.

Bunnell was famous among his colleagues for his brilliance as a surgeon and as a teacher and writer on surgical subjects. He was also an accomplished outdoorsman and wildlife photographer.

His son, Sterling Bunnell, MD, a psychiatrist practicing in Berkeley, was one of this year's guest lecturers.

Two options available for cemetery markers

Families of veterans who select a burial site for a deceased veteran in a private cemetery have two options for Veterans Administration assistance in marking the grave, James Rankin, Area Director of the VA's National Cemetery Office here, has explained.

The VA will provide, upon request, a headstone or marker free of charge and ship it to the consignee designated on the application. Cost of placing the marker in a private cemetery, however, must be borne by the applicant.

A second option is that VA will reimburse part of the cost of a headstone or marker bought privately and placed on the grave of a veteran. The current amount is \$67, the average cost of headstones purchased by VA.

Application for the VA headstone or marker should be addressed to Director, Monument Service (42), Department of Memorial Affairs, Veterans Administration, 810 Vermont Ave., N.W., Washington, D.C. 20420.

Application for the \$67 reimbursement for a marker other than the VA standard should be filed at the nearest VA regional office. Proper routing of the application will expedite service.

Toll-free numbers to VA regional offices are listed in the white pages of the telephone book under "U. S. Government."

The VA regional office in San Francisco is located at 211 Main Street (corner of Main & Howard).

The regional office in Reno is located at 245 East Liberty Street.

FHSO's skipper is Supply Officer

CDR Larry F. Stangl

Navy Supply Corps Commander Larry F. Stangl, who recently assumed command of the Fleet Hospital Supply Office in Alameda, was that activity's Executive Officer for a period approximately six months. Prior to that he was the Naval Electronic System Command Program Manager Representative for a surface fleet anti-missile defense system.

Raised in Iowa, CDR Stangl graduated from St. Ambrose College in the state with a bachelor of arts in economics and business administration. He was commissioned an ensign in the Navy Supply Corps on Nov. 2, 1963 at the Officer Candidate School, Newport, R.I.

Other duty assignments have included: Navy Supply Corps School (student); on the staff of Command Cruiser Destroyer Force, U. S. Pacific Fleet; Supply and Disbursing Officer, USS INGERSOLL (DD-652); Logistics Advisor, Naval Advisory Group, Vietnam; Contracting Officer, Naval Supply Depot, Yokosuka, Japan; U. S. Navy Purchasing Department, Hong Kong; Chief, Alameda Supply Office, Defense Subsistence Region, Pacific; and Assistant Supply Officer, USS HECTOR (AR-7).

The commander has earned a Joint Service Commendation Medal, Navy Commendation Medal, Navy Achievement (with gold star), Navy Unit Commendation, Navy Meritorious Unit Citation, National Defense Service Medal, Vietnam Service Medal (with four bronze stars), Humanitarian Service Medal, Republic of Vietnam Service Honor Medal First Class, Republic of Vietnam Gallantry Cross, Unit Citation, Republic of Vietnam Civil Action Unit Citation, and the Republic of Vietnam Campaign Medal with clasp.

He and his wife Lily have a son, David, who is a research chemist at the University of California, San Francisco Medical School.

The commander's outside interests include baseball, rodeo and live theater.

"What do you mean, a low grade infection?"

w benefits for divorced spouses

Uniformed Services Former Spouses' Protection Act was signed into law in September 1982 and is effective on Feb. 1, 1983. The act and the congressional hearings leading to its passage have received wide attention from the media and divorced spouses alike. One thing is clear: Benefits for separated or divorced spouses are an emotional and complicated issue.

There are many facets to the act, but essentially, it returns to state courts the question of whether retired pay can be divided in a divorce or separation proceeding. Portions of the act pertain to the division of retired and retainer pay in accordance with court orders, annuities under the Survivor Benefit Plan, medical benefits, commissary and exchange privileges.

Under the new act, a court in a divorce or separation proceeding may divide disposable retired or retainer pay as property solely of the member and the former spouse, according to the law in the state where the divorce or separation proceeding is conducted. "Disposable retired or retainer pay" is, essentially, the portion of retired or retainer pay payable after June 25, 1981. Under the new act, federal law stipulates that retired or retainer pay is payable solely to the member and not payable to current or former spouses, except under garnishment procedures.

Provisions affecting retired or retainer pay must be made by courts having jurisdiction over the service member because of residence within the court's territorial jurisdiction other than because of military assignment; because the member's domicile is in the jurisdiction of the state court rendering the judgment; or because the member agrees to abide by the ruling of that court's jurisdiction.

If the court so orders, a portion of disposable retired or retainer pay can be paid directly from the Military Finance Center, but only if the marriage lasted at least 10 years, during which the service member performed 10 years of creditable military service for retirement purposes. This provision is called the "federal enforcement procedure" and can be made without the need for garnishment proceedings. The "10 years of marriage" requirement does not limit the court's jurisdiction pertaining to military retired pay when fixing the property rights between parties in a divorce or separation proceeding; a court could award an interest in future retired pay in instances where the marriage was shorter than 10 years, but the award would not be subject to the federal enforcement procedure, and payment could not be made directly from the Military Finance Center. In all cases, the amount payable to divorced and former spouses under the federal enforcement procedure cannot exceed 50 percent of disposable retired pay.

If a court orders that property other than retired or retainer pay be paid in a divorce or separation proceeding, and if payment of this property is not in accordance with that court's ruling, the spouse or former spouse cannot garnish the service member's disposable retired or retainer pay to satisfy this obligation. The amount garnished and the amount of retired or retainer pay directly awarded may not exceed 50 percent of disposable retired or retainer pay. **This change is significant.** Before the act, only alimony and child support could be garnished in proceedings brought before United States Courts. Garnishment applies only to past due payments—monies owed—monies payable at a future date.

An unremarried former spouse may be eligible for medical benefits provided the marriage lasted at least 20 years, during which the member or former member performed creditable service, and the former spouse does not have medical coverage under an employer-sponsored health plan. An unremarried former spouse is entitled to commissary and exchange privileges to the extent and on the same basis as a surviving spouse provided the same 20-year marriage requirement is met. The provisions dealing with commissary and exchange privileges apply only if the final decree is dated on or after Feb. 1, 1983, the effective date of the law.

The act amends the Survivor Benefit Plan, making a former spouse an "eligible recipient" of SBP under certain conditions. SBP was limited to coverage of the current spouse only; now, service members can provide an annuity to a former spouse instead of the current spouse. This option is strictly voluntary on the part of the service member and exempt from court orders. The provisions dealing with SBP apply to people who become eligible to participate in the plan before, on or after Feb. 1, 1983.

There are some retroactive features to the new law. The federal enforcement procedure that permits direct payment of court-ordered retired or retainer pay from the Military Finance Center applies to payments for periods beginning on or after Feb. 1, 1983, regardless of the date of the court order. If a court had previously ordered payment of a portion of the retired or retainer pay before Feb. 1, 1983, the payment can be made by the finance center. If a court order became final before June 26, 1981, and the original settlement did not include payment of retired or retainer pay, but the court order was later modified as a direct result of the enactment of the Uniformed Services Former Spouses' Protection Act to include payment of retired or retainer pay, the modification will not be recognized for purposes of the federal enforcement provision. Court orders may be modified, of course, but payment of awarded retired or retainer pay cannot be made by the Military Finance Center under federal enforcement procedures in cases where the court order was final before June 26, 1981, and later modified to include such payment as a result of enactment of the act.

Like most laws, the Uniformed Services Former Spouses' Protection Act is complicated. Local Navy Legal Service Offices can provide specific details. (NES)

FUNDS FOR FUN—As they have done so many times before, the Ladies Auxiliary, Fleet Reserve Association Unit 10, once again donated money for materials used in Kay Barnett's ceramic program for Oak Knoll inpatients. Here, Nancy Corey, Hospital Chairwoman, presents Mrs. Barnett with a \$100 check from the auxiliary. Joining in on the presentation are Sandy McNichol (left), unit Secretary, Command Master Chief Charles Dackerman and Lillian Basas, Welfare Chairwoman.

Veteran benefits improved

A 7.4% increase in Veterans Administration compensation checks this month to service disabled veterans and dependents has been announced.

The increase and other improvement benefits are the result of the Veterans' Compensation, Education and Employment Amendments of 1982, signed into law by President Reagan Oct. 14.

The rate boost means an increase from \$58 to \$62 per month for a veteran with a disability rated at 10%. A veteran with a 50% disability now receives \$352 a month, up from \$328, and a veteran with a 100% disability now receives \$1,213 a month, up from \$1,130.

The legislation also increases the annual allowance made to certain veterans whose artificial limbs, or wheelchair, cause wear on their clothing. The increase is to \$327 from \$305.

In addition, the bill provides a compensation rate increase to veterans who suffer from service-connected blindness in both eyes and who also have incurred the service-connected loss or loss of use of an arm or leg.

The bill also:

- Authorizes payment of a \$300 burial allowance for unclaimed bodies of certain wartime veterans for deaths occurring after Sept. 30, 1982;
- Removes the bar against payment of Servicemen's Group Life Insurance and Veterans Group Life Insurance proceeds in the event a claim is filed more than four years after the insured's death;
- Authorizes the VA to guarantee loans made for the purpose of refinancing a lien on a manufactured home, or for purchasing a lot for such home, and changes the term "mobile home" to manufactured home;
- Provides for payment of burial benefits if a veteran dies while a patient

under VA contract in a nursing home;

- Terminates the Veterans' Representative (Vet Rep) program and allows for the outstationing of veterans' benefits counselors (VBCs) at schools and other locations;
- Repeals the current GI Bill requirement that vocational schools report on the numbers of their graduates who, during a specified two-year period, have obtained employment in the field for which the school has provided training;
- Improves on administration by the Department of Labor on the provision of employment and training opportunities for disabled and Vietnam-era veterans.

Full details of all changes in compensation regulations and eligibility requirements are available at the nearest VA regional office.

The VA regional office in San Francisco is located at 211 Main Street (corner of Main & Howard).

The following new additions to the Navy medical "family" have arrived at Naval Regional Medical Center, Oakland:

A baby boy to Lieutenant Commander Paul Esposito, Orthopedics Service, and his wife Bernadette on Nov. 22.

A baby boy to Hospital Corpsman Second Class Richard Williams, Military Manpower, and his wife Maria on Nov. 26.

A baby boy to Lieutenant Commander Evelyn Partridge Strode, Psychiatry Service, and her husband Lester on Nov. 28.

Job openings for civilian personnel

Position	Location	Closing Date for Applications
Information Receptionist, GS-3	Information Desk, Operating Management Occupational Branch Clinic, Mare Island Naval Shipyard	Dec. 13
Health Technician, GS-4	Occupational Health Alameda Branch Clinic	Dec. 14
Medical Officer, GS-13 (Occupational Medicine)	Drug Screening Branch	Dec. 15
Medical Technologist, GS-7 (Several Vacancies)	Laboratory Service	

For further information on the Medical Officer opening, call Christine Lessler, 639-2116; for all others, Maurine Tinsley at the same number.

Comings & Goings

(Continued from Page 5)

HR Tyrme Stuckey, Operating Management.

HM3 Gregory Jone, Outpatient Administration.

HM3 Richard Ober, Main Operating Room.

Shades of the '50s... It's a sock hop!

Ski Lift discounts

Special Services reports the following discounts and conditions for military skiers in the following popular Sierra Nevada ski resorts:

Alpine Meadows: Buy ski lift coupon at Special Services for \$15 and save \$6. Offer good for active duty and their dependents, Sunday through Friday only (no holidays or Saturdays).

Bear Valley (Mt. Reba): \$5 off with military ID and letter. Active duty or retired military, no dependents. Mid-week only and no holiday periods. (Regular price: \$19).

Sugar Bowl: 50 percent off with military ID, mid-week only, no holiday periods. For military, their dependents and civilian employees with Department of Defense ID (but not civilian employees' dependents).

Squaw Valley: \$14 with letter and military ID. Mid-week (Monday through Friday) only. No dependents; no civilian employees. Where letters are required, one for each day of skiing for each person is required.

Boreal Ridge and Heavenly Valley: No discounts offered.

For further information, call Ext. 2479.

No discount to Florida

Three airlines have "blackout" or discontinued the military discount air fare for travel to and from Florida during parts of the holiday season. Eastern, Pan American and Delta Airlines will not honor discount tickets for travel to Florida on Dec. 22, 23, 24, and 26, 1982.

The same blackout will apply to travel from Florida on Jan. 1, 2, 3 and 4, 1983.

Band to hold party

Hal Eurquart's Band, which has a few of its members on the Oak Knoll staff, will hold a Christmas concert and party at the Officers' Club on the medical center Dec. 15, beginning at 6 p.m.

Any interested staff members who are also musicians may call U. S. Coast Guard retired Commander Reed Adams at 538-8787 (evenings 462-9089) for further information on joining the band or the Christmas party.

The band rehearses weekly and entertains at non-profit functions.

Holiday in the parks

East Bay Regional Parks are open all 365 days of the year, including Christmas Eve, Christmas Day, New Year's Eve and New Year's Day.

If you want a little help decorating the indoors with the out-of-doors, check the program listings for Tilden, Coyote Hills, Sunol and the Regional Park Botanic Garden for December decoration delights.

All the East Bay parks are a great place to try out new Christmas gifts such as fishing gear, hiking boots, wool scarves and mittens, bicycles and the like.

New Year's Eve party planned at Porthole

A New Year's Eve Party will be held at the Porthole on Dec. 31 starting at 7 p.m.

A New York steak dinner, champagne, wine and cocktails, and a breakfast at 1 a.m. (as well as live music and dancing until 2 a.m.) will be included in

the \$25 per person ticket price.

Dress is casual but men are asked wear a sport coat.

All enlisted, both retired and active duty, are invited. Tickets are limited call for reservations at 639-2457 soon as possible.

SOUTHERN SNOW FUN—Snow World at Sea World, delighting children and adults alike, runs Dec. 18 through Jan. 2. More than 1,000 tons of man-made snow transform Foremost Bowl into a slipping, sliding winter wonderland. Military and civilian Department of Defense employees may use their special discount on Sea World admission during the holidays. Contact the base recreation services office for more information. WHAT'S MY DOC?—A few days after birth, Kimberly Benson is reintroduced by her mother to CWO-3 Rick Weaver, the physician's assistant who safely delivered the baby in the Mare Island Clinic.

(Photo by SN Debra Elliott, NSA Mare Island)

Kimberly wouldn't wait

PA delivers baby girl in Mare Island Clinic

When little Miss Kimberly Benson decided to make her entrance into the world on Dec. 6, she selected an examination room at the Naval Regional Medical Center Oakland's clinic at Mare Island for her birth, thus giving CWO-3 Rick Weaver, HM3 Regina Rushing, and Sam and Sharron Nutt some expected early morning action.

Kimberly, a week overdue, alerted her mother Shawna and father, LTJG Benson, Supply Officer of the USS CARD B. RUSSELL (SSN-687), as she was about to arrive. The ship, currently making its home in waters on Mare Island while the submarine undergoes overhaul, lives about five miles down from Weaver, the physician's assistant upon whom they called for help.

Weaver sped to the Benson quarters, ascertained that labor had begun, and accompanied by the parental couple, stopped by the clinic to pick up an obstetrics pack "just in case" the baby would arrive enroute to the hospital. Once the mother's contractions were now about two minutes apart, Weaver changed his mind, realizing there was insufficient time to reach a hospital, even one in nearby Vallejo. At 6 a.m., with HM3 Rushing assisting, the physician's assistant safely delivered the healthy 8 lbs. 5 oz. baby in the clinic.

Kimberly and her mother, with Weaver still in attendance and the ship as the ambulance team, then headed for David W. Grant Medical Center at Travis Air Force Base to avoid

the west-bound early morning commuter traffic.

"When we all arrived at Travis," LTJG Benson said, "the Air Force doctor came rushing in. After he'd examined my wife and baby, however, he found that Rick had taken care of everything."

"It was incredible, he (Weaver) had only minutes to make crucial decisions, and they were all the right ones," Benson continued. "Our other three children were born in civilian hospitals and this birth was the most peaceful and calm of all. The more I see of Navy medics and corpsmen, the more I am convinced that they are the most professional on board (the Navy)."

After the three-day mandatory stay for all new mothers and babies at the Air Force hospital, Kimberly came home to Mare Island, where she is the focus of happy attention from her siblings, Mark, 8, Melissa, 6, and Timothy, 3.

The emergency delivery was Physician Assistant Weaver's first obstetrical experience.

JCAH due Feb. 17

The Joint Commission on Accreditation of Hospitals (JCAH) has advised this command that it will send a representative to survey Naval Regional Medical Center, Oakland, on Feb. 17.

Robert Becker, M.D. will be the surveyor

To all military and civilian personnel of this command, their families, and the many who are patients here, I offer my most sincere holiday greetings and best wishes for a happy, healthy and successful New Year.

As we celebrate in the traditional manner this year, let us vow to make life a little bit more bearable for those among us who are less fortunate due to ill health, economic problems, or both. Even if we cannot contribute materially, we all can give a little something of ourselves through kindness and concern. With caring—and sharing—we reflect the true meaning of Christmas and can truly enjoy the blessings of this very special season.

R.C. ELLIOTT

Rear Admiral, Medical Corps, U.S. Navy
Commanding Officer

Holiday services announced

All personnel, their families and friends are invited to a special 7 p.m. Christmas Eve Worship Service in St. Luke's Chapel near the Main Gate.

This annual service of Protestant Worship for all faith groups will be highlighted by a solo, "O Holy Night," featuring John di Francesco; meditation by Captain L. Wayne Rushing, Chief of Pastoral Care Service; Sacrament of Holy Communion; singing of Christmas carols, and light refreshments following the service.

For those who find it more convenient to attend services in the Chapel of Hope in the main hospital, a Protestant Worship will be held there at 6 p.m. on Dec. 24, and a Catholic Christmas Eve Mass at 9 p.m.

Other holiday church services are:

Christmas Day, Chapel of Hope, 9 a.m. Catholic Christmas Mass.

Christmas Day, Chapel of Hope, 10:30 a.m., Protestant Christmas Service.

New Year's Eve, Chapel of Hope, 7 p.m., Protestant Divine Worship.

New Year's Day, Chapel of Hope, 12 noon, Catholic New Year's Mass.

Blind soloist former Pinza protege

John di Francesco, featured vocalist at the Christmas Eve Protestant Worship in the St. Luke's Chapel, was born in Lawrence, Mass. He received his early musical education at Perkins School for the Blind, and at the New England Conservatory of Music, where he graduated with high honors and a bachelor's degree in music.

Later, the famous Metropolitan Opera basso, Ezio Pinza, heard him sing and brought him to New York to study with Maestro Enrico Rosati. Early in 1949, Pinza officially presented him as his protege to a nationwide television and radio audience. Since then he has made countless appearances on the east and west coasts, in radio, television, opera, oratorio and recital, including New York's Town Hall and the Oakland Auditorium.

Since joining the faculty at the California School for the Blind in 1957, he has made many solo appearances with the San Francisco Bach Choir, as well as the Unruh Philharmonic Chorus. He has also been soloist in the Verdi "Requiem" at the University of Nevada, and in Beethoven's "Ninth Symphony" in Stockton.

He is perhaps the first blind artist to

sing and act an operatic role in professional performance in this country. In addition to his duties as music instructor at the School for the Blind, he directs the Chapel Choir at the Naval Air Station in Alameda.

John di Francesco

Command Line

(This column permits direct access to command executives by either military or civilian staff members of any grade, rate or rank. Questions on matters impacting the medical center operations as a whole, reports of incidents of abuse or fraud, or items of concern to large numbers of the staff are invited. Please also submit recom-

mendations and report positive information of interest to all of us. Submit comments in any legible written form to the Public Affairs Office for routing. You remain unidentified if you so wish.)

CO/Supervisor meetings

COMMENT: On a daily basis, civilian supervisors apply Navy regulations and policies, make work assignments, see that duties of personnel are carried out, and handle many problems as they occur. It would be useful for them to meet directly with the Commanding Officer on occasion in order to obtain his viewpoint and suggestions before various issues escalate. It would also give him a first-hand opportunity to make announcements or discuss issues. Informality could lend an atmosphere of cooperative exchange. May I suggest a monthly breakfast or luncheon meeting followed by informal dialogue?

REPLY: Your idea is a very good one and the first Admiral's Call with civilian supervisors will be held at 8 a.m., Jan. 20, 1983, in the Clinical Assembly. The meal meetings, unfortunately, are not practical because of the number of people (56) who are in supervisory positions. We will keep the Assembly meetings informal, however, and look forward to free and open discussion.

(EDITOR'S NOTE: Although one or more Command Line items have been submitted and are in process of being staffed for reply, there was neither time nor space to publish in this issue. Watch for them in the Jan. 28 edition.)

From a. to u. — what we should know about drunk-driving

With the approaching holiday season, now is the time to increase our awareness of the seriousness of driving while intoxicated. As of Jan. 1, 1982 the new California Law on driving under the influence went into effect, with far-reaching and significant changes. Two of the important changes are:

- The California Penal Code previously stated that at 0.10 percent Blood Alcohol Content (BAC), the driver was "presumed" to be under the influence; it was not considered prima facie evidence of driving under the influence. The new law states that driving with a BAC ratio of 0.10 percent will be sufficient proof for conviction.

- The penalties for a conviction of driving under the influence have increased radically. The minimum for the first conviction is three years probation; driver improvement and/or alcohol treatment program; 90-day license restriction; a fine of \$375-\$500; with the maximum penalties including incarceration in a state or

county jail for 90 days to one year; a fine of \$375-\$1,000; and one year license suspension.

The following are excerpts from a May 28, 1982 concept paper from the Office of the Assistant Secretary of Defense (Health Affairs) "Improving Department of Defense Programs to reduce DUI's:"

- (a) Higher death rate now for 15-24 years old than 20 years ago.
- (b) The number one cause is (75) deaths from injuries.
- (c) During 10 years of the Vietnam Conflict, America lost six times as many persons to drunk drivers as we lost to the enemy.
- (d) Five hundred military members were killed during 1981 as a result of intoxicated driving.
- (e) Last winter, 78 people were killed in a single plane crash in Washington, D.C. These deaths became front page news nationwide and prompted a federal investigation. On that same day, 73 people were killed by drunk drivers.
- (f) Drunk driving is the most often committed violent crime in the nation.
- (g) 250,000 have died in the last 10 years.
- (h) 500 people are killed each week.
- (i) 73 people are killed each day.
- (j) There are 800,000 drunk driving collisions each year.
- (k) For Americans up to age 35, the number one cause of death is motor vehicle incidents, and more than half of highway deaths are caused by intoxicated drivers.
- (l) The United States has the highest number of alcohol-related fatalities, per capita, of any nation in the world.
- (m) Every single day, 3,000 people are hurt or crippled for life in alcohol-related crashes.
- (n) Between 7 p.m. and 3 a.m. on weekends, one out of 10 drivers are legally impaired or drunk.
- (o) 80 of all fatal alcohol-related auto crashes occur between 8 p.m. and 8 a.m.
- (p) 44 of all nighttime fatal alcohol-related crashes are caused by the 16 to 24 age group (this group comprises only 22 of the total licensed population).
- (q) More than 65 of single car crashes are alcohol-related.
- (r) The average drinking driver offender killed on the highway has had 15 drinks before driving.
- (s) The average offender of alcohol-related fatalities has a BAC level of .20.
- (t) Drinking drivers cost the American taxpayers \$5-6 billion dollars a year.
- (u) Of every 2,000 drunken drivers, only one is arrested.

Drive defensively to avoid accidents

"This is a hell of a way to die", said the general as he was lifted into the ambulance.

Those are words to be remembered as they speak of the bitter tragedy and the utter irony of accidents.

They are tough words of a tough man. A man feared by the whole German army. A man who had known the stark danger of war. But also a man who appreciated life.

General George Patton died a few days before Christmas 1945 as the result of an ordinary traffic collision between a truck and the car in which he was riding on a hunting trip. Just a peacetime motor vehicle accident. The kind that happens every day on our streets and highways. The kind that may happen just as suddenly, just as tragically, to you or someone you know.

How can we avoid these accidents? One way is to drive defensively.

Defensive drivers think ahead about what might happen and are ready for any emergency. Because they know they have no control over the unpredictable actions of other drivers and pedestrians, or over weather and road conditions, defensive drivers develop defenses against these hazards.

What are some of these defenses?

- Conceding the right of way and making other concessions that will avoid an accident.

- Never placing complete faith in the other driver's signals.
- Being prepared for the motorist who ignores stop signs.
- Knowing some drivers will turn right from a left-turn lane.
- Slowing down at all intersections.
- Avoiding following too closely.
- Giving adequate and timely signals.
- Pumping the brake pedal to flash a warning to the motorist behind.
- Keeping to the right and letting inexperienced and speeding drivers go on their way.

Defensive driving can provide that added margin of safety needed when an emergency arises.

PLEASE DRIVE DEFENSIVELY—HAVE A SAFE CHRISTMAS HOLIDAY
(Industrial Supervisor—1981)

Standards of conduct for the Navy team

Bribery, Graft, Gratuities, Favors

Navy military and civilian personnel may be subject to penalties if they solicit, accept, or agree to accept anything of value in return for performing or refraining from performing an official act.

Navy personnel will not solicit or accept any gift, gratuity, favor, entertainment, loan or any other thing of monetary value either directly or indirectly from any person, firm, corporation, or other entity which: is engaged, or is endeavoring to engage, in procurement activities, business or financial transactions of any sort with any agency of the Navy; conduct operations or activities that are regulated by any agency of the Navy; or has interest that may be substantially affected by the performance or non-performance of the official duties of the Navy personnel concerned. A gift, gratuity, favor, entertainment, etc., includes any tangible item, intangible benefits, discounts, tickets, passes, transportation, accommodations or hospitality given or extended to or on behalf of the recipient.

Prohibition of Contributions or Presents to Superiors

Navy personnel shall not solicit a contribution from employees for a gift to an official superior, make a donation as a gift to an official superior, or accept a gift from an officer or employee receiving less than themselves. A voluntary gift of nominal value made on a special occasion such as marriage, illness or retirement is not prohibited.

**Don't let this happen to you!
Please drive safely this holiday season.**

Season's Greetings

Holiday Message From PRESIDENT REAGAN

Merry Christmas and the best holiday wishes from all your countrymen.

We appreciate the sacrifice you are making far from home today. Whether your image of Christmas is the crisp cold snow of the northeast or the clean dry wind of the western deserts, for all of us this holiday is a time when our families draw together in faith and love.

Though your place is empty and your family table, you are with us in our hearts and remembered in our prayers. I know this is a particularly difficult time to be far from your loved ones. I know you miss the traditional exchange of gifts and worshiping with your family. But because of you, your families are free to go about the joyful traditions of Christmas.

We are grateful for that special gift of security and peace you've made possible for America and so much of the world.

On behalf of Nancy and myself, your families, friends and countrymen, I send you our warmest holiday wishes. We look forward to the day when you'll be back in your home town in the arms of your loved ones. Until then, may God bless you and keep you and return you safely home. Happy holidays to you all.

NO adds his greetings

The spirit of Christmas traditionally finds family members gathering to celebrate holidays with festive parties and gift giving. This year the United States Navy is giving its holiday gift—presence and vigilance—to the entire free world community through our continued commitment to peace through strength.

This holiday season, as in years past, finds our people on patrol from the Gulf of Mexico to the Indian Ocean, from the Northern Pacific to the South Atlantic, providing our leaders with a ready first arm of defense. All America realizes we are performing these crucial and difficult tasks in support of national policies and it is this realization which has been the impetus behind a realistic defense budget designed to outfit and launch a 600-ship Navy before decade's end.

Those who are at sea or otherwise separated from loved ones during the holidays are worthy of special recognition. It is this personal sacrifice that truly signifies our commitment not only during this Christmas season but all seasons—peace on earth, good will toward men. With them, and with you, we seek peace, and with your help we can make this world a better place.

Wish each and every one of you a joyous holiday season. Merry Christmas and happy wishes for a happy and prosperous New Year.

Admiral James D. Watkins, USN, Chief of Naval Operations.

Holiday Message From The Secretary Of Defense

As 1982 draws to a close and the challenges and opportunities of 1983 come clearly into focus, America's Armed Forces maintain a proud presence and a strong posture around the world. Our aim is peace coupled with freedom and prosperity. It is a worthwhile goal...a very worthwhile goal...but a very demanding one.

We ask a lot of those of you who serve our country in uniform. And you give a lot in return. You give your loyalty, your dedication, your courage, your skills and your strength. You endure hardships and make sacrifices, including separation from friends and loved ones during the holiday season.

It is your continued, uncompromising dedication to duty and professionalism that provides the leverage that is so essential in our being able to maintain the balance of power and assuring our own national security.

I am very proud of you who keep the watch during this holiday season. Americans everywhere join me in saluting you and wishing you and your families a very Merry Christmas and a healthy and happy New Year.

SECNAV's holiday wishes

Each year the Christmas season is a social and spiritual high point, a time rich in giving and sharing, in custom and tradition. It is also a time of hope and renewal. Our Navy-Marine Corps team shares in this spirit in a special way. Many members of our uniformed family spend Christmas far from home and far from their loved ones, on duty all over the world. But the awareness that their vigilance and sacrifice make possible the peace and freedom of our nation and of free men everywhere draws our Navy-Marine Corps family closer together.

Let us join in giving thanks that America has awakened to the need to defend its peace and freedom, and is taking the steps to preserve those precious legacies for future generations. Your role in this American renewal is most significant of all. You are the men and women who bear the heaviest burdens of keeping this peace. Let us remain alert and capable, and thus continue to ensure that there will not be conflict, in the confidence that our efforts will one day bring about a truly lasting peace.

Best wishes to each of you and your families for a Merry Christmas and a happy holiday season and a successful New Year.

John Lehman, Secretary of the Navy.

Chaplain's corner

Our future is in His hands

By Chaplain Jay L. Hoppus
LT, CHC, USNR

"Don't worry about anything, but in all your prayers ask God for what you need, always asking Him with a thankful heart." (Phil 4:6 TEV)

Every day we need to renew this prayer of commitment to God's service. This Christmas season let us, through His strength, pledge ourselves anew to find what His will is for us, and ask for the strength to carry it out.

He does not bid us to bear the burdens of tomorrow, next week or next year. The long list of tomorrows will fade with the idea that the future is in His hands. What better place is there for it to be? Alcoholics Anonymous has a quaint, but nonetheless, successful quotation—"One Day at a Time." This hour and day is mine with its present duty; the next is God's, and when it comes with my faith in Him, His presence will come with it.

This is the true meaning of Christmas—God got with us.

Regional Nurse Coordinator to end 26 years of service

CAPT Alma Gomes

Captain Alma M. Gomes, Regional Nurse Coordinator here for more than two years, will begin terminal leave in mid-January in anticipation of a March 1 retirement after 26 years' service to the U. S. Navy.

Ceremonies will be held in the Commanding Officer's office on the morning of Jan. 14, to be followed by a Ecumenical Service in the Chapel of Hope, a reception in the conference room across from the Clinical Assembly, and subsequent "piping over" at

the hospital entrance.

The Navy nurse was born in Georgetown, British Guiana, South America. She came to the United States in 1948 and established residence in Berkeley. She earned her high school diploma from Oakland Evening High School, followed by graduation from St. Mary's School of Nursing in San Francisco, and a bachelor of science in nursing from the University of San Francisco.

She later earned a master's degree in human resource management from Pepperdine University, Los Angeles, and has been granted life time college teaching credentials in the State of California. She plans to teach after her Navy career has ended.

Captain Gomes worked as a civilian nurse at Alta Bates Hospital in Berkeley and as a Red Cross volunteer at Oak Knoll during the Korean War. She entered the Navy as an ensign in 1957.

Her first tour of duty was at the Naval Hospital, Camp Pendleton. Twelve other duty stations followed, including a tour on Adak, Alaska. While on Adak she taught two upper division courses in social psychology for the University of Alaska, including a continuing education course on death and dying for a group of registered nurses stationed on the island.

The captain makes her home in Foster City and considers California her home, with a sister and other relatives also living in this state.

Jan. 19 election

NRMC employees to vote on AFGE representation

Federal Labor Relations Authority (FLRA) representatives will be at NRMC Oakland Wednesday, Jan. 19, to supervise a secret ballot election under Title VII of the Civil Service Reform act of 1978.

The election will permit non-supervisory General Schedule (GS) employees other than firefighters to determine whether they wish the American Federation of Government Employees (AFGE) to represent them for purposes of exclusive recognition. Employees in professional positions have an additional option under the law to vote whether to be included in the unit.

Eligible employees will be included in exclusive representation by the union if a majority of the employees **who vote** choose to be included in the unit. Therefore, in order for the election to

represent your wishes fairly it is important to you to actively participate and vote "yes" or "no" for the union. If you do not vote, the outcome of the election will be determined by those who have taken the time to show that they care.

Management officials and supervisors, confidential employees, and employees engaged in personnel work in other than a purely clerical capacity are not eligible for inclusion in the unit.

An official notice of the election will be posted on bulletin boards.

The polling site will be in Conference Room 4-5-6 in Building 500. The polling site will be open from 6 to 9 a.m. and from 2 to 5 p.m. on Jan. 19, 1983. Eligible employees in outlying NRMC facilities will be given the opportunity to vote by mail ballot.

Advisory board meets with CO

The Civilian Employee Advisory Board met with the Commanding Officer on Nov. 16, with the meeting called to order by the Vice-Chairman, Betty Anderson. Seven representatives attended; six were absent.

Progress reports were made on orientation programs for new civilian employees, training and development, Employee of the Quarter Award, and board appointment letters.

Discussed under new business were:

- Special Rate Pay.
- Performance Evaluations.
- Grievance/Discrimination Procedures.
- NRMCO Instructions Affecting Employees.
- Vacancy Announcements.
- Contracting Out.
- Federal Women's Program.
- Advisory Board Member Replacement

A copy of the complete minutes for this meeting is posted on the Civilian Employees Bulletin Board on the bulkhead opposite the dining rooms on the third deck of the hospital. All civilian employees are encouraged to read them.

Guest editorial

What life is all about

(EDITOR'S NOTE: Through many years of experience, I have observed that when military members retire, almost without exception they talk about the occasion as a turning point in their lives. Most look forward to new civilian careers, some acknowledge a sense of insecurity, quite a few become nostalgic... and, unfortunately, a small percentage leave with bitterness because they feel they should have made more rapid advancement, or hold some grudge about a superior they encountered along the way. Captain Gomes, a very special Navy nurse who will begin terminal leave in mid-January, will retire soon after, had a different reply when we asked her the usual question about how she feels about leaving the service. The following are her thought-provoking comments and our guest editorial for this issue.)

By Captain Alma M. Gomes

"To everything there is a season and a time to every purpose under the heaven" (Eccles. 3:1)

And so the time has come for me to conclude this part of life's journey. I do so with a deep sense of gratitude for having had the privilege to serve my country, and in a "very special way," my fellow man.

Someone once wrote, and I accede to the philosophy, that: "Everyone is lonely at the bottom and cries out to be understood, but we can never entirely understand someone else, and each of us remains part stranger, even to those who love us. If the weak who are cruel; gentleness is to be expected only from the strong. Those who do not know fear are not really brave, for courage is the capacity to confront what can be imagined. You can understand people better if you look at them—no matter how old or impressive they may be—as if they are children. For most of us, we never mature; we simply grow taller. Happiness comes only when we push our brains and hearts to the farthest reaches of which we are capable. The purpose of life is to matter—to count, to stand for something—to have it make some difference that we lived at all."

I hope that I, in some small way, HAVE! For after all, that's what life is all about...

CFC donations exceed last year's total

The 1982 Combined Federal Campaign has ended with Naval Regional Medical Center, Oakland, surpassing last year's contribution.

The latest, although not necessarily final, report shows that 65 percent of all staff personnel participated with a collection of \$29,620. Last year, total donation from the command was \$29,200 from 54 percent of the staff.

Units, with keypersons listed, who reached 100 percent of participation were:

Legal, Wendy Gross; Education/Training/Administration, HM1 Claudia Abbott; Clinical Investigation Center, HM1 Howard Jones; Dental Service, CDR William Walker; Public Works Service, Joanne Payne; Ward 9 West, LTJG Karin E. Lundgren; Ophthalmology (doctors), LT Douglas Marx; Word Processing, Lucille Herrick; Internal Medicine (doctors), LCDR Robyn Tyler.

Also, Pediatrics (doctors), LCDR John Rowe; Surgeons, CAPT Robert Cave; Internal Medicine (residents), LCDR Paul Garst; Anesthesiology, Susan Stark; OPD Peds/OB-Gyn Clinic, Lenore Brady; OPD Surg/Int Med Clinic, LCDR Mary Petrosky; OPD Allergy/Adolescent Clinic, Charlotte Simonson; Food Service (one section), Mervin Shans; Pharmacy, HM3 Mary Smith; Ward 7 West, HA Scott Schwenkler, and Alcohol Rehabilitation Service, HM3 John Weaver.

The efforts of the following keypersons are also appreciated:

HM2 Arthur Auston, HMC Agustinito Cruz, David Lankford, John Pacely, SH2 Kathryn Bradford, LT Harvey Adkins, HM2 Martin Longhorn, Charles Johnson, LT Diane Workman, HM2 William Kerr, LCDR Basil Pugh, HM1 Linda Chamberlain, and Millie Lumley.

Also, Brian Dearnaley, HM2 Stephen Stroud, LT Deborah Sohl, LT Katharyne Johnson, LT Melanie Kaubisch, LT Eileen Grebb, HN Wade Madison, HA John Payne, HA Spivie Moore, LT Lynn Becknell, HM2 Shelly Tonge, LCDR John King and RP1 Roger Minks.

Also, HM3 Michele Brashier, PN2 Demetrio Suratos, Jr., HM2 Janice Reynolds, Sandra Harris, HM2 Patricia Jones, CAPT James Bethel, MM1 Kevin Garber, Vera Jones, HA Sandra

Brumby, Kenneth Wylie, Larry Henderson, Maurine Tinsley and HM Regina Robinson.

Also, LT Fred White, EN3 Elenamaria Steinhauer, HM3 Michael Duncan, Gary Louis, Lula Sander, HM3 Gary Griffin, HM2 Herbert Jones, Ann Maria Mullen, Dr. William Hayes, HM3 Margaret Cheeseman, HM2 Robert Wettlaufer, HM2 Stephen Carow, LCDR Thomas Tomzak, Sheree Thomas, Sam Barnett, LCDR Bielawski and LT Mary Schetter.

Nurse Corps LCDR Margaret I. Burns served as this year's CFC Chairman at Oak Knoll.

Naval Academy applications due

The deadline for applications from active duty Navy and Marine Corps enlisted personnel and drilling reservists who wish to attend the Naval Academy is Feb. 15. The Secretary of the Navy may appoint a total of 800 from each group every year.

Those selected can be no older than 22 on July 1 of the year in which they enter the academy. Applicants may be appointed directly to the academy or offered a billet at the Naval Academy Preparatory School (NAPS) Program. NAPS is an intensive one-year course of study which improves the applicant's chances of selection and success at the academy. While attendance at NAPS is not mandatory, a high percentage of enlisted members selected to attend the academy are drawn from the NAPS program every year.

Personnel applying for the program must be U. S. citizens between age 17 and 22, unmarried and without dependents, and have one year on active duty before July 1 of the entering year.

Application instructions are contained in OPNAV Instruction 1531.41 of Dec 30, 1981.

Red Cross has important role in aid to patients, families

By Pat Heaphy

DIRECTOR—Janet Wilson heads up the American Red Cross at Oak Knoll. She directs all activities on base and oversees more than 60 volunteers. The office is in Bldg. 71A and is open from 8 a.m. to 4:30 p.m., Monday through Friday. There is also a lounge in the same building which is open to all staff and patients of the command.

Two career personnel and more than 60 volunteers represent the American Red Cross at Naval Regional Medical Center, Oakland, where they work around-the-clock in support of patients, families and staff members.

The local organization is similar to those found on U.S. military bases around the world. Here, the agency is divided into four different areas:

• **Social Work.** Social workers provide counseling for personal and family problems; verify emergency leave, health and welfare reports; coordinate rapid communication to more than 1,500 other chapters worldwide; provide financial emergency assistance, and lend support to relatives of the seriously ill, as well as helping with other problems which arise from illness and hospitalization. Specially-trained staff members also counsel the ter-

minally ill, their families, women considering abortion, and families identified with child and/or spousal abuse.

• **Personal Service.** Most frequently seen around the hospital wards are the personal service workers. These Red Cross volunteers serve the inpatients by bringing little extras such as books, magazines and personal hygiene items to the bed-ridden. Their visits also bring friendship and cheer.

• **Clinic Volunteers.** Most of those working in this category have had prior hospital experience and are often retired hospital corpsmen or medical workers. They can be found doing an assortment of duties in the various clinics, and their contribution is invaluable in the smooth functioning of the medical center.

• **Recreation Volunteers.** These Red Cross representatives take ambulatory patients on field trips such as 49'ers games, celebrate birthdays with long-term inpatients, and teach arts and crafts on the wards.

In addition to the above services, the Red Cross offers patient education programs such as the ongoing Preparation for Parenthood course and pre-surgery classes.

"Volunteers are always needed at Oak Knoll," said Janet Wilson, Station Director at NRMCC Oakland. Miss Wilson said the volunteers are interviewed, trained and placed in many departments throughout the medical center. Men and women, 18 years of age or older, are welcome. Most of the volunteer activities do not require prior training, but if needed, the training will be accomplished in the using department. People with medical field expertise can, of course, both maintain their skills and make a significant contribution through volunteer service.

Those wishing more information may call 639-2525, or stop by the Red Cross lounge in Bldg. 71A between the hours of 8 a.m. to 4 p.m., Monday through Friday.

CLINIC VOLUNTEER—Mary Paternoster works in the OB/GYN Clinic every week, helping wherever she is needed. Many clinics in the hospital rely on Red Cross volunteers to lend a helping hand.

HOSPITAL ORIENTATION—Ardeth Klinchar gives hospital tours for new volunteers. Here she shows Mary Herlemen the newborn nursery in the 7th Deck.

HAND-CRAFTED—Many of those who donate their time to Red Cross projects are never seen here at the hospital. These are the people who do handy work in their homes and donate materials to the Red Cross to be distributed as needed. Doris Gibson, a long time Red Cross volunteer, covers Brian Martin with a hand-crocheted blanket for his use while hospitalized.

VOLUNTEER TO VOLUNTEER—Joanne Black (right) a volunteer caseworker spends a few minutes talking to Philameno Russo former Red Cross Secretary and presently a volunteer two days a month.

BLOOD BANK VOLUNTEER—"Pat" Paternoster, a retired Chief Hospital Corpsman, volunteers his services weekly to Laboratory Services. Mr. Paternoster is an expert in drawing blood according to patient LeRoy Engbert (right).

Red Cross volunteers--

(Continued from Page 5)

BOOKS AND MORE BOOKS—Irene Figroid delivers a TV guide to patient and Marine Corps Private First Class Troy Smith. Irene, who has worked as a Red Cross volunteer here for many years, is often seen visiting patients and pushing around a grocery cart filled with books, magazines and other articles of interest for the hospitalized.

BLOOD PRESSURE CHECK—Gary Brown, a retired Navy member, volunteers his services in the Primary Care Clinic one full day a week. He does check-ins and vital signs when the patients first arrive in the clinic.

Former Oak Knoll intern aids Indian crewmember

LT Konrad Hayashi, an intern from last year's class at NRMCO Oakland, recently rendered assistance to a crew member of the Indian merchant vessel "VISHVA NIDHI."

On Nov. 21, during a transit from Singapore to Diego Garcia, the Combat Stores Ship USS WHITE PLAINS (AFS 4) received a call for medical assistance from the "VISHVA NIDHI." A radio conversation proved unsuccessful in determining appropriate treatment for the severe stomach pains suffered by a crewmember so the WHITE PLAINS doctor, LT Haysahi, decided that an on-scene examination was required.

The two ships closed each other and

a motor whale boat with a medical team was dispatched to the merchant ship. After examining the 20-year-old Indian patient, Dr. Hayashi ruled out appendicitis, and found that the more severe symptoms had begun to subside. After a thorough examination, the WHITE PLAINS' doctor prescribed treatment, which led to continuing improvement in the patient's condition. VISHVA NIDHI's Master, CAPT K. P. Gopal Rao expressed gratitude to the medical team.

WHITE PLAINS, commanded by CAPT D.L. KERR, is homeported in Yokosuka, Japan, as part of the Navy's overseas family residency program.

Happy 'losers'

Weight loss program off to successful start

There has been almost overwhelming response to the behavioral weight reduction program initiated by staff psychologist LT John Brown and psychology intern Ms. LeeAnn Bartolini during the first week of November. The first group is already larger than originally planned and a waiting list was started less than two weeks after the program began.

Even more encouraging than the number of people wanting to enter the program is the low number of dropouts—only one to date—and the success of participants in losing weight. The first monthly "progress review" held Dec. 7 showed an average loss of exactly one pound per participant per week. Only one of the 15 participants failed to lose weight.

The program consists of weekly meetings in which group members are given suggestions for changing their eating and exercise habits to permit gradual weight loss and a healthier lifestyle. Increasing physical activity and exercise are stressed at every meeting. Other topics include dealing with emotional eating, reducing temptations to eat, breaking "conditioned" eating habits, and keeping obstacles to weight loss from becoming excuses for not losing weight. LT Faythe Weber, Dietician, periodically uses a group meeting to present nutritional information and often attends other sessions as a resource person. All group leaders discourage fad diets and recommend a balanced diet with moderately reduced caloric content combined with a more active, enjoyable lifestyle.

Participants attribute their weight loss to a variety of personal changes but are nearly unanimous in their enthusiasm for the group's assistance. For HM3 Kathy Stilwell, who has lost 12 pounds since her first group meeting, the biggest change has been an improvement in her self-image and a corresponding decrease in emotional eating. As she states, "I'm not there yet, but with the better understanding I have of myself and my eating habits I feel much more confident of success." Dr. Brown attributes much of the program's success to the motivation participants bring to the group and their weekly confrontation with the scales.

The hospital weight reduction program has already scheduled a second group to begin the first week in January and may start a third group if necessary. These groups and a planned monthly followup group will be a collaborative effort by Dr. Brown and LT Weber. According to Dr. Brown, the strong demand for assistance in losing weight stems partly from a recent OPNAV instruction concerning physical fitness and partly from an increasing awareness of the individual's role in maintaining his or her own medical health.

Priority for space in all weight reduction groups is given to active duty hospital staff, with next highest priority going to other active duty personnel and to authorized civilian hospital staff. Eligible beneficiaries living or working in Alameda may prefer to join groups starting in early January at the Counseling and Assistance Center (active duty) or the Alameda Branch Clinic (primarily dependents); Dr. Brown will help start both groups. A similar program run by psychologist LT Wayne Murphy will start another group soon at the Treasure Island Branch Clinic.

Goals of the NRMCO Oakland weight reduction program are to help all interested hospital staff get within the Navy's weight limits and, when possible, help other eligible overweight

beneficiaries improve their health by losing excess weight. LT Weber and LT Brown are currently collaborating on a nutrition and behavior change information packet for use by staff and patients unable to attend weekly group sessions. Everyone receiving the packet will be expected to arrange for supervised weekly "weigh-in" to monitor progress in losing excess weight.

Staff and patients interested in losing weight are encouraged to call 218 or 2494 for further information. Anyone interested in contributing to the weight control program or interested in developing skills in helping others lose weight are also encouraged to call on any of these numbers.

Classes to train BLS instructors

More instructors must be trained in Basic Life Support (formerly Cardiopulmonary Resuscitation) to meet the requirement that all Medical Corps officers of this command become BLS certified.

To meet the demand, Staff Education and Training Service has developed a special 16-hour BLS Instructor Course, to be held on Monday and Tuesday, Jan. 10-11, from 8 a.m. to 4:30 p.m. on 6 South. Participants must register by Jan. 4 with HM1 Thomas at Ext. 2003.

Pre-requisites for course attendance:

- Have a current BLS provider card
- Desire to teach
- Be able to instruct two classes each year.

Drug abuse survey final results reported

The Navy's drug control initiatives have been a key factor in the significant decline of marijuana use among the Navy's E-1 to E-5 population, according to a report from the research firm of Booz, Allen and Hamilton, Inc. The report presents final results of the Navy's random urinalysis tests conducted in Norfolk, Va. and San Diego, Calif. on Aug. 30.

Statistical analysis of the results indicates that a reduction in drug use of more than 50 percent has occurred during the two-year period since their last major survey in 1980.

While these results are significant and welcome, the strong drug control program initiated in 1981 will continue in order to further reduce levels of drug abuse. The Navy policy remains "zero tolerance."

Your CFC Contributions Will Help Millions of People Live a Healthier Life. Thank You.

Moffett Clinic—only Navy treatment facility in South Bay

Ken Davenport takes inventory in the well-stocked Pharmacy. In the background is another clinic staff member, HMC Gile Rubio.

HM3 Daniel Grady loads a syringe in the Urgent Care Clinic.

HM3 Lori Hill annotates records in the Urgent Care Clinic.

HM3 Sterling McCullough checks an X-ray.

One of Naval Regional Medical Center Oakland's larger branch clinics is located aboard Naval Air Station, Moffett Field, home of the Commander, Patrol Wing Pacific Fleet. The air station was commissioned in 1933 to serve as a base for dirigibles.

A clinic staff of 120 officers, enlisted and civilian personnel provides health care to approximately 8,000 active duty personnel and more than 130,000 active duty dependents, retired personnel and their dependents.

Outpatient care, optometry, preventive medicine and occupational health services are offered. Additionally, specialty care is provided by eight services of the Oakland Navy Medical Center.

Monthly workload averages 10,000 outpatient visits, 12,000 laboratory tests, 15,000 prescriptions, and 1,200 x-rays.

HM3 Gerald Nelson assists CDR Hong Sohn in minor surgery.

LT Mark Fantauzzi examines a patient in the Eye Clinic.

HM3 Linda Flores performs on-the-job training in the clinic lab.

Also a laboratory worker is HM1 Val Mapalo.

ASSISTANCE VISIT—The Honorable Joseph K. Taussig, Jr., (center), Deputy Assistant Secretary of the Navy for Civilian Personnel Policy and Equal Employment Opportunity, visited Naval Regional Medical Center, Oakland on Dec. 10. While here he conferred with Rear Admiral Robert C. Elliott, Commanding Officer, and Weldon Miles, Deputy Equal Employment Opportunity Officer. Secretary Taussig presented the keynote address at a memorial ceremony aboard USS ARIZONA in Pearl Harbor on Dec. 7. He was an ensign aboard the battleship NEVADA in 1941, and lost a leg in the attack. He remained in the Navy despite his injuries, retiring as a captain. He was a patient at Oak Knoll for a short time in 1950.

Pay changes due for retired military

Retired military people working for Uncle Sam will find reductions in their civilian paychecks soon, according to new laws. Here are some of the changes in civil service retirement programs according to Public Laws 97-248 and 97-253.

Military retirees in federal civil service will have their pay reduced by the same dollar amount their retired military pay is increased by the cost-of-living adjustment in fiscal years 1983, 1984 and 1985. There are no changes to pay of employees whose retired pay is based on wartime, service-connected disabilities.

Credit for military service also has been revised. Military service was credited to civil service annuities at one time, but the annuity was recomputed when the retiree reached age 62 to exclude credit for military service after 1956 for those eligible for Social Security benefits. Now, people hired before Oct. 1, 1982, will have the option of continuing under the previous laws' provisions—recomputing their annuity at age 62—or making a deposit equal to seven percent of any basic military pay received after 1956 and not having their civil service annuity reduced.

People with military service who are hired by the government on or after Oct. 1, 1982, no longer will have their

annuities recomputed at age 62. Instead, they will get civil service retirement credit for post-1956 military service only if they deposit a sum equal to seven percent of basic military pay received after 1956. Interest will not be charged on deposits made during the first two years of civil service employment.

After Oct. 1, 1982, retirement pay of current annuitants with previous military service will be reduced at age 62 by a fraction of their Social Security benefit. The reduction can be computed by dividing total military wages subject to Social Security deductions by total lifetime wages, including military wages subject to Social Security deductions. Civil service employees whose only Social Security-covered employment was while in the military will have the civil service annuity reduced at age 62 by the amount of the Social Security benefit they are eligible for at age 62. The reduction will not be greater than the reduction required by the old law. The new formula includes annuity payments to those who reached age 62 previously and have had their annuities recomputed.

Regulations, pay tables and instructions are expected soon from the Office of Personnel Management. (NES)

Working in the well-equipped Dental Prosthetics Lab of the Moffett Clinic are DTC Takazhi Akizuki (background) and DT3 Rene Jaime.

CHAMPUS hospital care determined by zip codes

As of Jan. 1, the zones around military hospitals within which military families must get nonavailability statements for non-emergency inpatient care in civilian hospitals will be determined by zip codes.

CHAMPUS claims for non-emergency care obtained after Jan. 1 for families within the new zones may be denied unless a nonavailability statement is included. Families on the periphery of the former zones—that is, those who live approximately 35-60 miles from military hospitals—should check with the local military hospital to find out if their homes fall within the new boundaries. Families closer than 35 miles should assume that the non-availability statement requirement applies to them. Previously, the requirements applied only to families living within a rough 40-mile radius of a military hospital.

The action by the Defense Department is intended to contain costs without cutting the medical benefits available to service families. Skyrocketing

health care costs in the civilian sector have forced expanded use of existing military medical facilities. Using military hospitals and clinics, instead of CHAMPUS, saves money for service families and for the government.

Currently, more than 55 percent of CHAMPUS inpatient dollars go for families who live near military hospitals. By returning CHAMPUS to its intended role as a supplement to the military hospital system, CHAMPUS benefits can be preserved. This is especially important for families who live too far away to use military hospitals. As it is, these families pay more for their health benefits because the cost-sharing CHAMPUS program is their only option.

CHAMPUS—the Civilian Health and Medical Program of the Uniformed Services—shares the cost of care at civilian medical facilities for active-duty families, retirees and their families, and survivors, when military hospitals are unable, or too far away, to provide the needed care.

CHAMPUS targets claims fraud

The battle against claims fraud is in high gear.

Planting itself squarely in the path of those who would raid the pockets of taxpayers by filing fraudulent claims, CHAMPUS headquarters created the Office of Program Integrity last year. Its purpose has been to work with CHAMPUS claims processors and with investigative units in detecting cases of possible fraud and abuse in the CHAMPUS program.

In late news from the "front:"

A former employee of a San Diego psychiatrist will be sentenced in December for her admitted falsification of CHAMPUS claims over a seven-year period beginning in 1973. She confessed to having received a total of \$26,000. The woman faces a possible sentence of five years in prison and a \$10,000 fine. Prosecution of the employee came after a year-long investigation by CHAMPUS and the Defense Department's Criminal Investigative Service (DCIS).

An employee of a San Diego based insurance firm has plead guilty to one count of theft of government property, in the filing of false claims with CHAMPUS. She was charged with embezzlement of \$1,800 between January 1981 and August 1982 by filing 45 false CHAMPUS claims for medical

services. Information obtained from the insurance company was provided by CHAMPUS to DCIS, resulting in the woman being taken into custody. She was sentenced in federal court to 18 months' probation, and was ordered to repay the \$1,800 to the government.

An appeal of a criminal conviction has been denied for four California doctors who were convicted last year of mail fraud, conspiracy and filing false claims against the government. The physicians, who operated a marriage and family counseling center, got CHAMPUS-eligible patients to sign blank CHAMPUS claim forms. They subsequently submitted claims to CHAMPUS for services not performed and for services performed by providers of care who were not authorized to receive CHAMPUS payment for their services. Following their conviction, the four physicians were terminated as authorized providers of care under CHAMPUS for a period of five years.

Since the formation of the CHAMPUS Office of Program Integrity, more than \$250,000 has been recouped through aggressive pursuit of cases of fraud or abuse. In addition, the Office of Program Integrity is presently pursuing cases of probable fraud or abuse involving nearly \$395,000 in claims.

Travel agency contracts tested

DoD travelers at the U. S. Army's Tank Automotive Command (TACOM) in Warren, Mich., began this fall to get their tickets and reservations through a civilian travel agency.

In a move to cut travel costs, the Department of Defense selected TACOM as the first of three sites for testing contracts under which civilian travel agencies would provide comprehensive travel services to personnel on Defense travel orders. Personnel at the two other sites, Travis Air Force Base, Calif., and the Marine Corps Base at Quantico, Va., will soon do their traveling under the new program.

The "one stop-shopping" plan, already in use by corporations, covers ticket reservations and deliveries, car rentals, hotel reservations and printed travel itineraries.

According to the Military Traffic Management Command, the government will pay lower prices to carriers, car rental agencies and motel/hotel

operators. A contractor performing this service would be paid by commission and defrayed operating costs.

Drug Screening needs applicants

Applications will be accepted until further notice for Medical Technician (Chemistry) GS-5 positions in Drug Screening.

All qualified applicants in the San Francisco Bay Area will be considered.

Two years of general, and one year of specialized experience is required. Successful completion of all the requirements for a bachelor's degree (with major study in a field appropriate to the specialization) in an accredited college or university may be substituted for three years of experience.

For further information, call Maunne Tinsley, Civilian Personnel Service, (415) 639-2116.

Comings and Goings -----

CDR Newell retires Dec. 31

CDR Richard L. Newell

Commander Richard L. Newell, 45, Chairman, Department of Optometry, will retire from the Navy on Dec. 31 after 20 years' service.

"My naval career has been very enjoyable and rewarding," he told us. "I have achieved the goals that I set for myself and have made many very good friends. . . It is time, however, to embark on a new career and to meet new challenges. I am confident that my naval experience will aid me. . . I extend my heartfelt thanks to those who have supported and assisted me along the way."

The son of Gracie and the late Rex Newell of Twin Falls, Idaho, considers Glens Ferry in the same state as his hometown. He is a graduate of the University of Idaho, Pacific University and Tulane University, and holds a bachelor of science, doctor of optometry, and a master's in public health. Service schools completed during his career have been the Naval School of Health Sciences, Bethesda; Naval Ordnance Systems Command Safety School at Indiana University, and the Field Medical Service School at Camp Pendleton, Calif.

Dr. Newell has been assigned to Oak Knoll for two years. In his previous billet he was Specialty Advisor for Optome-

try in the Bureau of Medicine and Surgery. He first served in the Air Force, 1962-65, then transferred to the Navy. Naval duty has been in San Diego, Vietnam, Yorktown, Va., and El Toro, Calif.

The optometrist and his wife, the former Theresa Kelley, make their home in Alameda. He is also the father of Jodi, Erick and Christopher Newell.

Time to report 1982 history

The annual Command History Report is due at higher headquarters shortly after the first of the year. It is prepared by the Public Affairs Office at Naval Regional Medical Center Oakland.

So that the report becomes more comprehensive, chiefs of service have been requested to review changes that have occurred within their respective departments during Calendar Year 1982 and submit feeder information to the PAO no later than Jan. 21.

Significant changes involving mission, key personnel, major equipment acquisition, renovations, organizational restructuring or physical relocations should be reported.

In-depth submissions will go forward as narrative enclosures to the report and should be in appropriate final form.

HM3 Ernest Bester to Lowry AFB, Colo.

Hospital Corpsman First Class Chris L. Whitehead

Hospital Corpsman Third Class Shelley Tonge

Memorial services for CDR Millard

Memorial services were held in St. Luke's Chapel at Oak Knoll on Dec. 8 for retired Navy Medical Service Corps Commander Matthew Joseph Millard, 75, who died at Naval Regional Medical Center, Oakland, Dec. 5 after a lengthy illness.

Commander Millard, in his second tour of duty here, served as Administrative Officer for Naval Hospital, Oakland from 1953 to his time of retirement in 1957. In an earlier tour, 1947-49, he held the position of Finance Officer. He served 30 years in the U. S. Navy.

He is survived by his wife Vivian, two sons, Raymond and Ronald, and six grandchildren.

The Millard home has been San Leandro for the past 25 years.

Scholarship application available from auxiliary

The Naval Regional Medical Center Officers' Auxiliary has applications available to any needy military dependent for college scholarships for the 1983-84 school year.

These applications must be returned by March 31, 1983. For more information, or an application, call Roseann Tedesco at 982-3641.

The following new additions to the Navy medical "family" have arrived at Naval Regional Medical Center, Oakland:

A baby girl to Lieutenant Commander Ernest J. Uffers, Branch Clinic Mare Island, and his wife Julie on Dec. 2.

A baby girl to Hospital Corpsman First Class Thomas D. Kimbley, USS HECTOR (AR-7), and his wife Kathleen, Dec. 3.

A baby boy to Hospital Corpsman Second Class Randolph Terracino Branch Clinic Moffett Field, and his wife Pixie on Dec. 6.

A baby girl to Hospital Corpsman Third Class Lora Lee Puckett, Branch Clinic Mare Island, and her husband Joelle on Dec. 12.

BEST DICTATOR—LCDR Darrel A. Baker, oral surgeon with Dental Service, receives the Dictator of the Month Award from Betty Raab, head of the Word Processing Branch. He was cited by branch employees for excellence in dictation.

"Fair winds and following seas" to the following personnel who have recently departed this command:

HM1 Nestor Feliciano to USS NEW ORLEANS (LPH 11).

HM1 Robert A. Gurney to NAS Glenview.

HM1 Michael Roach to FMSS Camp Pendleton, Calif.

HM1 Aurelio Picart to 3rd Marine Division.

HN Anthony Dunlap to NSHS, San Diego, Calif.

HA Barbara Miller to Branch Medical Clinic, Key West, Fla.

HM3 Vicki Welch to NRMCLong Beach, Calif.

HM2 Valarie Young to NSHS, Bethesda, Md.

HMC Alfonso Esporo to NRMCGuam.

HM3 Cheryl Proctor to NSHS, Bethesda, Md.

HM2 William Lough, released from active duty.

HM2 Leonard Woods, released from active duty.

HN Thomas Fields to Field Medical Service School, Camp Pendleton.

HM3 Martin Blanko to NRMCPortsmouth, Va.

MACS Edward Sharp to the USS MANAKEA.

HN Christian Fowler, to NRMCL Charleston, S.C.

HN Paula Dozitsky to NRMCL Jacksonville, Fla.

HN Julie Dryer to NRMCPortsmouth, Va.

HM3 Kathie Kluckey to NNMC, Bethesda, Md.

HM3 Timothy Cotton to 3rd FSSG, FMFPAC Okinawa, Japan.

HA Edward Vranian to NNMC, Bethesda, Md.

HA Mark Netherton to NRMCL Charleston, S.C.

HM3 Jon Bangs to NRMCL Camp Lejeune, N.C.

HM3 Garth Renaud to NNMC, Bethesda.

HM3 Blaiss Fossum to Naval Hospital, Guantanamo Bay, Cuba.

HM2 Arturo Banaag to 3rd Marine Division, FMFPAC.

HM2 Michael Duram to NRMCL Subic Bay, P.I.

HM3 Pamela Smith to NRMCL Camp Pendleton.

HM2 Mark Sejeck to USS L.Y. SPEAR (AS-36).

HM2 Lowell VanEtten to NRMCL Great Lakes, Ill.

HM3 Lee Tandus to Naval Hospital, Daufort, S.C.

HM2 Joseph Sheltry to Naval Hospital, Whidbey Island, Wash.

HM3 Kevin Smith to FSSG, FMFPAC.

HM2 Daniel Shulla to 2nd Marine Air Wing, FMFLANT.

HM3 Deborah Schafer to NRMCLong Beach.

HM3 Anthony Pridemore to Naval Aerospace Medical Center.

HM2 Scott Bowden to Sasebo Branch Clinic, Japan.

HM1 Paul Conlin to NNMC, Bethesda.

HM2 Mitchell McNair to the USS ITTY HAWK (CV-63).

HM3 David Killingsworth to NRMCL Subic Bay.

HM3 Paul Jackson to NRMCL Camp Pendleton.

HM3 Thomas Petrilak to NRMCL Quantico, Va.

HM3 Julie Ullrich to NRMCL Orlando, Fla.

HM3 Terrell Perkins to Ballston Spa Branch Clinic.

HN Donald Rose to USS ALAMAZOO.

HM3 Peter Camillo to USS KANSAS CITY.

HM3 Donnie Bracley to USS VIRGINIA.

HM3 Bertha Williams to Branch Clinic Treasure Island.

HMC Jackson to retire Dec. 31

Chief Hospital Corpsman David R. Jackson will wind up a 20-year Navy career on Dec. 31 when he is "piped over" in the traditional manner.

"I'll be ending one career, but beginning a new one (as a civilian) by simply changing compass course and bearing," he said, adding that "I've been everywhere I wanted to go and done everything I wanted to do in the service, and I feel I am leaving the Navy in good hands."

The leading chief petty officer of Nursing Service has been stationed at Naval Regional Medical Center, Oakland, for two-and-a-half years. Other duty has included service aboard the USS FORT FISHER (LSD-40) as Senior Medical Department Representative, with the Third Marine Division, and at the U. S. Naval Hospital, Taipei, Taiwan.

Chief Jackson received the second Semi-Annual Leadership Award given by Naval Regional Medical Center, Oakland, early this year for excellence in supervision of the 175 Hospital Corps personnel assigned to Nursing Service, and in his additional role as Assistant Operations Officer of the Mobile Medical Augmentation Teams Program.

Other awards earned over the years are the Naval Commendation and Navy Achievement Medals, the Battle Efficiency, and four Good Conduct awards.

HMC David Jackson

He has attended George Washington University and completed Independent Duty, ENT Technician and Field Medical Service Schools.

Chief Jackson will continue to make his home in Fremont after retirement with his wife Shung-Chou and daughter Mei-Ling.

He is the son of Mr. and Mrs. David R. Jackson of Greensboro, N.C.

FRA announces contest theme for annual patriotic competition

The Fleet Reserve Association (FRA) has announced that the theme of its 1983 Americanism Essay Contest is "What the Bill of Rights Means to Me."

All students in grades seven through 12 are encouraged to enter before the March 1, 1983 deadline. Entries may be mailed to Harold R. McNichol, FRA Branch 10, 16193 Via Del Robles, San Lorenzo, Calif. 94580.

Entries must be legibly written, printed, or typed, using one side of the paper, and not more than 300 words in length. Judging will center on originality and sincerity.

All entries become the property of FRA and only one entry per student per year is permitted. Each submission must be accompanied by a separate sheet of paper attached with the

following information: Name, address, zip code, telephone number of entrant; name of school and grade level; Social Security number of student, or name and Social Security number of parent or guardian; name of FRA member, or the number of the branch sponsoring (if no particular sponsor, use FRA Branch 10).

Any further questions may be referred to Hal or Sandy McNichol at 276-6080.

Awards will be made locally, and at region and national level, with the Grand National Winner receiving a \$1,000 U. S. Savings Bond and a plaque.

National winners will be announced at the FRA National Convention in Washington, D.C. in September 1983.

Child safety law effective Jan. 1

Motor vehicle accidents are the leading cause of death in children of all ages. Using crash-tested safety seats or seatbelts consistently is the single most important step parents can take to protect their children's health and safety.

Crash-tested safety seats can reduce the possibility of death by 85 percent, serious injury by 70 percent. Child safety seats can also prevent accidents since active children restrained in seats or belts are less likely to distract the driver.

A new California Law, SB 567, goes into effect Jan. 1, 1983. This legislation requires every parent (or responsible adult, if parent is not present) to provide an approved child restraint system for each child passenger under 40 pounds or four years of age.

CNO addresses compensation issue

"We have to watch the fair treatment of our people," Chief of Naval Operations Admiral James D. Watkins told a recent conference of naval officers.

Citing the past two years' compensation action, which he said "compensated for years of past neglect," Admiral Watkins promised to work to prevent future erosion of those gains by pay caps or cuts in proficiency, special pay or reenlistment bonus funds. "Those kinds of cuts would mean five or six thousand petty officers less in our career force next year," he said. "I think it would be criminal to do that when we are just beginning to come out of the mess we were in during the latter part of the '70s."

Vice Admiral Lando W. Zech, Jr., Chief of Naval Personnel, explained in support of the position that, "recent personnel actions taken by the Navy which extended promotion dates and may extend overseas tours were forced by pending Congressional reductions of the Navy personnel budget. If these actions were not taken now, far more severe measures would have to be taken later in the year. We will continue

A series of 20-minute briefings for interested staff and outpatients will be presented in the Radiology/Orthopedic area of the hospital on Dec. 29 and 30 from 8 a.m. to noon each day. "Be informed—not fined" is the theme of the briefings.

Several models of approved safety seats are available at the Navy Exchange. The Navy Relief Society Thrift Shop in Bldg. 101 at Alameda has used seats for sale, but before purchasing these used seats, make sure that they have been dynamical crash-tested.

Further information on choosing safety devices for children may be obtained from Hospital Corpsman First Class Claudia Abbott, Staff Education and Training Service, Ext. 2003/2110 or the Pediatric Clinic, Ext. 2374.

to fight for restoration of personnel funds, which are vital to the welfare of our Navy men and women."

Statistics show that equitable personnel compensation has a strong positive effect. Following implementation of the October 1981 pay measures and benefits package, retention at all levels shot up, naval aviation shortfalls were reduced, 1982 nuclear officer recruiting easily surpassed the previous best year (1980) and, largely as a result of meaningful sea pay, the fleet petty officer manning picture improved significantly.

"We have now the highest retention of both of our first-term and second term," Admiral Watkins pointed out. "A lower UA rate, a lower desertion rate, drugs cut in half—all the vital signs are good."

The CNO sees a positive sign in the resurgence of public sentiment for an effective defense. "We have strong Navy support in this country, stronger than I have ever seen before," he said. "We have a responsibility to ensure that our people in the Navy understand how well they're thought of in the national scheme of things."

DoD wants to hear about voting problems

If you had a problem voting absentee this year, Defense voting officials want to know about it.

As the 1982 elections drew to a close, some absentee voters may have received their ballots too late to vote and return them to their voting districts in time to be counted. Some may not have received their ballots at all.

Such problems, which may deprive eligible absentee voters of the right to vote, are the focal point of a survey by the Federal Voting Assistance Program (FVAP), the office responsible for managing absentee voting assistance for military personnel and U. S. citizens living abroad.

The survey includes voting assistance officers and counselors and local election officials who will be asked to identify the most frequently occurring problems in the absentee voting process. Local election officials will be asked to provide information regarding the mailings and processing of Federal Post Card Application forms and absentee ballots.

A similar survey of election officials and voting officers following the 1980 elections provide considerable information which helped improve the system. On the positive side it reflected increases in the frequency of voting as compared to the 1976 presidential election but the problem of late receipt of ballots remained.

The 1980 study showed some local election offices mailing their absentee ballots too late for the voter to execute

the ballot, get it notarized and mail it in time to be in the polling place on or before election day.

Voting officials urge all absentee voters to quickly vote the ballot and return it, even if the voter feels it won't arrive in time to be counted. Court action could be taken which would direct the counting of ballots received past the normal deadline. The voting assistance office has required counting of late absentee ballots twice in New York State, Florida, and Santa Clara County, Calif.

If you encountered a problem voting absentee in the 1982 elections, contact your voting officer or counselor, or write about it to Director, Federal Voting Assistance Program, 18457, Pentagon, Washington, DC 20301.

BRINGING HOLIDAY CHEER—These Christmas Carolers from the Zion Lutheran Church in Piedmont entertained patients and staff on Dec. 11. Note that one of the singers wore a lighted Advent wreath in her hair.

Only certified mechanics at NEXs

All newly employed mechanics hired to work at continental U.S. Navy Exchange automobile service centers must complete the National Institute for Automotive Service Excellence certification program as a condition of continued employment.

The aims of this 1980 policy are to employ qualified mechanics, increase service bay productivity and increase the professionalism of NEX mechanics.

Newly hired mechanics must either have NIASE certification or become certified in the auto repair services offered by the exchanges. Mechanics are required to take the NIASE test within six months after employment. Navy Exchanges pay for the test registration.

"Grandfathered" mechanics, who were hired before the program began, do not have to take the test. However, exchanges encourage them to participate in the program to enhance their opportunities for promotion. "Grandfathered" and NIASE-certified mechanics are eligible for additional exchange funded training courses offered through major automobile and auto equipment manufacturers.

The NIASE program tests mechanics in eight areas of auto repair and also in body repair, painting and refinishing. The tests cover basic technical repair and diagnostic knowledge as well as skill.

Mechanics enrolled in the NIASE program are tested on their specialty aspects such as engine performance, brakes or electrical systems. Mechanics who pass their specialty test will receive certification in that particular auto service area. To be certified as a general automobile mechanic, they must pass all eight tests in the series.

NIASE certification is valid for five years.

The goal of NEXs is to have all automotive service centers staffed by certified mechanics. The required training guarantees that customers' cars receive detailed attention from highly trained professionals, thereby providing quality service. (NES)

Take a 'chop' on this...

By LT M.L. Thurwanger

All too frequently the message or report that has required hours to complete is held up while we wait for one more "chop." Few of us realize that the origin of the "chop" predates our Navy and all the red tape that goes with it.

For centuries the Chinese have used a device called a chop to affix their signature to letters, official documents and even paintings. Usually made of wood, plastic, ivory or stone, the chop carries the name of the individual in Chinese characters surrounded by a small square or circle. To personalize the signature and discourage forgeries, most owners include a flaw or imperfection which only they will recognize. The chop is carried in a small case with a supply of waxy red ink. The chop is pressed into the ink and then pressed on the surface to be signed.

Still used today, a chop is often the preferred method for endorsing a check in some areas of China. Well-known examples of Chinese art frequently sport hundreds of these chops indicating the approval of art critics of the period. (NES)

Christmas Menu

NAVAL REGIONAL MEDICAL CENTER
Oakland, California

Whatever became of old. . . ?

Want to contact a retired servicemember, a former shipmate or someone you served with in years past?

Many active duty and retired servicemembers would like to renew acquaintances with other military members, including those retired, but have lost track of their whereabouts.

The Privacy Act of 1974 normally prevents the military departments from releasing current addresses; however, each service operates a locator service which will forward your correspondence.

Here's how to do it. On one envelope, in which you have included your message or greeting, write the name and grade of the person you are trying to find. In the upper left corner put your return address. Place a stamp in the upper right. Insert this envelope in another stamped envelope addressed to the locator service.

Include your return address on this envelope, too.

Because there are so many people with identical names, accuracy of spelling and completeness of name is vital. It also is a good idea to send the locator service a data sheet, in the "outside" envelope, listing what you know about your friend's service background, duty stations, schooling, dates, etc. This will help the locators to track the individual down faster.

Send your correspondence:
Army: HQDA-DAAG-PSR, Alexandria, VA 22331
Navy: USN (NMPC-641E), Washington, DC 20370
Air Force: AFMPC/DOO3, Randolph AFB, TX 78150
Marine Corps: HQ USMC (MSRB-13), Washington, DC 20380
Coast Guard: HQ USCG (G-PS-1), Washington, DC 20593

Any wrestling, boxing interest?

Tahoe trip planned for February fun

Is anyone interested in forming a boxing team at Naval Regional Medical Center, Oakland?

If so, contact Ron Brown at Ext. 2350 or HN Juan Escudero at Ext. 2234.

Wrestling matches begin in January. Anyone interested in participating should see Ron Brown in Special Services or give him a call at Ext. 2350.

We're headin' for the hills again!

A deluxe motorcoach will pick up passengers at Oak Knoll at 6 p.m., Friday, Feb. 11, and return them at approximately 6 p.m., Sunday, Feb. 13.

The group will be staying at the Elm Inn at South Lake Tahoe, just a half block from Harrah's and all the restaurant and club action. For those who would rather ski than gamble (or perhaps ski by day and gamble by night), a shuttle bus will be available to both Heavenly Valley and Kirkwood Meadows.

The package is \$68 per person (double occupancy), but Harvey's Hotel and Casino will refund \$17 back in cash on Saturday, and Sahara Tahoe will give each participant \$5 more in cash, plus \$2 in food coupons and two free drinks on Sunday.

Country western fans will be happy to hear that Mac Davis will be playing at Harrah's that weekend.

Space is limited on this trip, so stop in now to reserve with Sally at Special Services Office, Bldg. 38, Room 216, or call her on 639-2479 for additional information.

A deposit of \$10 per person will hold your space until the trip signup deadline of Jan. 17.
